Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on water on earth is happening we are ending slavery one mind at a time thanks for tuning in today we have a great show lined up for you here today today is Sunday May 5th 2019 this is episode number 208 and today's show is going to be a call-in show that's going to act as a follow-up from last week's show the topic of which was least harm possible plant-based nutrition vs. carnism revisited so we're gonna be taking your calls almost the entire show I do have a couple of quick things that I want to wrap up on because we sort of like you know didn't really beat the clock last week we ran out of time during my last couple of slides and I just want to go over a couple of things that were left out of the show last week very briefly at the beginning of today's show and then we're going to be taking your calls on discord for the duration of the show today you can get the link for the discord calling on the what on earth is happening live show page at what on earth is happening dot-com slash show so that's the show for today coming up now I want to just do a very brief housekeeping I am still looking for a video editor live here in house we have a couple of editors that we work with but they're remote and I would like to do some projects that require a video editor being here on site working with me in real time so if you have skills particularly with Final Cut Pro and you live in the Philadelphia area or you're within a short travel distance to my home in South Philly please get in touch with my assistant Leah Boone at Leah at what on earth is happening calm and she's gonna ask for examples of your video editing work and you know if you're interested in helping out on a volunteer basis with what on earth is happening so that's le IH a at what on earth is happening calm and my assistants name is Lea Boone so please get in touch with her if you're interested in being a video editor here on site at what on earth is happening headquarters that's really all the housekeeping that I have for today so I'm gonna get ready to jump into the show just give me one moment so last week's show went pretty well and I've gotten a lot of very good feedback on the show there has also been a lot there has not been a lot but there's also been some negative feedback and I expect that as well because I don't expect everybody to understand the totality of you know what I covered I'm just getting my slides together folks just bear with me one second so you know I will take anybody's call today it won't i will not really um you know discriminate if you want to disagree okay so there's you know nothing that's going to be forbidden but I am gonna if people do disagree with what I talked about regarding the morality of the topic of veganism versus carnism are just in general plant a plant-based diet versus carnism I am going to ask for I am going to ask certain questions of individuals who disagree and I want them to answer those questions first before they make their points because I'm gonna kind of hold people's feet to the fire you know regarding you know what their beliefs are on this topic okay so that being said I think we could jump into the slides for today and go over to the to this computer slides so this is the artwork that Brett came up with for today's show again it's a call-in show and I want to let everybody know even before I go to the calls I'm going to do a few slides and then go to the calls but I want to let everybody know too if you're if you are call via the discord chatroom do not listen to the live stream the live stream will be delayed by often several seconds possibly even up up to 20 or 30 seconds depending on your internet connection speed okay so you don't want to be listening to the live stream or watching the live stream you should only be listening to me in the discord chat room if you are planning on calling in because that's where the real-time voice interaction will be taking place if you're watching on the live stream I will probably call on you and you will it will be delayed and you will miss me calling on you to go live because as soon as I call on you you should jump in you know with your question or comment okay so I'll go over those uh you know technical things in a moment but let's jump into the last few slides that I really wanted to cover from last week one of them which I didn't even really have a slide for but I wanted to mention so last week you know we got into all of the aspects the moral aspects of a plant-based diet versus a meat eating diet and I talked about all of the aspects regarding natural law and morality that have to do with making the decision about how a human being should eat and how we should view the eating of animals in a in an immoral capacity if we're being honest with ourselves I covered all with that and then I got into some of the positive aspects of just general nutrition okay like what I think people really should be doing and the things that they should be looking into and this is something that I left out okay I left out talking about the importance of iodine in the human diet as a supplement okay iodine is not something that the body produces but it's something that's very very important for the regulation of a thorough health okay so sorry about that folks I just I just took care of that my laptop power cord was up plugged into the wrong jack so sorry about that but I wanted to let people know about a form of iodine that we all really should be taking as a supplement okay on a daily basis and I've been taking this for several years every single day of my life without missing a day okay as a total regimen as something that I have habituated as a regimen every single morning when I wake up I take nee-san iodine okay now nascent iodine is an unbound atomic form of iodine that really has been removed from anything that once even contained it like certain types of sea salt okay now you have processed salts where the iodine is actually removed okay and this they've done this deliberately they've taken it out because they know how beneficial this is not only for the thought the health of the thyroid which it very much helps to regulate and the thyroid have regulates so many other functions of the body that really being deficient in iodine as an actual health issue can become a detrimental health issue so arm this is something that I will highly recommend it's something that I've been doing this is the the proper way to get it into your body is by taking the atomic form the unbound atomic form of it and not a polluted form of the iodine so there's many different forms of nascent iodine on the market you can research that look on any of your favorite health sites or or anywhere any shopping sites that you want to check out and you can often find really great deals on them so um you know do your research and I'll purchase something that you feel is a quality product and I'll take it every day you know because it really has made a tremendous difference in my personal health and I highly recommend it it's something that shouldn't be overlooked I mean this is like something isn't to me that is as important as juicing and blending in your daily regimen you know fruit juices vegetable juices you know and blending you know making healthy smoothies you know often you could even add protein powder to smoothies that's what I basically do I'll make fruit smoothies with added protein powder in them or you know even green smoothies you know with spinach or kale or celery I mean that that's the way to do it with a high-powered juicer or blender now I would say nascent iodine is right up there with importance and it's also right up there with things that people lack and don't do they don't supplement their diet properly they don't take the right supplements they don't take you know the right things that when you add it to a healthy whole plant-based diet Whole Foods plant-based diet based in nature as undiluted and unpolluted as possible straight from the earth if you don't supplement with iodine you're making a huge mistake it's as big of a mistake as not doing fruit and vegetable juicing and blending okay so that's what I wanted to say regarding nascent iodine I also wanted like I talked last week about like all of these health fads and these diet fads you know these um you know fad diets and crazes that that you see pop up and how people will follow them because they don't really have the information that they need they haven't really done the research and the homework and then they're like so you know craving to look for something that some some expert knows about that is you know gonna help them and gonna improve their health or change their body type you know or make them feel energetic again and it's so simple none of these fad diets like I wanted to talk about like I did talk about like the keto diet and you know the the Paleo diet one thing I didn't talk about is like the blood type diet this is another big craze and it's another big fad diet you know all of these fad diets or just get rich quick schemes by the people that come up with them as far as I'm concerned okay and that one one of the things they never talked about they always talked about well here's the things you need to restrict completely from your diet don't ever eat this don't ever eat that as soon as you hear don't ever eat this or that unless it's something that's completely artificial like artificial sweeteners okay dyes colorings all that shit that's in our diet all those poisons okay as soon as somebody starts talking about any natural food that grows in the earth okay that is actually here for humans to consume I'm automatically suspect and I will say that that's automatically some type of you know fad diet that's being marketed to people because they know how gullible they are they know how little they know about real plant-based nutrition and they know how you know just desperate they are to go to you know some sort of an expert and you know follow everything that they say I'd group the blood type diet in with all of that okay I would also group the grain free diet in with all of that and I know there's gonna be people who hey they're gonna disagree with all of this okay but grains aren't in and of themselves poisons as they grow in the earth naturally okay no one is going to convince me of that okay it does I don't really care where your studies came from my take is if it grows in the earth naturally and it's not something that's like inherently poisonous like poisonous berries or things like that there are certain inherently poisonous plants that human beings cannot consume obviously okay that's common sense knowledge that things like that exist in nature grains have are not one of those things grains have certain grains have become poisonous because of the way human beings have genetically modified them and I'm gonna say genetic modification okay so how certain grains have been modified and this is why there's a stigma in many health diets and fad diets against all grains and I do not agree with that stigma I think it is a false equivalency okay that being said you have to be very careful with many grains with most of them because most of them are genetically modified and here's the problem with this folks they don't have to be labeled genetically modified because they are not genetically modified in a laboratory with some type of actual chemical or physical modification of the grain they are genetically modified through the process of genetic hybridization in the fields in the way that they are crossbred grown so that type of genetic modification which is called genetic hybridization does not have to be labeled as a GMO food in almost any place in the world especially in the United States I'm not going to say that that's true for every country in the world in some places that may have to be labeled if that is the case but I'm telling you definitively that in the entire United States the no product containing genetically hybridized grain ever has to be labeled as a GMO food as a genetically modified organism okay so this is where people don't understand the difference between these things and if you research it the the process of genetic hybridization creates a poisonous protein in many grains specifically modern wheat okay and if you look at modern wheat versus ancient we could actually see the physical difference in the size of the wheat berry okay but that that's like just you know that has not really the size of it and shape of it has very little to do with what's going on inside of it okay because that's ultimately way more important okay it produces a protein that is not really found in grains as nature grew them and intended okay and it's called gliadin now if you research gliadin this is a poisonous protein for the human immune system reproductive system digestive system everything it's it's a very very insidious poison it's a poisonous agent and this is contained in just about all modified modern grain strains okay the the the genetically hybridized forms of wheat okay now if you go back to ancient grains you're not going to have these problems okay you're not gonna have this this poisonous protein in it and this is what almost hardly any researcher or any person advocating grain free diets ever really talks about and what they'll say is avoid them all because you're not gonna know the difference if that's untrue it is possible to know the difference in which grains are hybridized and not anything called wheat plain wheat is going to be hybridized okay but if you get an ancient form of wheat like einkorn or an ancient spelt okay or an ancient comet we then those things are not going to be genetically hybridized so you want to look for organic and ancient grains okay so amaranth quinoa you know a millet things like that not only are many of them gluten-free they're going to be glide and free if they're organic and non genetically hybridized so ancient organic grains okay so I just want to let people know that we need to break this whole idea that anybody's saying just avoid this whole thing in nature 100% completely is selling you a bill of goods as far as I'm concerned I don't subscribe to any of these restrictive forms of dieting okay I I subscribe to a whole and a complete nutritious diet based on plant foods that are largely unmodified by the work of man if nature grew it and it is safe for us to eat okay and it's a largely unmodified and and not polluted by what man does to it so almost completely unprocessed use it in your diet it's called a common-sense approach to nutrition and health okay and all of these other fad diets are just it's it they're there to sell people build goods in a naive state and in a in a hungry state to get you know information that they lack because they don't want to do the research themselves and opportunists will come in and sell them all these fad diets and that's exactly what's going on so you need to research glidin which is the poisonous protein that is created in wheat and others certain other grains but mostly in wheat through the process of genetic hybridization okay last week I kind of ended the show trying to rush through what adaptogens were and I think this is also very important and also very not understand by people when they study nutrition and health and yet these are some of the most important herbs that we could be using to supplement our diet adaptogens are compounds which help the body to adapt to stress and exert a normalizing effect upon bodily processes and I'm talking about across the spectrum of body functions okay just about every way that your internal organs function to weight regulation to energy you name it it will normalize things if you are underweight it will help you to gain weight if you are overweight it will help you lose weight it will they'll give you a lot of energy by taking these in and in the right amounts okay some of them you have to be careful with if you take too much you know it could actually you know wire you up like caffeine can okay so you want to look into adaptogens you want to do your research on them some common examples are ashwagandha I take this all the time as well okay a struggle this route great for detoxification and energy that's an also you know something that I try to take whenever I can cordyceps mushrooms ginseng licorice root rhodiola rosea okay all of these you want to do your research into and start getting on different adaptogens I highly recommend ashwagandha it's something that's also very much helped with my you know energy and just um overall regulation body regulation okay it's really good for men and women as well so Ana straggle acai I can't say enough good things about that and then you could look into all of the beneficial mushrooms you know the cordyceps mushroom the Blas a mushroom the chaga all of those you know you know different types of fungus in the form of mushrooms can have an extremely high health benefit on the diet when they're used as supplements you put them in smoothies etc there are certain forms of coffee that have these infused in them you know nutria Cafe is one example okay so the whole point here is adaptogens regulate body processes and they help with stress they help reduce stress or effects okay so very beneficial and they're another thing that a lot of people leave out of the the diet and don't know anything about and have never even heard of okay so that's something that I left off talking about last week and then I just wanted to wrap up this whole topic by just saying that eating well is actually a form of self-respect when we make our food choices we are choosing between putting toxic and poisonous substances in our body or putting life-giving substances that came from nature came from the earth and ultimately came from the Sun as I talked about last week you want to talk about what the source of everything here is it is our star the Sun okay and you know that's where all energy and life is ultimately connected to folks and like I said it's something beyond what we even understand we don't even know what the Sun and the light that comes from the Sun even really ultimately is it's a form of energy it's a form of spirit it's a form of nurturing and it is it's like the core of nature okay it's everything in this solar system no life would be possible without it and that's where these plants really get their energy connected to the earth you know through the process of photosynthesis and then they transmute that energy to us when we take them in as we are meant to okay so respect is what this is all about you know especially self respect so many people are in this self-loathing state they don't want the truth they don't want real knowledge they and and therefore they want to treat themselves as if they don't deserve anything better in life this is why we're in a state of slavery ladies and gentlemen we're in a state note no self-respecting species could allow themselves to remain in a state of slavery we are in a self-loathing state as a species and our diet has a lot to do with it see this is a big end point for a lot of people I I've told people many times this came last for me I got all the other stuff folks I got all of it all the aspects of the conspiracy the worldwide conspiratorial aspects all of the political and financial nations that are taking place in the whole political spectrum I got the whole you know polarization dialectics the mind control techniques the occult all of it the last thing that fell into place for me personally was a change of diet and an understanding of real plant-based nutrition and how powerfully mind changing that could be for the positive to help us to get the brain fog out and help us to really clarify and develop a true sense of self-respect clarify our thoughts emotions actions pure it's a process of purification I would go so far as to say it is internal alchemy okay and then when you get yourself in a state of health and strength then you are ready to do the great work of external external influence which is a process of alchemy but by putting this information and knowledge out there for other people and that's what the great work is to really do okay so I'll wrap up this formal presentation right there okay and another thing I neglected to do last week because we ran out of time was to just you know wrap up housekeeping as far as you know talking about what supports our efforts here at what on earth is happening we couldn't do this without you I have a fantastic internal team that helps me a produce the show every week I want to thank the crew and all the people who assist with that it's their efforts are absolutely invaluable okay and you know the people who don't necessarily directly interact to help the processes here at what on earth is happening you can help indirectly and if you want to go to give stop what on earth is happening calm or just go to what on earth is happening calm and click the gifts button or tab okay there's hard items that you could order okay that are my DVDs flash drives we have t-shirts up there we have keychains and stickers and buttons and coasters you know just little simple you know merchandise items that you know you could make a donation for okay and then they'll be sent to you as a free gift okay so there's it's a it's a mixture change of a gifting it's an exchange of gratitude basically is what we're talking about here so thank you to everyone who has contribute contributed at donation gifts okay please keep that up because it helps the efforts continue here at what on earth is happening so thank you for for engaging in that site if you want to receive the Ark Drive which is a collection of all of the research material that helped me to gain the best research material that I've put together and assembled in one place on one hard drive that helped me to gain the understanding of the world that I did you know post coming out of the occult the world of the dark occult all right I I started to become an obsessive researcher in all of this once I understood what who was really running the world okay through direct involvement in groups like that and then I became an obsessive researcher and I started gathering digital information from every corner of the internet and what you might call the dark web okay and I put all of the best research aggregated all of my best research data onto one one terabyte hard drive you know and then I started copying that for people and distributing it so if you're interested in receiving all of that research data that I put together many years ago you can go to what on earth is happening calm slash arc the arc stands for the amazing repository of knowledge and if you fill out the form there you can then get the PDF document which contains the shipping instructions for how to obtain the arc Drive many many people have now taken me up on the arc Drive and it's great that that data is proliferated and it's out there and at some point in the future I haven't I've started the project but haven't had the time to completely finish it I will be building a second iteration of the arc Drive that's which is actually going to double it's gonna be a two terabyte drive but I haven't gotten to completing that project yet I probably will probably by the end of the year and then if you want to make a straight donation to the cause of what on earth is happening you can go to the donate page click the donate tab or just go to what on earth is happening doc calm / donate there are 10 different methods on how to donate - what on earth is happening this slide still says 9 all updated at some point but basically you could not you could contribute by paypal check out our new patreon page I've been posting all of the podcasts to the patreon page so if you want to become a monthly donor through patreon you can go to patreon.com/scishow our passio there are five different crypto currencies that I accept and all the addresses and and QR codes are up on the donate page you could donate by personal check by personal money order and another great way and people have been really taking me up on this is our Amazon wish list for technology we're always in need of different technological items as you know the operation here expands and grows we are trying to bring some new workstations and you know basically bring some new people to work on graphics and video here and you know there are some items in the Amazon wishlist if people would like to contribute by donating that way you could also do that thank you to all the people who have donated in any way you know who you are and we completely sincerely appreciate your very generous donations for what on earth is happening we would not be able to continue to do this to make this effort to continue this cause without your generous support so thank you so much that being said let's all let's go to your calls in a moment okay now what I want to let everybody know is I'm gonna read some of the basic ground rules or just like the setup that needs to be understood for calling into discord I've I've covered this a couple of times I'm gonna do it one more time before we go in so I always have to put these headphones on before I take calls because I'm actually taking calls right on the computer that is connected right here so it's going out over a different mic what I've been doing the last few shows is leaving the microphone for this headset on at the beginning of the show so the people in the disc court room could get used to hearing my voice live and see how it's different from the live stream okay so what you want to do I'm gonna basically read some of the read the instructions okay so when you go into the discord room using the using the link on the show page the link to get into the call section to get into the call app and in the server where I take the calls is at what on earth is happening comm slash show you can click the link that says click here to call in live using discord right on that page okay that'll take you into the the discord server that we use here to take calls discord is like just Skype on steroids you know or Facebook messenger on steroids or Google Hangouts on steroids okay we're talking about basically just a chat and a voice and video app okay that you could you know just talk to other people throw it's mostly used for gaming largely okay my producer just asked me thought it would be a good idea to just show people the discord link on the show page largely I'm gonna I'm gonna I'm gonna pause the video that's playing there okay on my browser just show you this is the link right here okay you can get the discord app using this link right here the word discord is linked and that'll take you I'll just show you real quick that'll take you to the discord page where you can download the app for your operating system okay so you that's really the best way to do it is to get the actual desktop app if you're using it on a phone that's great too I recommend using the desktop app I'm gonna just continue to go through the instructions but I just want to show you here here's the link right here click here to call in life okay that'll actually take you into the server once you have the app installed okay so yeah we can cut away from that great okay so I'm going to go back to the instructions that I was reading okay so when you when you go into the server then you're going to click in what on earth is happening calling room you want to click the actual voice channel that's listed under voice channels what on earth is happening call in room okay so you're gonna enter it by clicking that okay and then you want to realize that this is not a chat room at least not when we're on the air we've allowed some off-hours chat after the show but during the show we don't want that going because it acts as a distraction okay I want you to be paying attention to what's going on on the show okay so this is a waiting area to speak to me live on the show it's not intended to be a chat room okay so you don't want to stay in the room the one earth is happening calling room unless you actually intend to have your call taken live on the air I highly recommend to use the discord desktop app or the mobile app and not use the browser interface you can if you want to but I don't recommend that okay so you click into the calling room to enable voice call and you have to unmute your microphone in the app okay now on the desktop app that's down here in the bottom left hand corner so if I click this I muted if I unclick it unmuted you want to make sure that that is unmuted I have everybody muted from the server end okay so I have to physically unmute you to take your call so you want to have your own mic unmuted on your end okay all right so during the call you won't be heard but you will you will be heard but you will not be seen live on the video stream okay so there's no video it's just live audio okay don't listen to the show on any live stream while you wait for your call to be taken live streams can be delayed up to 20 seconds so you may be you may miss being called on instead listen to be called on onto the show by me right on discord right in the discord app okay mute any devices that generate any sound at all that that includes any other app that includes you know anything you might be watching the show live on you want to mute all of that okay quit any program except this cord that may use the mic or your headphones okay and you have to use headphones because if you don't your speakers are gonna be feeding back through your your your microphone okay so use headphones to make sure that the sound only goes into your ears and don't loop back into your mic okay if you're not using headphones and I hear an echo I may have to terminate the call I don't want to have to do that okay and I'm gonna determine what calls I take we don't have a specific order I look at who's in the room and who whose calls I want to take and you you will not be screened there's no call screener when I go to your live on the air okay and what I call on you by name you'll be live so be ready with your comments or questions alright so that being said let's jump in okay all right we can yep well we can cut away from that here we go let's go to Shaun McCann Shaun you are live on what on earth is happening episode number 208 Shaun welcome to the show hi there mark good to speak with you again excellent thank you for thank you for participating and thank you for being ready I think I might be the first time that the first caller I called upon was totally ready to go that's good I'm glad to be part of something and be a be remembered I just wanted to say how how my experience of how I've grown to to my understanding of doing least harm is best and I wanted to say that that your your work has been an influence to kind of push me over the edge my whole life my my mother was vegetarian and I've always loved animal it's always been a big part of me and the cognitive dissonance was just blind to me and all my ears and like I like everything that I'm learning about spirituality it didn't click for that you know until it's almost been a year it was my birthday and I stop you there for a moment ladies let me ask why why do you think that aspect of spirituality didn't click because I agree that doesn't click for everyone even if they study spirituality particularly from a quote-unquote new-age perspective you know you do have a lot of New Agers who become vegetarian ok it kind of overlaps with that community but it doesn't necessarily directly overlap with spirituality in general it can but again it doesn't necessarily overlap and click for many people so why do you think that that wasn't included in the types of spirituality that you study particularly I I can I can guess that maybe it's because it's so it's so tough for people to make change and when they face change they don't they want to reject it so any kind of spiritual course kind of makes an excuse I mean even Manley P Hall says that animals die willingly to give us their life you know and I can tell that strongly disagree and he's a spiritual man like like any sailor you know it doesn't make sense you see you see a lot of contracted even in the spiritual source I have an aversion to that just to start with and that's probably why people don't even try to push that subject do you think it's because it's polarize the spiritual sense right you think it's because it's a polarizing factor that a lot of people who consider themselves even spiritual teachers leave that out of their curriculum so to speak exactly yeah and in order to get everybody on board you got a you know you got to make some sacrifice and be moral relative and morally relative in some ways well folks this is why I kind of didn't revisit this topic for so long because it's so polarizing I see the polarization in the community on this topic and I again I did this show last week and the subsequent call-in show this week to try to bridge that polarization and make people realize it does not have to be present if we're as long as we're being honest with ourselves see I don't have any problem with people continuing the carnist diet as long as they make the spiritual realization that this isn't the optimum way for human beings to be in the world right the the were I consider the hardcore ignorance coming from is the people who actually have come to the incorrect conclusion that we really actually need this in our diet and that they don't understand that there is a proper way to convert from a carnist diet to a plant-based high density nutrient diet based on plant food plant nutrition there is a right way to do that there are wrong ways to do it there are many wrong ways to do it okay I'm trying to give people the tools the information and the tools that they need to do it properly so that they transition it's a journey and a transition it's not an event as I said last week you know they're transitioning to a plant-based diet is not an event it's a it's a process okay so yeah tell us a little bit about how that happened for you and how long it took and how difficult was it well it was I mean it was a journey but I'll tell you what pushed me over the edge was an event I I imbibed what it was my birthday and early morning I had my coffee and certain entheogen which put me in a in a mine space and before my girlfriend was awake I was you know just scrolling through internet and I happened upon Facebook like I I knew it was a bad idea but I went anyway and people were discussing how grass-fed beef is great and it's organic and it's good for you and people were debating you know and somebody just posted a photograph of an animal that's enslaved its face was bound with metal and ropes and its eyes were crying and looking at something horrific and you could see the fear and the pain and the anguish and I just cried like I opened up and I cried for must have been like an hour she walked my girlfriend woke up to me sobbing she's like what's wrong and I just couldn't take it I mean my everything shattered for me and now I see I see meat as different than I used to I used to see it as you know and now I like I see what it is and I understand what it you know I have to choose to ingest fear and pain you know and I have to choose to be that animals captor like three times a day I have to choose wrong you know and I just couldn't do it anymore and that was almost a year ago I mean I'm only vegetarian I'm still just technically I'm still my attorney you know all right so it is a journey but I stayed I stayed vegetarian Shawn for 12 years before I made the commitment fully go to a plant a total plant-based diet and it was difficult you know I'm I saw the you know desires welling up in me to you know stay attached to you know certain animal-based products and you know it was a process of you know developing that willpower to say I don't really need to stay attached to this and that's something that like we work internally with ourselves to do and some people do it at a faster pace some people do it at a slower pace for me the actual stopping of the consumption of meat was far easier than stopping the consumption of different associated products like dairy products that was I was much more addicted and you know attached to those than I was to actual animal flesh even though I was a big meat-eater when I was a carnist okay I mean unbelievable I was going to tell people about the some of the you know anecdotes that happened to me too - how you know of what I was like before and things that got me out of it so um Sean just let me let me know how long have you been vegetarian for now it's been my birthday is June first so that's it'll be your fantastic congratulations thank you kindly yeah great job you nice Sean I'm I'm gonna unless you have anything else I'm gonna let you go I'm gonna tell people a couple of quick anecdotes before I you know get get into another caller well sure I'd like to for everybody to participate I suggest speaking with Nathan ridet I did do that I'm actually planning on taking his call next believe it or not okay great tell them I said hello yes we we spoke a couple weeks ago on Evelyn's program Good Vibrations podcast and that was that was a vegan roundtable we discussed veganism and he's very intelligent and I'm glad you're speaking with him absolutely Sean thank you so much for the call great points very good thanks for having me you got to take care so I'll just let everybody know like you know how much of a meat-eater I was I used to go to like those Brazilian steakhouses the Brazilian barbecue steak houses you know with friends and just you know there's some in Philadelphia here that have this little gimmick that they give you like a chip like almost like a casino chip or like a coaster okay and one side is red and one side is green and they just tell you keep this in front of your your your place mat here and if you want to keep having meat serve to you different cuts keep it on the green side and when you're full flip it over to the red side and we won't keep bringing different cuts of meat over to you to you to your plate okay and like we'd be sitting at a table with like ten people having dinner and like me and like one other guy you know would still have it on green after long after everybody had stopped and flipped their their chip over to the red side and then we'd be like almost like competing like to see who could keep going you know and finally you know like literally people are done and we've had like you know eight more helpings brought over to us long after they had finished and we're still going and everybody is just looking at us like are these guys serious like you're like machines or something you know were you even putting it you know and I we'd keep that chip on green and finally and like own like the ninth round he turns his over to red and I left mine on green for let yet another couple okay that's how big of a meat-eater I was so I'm not talking about somebody that just occasionally participated in eating some meat I was like ravenously devoured it and yet when I made the decision to start even weaning off of meat I thought it was gonna be this like gigantic struggle I thought it was gonna be like I would be having meat cravings 24 hours a day I'd be getting up wanting to go down to the refrigerator and you know make something with meat in it and it was just it never happened like that when I finally did make the decision to even start weaning from it it was miraculously and strangely easy for me to do and that was the shock to me it was a shock to me more than anything else like I was never expecting it to be like that I was prepared for a battle willpower battle unlike anything I've ever done and it just didn't happen now dairy products cheese in particular you know was the hardest for me but and that took a lot longer obviously but I was mentally committed to eventually making my way toward a plant bay a fully plant-based diet and I mean I'm gonna try to not even use the word vegan because of the necessary the the potential connotations Atta conjures in people's minds I don't particularly have a problem with it but it can develop into a religion when it becomes militant I've was never a militant vegan or a militant plant-based diet person okay I think that this is a journey a process a process of self-discovery a process of being honest with oneself and then a process of using one's own internal developed willpower to create a change that I feel we should decide to engage in that's it and that's the balanced approach that I take to this like I try to take a balanced approach to nutrition I don't want the polarization that's going on in the community but I do want people to be honest with themselves about the moral aspect of it so another quick anecdote before I continue with the calls is I also as Sean was just saying was quote unquote helped by a plant psychedelic slash slash entheogen okay a one day I took some psilocybin mushrooms and I it wasn't a large amount it was a probably under two gram amount which is not blasting you off into outer space you're still gonna interact pretty fine with the everyday world and it like didn't even like obliterator I was still hungry and wanted food so I went into a Boston Market believe it or not here in Philadelphia and I ordered a plate of roast beef and sat down at the table and was eating it when I guess you could say the peak part of the experience was coming on and it was basically saying you don't really need this you believe that you do but you should look into what is done with the animals that you are consuming and how this ended up on your plate being eaten by you and like you know it's like an external voice like it literally it is like a teacher if you're using it in the right context and I was I was simply trying to be observant and you know let it guide me you know where you know and just commune with it okay because then this is a process real anthea genic communion is just that it is a process of sharing consciousness with a aspect of nature if it's used in the right context obviously they can be abused okay so it's for people to learn how to use correctly as we've talked about on other shows okay I don't advocate for just the wild use of psychedelics it's to be done in the right mental preparedness State okay and that's how I approached it and I was open minded to hearing that but when I heard it it was like where did this come from I know I I'm not thinking this it didn't come from me okay so it's like if you use psychedelics in a context like that to try to change consciousness it can gently nudge you to that way some of them can be more brutal and be very harsh you know but this was just saying you might want to look into what whether you really do need that and whether it's actually necessary for your nutrition in your body or whether you can step away from that because of the violence it's based upon and because of the harm that it causes in the world and again that's what this show is called this is the addendum to least harm possible it means we can transition to a way of life that is less harmful than the harm we were previously causing that's what anarchy is all about and that's what a plant-based diet is all about so you know that being said I think that people have to understand more this is less about just polarizing people right we have to move away from that polarization and get to the core issue and just ask people to be honest so like you know if I don't disagree on the this topic with someone else all I'm gonna ask you to do is be honest and see where your moral aspects of your thinking are at and you don't have to lie about it you can just be honest so I like I've had conversations with people who still eat meat and they're just like I know this is causing harm I know that the animals don't belong to me I know that my body does not require me if I transition away from a meat-based diet properly yet I know also that I don't have the willpower to do that so I'm going to continue to eat meat and that's it then we're honest with each other and we know where each other stands okay then and that's all I've ever asked just don't lie that's step one of a cult initiation stop lying don't lie to yourself or other people but most of all don't lie to yourself first you know if you don't have respect for oneself you can never really display respect for anybody else you know and this is kind of almost where I struggle myself because I do have that form of self respect developed for myself but I'm living in a world where the vast majority vast majority of other people still don't have that developed self respect so then I struggle with giving them respect and I almost fall into like hating people like that who are in that state of self-loathing because they're the ones who are really fucking up the world you know and I'm not just talking about obviously like plant-based diet versus carnism I'm not going to say that there are the ones fucking up the world but the people who still advocate for human slavery are okay and don't understand the more the moral implications of what they advocate for okay so when it comes to Anarchy I fall into the the you know what you might call trap of you know really descending into the lower emotions of just hating people but I acknowledge that and I admit it to myself and I say okay this is something I have to work on to try to get people bring them up more right instead of just giving in to that to that emotion but I'm not saying we should should just like the state that it is we should be working to change it it shouldn't be tolerated okay it shouldn't just be accepted right so there's a balance that has to be developed between just raging hated people who aren't really trying to change for the positive versus trying to help uplift them and get them to be honest with themselves and others and develop self-respect because that's what this is all about folks this is about a species that is in a state of what I would call cosmic abandonment with deep parental abandonment issues okay and real worldly abandonment issues in the very real 3d world okay of people who have not grown up mentally psychologically emotionally and spiritually enough to be honest with themselves and that's all I'm going to demand of my viewing audience is just honesty okay so we could do that we have mutual respect between us here's a gentleman that I certainly respect Nathan R a debt nathan radec you are live on what on earth is happening welcome well thank you very much mark and thanks for the kind words from Sean as well can you hear me okay absolutely you're coming through loud and clear fantastic fantastic well there's only one mistake you can make on the path to freedom and that's not being a vegan anarchist excellent um yeah I'm excited to be on your show again this is a great honor mark so it's a big part of my work as well I really try and get this message across that it's wrong dominate you know it's wrong to dominate both humans and animals so it's a hard lesson for people to learn that a lot of them don't want to hear that they buy into the idea that simply because we are more advanced and more capable species in many ways than the other members of the animal kingdom that that somehow puts us in a position to dominate and own them and use them as we see fit you know what led you to the understanding that that's not the way reality really works or the way we should be acting in the world to get to help you to understand that their lives belong to them they want to live they want to survive and that we can change and not take part in that harm is coming up moral relativism okay you're learning the objective difference of right and wrong and and you hit it on the nail last week when you're talking about heart based intelligence so not only do you do you know that you've got a care as well right so if you don't really know if you don't if you don't actually act on so through Intel or gents you know and if you if you really develop that care yourself and you're going to read the card base that you've developed that care the animals there we are base then certainly for the planet as well now let me ask you are what how long did it take your transition to go to a fully plant-based diet did you go through stages like weaning from meat and then becoming vegetarian then becoming fully plant-based sure sure so it's about five years ago I went veggie mmm-hmm and then within about three or four months so I went full plant-based and I guess entheogens at a big part of that as well Wow whether these are the quotes from your show just kept niggling at me you know to know and not to do is to really not know or care or just niggling at me and the only the only two mistakes you can make on the path truth is not done and not going all the way so they're just an ignorant me all the time especially on antigen so I just had to take the plunge still just stopped by and the dairy stuff and what I found mark is that if I at well and are united full belly order I didn't miss it sure always I love juicing in the morning you know it's there's a great piece for the day how was your in the dark how is your energy now compared to how it was when you ate meat well I guess I've been pretty energetic but anyway I'm I'm not I'm not a star J anymore no I do martial arts weekly do you hear the argument often coming from people who are still engaging in meat-eating that somehow vegans will become less energetic and weaker because I hear that a lot of the meat industry and I will tell you emphatically unless you are doing the plant-based diet very wrongly very incorrectly that is most certainly not the case folks I have so much energy it is difficult for me to burn it off most days okay I have such an abundance of energy that I don't even know where to place it and I find myself even wanting to do more mental activity to just try to get energy out of me okay the for people to say that you're not going to be energetic and have energy and and strength on a plant-based diet like I mean they obviously haven't done it right or haven't tried it or haven't followed the methodology purple properly yeah I just want to say one thing actually on their Shaolin monks right that they you know from an early age they're on a plant-based diet and they they do superhuman feats all their life and they had done a simple plant-based diet so you know that then alone just completely dispelled a bunch of the meat-eating myth you know this is the boxer David hang Germany Strongest Man there are meters you can record a lot of vegan based athletes sure a lot of athletes and moving over to plant based as well as MMA fighters you know it's also proven it comes back to this people filtering it through the screen and mesh of what they want to and what they do not want to believe mark doesn't it absolutely absolutely and that's that's really the the wall that we have to try to break through is it's what people want to be true versus what actually is true you know I mean if sorry yeah not bad I still say no if we if we're doing the Trivium on this you know we know what what's biologically correct have you seen an empty male gist presentation actually what humans are meant to be I have not thoroughly recommend it it's a cracking presentation give give the name and title again please MD Mills are humans supposed to be eating meat wrong it's along those lines anyway okay drink that you've got super juice me as well have you seen that one I have seen that yeah and then you've got earthlings yep no if we're doing a homework thing another good news fat morons I think fat sick and nearly dead is another great documentary that deals us juicing and how it transformed one human beings health and I you know just just doing basic juicing to detoxify the body from all the harm that he did through you know a very high pollutant diet obviously that's an extreme measure you don't want to be on a liquid diet for a very long amount of time you could do these things as juice fast to detox and then you want to go into you know a something where you're taking solid food in addition to doing juicing and blending as well but fat sick and nearly dead is about a gentleman who doesn't juice fast to reclaim his health after being very sick and you know having serious health problems very much like the super juice sweet yes really plaid that was a really powerful one you know when I was very is changes oh my god oh I've got a question I'm being so well at first into Satanism okay obviously one of the tenants is keep putting people in duality and you know I think carnism is a morally relative limited as well sure do you think as part of the control system that it puts people in a state of duality that the realizing and then when you're not saved relative I'm really going to know the self without any doubt without any doubt whatsoever in my mind it is part of the Satanic agenda without any doubt so in in love the doggy dog social donut that's right because if we believe we can do this to animals it's only a measure of a step up in psychopathic mindset to then get people to accept that some human should do this to other humans you know so one of the questions always posed to a carnist is if you're being honest with yourself shouldn't advanced species far more advanced than human beings arrive in our solar system and they say this is a perfectly great human beings would be a perfectly great nutritional requirement for our diet ok and they decided to just start scooping up humans and eating them at their convenience would you be the first on the plate because it's like that's how you think about the chain of nature the the so-called natural order of of Darwinian macro biological evolution so but by that definition you'd be perfectly fine with if in more advanced species turned up here to just hop right on their plate and not a one of them has ever said yes and I'd be the first on the plate you know which is proof that they're lying to themselves that's all so if you're honest with yourself and you really do take that Darwinian you know so-called natural order which isn't natural and isn't doesn't create order you know approach to life to nature then if you're honest with yourself you would say yes I'd hop on that plate but none of them ever do but to go back to your question the whole continual blood sacrifice of the the slaughter of animals on a daily basis 100% is the practice of satanic ritual in the world active in the world abso yeah yes and another thing that focusing on this is what I really try to focus on today autiful hopes as well but the law of Correspondence regards that which into authoritarianism carnism I really think that they need to be done alongside each other just reserve those two naturally laws that bind us in a positive way but you know just to get people to understand this wrong to dominate both humans and animals I don't think get to a state of freedom now or either direction if both have to on the aggregate force or not well said you know and I think part of what keeps people from directly viscerally understanding it is that they don't have to do the work of actually slaughtering these animals themselves I think if they did and we didn't have factory farming practices and just general you know big Agri practices and people had to do that for themselves they would find that they would actually really that the compassion centers in them would be more engaged because it's very difficult for a person who hasn't been harmed by another life-form to take the life of that life-form you know and you know even be if they still believed that it were necessary which it isn't we know scientifically that that's the case if you wean off of a meat diet because again you're gonna do make changes to your physiology by eating meat your whole life you don't want to just suddenly you know put the body into a you know a distorted state I guess you could say by suddenly making that change you want to ramp up okay just like anything else you know you consult any body who knows anything about the physiology of the body and they're gonna tell you avoid very sudden drastic changes that are going to affect the physiology drastically all at once you know we come to a state of homeostatic equilibrium in in in just about whatever we do because the body will make adjustments the the whole immune system and the processes of the body are amazing in their ability to adapt okay so you don't you know they'll adapt to even negative stuff being thrown at it all the time and be used to that so when you want to change the something that is even more positive you should do it over a process of time you should do it suddenly I think a lot of people when they go plant-based or vegan they try to do it too suddenly and they find that processes in their body can you know go haywire then they blame it on that and say I needed the meat I get this a lot too you know oh I I went to a plant-based diet never saying anything about how quickly they did it okay or about what they ate right they just say oh I went plant-based they could have been eating plant-based sugary cookies all day okay you know that they could have not they could have been eat enough totally grain based diet with not a lot of you know real phytonutrient nutrition's in it okay and then they want to say oh this caused problems with this organ or this process in my body because they didn't do the dot they didn't do the the transition to a plant a healthy plant-based diet correctly and so then they blame it on the the plant-based side of things and say I need meat for to maintain optimum health and it's just it's not true and it's based on a lot of presuppositions and just wrong ideas about how the science of this works that they didn't come to fully understand by doing proper research yes going back to what you're saying about how they're that's what bodies work in the energy the high quality juicing the hemp seed you know and they collect coal ganic plant-based diet that's right I think I think you can transition fairly quick because your body you know it's getting everything needs to be feeling full up obviously it's not since they don't even know what you've seen them do um see I do yes that's a I think that's one of mine sure I take hemp-based CBD oil every day as well as a supplement as part of my regiment of tinctures and supplements every morning what school yeah do you like all the hemp seeds are excellent too you could throw them into smoothies or on a salad it's an excellent nutritional aspect I'm sorry say again I just asking you how often you do antigen and I know there it should be done in infrequently infrequently so I can't give you any amount of particular time and I don't like to maintain any kind of a schedule but I do not do them very freely therapy - yes that's right and I feel like they should be used when you feel like you need another lesson when you're falling short in your life and you should be prepared here things that you don't want to hear and see things that you don't want to see that's what they're for that could be harder me yeah absolutely so it's about a mental and spiritual preparation and they are tools to assist that they're not going to do it for you either they're gonna they're gonna kind of show you what needs to be done and then drop you back down right on on the ground floor and say now you have to do it nothing will do it for you yes feels quite funny I'm going back to brother restroom that was actually one of the last times I ain't restaurant that was just you know gorging on all of the Smith just the point of made me realize just where the gluttony and that's here as far as one of the last ones I mean this place is how me don't change ways Wow yeah I mean it's uh it's a it's a whole difference in lifestyle you could see a come through in just about every way I mean you look at where low vibrational energy and what people pay attention to that's low vibrational and you'll see meat is always associated with it you know high density plant-based nutrition juicing smoothies you're gonna see in many cases not blanket statement but a higher vibrational state of awareness a company that you know they definitely go hand hand in hand so I noticed the shamans though I they those those conscious Jenna orientated conscious yes absolutely there are more such with nature in general and in touch with the land yes do I just leave you on another quote no man he will quote you shouldn't go through ages of suffering change through education to any true meaning of the word intelligent say the quote Walmart is it is along the lines of we shouldn't go through ages of suffering without something to pin down but basically saying that we should you shouldn't keep doing the same thing we should with Papa that's right learn from or less of the cause right learn from the lessons of suffering it doesn't have to be a constant repeated cycle we can learn the lesson pick up and move on and and learn and grow from that lesson even if it was a negative lesson you know there's no reason to keep repeating those cycles of suffering through continued ignorance that suffering is often here to teach us a lesson it's up to us to receive that lesson and acknowledge it and be honest with ourselves that's what this is all about Nathan thank you so much for the call thank you for your work my friend really appreciate it let's see who else do we have on the line let's go to let's go to Bill Church bill Church you're live on what on earth is happening welcome mark can you hear me I can coming through loud and clear how are you doing bill I'm doing great brother good good to speak with you always you too my friends I appreciate you doing this show because I've experienced the polarization on this topic and I think we all have yeah yeah yeah and and it's a journey that you know I'm on as well I'm on the trial and error aspect of this I longest time that I went vegetarian and I am currently a carnist okay but I see and I know the moral this is this is my biggest my biggest issue right now man it always has been so let me just clarify what you just said you you are attempting to go vegetarian right now absolutely I'm in the process always dude that's what that's what and and that's where I want people to understand and the polarization of this community you know we we can help each other much more than the bitter then by doing these literal attacks to each other I felt like I've experienced is has made me separate myself and and come to my own and and the thing is mark is that I I I'd use my own vegetables I do the hemp seeds I do everything I do the Teamsters my wife is a wild crafter sure okay and so she does right now and that certainly helped with it I mean you'll be able to get so much benefits and energy from from doing something like that that's a hugely added benefit well in the thing is is that I I need help you know and I need to find out what is gonna work for me sure and and that's where we can really come together as a hive mind community and and say hey look you know with love compassion empathy for each other there's nothing we can't discuss and there's nothing we can't figure out right and every body is at a different stage in that process because we've all been conditioned to believing that it has to be a certain way it's the same with the control system you know yeah well and look how we grew up market just look at how the hell you were speaking about the Brazilian restaurant that you were at I mean these are charged with emotional sorry uh hot hot buttons that we've grown up with like when we go to Thanksgiving dinner yup what do we walk in the house and smell all right you know when we go to a barbecue you know and even my friends that are vegans and vegetarians I asked them does that smell good to you and they're like dude it's amazing right I'll still walk by places that are cooking me and have to acknowledge that smells good to me I mean it's something you don't fully get rid of you know but I mean look at how our families like my family prepared meat like maybe six out of seven days out of the week you know it would be rare when we didn't have a a meal containing meat when I was growing up you know it just wasn't even considered it was just thought of as this is just normal this is just the way that humans eat you know well and what are their there's so many new options it's amazing I mean they're in Philadelphia this week actually I think yesterday was the last day of it the previous week Sunday to Saturday was called vegan restaurant week and it's amazing how many restaurants serve vegan options in the city of Philadelphia now and they did a whole week about like having all these restaurants having amazing specials that are just whole food whole plant-based uh you know meals and uh you know I went to a few of them during maybe two or three during vegan restaurant week and the meals that I got I could barely believe were vegan in some cases it's like um you know what the measures that they went to to mate to prepare meals like this and make them taste with the flavor profiles is amazing as they taste and it's like you could just be look at this and be like it's practically a piece of cake to go plant-based in today's world and it was even you know five to ten years ago that's right and take up for that because you know we don't know what we don't know because like you said we've had a lifetime of programming and with this issue it boils down to respect and self-respect that's and what does respect mean to take another look and that's what we need to do on a daily basis in my opinion and what I've stressed is that we have more pressing matters as far as a world as a whole as far as humans being dominated that's right and you know I loved what you said about the domestication of some of these countries and that's what I raised too when I have these vitriolic attacks from people is like can you I have a gun right now on my hip that's right I always do you know I have working on printing ar-15s because we can that's right you know and that's that's the other pressing issues that I want people to know is like look at you know the sacred masculine Sacred Feminine to me are just as important if not more important because then we claim our right as a human to really navigate and to a contemplate and to really get our diets right and to you know not not have that ever-present ear overlying that because we are being were dominated we're taking our health into our own hands we're taking our self-respect we're taking our self-defense and that's about taking the whole sovereignty of your own life into your own hands you know that we have the ability that ability that's right we have the full power to do that within ourselves you know that's right and together as a community there's strength in numbers and not only that but what you teach is that the powers that should not be are unified and that's what we need to be as a community is unified and that's where I'm so happy that you're talking about this and I salute this look at what's happening right here right a person whose transition to a plant-based diet is speaking with someone who still considers themselves a meat-eater but is on a trial and our basis attempting to go to a vegetarian diet eventually probably making your way to a plant-based diet at some future point but we can have a civil discussion about this process without hating each other okay like there's no judgment here it's like gratulate you on making a contribution to easing the suffering of animals by even reducing meat consumption and attempting to look at going to a vegetarian option congratulations on that and that's how any vegan / plant-based diet person should look at someone who's contributing less less you're contributing less harm in the world to the animal kingdom so you know I'm gonna congratulate you on that and say best of luck in your efforts moving forward in that endeavor that's what any vegan should do when it comes to reducing harm well you know the first thing I gotta say is I and I realize that and this is my biggest contradiction that I'm working on and as soon as I figure it out I will celebrate it dude and I'll let everybody know you know that it but it's it it's that process like you said it took you 12 years after you know and I've been on the longest span is eight months and I celebrate that dude I feel like I would never beat anybody up for not getting there fast enough you know what I'm saying it's the same thing when it comes to the whole authoritarian approach as long as somebody's moving in the right direction okay I'm still gonna try to nudge them further but like hey you just stop advocating for slavery you know what I mean it's the same thing with this don't advocate for more harm of animals right you can move in that direction and we don't have to beat each other up as long as people are being honest and moving in the right direction what I get angry about is when people are trying to lie to themselves and others and put out information that is false when it comes to the truth about the moral truth about these things all I'm saying is let's go to the core underlying root moral philosophy which are called first principles which are called the principles of natural law and let's apply them to any given scenario that involves human action and then make the the knowledge based determination based on morality based on objective morality about where which direction our behavior should go that's all I've ever really asked well how why I get so nuts and you know angry sometimes is because I fully realize many people are not even interested in having that discussion and they just want to continue to apply a religious belief to their behavior and all I'm saying is we could not even be in the same place as far as where our behaviors are but we can have the discussion based on first principles and as long as we're mutually honest with the ourselves and each other in that discussion there's no need for hostility regardless even if people are in two different places you know yeah that's how we bridge the gap right you know that's how we make change and look at the word converse right we come together to change that's right to change together that's right and that's what I want to do I want to again say thank you for making the effort that you're making and I wish you the best with it and if you ever need any advice help you know questions in whatever way my experience can help you out never hesitate to ask personally I would always help you out as a friend you got it buddy I'll definitely take you up on that I love and appreciate you thank you for doing the work that you're doing thank you for coming back on live and I can't wait till our paths cross again and the real world brother they'll thank you brother I really appreciate that thanks for the great points that you brought up during the call excellent all right let's see who else do we have let's go - lets go - Carmen Koran gee Carmen you're live on what on earth is happening welcome mark what's up Michaels oh yes you are how you doing man ah baby how eyes up good good awesome dude you know it's so nuts like I'm in listened to the whole show and you know every time before you call somebody I wonder if it you're gonna jump to me and both times I've gotten into the show like the moment before I feel like I have this like moment of psychic intuition where I'm like this is it I'm driving my car like is it so that's pretty cool but I gotta say man this this this show and the show before these topics and the way that you cover in death no BOTS has taken this angle when it comes to this very polarizing topic can I comment on that comment briefly okay sure I have to say I would really really love to see more people covering topics and dynamics regarding what's taking place in our world from the moral natural law first principle based objective rather than any other political worldly financial economic you hear all of these things there's a political talk but so few people go to the moral core or the moral center of something and and so few argue from real first principles and this is why I you know sort of some people will say oh I talk arrogantly about myself and I say there's there's nobody out there really covering things like this but in all honesty there are so few you can count them on and you know so I I do listen I do listen back to some shows to see how I do and honestly when I listen back one of the things I always say and I know this is gonna sound egotistical to people but and to trust me it's not it's actually something that I consider with somberness and sadness okay I hear the job that I do on some of the shows that I I do and I say to myself why aren't more violent there are a hundred people or a thousand people doing this like this and even better and I can't believe that I'm one of the only people that his car is covering these topics from the points of view that I cover them from we need to do better in that sphere we need to have way more people talking about things from first principles so you know it's not a it's not an arrogant or egotistical thing I'm just being honest that I don't see it that much but when I hear myself talking about it in these ways I sort of like him like wow I did a really great job in covering it from that perspective which is so lacking in the world and I wonder why it's lacking and I realize it's because people really haven't spiritually gone far enough into natural law and moral the true objective morality based principles unfortunately because it's very occulted and hidden from us yeah it's a cousin but on top of it we're so used to like you know extract advocate rationalizations for things that's all we get taught like nobody it's when you're a kid like you just you you do kind of operate from like first principle you're like yeah like mom isn't like electricity of renewable resources why do we still use like gas for like cars and stuff like the mom would come we'll try to remember whatever a weird explanation that overcomplicates a very simple you know thing and that's like what people is like modus operandi is yeah like let me let me ask you something as a person who's been engaging in a plant-based diet for many years what is the biggest justification that you hear for people not moving more toward a plant-based diet in your life what do you hear from people who won't engage this dynamic or just acknowledge that it's a better way to be in the world because it causes less harm and like where they're falling short in even acknowledging that this is true what's the justifications you hear spouted from people it's it's a it's usually like a dead tie between you know the misinformed people who believe that it's necessary you know and it's less than that they believe is necessary and more that like they need it to be necessary for them to justify their behavior that's what I've run kotas that's the biggest one for me I think more people still believe that human beings must eat meat to be in optimum health they admire 20:19 with all of the science that has been fully shown and like I posted this book that goes into a lot of the science I I said I wasn't really gonna cover it that much on the show one of the things I want to do when I hang up the call with you in a little bit Carmen is I want to show people what I posted with the last podcast because there's a lot of good educational material there that I think people should go through and one of them is a book called you don't need meet by a researcher named Peter Cox and basically he covers in this book the science that definitively proves that the human physiology does not require animal flesh in the diet or really any animal products so um you're an athlete Carmen yeah prepare who is helping me with my natural law documentary he's one of the individuals who was editing it Carmen is an MMA athlete okay so you pate you participate actually in mixed martial arts competitively daily beat down don't think about that folks I mean he's trainable in MMA and particularly trained in Brazilian style Jiu Jitsu and he competes in MMA in the sport of mixed martial arts and you're a fully plant-based eating a fully plant-based diet a vegan check this out it actually helps me in a lot of ways like for example in my most recent fight got hurt in training camp I got an actual bruised rib like it was like - it was like I would say like 2 pounds per square inch of force away from being a broken a fractured rib but it was like as bad as you can get without fracturing and it was like two weeks before the fight but since basically what heals your body is the rate of which you can you know get rid of inflammation right when you ever play a base diet things like that heal at a phenomenally quicker rates like I noticed that when I transition and now like I can rely on it it's actually I rely on it as a form of white magic to be completely honest to sort of like transcend the injuries I do sustained like you know what I mean being a V doesn't necessarily make me the best martial artist so I do take my lumps but the good thing is being a vegan allows me to recover from those lumps faster and also not sustained injury I mean I don't tear muscles I don't pull things everything is super healthy on the on under the hood you know what I mean and that's where it counts yeah I mean I also I think another thing I should have mentioned when it comes to like positive on nutrients to put into your body things that help with inflammation like turmeric you know this is a incredible spice that people should be using for anti-inflammatory as an anti-inflammatory you know and then you mix that with things like black pepper you know piperine and it'll be absorbed into the body even faster and more readily so you know people should look into turmeric formulas you know or just buy a bunch of powdered turmeric and encapsulate it by vegan capsules and you know cap it up and you know just take lots of it because it's anti inflammation inflammation is the source of just about every disease exactly it's the root cause and see and that's kind of like how I like to try and approach vigas them I take the balanced approach but I also try to almost in a way like sort of like market it to the individual in the sense that like hey look this is going to make you feel like 50 times better then however you feel right now if you're carnist like on every level physically mentally and spiritually your your life is just gonna glow sure you know a lot of people Carmen I want to say thank you so much for the call I'm gonna I'm gonna jump because I wanted - one thing that you said there and I'm also going to show people some of the things that I posted with the with the very last podcast that I put up so Carmen thank you so much ladies and gentlemen also Carmen is gonna be one of the co-hosts of an arkadelphia we'll be talking more about that conference I'll be speaking at it here this coming fall in Philadelphia so Carmen thanks so much for the work that you do and thanks for your contribution to the show today awesome like thank you for having me I can't wait to hear the rest of the show you got it so our Carmen brought up a point that like you know when people do transition to a plant-based diet they do feel more energetic and healthy and a lot of people will dispute that and say that like oh meat makes them feel better okay well here's what happens with meat it's actually decaying when it was it's already decayed when when you put a decaying substance in the body your body releases a lot of things different types of chemicals largely from like the adrenal system that are identifying it as something that is toxic and that is decayed and that doesn't really belong in the body and that will often give someone an energy boost because of how the internal chemistry of the body is dealing with an internal toxin and then that is mistakenly identified as giving you energy okay the very small amount of nutrition that's coming from the consumption of meat is coming from the actual plant-based nutrients that make their way from the animal into the flesh of the animal when they consume it and really that's getting that secondhand and it not only uh like what Nathan Radetzky related to the moral implications of eating meat but there's another occult law that many people don't know about because they don't really see it at work in the world enough is the law of assimilation this is not what is considered one of the hermetic principles but something that is taught in the Rosicrucian tradition and in the free Masonic tradition and if you really study the law of assimilation we realized that in order to get the same thing that we can get directly from a plant-based diet our body has to work much harder break down the complexity of physiology that's why eating that's why most people tend to go on the side of eating herbivores or other beings that are eating a plant-based diet like chickens cows etc okay if you were to choose a carnivorous animal to consume you'd step up in the law of assimilation another layer of complexity because that animal is eating often an herbivorous animal in order to get it's you know nutrient requirements met as a carnivore a nature-based carnivore okay not a carnist that is not a natural state for a human being to be in but that natural carnivore is then eating an herbivore in most cases and then it's having to break that down and then you're having to break it down so like in the Rosicrucian traditions specifically talked about in the book that I posted with the last podcast this law of assimilation is mentioned and it's like talks about like that if you were to eat you know like a lion for example that would probably be like one of the worst meats that you could put into your body for that very reason because of that occult law of assimilation so I want to switch over to the computer very briefly let me just bring up the page and I want to show people what I posted in the last podcast I'm going to go to the podcast page you could switch over this is the podcast page for the what on earth is happening dot-com website if you just click the podcast tab there okay this is show number 207 okay and this is the description the date and the description of the topics underneath that of course I post with every podcast the related images okay that you could download as a zip archive and then I posted related documents we had talked a little bit about the note read um event during the burning of notre dom during the season of sacrifice so i posted folk and ali's pamphlet called or smoked you know essay called mystery of the cathedrals and then that post from the person who was a carnist spouting all kinds of inaccuracies about you know not eating meat I posted my PDF document of his Facebook post but then there are some books I wanted to just talk about the books that I posted with the podcast very briefly I posted natural cures an epub and PDF format and here's the book I was just talking about the Rosicrucian Cosmo conception this is a Rosicrucian text by the occultist the Rosicrucian occultist max hind l I highly recommend reading this about the differences between the kingdoms of life namely animals and human beings it contains information about natural law morality the law of assimilation etc I'll just briefly show you what happens if you click that in this case it just simply downloaded the PDF there okay so some people it'll come up in their browser and there might be a browser handler for the PDF and you can click save or you know save to disk from there in my case that type is set up in my browser preferences to simply download to my downloads folder which is how I prefer it then you can click it from there and there's the full book and you can see I can scroll through every single page of the book it is the full text okay so just showing people you know what I'm making available with the podcast this is only available on what on earth is happening calm I generally don't post this to video sharing sites this did all of these links so you would have to go to the podcast page of what on earth is happening to get this material okay and then underneath that there's next to that there's a book called you don't need meat okay this is an epub and PDF format this contains a lot of the science that proves that human beings are not carnivorous and can fully sustain their life and energy and health and optimum health with a plant-based diet you can read about all of those findings there I posted a link to the Earthlings documentary and that short video clip of the dog helping the fish who was out of water trying to you know push the water over the fish who unfortunately was probably already gone and then there are related links I posted information about reverse osmosis systems Breville juicers Vitamix blenders general juicers and blenders air for the intestine cleanse vegan protein powders in two different flavors so you get the idea there's a lot of supplemental material that gets posted with the podcasts and I just wanted to show people where they can find that and how they could download that material so that being said we could switch away from that and I'll start moving on to the next caller all right let's see who else do we have on the line let's hear from let's hear from Patti lager Patti you're live on what on earth is happening welcome hi mark how are you can you hear me okay yes I can great to hear from you yes and it was great to hear from my old friend bill up in Seattle so hi bill I'm glad you took my call and I'm so grateful that you are addressing this subject again I remember you know I became an anarchist through veganism actually you know when you think yeah when you I mean when you can see that animals are not being treated for what they are you know which is like a life a miracle that's kind of how I look at it I'm a biologist I'm a physiologist I teach human anatomy and physiology and I marvel at just the complexity and the biochemistry of everything that goes into making life express itself the way it does and seeing harm done to that and even at the smallest level you know with a little fly it does it up it's upsetting to me so then through that I realized well you know I guess as a human I'm being treated that way by a power that you know I later came to find out where were the powers that should not be and you know just all made sense it all started falling in line so so it's nice to see that and I know one thing as I went further and further on my progression along anarchy it came to find out that not a lot of anarchists saw animals the same way I did and you were kind of one of the first ones that actually brought that up as you know animals should be treated the way the same way we as humans should be treated as beings that deserve respect and compassion and so I want to thank you for doing that thank you I appreciate that Patti let me ask you something um how many years were you eating a plant-based diet before you tied it in with Anarchy and then went to an anarchy mindset how long did that journey take you well and I became a vegan in 2009 after watching Earthlings Act I was vegetarian before that but Earthlings really made me kind of step over to the line of veganism it's a tough one to watch yeah I mean yeah I've told people in the past I watched I forced myself to watch it twice because the first time is visceral and painful as it was I felt like I needed a little bit more of an urgent a hammering into my psyche of this - that's how big of a meat-eater I was how I knew I was attached to it I knew I was heavily attached to it and I'm forced myself to watch it a second time which was infinitely more painful than watching it the first time and I won't subject myself to it again I won't watch it again so I've seen it twice and that's really more than enough for people who really want to know what really goes on with the suffering of animals you should make yourself watch the documentary Earthlings all the way through at least once and it's traumatic you know so beep it is yeah it really is traumatic it's um I mean I still have kind of like I guess PTSD imagery from that movie where it just comes to mind and it brings tears to my eyes but I'm you know that was 2009 and then in 2011 maybe 2012 I came across stefan molyneux and then it was in 2000 2013 that I came across you so um yeah that's when all of the pieces started coming together you know that humans animals are all miraculous beings that are capable of respiration and feeling and sensory so it was just you know it all came together at that point and we should all be free I mean that's what we should want for all life you know it's like this is about freedom and it's not just about just freedom for us it's not my freedom its freedom with a capital F actually make it freedom with all capital letters you know that's what this dynamic is all about that's what life really is all about is endeavoring to be more free and we we are more free when we are more moral when we are doing the least amount of harm that is what will create the optimum amount of freedom that's how the laws of reality actually work that's what natural law is and that's how it works that's why it's so occulted that's why the occultists of our world do not want us to understand how those laws function they want to keep that hidden from us at all costs so Patti thank you so much I mean is there anything else that you want to bring up or ask because I you know I think more people I think should be coming to Anarchy through veganism I see more of it happening the other way around I see the anarchist movement eventually getting to the idea that you know that freedom should be extended to all creatures but I don't see enough to me of people in the plant-based food movement recognizing the illegitimate of government and man's law and seeing that as slavery I attend not attend but like I have attended some meat not meetings but like events that people in the plant-based community put on and host you know I haven't really joined those organizations or go to a lot of their internal meetings I know people who are involved and I've gone to some events that they've hosted and I don't see a lot of people who understand the illegitimate E of government at those so how do you let me ask you this then how do you how do you think we can bridge that or add more numbers to the people who are coming over to real anarchy of the way you did by looking at it from the perspective of all beings should really be free not just humans but animals as well and when when they're animal activists they should understand that you know the the the forms of subjugation that humans are subjected to often like animals through the slavery called government should also end how can we bridge that gap well I think it's just we need to be more vocal about the truth and who the real threat is you know all of a lot of vegans try to work through the government to create laws that are you know giving the the chicken a bigger cage or you know giving them a little bit more incremental freedom than they already you know are suffering from the lack of and we have to let them know that it's the government that's the problem government is slavery and if we want freedom for these animals we also have to look at ourselves that we are animals enslaved by the same consciousness and it's it's you know it's a consciousness that's trying to limit us so I think that the more that we can just speak that truth the better and you know I I do I've been offline for a while with regards to my own weekly live Q&A I help people learn about how the human body works with regards to detoxification and I've been using your ideas and sharing that with people and I've been sharing or your podcast with them and people are you know they understand it they have this innate understanding that you know we are being controlled and there are there is an agenda out there that's limiting our freedoms and we should question these things so you know it's just slowly we're helping people awaken and become more aware and that's really what elevating our consciousness is is helping us see what we had not seen before that's right and it is a process like any other I feel like it's not moving fast enough certainly not for my likes and I feel a lot of people ignore the truth about it but that's where our job comes in we have to be more vocal just like you said we need more teachers of this one person or even a handful of people cannot do it folks you know that's what the great work is to do Patti I want to thank you so much for the call brilliant points that you brought up always great to hear from you thank you got it but Patty's exactly correct we need more voices you know we need more teachers you know it's or we're not we're not gonna make it things are not gonna go well you know and another thing that she said is look at how much the government's involved in the suffering of animals look at how much they subsidize the meat industry you know that's going on and the dairy industry that goes on all the time you know so not staying silent about this is a huge part of the effort to change it you know and this is where you know I see everyday people patting people on the back you know and saying great job I keep doing the work that you're doing and I keep asking help me help me you know and it's great when people want to contribute and do contribute that's awesome we we need that help as well okay the best way anybody can help me is to get involved in the great work themselves by developing the courage to speak the truth that is the absolute best way anybody can make a contribution to this work because the more people who are speaking the truth the more we're going to be able to get it out there to all of the people of the world and that's what really needs to happen because contrary to popular new-age belief as I've talked about in my new age bullshit seminars for a quantum shift in consciousness to take place on a planet such as ours with the type of species that we are living on it numbers are required it's not something that happens with small groups of people as many people believe erroneously we need large numbers of people to tip the dynamics and tip the scales in the opposite direction that's why it's called a quantum shift folks a quantum leap or a quantum shift in consciousness what is it based on the word is quantum that's the word quanta from Latin which means an amount a number of something an amount of something it's in the very word a quantum shift means a shift in the amount of people who are doing something we're thinking a certain way you know this is what people never really make the distinction in language and they believe this new-age variant of what it means for shift in consciousness to take place it's all this tiny little group of people is gonna drive it no it has to be driven by the majority of people for really things to change for the dynamic to be flipped and this is what a lot of people don't want to hear they want to believe this new-age notion that like a small sliver of people or it's gonna are gonna drive all this change it never has worked that way and it never will people can influence that change but the change doesn't take place until most people are doing it until the majority of people have actually converted that into real world action that's when the change actually takes place you can argue about how much small groups of people will influence something like that's why I continue to do what I do people will say what difference can one person make a lot but guess what a whole lot of people driving that dynamic can make it happen a whole lot faster and right now we're really playing beat the clock okay if you don't think that you're not paying attention we don't have an unlimited of time unlimited amount of time to change the dynamic that's taking place on this planet okay because evil can and does win and destruction can and will occur you know and if you don't believe that Nature has a tipping point itself where it says this far and no further with this species that's causing this chaos here well I mean you're very naive about how nature works and how eventually it takes things into its own hands and when it decides to do that humanity will not stand against that force okay so we need to have a an adult grown-up understanding of how those nature forces work let's see who do we who else do we have let's go - lets go - Ivan from Phoenix Ivan you're live on what on earth is happening welcome my friend Ivan are you there you are unmuted at the server end make sure you want to meet your microphone Ivan from Phoenix alright I'll try to come back to you alright let's go to ah let's see let's go to essence of an Archon II essence of an ur Connie you are live on what on earth is happening welcome hey thanks mark can you hear me yes I can alright well I'm pretty much in the same boat as a build Church there absolutely still eat meat trying to work on making the transition haven't seen earthlings yet how long was it between when you saw Earthlings in stopped eating meat I think I saw earthlings the year that it came out which if I'm not mistaken was either 2006 or 7 it was definitely before I became a vegan and before I became a vegetarian in the year 2007 so I'm assuming Earthlings came out at least maybe one or two years before that I don't want to definitively say maybe my somebody can my producer might be able to look it up and just tell me but I saw it I guess around late 2006 early 2007 if I recall correctly and I went vegetarian in April of 2007 so I have been vegetarian now for two over 12 years okay Earthlings was the year 2005 I'm being told good okay so 2005 Earthlings came out I saw in mid to late 2006 and then I decided in early 2007 that I was going to give vegetarianism a try and I started attempting to become vegetarian by weaning off of meat in early 2007 it took me four months to make this decision that I was no longer going to consume meat and I was going to be vegetarian from that point forward and I never looked back after about April of 2007 so last year was my 12 year anniversary of being vegetarian I struggled with going fully vegan and attempted it and kind of like fell back on just plain vegetarianism for about 12 years and last year in mid 2008 so it's been you know we're coming up on almost a year I think like at the very beginning of the summer around June I decided to be fully vegan so you know in a couple months about ten months I'd been fully vegan fully plant-based diet so less than one year for me about 10 months fully fully plant-based okay well yeah I plan on watching that movie pretty soon and even as someone who still eats meat the message that you've given over the last two weeks is so easy to understand and I don't see how I don't see how anybody could argue with it that's all I'm all I'm asking is to hear the argument from the objective moral standpoint in natural law that's it then let's be honest regarding that and then we could talk about where we are all at in that process we're not involved in it and that's all like it doesn't have to be this war between us you know it's like okay you're still eating meat we're having a civil conversation and you acknowledge the moral aspect of it and understand that you could change your behavior to do less harm and as long as we have that basic understanding then you can make the determination of how you're going to proceed I'd like to even just see that in the whole political sphere you know to help people to understand hey if if this is really slavery and government is really slavery what can we do to try to work toward eliminating it just like how can we wean our way off of doing harm to animals and eventually not do harm to animals they're living their lives they don't want to be harmed or killed just like we're living our lives and we don't want to be harmed or killed it's very simple to understand from a moral perspective but here's the key if we're being honest with ourselves you know I mean we just need t-shirts made with that on it if we're being honest with ourselves you know cuz and the word if needs to be the largest word because that's really all about it's like that's not like yeah so I want to just thank you for your honesty right thank you for your self-respect regarding your honesty even though you're you're still eating meat we can have a mutually respectful conversation because we're both being honest with ourselves and that's all I ask anybody to do oh yeah exactly and like I was mentioned on the last time I called I've got a radio show in town and since that last call I've been talking a lot about these sort of things on my show and talking to friends of mine around town about freedom of humanity and truth and this one people people are so hard-headed I mean there's people that I've considered you know decent people and I've liked for a long time and they just can't hear it it seems like up and it's like religion yeah be honest it's religion you know this is why I call religion the only one and the one and only problem because all incorrect forms of thought that we can't let go of our religions that are holding us back binding us to the lie and tying us back holding us back from getting to the truth which will actually help improve the human condition it's all religion that does harm you know hey oh yeah again as I've said in the past a quote that people have made into an internet meme is you know I've said we need to as human beings stop trying to make our religion the truth and start making truth our religion you know yeah that's definitely true and I got two quick things before you move on to the next caller sure I do a lot of gardening and just growing your own plants seems so important to and especially with when you consider industrial agriculture and I mean just looking at the face of it it's bad especially I was looking at a Google Earth shot the other day and you see all these farms and it looks like a low resolution digital photography or for photographs oh yeah but so many animals get harmed in the runoff and in the giant combine harvester that sure grow and you're growing your own food even if you do still eat meat that can help lower the amount of suffering sure and we could keep it local you're you're using the the local nutrients you you know it's another thing is like I have a few things to say about this because I have to be honest with myself and with other people I haven't really done much in the sphere because of how busy I am with what on earth is happening I have a little bit of land that I could use to plant some food out in my backyard and it's a very small amount comparatively but in South Philadelphia it's actually like considered a large backyard okay so but I don't really have the experience that no hell I have not really tried my hand much of gardening a little bit a very little bit but I'm beyond quote Ampang intended on beyond green regarding gardening okay and I don't have the green thumb so to speak you know I could use help with that you know and it's like I want to learn more about that and and practice it but like it's like most of my time is consumed with this I don't really have the time to dedicate to that here because I do this type of work this is one of the things that if I didn't have to do this type of work if I wasn't like like morally obligated and forced to do this type of teaching because if it was just common sense knowledge I wouldn't have to spend my time doing this and my resources doing this I would take up two things the the two things that I would want to devote more time and energy to would be creative efforts and nurturing efforts I would want to get involved in more art I love music and have done that form of art but I would want to get more involved in actual different forms of art like drawing painting you know a digital artwork etc and I would want to get more involved in gardening you know learning hell things optimally grow mate planning food for myself etc and these are things that I just have not had the time in life to dedicate more time and you know learning to because of the nature of the work that I do with teaching you know natural law and morality that's one of the reasons I wished humanity would get past this you know silly stage and condition that it's in by believing in false religion and you know turning that into heart and cult belief systems and you know then my time would be freed up to do more things like that but at some point maybe you know I should try my hand at it here at some point in the future because um you know it definitely is probably something that's also mind centering like a meditative oh yeah very therapeutic right and I was glad you mentioned old John Kohler the other day because not only does he had a good juicing channel he's got a great channel about growing your own green excellent the dude's great he's got a great attitude I love his information you know so I highly recommend people check him out oh yeah so Dan McDonald helped me a lot with you know green juice recipes made a lot of those did a lot of good for my health so I think people should check him out as well and again to me the king of juicing was Jay Kordich you know I mean I I grew up watching his stuff and just learned so much about what to do with juicing from Jay Kordich I didn't link to them in the last show I probably should definitely link to some of their videos or their basic channels on this with this podcast for sure so thanks for bringing them up oh yeah and I've got a juicer and I've done some juicing but I definitely want to get more and there's a bunch of good resources on the internet for because gardening's doesn't have to be expensive or hard necessarily there's a lot of good trick tips and tricks to make it cheap and easy sure

I do have a little bit believe it or not a small amount not in any way any kind of an expert my grandfather was a carpenter he was like kind of like a master carpenter and um you know he taught me a little bit I have a minor amount of carpentry skill I just helped a friend build some wood based garden beds that she's going to pick has a lot of land and gonna be growing a whole lot of food out in her outdoor garden and I showed her how to replicate the work that I did you know basic woodwork to make basic garden beds and you know that's that's the extent that I've gotten involved in the last you know little while in helping with gardening so oh well that's a good start to I mean help out a gardener they'll probably give me some produce that's right you know that that's kind of like you know what the implied agreement was so you know rightfully that'll come to fruition at some point well and then I got one last question but you can shut me off after that and go to the next person what do you think about the health effects good or bent about fermented foods like lucha or kimchi that sort of thing it's another oversight on my part that I really should have talked about and and really given some visual images regarding you cannot underestimate how important ferment fermented foods fermentation in general is in the human diet it totally activates positive gut health which is where all the immune system really is starting at is with you know the the health of the digestive system and kombucha I drink as much as I can I I was brewing it on a daily basis you know I haven't done that recently you know barb it still does kombucha brewing and gives me kombucha from time to time my assistant Leah does kombucha brewing and gives it to me from time to time I buy it in store as well but I wonder if you can make it yourself that's the best way to do it it comes out the strongest and the most health beneficial that way especially if you've got a really good healthy colony so definitely I advocate for drinking and brewing your own kombucha and just any type of fermented foods making your own fermented pickles making fermented beets I drink because sometimes I like sauerkraut I mean making your own sauerkraut you know cabbage is just so healthy oh yeah it's just one of the most for that for the gut for anything in the gut stomach intestines the whole digestive system juicing cabbage is unbelievable but fermenting sauerkraut to make fermenting cabbage to make sauerkraut you should definitely get into that as well very easy to do very inexpensive and the health benefits are through the roof so fermented foods I absolutely advocate all right I'm glad to hear that because I love fermenting things yes but when you'd mention about me to fermentation causing all the effects in the body that's just meat base yes exactly okay all right well thanks for talking to me mark I'll talk to you later and keep having a great show thanks so much for the call really appreciate it all right okay all right let's go to let's go to a one-way see grati own a gratitude tone if i'm pronouncing that correctly you're live on what on earth is happening welcome greetings mark thank you so much for taking my car it's just it's one why okay weye like I see a stands for create sin grata tell this tone of gratitude excellent much appreciates you taking the call my friend we've never met I've been wanting to be in touch with you for a long time I've got like a list of ten questions here I want to handle through but okay the most important one that I think comes to my mind is have you ever considered if if the financial component was taken care of doing a tour of some sorts and like coming around so all around everywhere it listens to your podcast and if we can gather enough people in any given area is that something that you would be open to entertaining the idea of well I appreciate you asking and bringing up this dynamic I have sort of come to not really relish traveling unfortunately because of how much harassment is involved with it whether in any capacity I and I understand that is partially like giving in to what they want which is for people not to travel but I so dislike travel and I used to love traveling I used to literally I used to just get in my car and drive sometimes and just wherever I ended up you know just stay there not not for long periods of time but just like you know take a whole day and just wherever I drove I drove and experience what it was like there for a little bit you know and now I I just I won't even do that because of how much harassment sin volved even with driving with these scumbag Road pirates you know all over the roads it's just how many busting in the United States just like just they're all they do is harass working-class people that's all they do just endless harassment to try to extract money from them because they're just scumbag pirates of the the modern crown called the government and well there's trash they're just trash whose parents were trash there's a silver bullet though and anytime one of these people engage with you there's a silver bullet all you gotta say is I'm sorry I don't speak legal here's my lawyer have a nice day and just let him go back to the little computer type in whatever that means and generally speaking they leave you alone it's something I found to be successful so that's something for everybody to go out there and try please give it a shot absolutely wrong I mean some people may you know some cops may do that but I'm not gonna give that I wouldn't say that as advice because some don't care what happens to them and believe their God and above any repercussions and in many cases the cities they operate out of are that corrupt and they'll get away with killing people that's that's how certainly is in many cities you know certainly always be conscious of your time and is the right thing at the wrong time is the wrong thing I always say be conscious every case is different I'm not giving any blanket shirt I'm just saying know yourself enough to at least come from that position of this is an adversary and you know I mean it is an adversary it's the art of war just I mean that's these people's Bible to go back to what I was saying about traveling I would love to have a quote unquote tour regarding this material they're just in general what I talk about on what on earth is happening or like a natural law course tour okay but at this point what I would quote require to do that would be some form of a private mode of travel provided for me on the ground because I'm no longer going to take buses trains planes I don't want it I don't want to travel in any capacity with anyone who is providing a service of travel because of what they quote subject you to and consider you to be a subject of so I don't want to use any public transportation services for any reason anymore so if someone were to say I'll arrange a tour with a tour bus or private tour bus driver I might consider something like that but it would have to be you very much talked about and arranged specifically beforehand and I know that sounds almost diva-ish but I'm done like all those travel arrangements for myself and I'm done taking public transportation anywhere it's absolutely true I mean security first always that's how we operate so that leads very nicely into my second question which is when is the best time for you and I be able to discuss some things off the air well I mean you could contact me by email and let me know what you want to talk about I don't necessarily you know can't always make time for things like that privately because of how many people want to do that but you know let me know what you want to talk about and I could consider that the other aspect of travel I want to briefly mention since you brought it up regarding this is the non reciprocity of defending yourself with a firearm anywhere you travel within the United States that's why I don't really want to leave the the borders of my state anymore because who is dares to tell me I can't defend myself with a firearm I can't carry it over an imaginary line I don't want to disarm to travel throughout the country because there's no reciprocity to carry a firearm anywhere I want it in the country first of all I shouldn't need any permit to carry a firearm like I do here in Pennsylvania every state should be a constitutional carry state without any question absolutely I mean in the state Dannette did not create my right to defend myself you got at all ever and you know that's the whole thing that I was speaking with my friend about this past week he said you don't have rights you are rights if they're doing that they're part of our general natural makeup because right the universe and the rights are embedded in the universe they cannot be ever separated from us we can only do the cult religious belief that that is possible to do and people believe that cult belief yeah unfortunately yeah right absolutely and I had a I had a meditation the other day and I was like I'm really curious about your thoughts of that day what what level is the top of that G encompass that Masonic symbolism is there a level where that stands for gratitude on the light side it's a duality to that yeah I haven't heard that specifically expressed in the free Masonic tradition but it is something I would most absolutely include in the meaning of the G in the middle of the compasses and square along with many other things like the generative principle you know which is care I mean care and gratitude often go hand in hand I mean I wake up in a state of gratitude for at least knowing what I know that I'm not one of the mindless golems of the world you know at the same time then that puts me in a position where you know I don't like the human condition or the pain that it causes to even be here amongst people who are so unconscious you know so it's like it's a dual thing when it comes to whether I feel grateful or bitter regarding the state of the world I feel grateful regarding the state of myself I often feel bitter regarding the state of the world as I think that's easily understandable but I would definitely say that the G in the compasses and square in Freemasonry could represent a state of gratitude because I think if we're we have gratitude about where what we have developed in ourselves that the universe will provide more for us to continue to go to the next level I think gratitude is a that's part of what is called in spiritual teachings the the law of allowing it's part of the law of attraction it goes hand in hand with it so you have to express gratitude for what the universe has revealed unto you that you have come to understand and integrate into yourself and that state of gratitude will bring on the next benefit the next state of bountifulness of abundance right absolutely and thank you so much for that I mean I've got my part of my path has been to ultimately recognize the self as a synonym for gratitude I don't know just takes a minute to realize but I mean every time I refer to I I've trained myself to be grateful for this moment to the best of my ability every single time and that's what I becomes that's why they call the moment the present you know it's a gift or even grateful for it previs and presence right that's right and that could be multiple gifts so excellent point it's this is about this is about present moment awareness it's a topic that's been very important here on what on earth is happening so thank you for that hey it's an honor and a privilege so would you think it's a good thing for there to be some form of codification to natural law in other words on a first principles just basic first principles trying to write down the totality of it probably would not be a good idea I think it's best expressed through the oral tradition personally which is why that's been the medium for my expression of it I think that's how it's always been taught because it has to be communicated I think through vibratory energy not written language personally this is my personal take on it and I think that's what resonates with the heart based intelligence the most is when you hear it spoken so I don't think there's strict and rigid codification rules like laws that could be written down as I've often said natural laws written on the human heart and it's written in nature so well if it's something that well I mean if it could be something that the individual would be able to manifest for themselves literally take it write it on a piece of paper and they put their mark on it now it's there cuz think about how many people operate having never signed to a quote unquote Constitution I would say don't just write in something words you've write it as two words then don't school that's the the simplest of easiest and a bust expression of natural law that I've ever personally heard and it sums it all up that's what we're here to learn we're here to learn don't take which that which does not belong to us that's what every natural law transgression is ultimately a form of theft so just don't take that which is not your property to take and we'll be okay we continue to want to engage in acts of theft we're gonna learn the lesson the very very very harshest way imaginable so thank you so yes we we have to admit that would be and I will be my last so we have to admit to this entire system and largely exists as a fiction right I mean it's pretty much it's a story that we're all telling each other and I mean and almost in time believing it religiously religiously so and it's a very destructive story were telling each other so my question is isn't it possible that there could be a more constructive story that we could come to there was sure oh he's of enough to be codify some way and then just be the rules of how the games would play and I'd love to take this conversation off there Mike thank you so much you got it I definitely think it's possible I would lean more toward not being too codified structurally with it I think what all the things we've talked about here since day one on water what on earth is happening is that story is the news story is the new better way of being in the world and that could be added on to and we could refine it we can look into the details endlessly you know but you know certainly the story that we're telling ourselves now which is a gigantic lie is very destructive and does need to come to an end by us not speaking it anymore and keep telling other people that it's true and supporting it and there is a better story for Humanity we have to learn what that is and then teach it to others you know and that is all about that's what natural law is all about so thank you so much for that call great points let's go to let's see who else do we have here let's go to let's go to mr. Miller mr. Miller you are live on what on earth is happening welcome okay yes I can loud and clear so um yeah thank you for taking my call and uh everything that you do the last caller brought us some good points about you are rights rather than you have rights that's kind of interesting concept since rights are embedded into the fabric of creation and we are part of that fabric of creation how could they ever be separated that's what I word in alienable means incapable of being alienated or separated from something yeah yes and I like the way that's put another comment would be that the G you said the generator if generative excellent I mean that's another thing you know that goes hand in hand with the law of attraction and allowing you know we have to be willing to give in order to receive you know when you put energy out energy comes back you know so it's all about that positive and negative polarity flowing circularly it's a circuit you know so yeah it's generosity and gratitude absolutely you know and that's why I'm so thankful for the generosity that's been shown here and I consider that that comes back as a result of my generosity to put out this information largely for free you know only asking for donations to continue to support the efforts and you know then step up the production quality you know which obviously has been done here on what on earth is happening and will continue to be done you know and that's you know why I always want to try to keep moving it forward you know it's about it's an evolutionary process to move it forward and step it up to higher levels and reach new people you know so it's all part of generosity and gratitude the great points that you guys are bringing up especially even in relation to that people may not think that that relates directly to what we're talking about here with plant-based a plant-based diet but it absolutely does because we should be thankful for all the the generosity that the earth the bountiful nature of all the the plant-based nutrients that the earth gives to us you know it's like this sustains our life you know and we should be very thankful for that so great point if I don't know if I've lost him you still there sorry it's somehow you were muted accidentally I'm sorry you still there no maybe we did actually lose him well I apologize for that but uh excellent point regarding gratitude that you brought up there so thank you for that let's see let's go to dutch patriot dutch patriot you are live on water and earth is happening welcome to the show thank you for taking the call absolutely okay you hear me yes I can loud and clear okay okay I hear a lot of good points on the legal legal side and and a lot of people are thinking that you know you have rights when you fulfill your privileges but then the first question I ask is what is a country a country it's not even a religion so you know if we embed all the people with passports country called America or the Netherlands or what people call the country you're living in then we fulfill the obligations or we give their government the power to give so we already have them we don't have privileges before we have our rights you know governments are built on our consent it's ostensibly yes they ostensibly are but if we really strip away you know the the the legalese and the the implications if you really look at it without the violence the force backed by violence it ceases to be a government and it's simply a cooperative effort so this is why I recommend Larkin roses book the most dangerous superstition because in it he very clearly defines the characteristics that are necessary for something to truly be considered a government when it comes to country versus nation or a nation-state I also make the the delineation that one could look at the the term country to simply mean the land and the people living on it which is why we he just had different names for different geographical regions were certain people with a certain cultural way of being in the world were living it together with each other so I look at III I see that you have the word patriot in your name and that people have often criticized me for using the word patriot but I think there's a true meaning of the word patriot and there's false definitions and ways of seeing the word patriot that a lot of people graft on to and think there's only one meaning of it and it's like you know a false patriotism states laws and ways of doing things whether they're moral or immoral and supports it no matter what they do but a real patriot supports the people and the land that the people are living on and once and to be moral and puts it's in his and his or her entire effort behind supporting the the freedom of the people on that in that geographic region by teaching them to become more moral and better people and that's why I consider myself a patriot of the the quote country or land that I am living in and the people that I am surrounded by whether they even understand what I'm talking about or not it's like I'm still going to do the work to try to teach them and and uplift them in consciousness so you know it's that's my definition or the way I see country and patriot so you know thanks for bringing that up and I think I kind of made the distinction or the delineation of where I see those terms but patriotism and anarchy as both the same stigma on definitions so now yes yeah they don't understand what they really mean they have their own connotative definition for those terms absolutely but getting back to the corporate the corporate the country illusion is that you know I've noticed that everything all countries are just like corporations and sure like they are just corporations and what people need to understand is that you know we're all playing checkers on the chess board yeah right now that's a good analogy of what's going on like people are not understanding the complexity of what's really taking place and are looking for very simple that they're seeing it from a very simplistic perspective instead of understanding how really far down the path toward evil and enslavement we have really descended and they're our masters are playing that game of of chess where we're not we're barely playing the game of checkers as a people and we just keep on playing the game checkers yeah yep where we have the confidence is terrible yeah we have to become the same chess masters that our masters are and understand the game that is being played on us we haven't even sat down at that board yet I think those are great points that you brought up Dutch Patriot thank you so much for the call and he's right you know we're not we're not getting how far psychologically advanced the people who are really controlling us are and all the different dynamic components that they put together in that game of control you know and I think food is one of the biggest what we put into our body is going to inform our brains and our mind and become an integral part of how we think and ultimately then how we behave you want that to be optimum you want that to be as clean as possible you want to be that as nutrient-dense as possible that's part of self respect that's part of building a better body which ultimately is building a better brain and ultimately building a better spirit you know and it's it all plays in to this it all played nutrition plays into one of the that the the lowest base building blocks the foundational building blocks of everything that we build up on top of it and so people so few people think of it that way the old adage you are what you're you eat is literally true it's not just a metaphor it's literally true because it becomes your brain your body and ultimately your behavior so great point there let's go to lioness lioness you're live on what on earth is how okay mark can you hear me yes I can welcome to this Oh awesome thank you thank you for having it for me becoming a vegetarian which was a long long time ago and I'm not right now was a trip that I made to the Atacama Desert and for some reason I came back from that freaking mountain of adit Aryan and completely changed it was a frequency thing it was weird it was really there and make the conscious decision no felt like it was something that you just had to do after literally being in a physical location yep yeah so that that common desert is in Chile it's a very very strange place and it's the driest place on earth there's this salt desert there are volcanoes it's an extraordinary place and they meet that because they don't have much so they have Lama Yama Rama and they have tomato and rice and very good meat the the the food was very very very simple and that's all they I'm not a lot grows in that this not me be quiet me maybe a place like this is what certain people called an energy vortex and who knows what certain places could how they could affect consciousness you know sometimes are more dense energy points like could be at a chakra or meridian line of the earth you know I definitely think that there is such a thing as energetic frequencies that flow in certain areas of the earth and this is what was known in the occult sciences as the study called geomancy understanding the energy flow and grid patterns of energy of the earth and a lot of occultists have worked with that type of you know geomagnetic energy so who knows and maybe very well could have affected your physiology and or mindset Oh totally no I I came back I mean I was how old was I I went I was about 25 24 and I I was shooting a show there and I was there a month and I I complete it was weird because I'm the way there I read this book and I forgot the book but it was kind of like as a actually very esoteric book I mean and he talked about all this except I mean I was not really and I mean my mother was and I mean I couldn't take it or leave it I mean I was just 24 hours just you know living my life and I and when I came back I mean my frequency had changed so much that I could not eat the meat like I you know I could not eat red meat I could not you know might like my thinking completely changed you know completely started seeing things in a different way you know my dreams change my visions change I mean I just changed I just you know I just completely changed me and I was think about it earlier how did your body and physiology react to the sudden change was it was it like did it go through a process of adjustment um no it was like a fish to water really I mean it was not it was not traumatic it would there was no of course our environment back then you know was not as toxic that is it as if now so I I imagine it would have been different but over there it was like you know I was just it was just like a click really and and I remember distinctly the volcanic and you know the the masculine the masculine and the feminine there was something there was something that what you're saying is correct I mean there was something there right and I remember the the frequency of the volcanoes and then going higher even so it took us we were at a certain altitude and then we wouldn't even higher also there was no even no electricity they always only to say from like eight o'clock to ten o'clock or something like two hours a day right many indigenous places like that don't have electricity store I've talked about on the show in the past how much of the earth population still doesn't even have electricity or even you know indoor plumbing they don't have water or toilets all running into their home it's amazing how much of the earth still live is like that you know probably over 50% still of people don't have access to electricity and running water it's unbelievable that we're living in what we consider the modern day you know in modern times the technological age and over half of the human population still lives in what we would consider a primitive technologically absent state yeah but the lack of electricity really does something to you oh yeah you know when you've noticed when there's a an outage there's like assignment so let's not be surrounded we're surrounded by electromagnetic fields that are burning through us absolutely because the whole AC current system that Tesla you know helped invent it and helped basically get wired to all of our homes you know was not meant to be the end of how we would power devices you know the new cleaner ways of doing it but those innovations are largely blocked in the modern world yeah he was working on that he had two ways of doing it one of the levels of the atmosphere and then also from the magnetic from the magnetic field of the earth sure so you're absolutely right but and you have your heart of the lily waves do you know what that is so there's a forgot his name but there's some physicists that invented a way to put on top of the electric currents a wave that would affect your emotions it's kinda like TV like programming and so you know they can ride an emotion my anger you know on top of the other things that would act as a carrier frequency that get out as well you so that's what these cell towers are they're like carry or free and they have to piggyback other frequencies on top of them absolutely so yeah it's called a little wave this thing anyway another thing I wanted to grab that you just floored me because I've I've never heard anybody else say it but me which is eating the Sun what I call eating the Sun yes and you said it and I can't believe you said that when I drink juices especially green juices or like maybe a good citrus juice I drink it and I'm I am sitting there thinking this is consuming literally sunlight literally sunlight converted stepped down from its pure form into a vibratory frequency of a liquid that came through that plant that then you are drinking to nourish your cells and you are literally drinking the Sun now powerful juicing is for those who haven't done fruit and vegetable juicing if you have an experience drinking a glass of fresh freshly juiced fruit or and vegetable juice and just feeling what that does to your physiology unbelievable and so and also getting fun directly like we don't get out of fun enough like they tell us that the Sun is bad I'm guilty about myself because I did so much technological work indoors before you got out you know I make a point to go outside and yes take off and go in the Sun yeah oh and all your skin everywhere brilliant points thank you so much for the call for bringing well good so you were mentioning gardening yes my theory is I am I love gardening okay that's one of my big things and I have this theory that the plants if you give them your DNA and that's easy with hair or whatever spit on it whatever it will make stuff for you specific to you DNA interesting why don't you blow your mind with that that's something that I don't know not like in in what way like specifically like for things specifically grow according to what you need interesting yeah think about that okay I'll let you go that that did kind of blow my mind I had out yeah very interesting and I don't dismiss that I think that that is quite possible because there's so much intelligence that underlies nature through the plant kingdom that without a doubt when they that I would say that the earth has that ability to sense what we need and adapt to it and and provide that force that's how intelligent the earth is that's how intelligent the whole living dynamic system that we are all living within that's how intelligent it is so that's a very good point that you brought up I just want to just say regarding what she said regarding the frequency this is all part of nutrition you know this is all part of detoxification you know we not only should be filtering our water and eating as clean food as possible but we should be looking at the types of electromagnetic frequencies that we are exposing ourselves to and we should also be looking at the types of information that we expose ourselves to that's part of nutrition you know these are all stressors of the body you know and it's like that that's why like adaptogens are so important you know some of us have a more innate inherent strong physiology that can adapt to things like that some of us are far more sensitive to that you know and and are very easily affected by different frequency fields etc I find myself on the former end of that spectrum where I mean something has to be overtly beating on me for me to practically sense it I have a high threshold for things I have a high threshold for pain I have a high threshold for you know being able to feel subtle energies okay like frequency fields etc I'm not what you would call an electromagnetic sensitive that you could tell if a cellphone is on in a room or something to that effect you know I almost have a thick skin when it comes to that type of stuff and maybe it's because I've worked in the technology field and been exposed to it and it's like your body gets tempered in some ways but that doesn't mean it's not doing harm on a subtle level so we have to look at all of those dynamics when it comes to being in positive health it's all part of quote nutrition of what's coming into our physiology period and again that has to do with you know what we take into our minds as well what are you paying attention to what are you watching what are you reading what are you listening to you know I had a conversation with a family member in the past where you know we were talking about trying to mitigate mitigate the effects of diabetes and I was talking to the person about like what to do regarding diet but then when I got and the person was very receptive to that aspect but then when I started talking about well it's not just about what you'd put in your mouth through your diet it's also about what you take into your body and mind in other ways you know are what are you paying attention to what are you listening to what type of media you know are are you taking in you know and when I got to that they didn't want to hear it because they just wanted to continue to think it's only just the physical stuff that you put into your body through food and it's not it's about other stressors as well and most people don't take any of that non-physical stuff into consideration you know and we need to so great points brought up in that last call by lioness thank you for that let's see let's go to lucid nebula lucid nebula you are live on what on earth is happening welcome to the show hello yes did you hear me yes I can loud and clear shoot I'm not being able to hear you okay let me try to let me take off this or good try that real quick does that work can you hear me mark yes it looks like you're having a problem I cannot hear you okay I'm gonna I'm gonna jump unfortunately it looks like he's having a problem with his speakers or headset unfortunately so I apologize for that having a jump but if you get that cleared up I'll try to go back to you let's see let's see can I go back to Ivan from Phoenix let's see if Ivan is there I'm gonna try them again Ivan from Phoenix you are live on what on earth is happening welcome looks like Ivan is still having a problem this week sorry about that brother let's see let's go to - who else do we still have let's go - Ethan strong Ethan strong you're live on what on earth is happening welcome mark can you hear me yes I can loud and clear excellent uh so I got so much that I could say um just a little quick note on what lioness was saying about the plants producing specific compounds and stuff for your DNA I'm wondering if she read the book honest Asya because that is something that I got out of that book when I was reading this a couple years ago but interesting concept if you get out it's a good read okay yeah ringing Cedars of Russia Siri and the first one is called uh Nastasia I won't go into any details about that cuz roll off topic but anyway um thanks for taking my call sir it's been a little while so I got a couple of notes here um first I just wanted to mention because we're on this topic of carnism and by the way thank you for speaking about it in the way that you do I think it's really needed as you know and thank you at some point I intend to get into that as well so when I was really young like way back as far as I can remember you know before probably prior to the age of six even I distinctly remember being really disturbed when I came to the realization or found out that people kill any animals for food that just really bothered me instinctively intuitional II that really bothered me I thought most all of us are as children because we first are being given foods that are animal-based we don't really directly make that association when we're very young and then at some point when we reach the age of being able to reason that out for ourselves we're being told and understanding it by our parents then it's sort of an initial shock or an initial trauma to us to understand that this is what human beings do to other animal life and you know some of it it hits harder and that resonates more with us from a very early age than others and some of us don't really think too deeply about it so much after the initial understanding hits us mmhmm yeah yeah so you know just through familial indoctrination I eventually I never really got totally hooked or addicted to eating me but I did it for a number of years when I was younger all through my teenage years and then when I was about 25 I read a book I was in a relationship with this woman who was already vegetarian and then she read a book called Skinny Bitch and after reading that book she was like I'm going to be and I didn't even know what vegan was at that time what's that and so I read the book she was you know her just abrupt inspiration to do that got me curious so I was like read that I read the book and then I decided okay I'm gonna do the same and for me my experience with making that transition was quite easy and I basically went cold on all of it didn't do any gradual transition and for me I think it was easy to do because like I said I wasn't ly addicted to meat I ate it because I got kind of you know cold I got conditioned to think that that was okay in normal of course and then over time just consuming it a little bit here a little bit there and my family it wasn't a staple thing every night having right it was like a couple times a week maybe nice right so anyway for me making that transition and ID that back in that was like a little over 10 years ago 2008 I made that transition to going totally vegan and during that time I was working as a landscaper in Seattle Washington and I have to say I thinking back to that time I don't think I've really ever felt a whole lot better physically mentally just felt really good after a few months of being on the planet base program so just a little note for everybody out there who's listening who is on the fence about trying it or has tried it and did you know do it right like you said and you'll get the good results and I must have done it right the first time body was largely as you said accustomed to eating more of a plant-based diet in the first place because as you said you didn't really learn a big meteor or your family really didn't prepare a lot of meat based meals so it's like you know for people who are coming from it from the perspective where they really were having a meat heavy diet that's why recommend that gradual transition and even if you say I like just eating one meatless meal a week and then just go to two or three you could just do it like that there's no need for an abrupt a sudden change if you do were to try it like that and it works okay well you know I almost consider like the people who do it like that kind of got lucky because a lot of people who do try it and go very quickly with it they don't have as much success and I see that over and over again so it's it's good that you're bought your body your physiology kind of already had the way paved for it in that respect by the way that you were eating and to do it in a more a less gradual way let's say was successful and easier for you to do so and it's very fortunate and I'm glad it worked out that way yeah something that I wanted to mention that I think appreciate is sure so back then I did that it only did it here and I got into during that time oddly enough some of my co-workers I used to smoke cigarettes and you know I got on this plant based program and my co-workers called me out and they like so what's up with this your concern with your well-being your health your eating plant-based but then here you are smoking a cigarette after your burrito at lunch for a contradiction regard yeah so they called me out on that and I thought about it for didn't take long I was like okay yeah I wanted to get rid of this nasty habit for a while so eventually I worked into that and that was something I didn't do cold turkey so like like you're saying when you're addicted to something and hopefully people that are addicted to it confers to acknowledge that they are addicted because of Schubert's that brace that's exactly making a grant a gradual movement away from is totally necessary like I did some preparation when I quit smoking to get the body ready cleanse the liver and be prepared for the withdrawals or be more prepared to handle it and not go into shock so but anyway so it was on planet based program initially for a year then I got through my research into what I was preparing to quit smoking the knowledge I was taking in for that I came across dr. Mercola and started reading his newsletters and articles and kind of got sucked back into eating some dairy and some meat on the basis that it's okay as long as it's produced humanely right so for a few years that justification over and over yeah and the whole thing like it's natural normal natural necessary like we need certain things from the animals the proteins different than planet protein all that stuff so anyway I got sucked back into it and started actually fishing and I live in Washington and I got into fishing for salmon and steelhead and primarily when it came to meet that's all I ate for a while few years and I have to say for anybody out who's listening that thinks that the animals are here to serve us in that capacity to uses food I have to tell you it's not true it's wrong and if you haven't I'm trying to speak specifically to people who have never actually killed an animal if you haven't done it then it's easier easy for you to think that try killing an animal and then talk about how that animal reacts to the action you're taking against it because they don't want to die right you know I've never had a fish just jump out of the river onto the bank and be you know willing for me to just knock it out and cut it open and bleed it you know it doesn't work that way they want to live they have a purpose and it's not to serve us and our stomachs when there is alternatives that we could engage in that doesn't necessitate that again I've been honest and said in a very you know survival based situation where there were no other possibilities to sustain my life would I sustain my life by taking the life of an animal to sustain mine I would do it in a survival situation that absolutely mandated that you know that there was no other way but when there is another way to do it there is a viable alternative that can maintain optimum health this is what many people still don't believe is necessary that believe the necessary quote argument of meat justification meat eating justifications whereas it is definitely provable that it is possible to sustain our human life without doing that to the animal kingdom and that's all I like this level of honesty is all I want people to get to you know to just understanding that's the scientifically provable truth regarding the matter and we can make it now now to choice right and we can make a choice about how we want to behave in the world after we have that information clear in our minds regarding that it's not necessary and that we do not need to do this it's not a need or a necessity so thanks for you know reiterating that point and yeah it's absolutely true yeah so what I was getting back to what I said about something you might appreciate I I don't know how many years it was maybe like five five years would be actually about six where I was back to eating a little bit of meat and select very limited dairy products I didn't I had used to really love cheese but I'd tried not to get back into that because she seems to be pretty to do but anyway I when I got turned on to your podcast and all of your work it was you who got Mirian spired to go back to being plant-based because I'd thought back to my childhood and how I instinctually felt about this whole topic and you've you've brought to my awareness the occult reasons why we should not do this because of the negative consequences that will manifest in the world especially given what you were just talking about how we live in a type of society now where the structure is such that we don't need to be killing and eating animals to survive and provide nutrition for bodies we can get it through other means and um you know it's just not necessary and so for those occult reasons I got you know I got all that from you and I was like okay I have to go back now I'm very glad that I was helped able to help you to influence you to look into those matters regarding the occult aspects of this you know this is what I did with the earlier work that I posted regarding this topic in the earlier podcast again I believe it was episode number 122 and I posted with that occultism and vegetarianism which gets into what slaughterhouses - the American energetic field of the earth you know we have to understand we're all interconnected energy and as one suffers even one being there that contributes to the the negative etheric energy field of the earth because it's all operating as one living dynamic energy field you know and we have to understand we're all part of that and it affects us you know and it takes like somebody really being strong not to and to get themselves to a strong place in their mind body and spirit to be able to even come to the point where they're able to resist that overwhelmingly negative etheric field that's constantly having death and suffering interjected into it at the energetic level you know to even get themselves up to a point where they are able to process and understand truth and then work on their body in their mind and then help others I mean it's it's a it's a it's a process and a journey for any individual to do that knowing how badly polluted the whole etheric energy field of the earth is and how it got that way you know so it's like that's why I try to work I have a lot of shortcomings when it comes to understanding how weak other people are regarding that like I because I'm strong in in doing that it makes me automatically you know look at other people should automatically be that strong but they haven't done the lifting that I've done you know what I mean you know I may not do a lot of physical weightlifting I I you know try to go to the gym when I can but it's like it's the same thing you try to throw a barbell at somebody who's never lifted a weight before they're not gonna be able to handle it it's the same thing with all of this information it's like if you haven't done the heavy lifting when it comes to the information all of this info it's gonna be very very very difficult for people they're not going to get it all at once it's gonna have to be a journey where they start with the light weights and build their way up you know so it's it's a process so thanks for bringing up that point and you know I am glad that I was able to point you to some of the more esoteric and a call knowledge when it comes to that because that is the ultimate to understand where the truth of this all goes to in lies is all in that space where we understand this is all about energy and you know its operating at a higher plane of existence at the unseen level then that which is operating at the scene level there's a lot more going on at that level where our senses don't reach but there's a part of us that does reach there and that's the spiritual part of us so fantastic points I really appreciate you bringing up those points you know thanks for taking my call I'm real quick if you don't mind me adding your original discussions in the podcast series on these actually spanned more than just one podcast you had number one twenty-one number one twenty two and then part of one twenty three was dedicated to that topic thank you for reminding me of that and our listening audience so it's those three podcasts everyone 121 through 123 thanks Ethan cut out all right okay I think that's probably all the time that we're going to have for this episode I don't want to get into another caller and have them cut off so I'll just take us out and what I'll say about this whole series is I think it's been very great that I revisited this topic I'm very happy on how it all went the caller's are unbelievably astounding that's all I could say about it like the the I have the best callers in all of talk radio ever in the history of talk radio talk internet television whatever you want to call it could not ask for any better callers for an all call-in show so I want to thank everybody for listening to this and watching this episode of what on earth is happening I hope you've found it informative I want you to make sure that you check out the resources that get posted with the podcast for each episode that can be found as always at what on earth is happening calm click the podcast tab or just go to what on earth is happening comm slash podcast and that's all the time that we have for this edition of one remember ladies and gentlemen government is slavery we'll see you right here next week thanks for watching [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #209

Topics: *Awakening Your Local Maven, Mark will be a featured speaker at Anarchadelphia 2019, Mark's documentary "Mark Passio & The Science Of Natural Law" will premiere at Anarchadelphia 2019, What is a Maven?, Malcolm Gladwell's book "The Tipping Point," Mavens as trusted individuals, Mavens as teachers and information gatherers, types of social influencers, Locating and awakening the maven of your social group, using mavens to promote social and behavioral changes, social media influencers, personal sacrifice to speak truth, Alex Jones' interview with Soph, Courage to speak unapologetically, the Maven Effect, Opinion Leadership, the Two-Step Flow of Communication, the Five-To-One Ratio for Maven-Influencing, breaking through the Poison Signal and propaganda from other sources to reach the Maven, Soviet and Chinese styles of Censorship active in the United States, Technological Competence in the Truth/Freedom community, Perseverance and Will in influencing Mavens and learning new Technology, Courage to create positive Change, Monopoly on information dissemination through technology by Google, Apple & Facebook, Social Media's destruction of the public's learning curve with technology, the near-future 'How To Become The New Media' technology class, the Domino Effect, the allegorical Unbreakable trilogy, Suppression of the personal power of the Individual, the ability to influence others that One Human Being can have, people who act as Connectors or Networkers for others, subverting internet censorship, Technologies of the future, Photonic Computing, becoming a content creator, the Digital Town Square, Human behavioral change on a mass scale is still possible, people holding themselves back because of the Fear of what others think of them, the personal moral responsibility to pass on knowledge, Beginning The Great Work, cultural differences in information dissemination, religion mandating that their followers obey government, the Dark Night of the Soul, spiritual fortitude and revelation, the power of the statement “I was wrong”, Synchromystic Numbers, Gematria, 11;11 as the "Light-Worker’s Call," Fake Ass Christians, Owen Benjamin as a potential Maven, Henrick Palmgren turning to White Nationalism, not taking money from the Tech Giants, people in France jailed for political cartoons, continued censorship will be a trigger for a hot war, removing the supporters of censorship and control, Rights protected in the USA through Gun Ownership, the Moral and Philosophical War against Authorianism, Influencing the Influencers to awakening in Consciousness*

freedom man that's what it's all about [Music] is that the groove on freedom-fighters book says [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law vehicle and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com today is Sunday May 19th 2019 this is show number 209 and on what on earth is happening we are ending slavery one mind at a time welcome everyone thanks for tuning in we have a great show lined up for you here today I'm gonna be talking about the importance of identifying and awakening your local maven and I'll explain what a maven is and how important they are in modern society and how they are influencers of many people in many different peer groups awakening the maven is something that I have touched on in the past I've often referred to it as maven targeting I more look at it as identifying who the maven is and then sort of really trying to work on them as a potential influencer of other people because that is how we're going to reach the maximum amount of people with the truth so that's what's coming up today on what on earth is happening a couple of very quick housekeeping tasks first of all you may notice that there might be a slight background hum it's pretty hot here in Philadelphia already so to do the show in a small bedroom as a home studio would be it would be sweltering in here if we did not have air conditioning so there is a room air conditioner in here now and unfortunately that might create a little bit of background noise but hey this is what it is you know I don't have a multi-million dollar you know high-quality studio we produce this show on pretty much a shoestring budget with volunteer people helping out to produce everyone who does you know participate does a phenomenal job and I thank them for for their efforts all the time but you know you know I we don't have like you know huge studio space here so just bear with us regarding that during the hot months of the year you may hear an air conditioner humming in the background so that it is what it is that being said I want to show people my website if we could switch over to the laptop I have posted we've announced publicly that I will be speaking at an arkadelphia 2019 this is going to be a great event coming up September 13th through 15th the banner is live on the homepage of what on earth is happening I'll be a featured speaker my main presentation that I'll be giving is entitled the sacred gift of anger I'll have a couple hours to deliver that presentation at an arkadelphia 2019 I don't have the schedule yet or the day that I'll be speaking that'll be announced forthcoming if you click on the banner and you use code passio at checkout the affiliate code is passio at checkout there'll be $10 deducted from the ticket price you'll get 5% 10% deducted from the ticket price you'll get 5% of that taken off and 5% of the ticket sale will go to me so it's a way that they're helping people to save money on the ticket price and also give the speaker some extra money so this is the page that it will take you to the ad arkadelphia conference is hosted by the group called the state of anarchy this is the ticket page so when you check out here's all some of the other great speakers speaking max Egan's gonna be a part of this Carrie Wed ler lark and Rose Derek Bros you know Gina car Bennie wills it's gonna be a lot of awesome people talking about anarchy and the issues that surround it so come on out to Philadelphia September 13th through 15th 2019 for an arkadelphia that it's the inaugural one the first-ever an arkadelphia so please do check it out at 1:00 on earth is happening calm click on that banner and use affiliate code passio at checkout to save 5% and have 5% of the ticket sale go to myself so that's really all of the housekeeping oh I'm sorry at an arkadelphia going to be debuting my documentary that has been in the works it's called mark passio and the sign of natural law it's to my knowledge the first documentary that's ever really been made on natural law and we will be premiering this at an arc Adelphia 2019 so come on out for the initial public release of Mark passio and the science of natural law my first ever documentary film that is being edited by one of the hosts of an arc adelphia Carmen chironji so I think that's all the announcements that I have for this week I will be announcing a workshop that I'll be giving at an arkadelphia as well because they will have some workshop classes that are being delivered by some speakers there as well I don't have my topic lined up for the workshop yet but I will be announcing that shortly so stay tuned for that so I think that's all the housekeeping let's switch over to my slides and I'll just show people the the pretty nice banner that the guys from an arc adelphia made for you know for me as a speaker and there it is if you use promo code passio a check out you get five percent off the tickets and five percent they match that and I'll give five percent to me so it's a nice way of doing affiliate sales so that's the banner that they made and I'll jump in for the topic for today's program which is awakening your local maven okay so this is a topic that I've bounced around in the past and kind of talked a little bit about and hinted at that I would be doing a full show on now well we will be taking calls on this topic and really any topic that anybody wants to call in and talk about a little bit later on I don't know if I'll have a full two hours with this particular topic maybe it will maybe it'll go longer than that I'd really don't know I I don't have that many slides for this but the slides are very pertinent and really illustrate how important this topic is again I called this in the past maven target targeting but it is more like really trying to identify who the real social influencer in any particular social circle or group dynamic is and it's very important for a lot of different reasons which I'm going to talk about here today thank you to bread Hatton for making the the slides for the title cards for the shows I've been doing a great job as always so thank you to Brent so let's jump in with this topic and talk about what a maven actually is because it's a word that some people have heard but I'm not that many people really know what it is truly I hear a lot of misconceptions about the word maven as well for example a lot of people before I even get into defining and a lot of people think allmate mavens must be women I've heard this misconception time and again and that is not the case a maven can be anyone it does not have to be a woman so this is just something that I think a lot of people because of the way that it's been used in colloquial language think of a maven but the English word maven is actually derived from the Hebrew Maeve in which means a person with understanding or a teacher so a maven is an expert an influencer or a teacher who is highly trusted by others to pass along relevant knowledge in a particular field of interest and that's the key factor about what a maven really is a maven is a trusted influencer or teacher it is someone that people genuinely look at and give their trust to for whatever factor that they have some sort of a you know X Factor genis a qua factor you know that it's a characteristic of their personality that maybe it's some sort of charismatic factor that enables trust between themselves and the base of people that they are connected to that who they influence or who they communicate information to so a maven is not necessarily just a teacher you know I've said before so people can consider someone like myself a maven because I've tried to teach and pass along what I know regarding what's going on in the world regarding psychological knowledge regarding knowledge of the occult etc so I could be looked at as a maven among the anarchist community the spiritual anarchist community you might say okay I could be looked at as a maven in people who really want to study the occult from a deep psychological and philosophical perspective so however there are certain spheres of influence in which you can consider that I might be a trusted person but there are many other spheres of influence in which I would not be trusted okay one of them could be a social circle of friends or just people on the street one of them could be you know people in a neighborhood one of them could be in a family dynamic again I would not be considered the influencer of my family dynamic I would not be what you would call a trusted individual or involved in a trust dynamic in my family there are other members of the family who I would say would fulfill that role so what you have to understand first and foremost by regarding the very definition of a maven is that a maven is highly trusted in the sphere of influence that surrounds them okay they're liked and trusted by the people who listen to them alright so in his book The Tipping Point which is shown here on the Left which is a fantastic book that I think everybody should read and check out if you haven't already that brings up a lot of great points about how you know influential people and certain dynamics and circumstances can often have a wide reaching and very dynamic impact even set off by a small group of people so he it's Malcolm Gladwell the popular author Malcolm Gladwell in his book The Tipping Point described mavens as intense gatherers of information who were often the first to become aware of pertinent data and new trends in their fields Gladwell also suggested in the tipping point that mavens have the greatest influence on on others when they partner with other trusted social influencers with wide networks of casual acquaintances so you could look at those other people who connect with mavens who are considered experts in their field they are social influencers particularly in social media fields in the modern sense some people even equate the modern form of what a maven actually is with a social-media influencer Gladwell would suggest in the tipping point that our mavens are often influenced the other social media influencers it works almost like a hierarchy dynamic okay and this is incredibly important for a number of reasons okay and this is what I want to try to communicate with the main you know formalized presentation here on today's show is understand what a maven is and then understand why a maven is important to identify and understand who it is and what they're capable of doing okay and again this is something that not that many people have even really looked into a researched okay so read the tipping point okay perhaps I'll post a link to it or something like that with the show and you know people can check out this book and check out what Malcolm Gladwell the author has to say about just general dynamics that like act as a switch that a flick a dynamic to the other side like a pendulum swing or like a seesaw tipping okay so what he's talking about here is how do certain trends dynamics factors within society how do they go from being one way from one polarized dynamic to then switching over to another dynamic okay how does change how is effective change Creek created mavens are change agents this is the number one thing we have to understand about what mavens really are and what they do they influence change in a society they can influence change for the negative it doesn't necessarily mean that they influence things for the positive okay but we are looking for the mavens to be able to help get them to understand the truth wake them up because then they have other people's trust so these are the people who can flick the switch on social dynamic in a very short amount of time because of how many people they are capable of reaching and how many people whose mindset they are capable of influencing okay so we are trying to reach the influencers this is what this dynamic of the importance of identifying and awakening the local maven okay because you could you could try to work on one person that doesn't have that much influence right and you could you could spend years trying to awaken them and getting them to see what's going on in our world okay helping them to understand the mind control that's going on helping them to understand all the factors of the control system getting them to understand human slavery getting them to understand social engineering so forth and so on okay but if that one person has no reach with others in society you've done all of that labor and all of that work to reach one individual that may never do anything with that knowledge okay the importance of reaching the Maven in any given social dynamic or group is that they are then in turn going to take that knowledge and information and pass it along others who trust them and at some point this will be a trust or / belief dynamic a trust / belief dynamic okay admittedly okay I'm admitting this and explaining that this is not necessarily a bad thing okay you may have to rely on trust and belief at first when it comes to these communicating this type of information and then when the people run with that ball after it is given to them they will then it will leave the area of trust and belief and then they will take it into a into the realm of knowledge by doing their own research on their own homework and then understanding the dynamic for themselves okay but we have to reach the Maven with that knowledge get them converted so then they can then go out and do their magic of influence with other people and it's not it's not like you know this is the same thing as like brainwashing people like the mass media and social engineers do because the information that we want to communicate to the Maven and then help them to communicate to other people through their trusted networks is the truth so the truth is not going to do harm it so this isn't about like just you know trying to brainwash people into a belief system it's trying to communicate knowledge to them by identifying the main influencers of other people in a social dynamic so that's what awakening the Maven is all about and I'll just give a brief example okay so um my family maven is my own mother she's like the new matriarch of the the extended family you know all of our cousins you know friends other people within the family okay the whole extended family dynamic probably more people call and talk to her and ask her for advice than anybody that I know in the entire family okay more people physically probably go into her presence and her household talk with her on a daily basis than anybody else any other single member of the family for someone like me in my family dynamic if I see a couple of relatives a year it's a lot literally I mean there are people who work with me who know me through my work who have never met a single member of my family because they're never even really in my presence it's you know not necessarily a good thing in some diet in some aspects maybe it is because we would butt heads a lot because a lot of the members of my family are totally ignorant to what's taking place in the world and don't care you know not not even that they don't know they don't care to know so you know that doesn't really sit very well with me personally so you know I try not to inflame that dynamic by you know being in their presence a whole lot and so I kind of steer clear and that's what I've chosen but I did do a lot of work to try to get my mother my own mother to understand this dynamic knowing that she would be the one who would possibly communicate some of the information to other people in the family that I would have no chance of doing that but she would certainly have a better an average chance of doing that at some point if she woke up to a certain extent and in the early going it was brutal I mean ultra brutal okay as I'm sure many people have stories like this with their own family members but see the thing is is before you put all that effort into a single person I'd say identify them whether or not they're a maven within your family dynamic so you want to really do that you want to spend the time and energy to do that if the person is a maven if they're not of one of the mavens of the family or social circle or friend circle then you're probably investing a lot of that time and energy into helping to awaken one individual that is not really going to pass that information along or even have a chance of influencing other people within a particular social circle and that's not necessarily a bad thing either it depends on how much you care about that individual and really want to help them awaken themselves and you could spend that time to do that just the dynamic we're talking about here today with awakening the maven is putting that effort into a person who you know is going to have significant trust and influence with others so that the the information will reach others as sort of a snowball type effect okay which we're going to talk about which I call the maven effect all right so the next slide is and it looks like we have a little bit of a glitch there let me take that back sorry about that folks all right that looks good so the the next slide is about the different types of social influencers in any given area of our society okay and the maven here is shown in the middle who connects people through sharing knowledge and again this is what what on earth is happening is all about okay so again I could certainly be seen as a maven for the type of people who are seeking out the type of information that I put forward here on this show and have been doing for the last 12 years through what on earth is happening however there are other types of social media influencers or just social influences I should say this does happen on social media and other types of social networks okay but there's a connector who connects people to each other okay they're not necessarily the sharers of information or communicators of information themselves what they are good at networking people together okay this is what conferences can help to do this is the importance of a conference organizer they bring a lot of people with similar interests in similar areas of knowledge together so that they can come together network and then help each other okay and there are other types of people who are very good at this just people who are very good at networking establishing connections between people there the connector or the network or I would call them okay and then you have salesmen who use their knowledge to engage other people and to persuade other people they have good charisma they're good at talking with people they're good at communicating ideas they're good at selling things to people okay and they're very important to we have to understand that this is about it's almost like engaging in a sales pitch to people you have to help them to understand why they would be in a better position to know this than to not know it because ignorance is death it isn't bliss as many people think oh I don't want to know that that'll make me upset no not knowing this won't just make you and knowing it may make you upset but not knowing it's going to get you killed okay it you're you're going to be slow killed you're going to be dumbed down to a point where your masters just have such an advantage over you that they're gonna put you into an early grave really because that's really what's going on here you know soft kill eugenics is what's really taking place in our society and the people who are so ignorant are gonna be spending the better part of their adult years in and out of hospitals that's how bad the dynamic is you know and not not just that have their psychology broken so that they can't engage in any healthy relationships they're gonna have their health broken they're gonna have just you know in subby in such a state of ignorance that they're not going to understand what's going on around them and they're going to be susceptible to just about every kind of negative influence and and negative social engineering that is taking place what we're talking about is using all of these social influencers in our society for the the fit of communicating the truth and again you're not doing any harm to people when you communicate the truth again yes the truth may make you angry but it will also set you free you know this is what we have to be much better at doing because I'll tell you something folks we haven't been very effective at doing this the other side is much more effective the authoritarian side is more effective at putting their message out there much more effective at using technology which I'm going to talk about later in the presentation okay but there's certainly much more effective at identifying the mavens who will communicate this knowledge to other people they have many more sales people engaging in sales pitches to other people in society that's why why they have so many people believing in their nonsense that's why they have so many people under their mind influence and brainwashing and social engineering we have to get better at this dynamic of social influence because the people who stand on the side of the truth are not really doing it they're certainly not doing it to any great effectiveness okay they're there they're really um playing a half-ass game when it comes to this okay to put it as simply as I know how to put it because a lot of people want to remain anonymous a lot of people don't want to get involved on the playing field on the battlefield okay they want to kick back and they want to just say it's good if I know this you know cuz that'll help me and help my situation but if somebody else doesn't want to listen and pay attention to this that's their problem no that's your problem too that's your problem as well okay and the reason it's your problem is because other people's ignorance is going to affect your freedom whether you like that dynamic or not that's how it is it is a numbers game okay whether anybody likes that dynamic or not a lot of people want to think oh you see you know a lot of people want to take this concept of the tipping point or a paradigm shift or a quantum shift right and they want to make it not about numbers they want to say oh it's only the little the small amount of people that have to know this for it for it to flip for the script to flip in it for the dynamics ago the other way no it's not folks it's a small amount of dedicated passionate concerned people that will help to influence people in a wider way because they put so much time into this see but it's not about not reaching massive numbers of people the whole world dynamic is only going to ash it to shift when enough people in all of society shift their behavior this is about not just changing what people think but changing the behavior of all individuals within society and right now we don't even have we if we have two percent of all of society even understanding this let alone changing their behavior I would say we're doing massively well we don't even have that I'd say we probably have under a percent still okay you know we need to really step up our efforts in this regard and a lot of this comes down to courage a lot of it I have people writing to me all the time mark I want to get involved but I'm still you know I don't want to necessarily put myself out there you know they're waiting for something you know you know what they're waiting for they're waiting for a backbone to grow up their spine that's what they're waiting for you know I don't know if you're gonna do that you know you better go order some you know some bone growth miracle cure because a backbone ain't gonna grow itself you just got to get out there and start doing it and you got to take your chances you got to throw your you got to throw your cards down you got to throw your dice down on the table and cast the die and say it's gonna be what it is that's it I'm not interested in what happens to me in the physical I'm here to perform a mission in the metaphysical you know that's what this is all about this is about what's going to happen with my soul not just about what's gonna happen with my body I could care less so it's gonna happy what happened with my body this is about speaking the truth out there into the universe you know the universe is spoken into existence as I've said countless times you know if we're not putting our voice out there and we're not contributing to the chorus of the truth and then we're not going to be really truly on the right side of history because for people to say that they intellectually understand this and they're not communicating it to others and they're not trying to reach the influencers of our society you they don't really know and they certainly haven't converted it into action you know do they really know and do they really care that becomes the question when people don't want to convert this in action by speaking alright so you know this this slide I think helps people to understand the main types of influencers in our in our society and you may be one of the three okay and if you are one of those influencers then do the work that you need to be doing I consider myself that maven in the middle okay I am a maven when it comes to a certain type of community a certain type of individual not in every dynamic that I find myself in in life however okay so and that social circle is only going to be so big with stuff like what I do with what on earth is happening folks especially at this point in history where we have such a an astounding array of ignorance you know amassed against us you know because so many people are still in that you know they're gonna cover their eyes ears and mouth you know they don't want any information coming in to the contrary of their predisposed worldview and they're certainly not going to communicate it to other people they're shut down you know we need to reach the people who those people will trust this is why a lot of people who have a lot of people in their social media sphere of influence okay are often targeted by the powers that should not be you know and if they start talking out against them they'll try to do whatever they can to ruin their you know life dynamic okay they'll bring financial burdens down upon them you know they'll try to smear their name you know and slander them etc and many other ways even blackmail you know force them into a situation where you know they can be blackmailed and you see this a lot with celebrities and people who already have a lot of people who are paying attention to them okay so there are reasons there are legitimate reasons why people are hesitant but we have to shed that fear you know because there's the believe me not doing this is gonna result in a much greater harm and degradation to all of society than doing it and having your personal situation attacked okay this is where we have to overcome that fear and understand it doesn't matter what personal losses one might have to endure or sustained you know the rewards that you're going to get by speaking the truth and helping to influence other people are going to be much greater in the long term so you know you see people who have huge social media gatherings and an influence I mean um you know just as an example just look at this girl who Alex Jones this young girl who Alex Jones just interviewed last week on his show you know I happen to be checking it out and he brought on this girl so she has like a million people a million YouTube subscribers and she's talking about how like they're censoring her because you know she's considered extreme right far-right wing to them and you know they're trying to shut down people of you know these political persuasions who they can slap a label on you know I talked about they haven't tried to do that with me because I don't think anybody is capable of labeling what I do they don't even know what to think of it or they don't even want to draw any attention to it you know because they certainly don't want people listening to my stuff you know they absolutely don't want you coming here and getting the information that's in what on earth is happening because this is the most forbidden of the forbidden this is the stuff that they don't even want to even allude to to hint at to even ever speak the name because once you start looking down this rabbit hole it's all over it's all over for your belief and authority you know it's all over for that religion really if you're really being honest with yourself and you really do go down the rabbit hole that I present here it's all over for all religion and that's the last thing the social engineers want because that's their main tool of control is religion religious thought that's their main tool of control and that's what we're trying to break down here from day one is getting people out of a religious mindset helping them to understand that they need to learn what the actual truth of what's taking place here on earth is and the truth about real spirituality okay and they don't want you looking into that because that opens up whole new avenues of knowledge and understanding that will open up not knowledge about suppressed science occulted Sciences the occulted aspects of the human psychology they don't want anybody looking into the occult that's why I'm the last person who they want to draw any attention to okay so but you know this this young girl who came onto Infowars this week I basically said she doesn't care whether they try to censor her you know not interested in it she's gonna keep speaking and with a banner she'll move on to another network and basically said so much as YouTube and Facebook and things like that are just stepping stones to get some following say what you want let them ban you take your following to another platform and that you know in all honesty I commend her for saying that that takes courage I think more people should have courage like that you know not that I agree with everything this individual says I don't agree with everything that just about anybody says okay you know I think in some ways we shouldn't agree with everything we say okay you know you got a question in your own you know thought processes sometimes you know not to a point where you're you know losing all having so much doubt in yourself that you're not willing to put information out there but you know you always have to be able to reevaluate what knowledge that you have come to know okay and possibly make adjustments so what I find commendable with this teenage girl Soph is that she has the courage to just keep doing this and most adults don't have courage like that so you know congratulations to this individual because I wish more people would have that kind of courage you know this is what's holding the world back this is what's holding the entire dynamic back from people understanding the truth is that there's a lot of people out there who know what's taking place and don't have the courage to speak it they want to remain anonymous and that's cowardly you know I see it all the time this is why you know uh for example the arc Drive you know I don't want anonymous cowards requesting the art drive what do you what do you think I think someone who's an anonymous coward who doesn't want to put their real name out there okay he's gonna think when is gonna what do you think I think they're gonna do with the knowledge of the arc Drive do you think I think they're gonna take it run with that ball spread that knowledge all over the place how people to understand it they're already cowering under the staircase in a little ball you know oh I don't want to use my real name although the powers that be they might they might know who I am then you know you know and then you then you have other people who think I'm not using my real name because I used a assumed name when I was involved in the dark occult you know and what a thing I'm not using a real name now you know mark passio is my legal full given birth name that was given to me by my parents that's on all the bullshit legal paperwork that of anything that I still you know I'm involved with with the state as far as you know mailing addresses licenses etc okay and there are people out there who still insist that isn't true because mark rokahr was the name I used when I was involved in the dark occult and I that was an assumed name that I just took and I've told people the story in the past where I took it from and they still won't even bother looking into all of that information where I explained it and half of them spell it wrong because they probably saw it written in handwriting and uh you know don't I don't even get that right you know so a part of what I'm talking about here is it's all it all comes down to courage folks you know if you're gonna become an influencer of other people you have to have courage to speak you have to have courage to speak unapologetically you know and that this is one of the biggest dynamics that I see in our society that's just not there we still have cowards walking among us you know who want to remain anonymous you know what do you think that the whole powers that be the whole power structure thinking of people like that they're so afraid they're what those people are walking around those social engineers and they're thugs are walking around like this here's their mindset folks they're like look at that little punk-ass bitch they're so afraid of us they won't even use their real name imagine they won't even say their name they're so afraid of us of what we we could possibly do to them like I don't give a shit what you can do to me physically you think I'm afraid of you or anyone you think I'm so identified with the physical body that you think I think this is Who I am that I'm this meatsuit you think that's where I'm at with what I know spiritually and you think that's gonna hold me back from speaking and continuing to speak you have another thought coming to you if that's what you think but let me tell you something that's what these controllers think of people who remain anonymous cowards okay you're never going to influence anybody with an assumed name or with you know being anonymous it's like they're just looking at you and going wow what a punk-ass bitch coward that's exactly what they're thinking you want to know how I know that because that's exactly what I think okay to put it bluntly and in street language all right and I'm being nice about it compared to what I really think of that dynamic let's move on to the next slide into what I call the Maven effect okay and um some of these slide images were taken to give credit from a article on let me see if I could find it real quick I'll step out of the slides for a brief moment it was an article called influencers a discussion you can go back to the laptop influencers I'll make this fullscreen a discussion about the law of the few this was on the buzz bin and it's a you know not necessarily a great website but the dynamic is that the article is a very interesting thing and you could see where you know people are looking to these dynamics of influence are talking about and dissecting Malcolm Gladwell's book the tipping point talk about levels of different influence in the blogosphere okay how social media influence gets propagated down to lower levels of society and you know that last slide that I actually presented with the connector the Maven and the salesman was actually taken from here okay so it's an interesting article I'll probably link it with the with the site you know not that I'm that into the website that it comes from just I thought that this link was actually sent to me actually thanks to barb for finding this she sent me this link so I'll give her credit for doing that because she thought it was a interesting article about Gladwell's the tipping point you know another thing that this whole dynamic is called is opinion leadership I thought I would bring this article up from Wikipedia to show people that a lot of people consider the Maven dynamic or the Maven affect the flow of a two-step flow of communication which you could read about in this article and it's called opinion leadership where the mass media or even alternative media first communicates ideas to people and then the other influencers then take it down and step it down to other people in society so it's another dynamic that you can look at when it comes to understanding of the concept of a maven it's called opinion leadership so I'll step back into the slides now okay so this is um an infographic that I refer to as the maven effect and you could see the maven would be the red individual at the the bottom of the slide up in the front who has the most effect because they're communicating with the most people in a given network everything is flowing to and from them okay they're the knowledge communicator and influencer with the rest of the people and it's there they would be it like sort of the top of the hierarchy when it comes to this trust network this trust communication network okay so that's who you want to try to identify and reach in your social circle and uh again if you really sit and think about this you will be able to identify it just think about it in your mind who is the person that other people in my social dynamic in my sphere of influence who do they listen to who do they communicate with when they want advice who do they call who do they go to who has the place where people come together around okay you know it fit geographically physically this is important okay because most people will gather at this individuals home okay for example like when holidays come up you know my mother's home is the big place that's where people will go you know or like you know my mother will go to wherever she's going if she's going likes let's say to my sister's house she's going there and then other people are gonna gather at that location they're gonna go where the Maven is at it happens all the time they're the ones who can make other people gather around okay so you just sit and think about this dynamic in your social situation and you will know who the Maven is you will be able to identify that's the first process that's the first step in this process is identifying who the Maven of your social dynamic is or family dynamic okay so you have to identify them first and understand this is the type of influence that they hold they'll talk to a few people in their close circle and that will widen out okay so they have the most power to influence and affect change that's why the Maven is so critically important so I'm going to break down a dynamic here that and I apologize for the slight glitches that we're having today I'm not really sure why that is going on with the presentation but perhaps I need to upgrade something or up update my presentation software or maybe it's just a loose connection but we will look into it um that being said let me I did step forward okay there we go okay so I call this aspect of the Maven effect the five to one ratio now now this is slightly different than just the Maven having influence this is how to influence the Maven okay so let me just say that again the slide that you're looking at that I'm going to build up here in this next part of the presentation is what I call the five to one ratio okay this is a 20% ratio okay the Maven that is the one and we're gonna have to have five other influencers that are going to influence the Maven okay so let's let's put the Maven in the center here here's our maven okay and let's name him Malcolm after malcolm gladwell and we have there in the middle of the star there's malcolm in the middle remember that was a pretty good sitcom show so there there's our maven malcolm on you know named after malcolm gladwell okay and he's he or she is the center of the their social network but that's who we are targeting we have identified them and we're going to put our effort into awakening them because if we get them awakened to the knowledge of what's going on in the whole control system societally and we get them awakened to the higher level psychological knowledge of what's going on into social engineering and to the entire world of the occult and the world of real spirituality right think about the power and the influence they're going to be able to have to influence other people to start looking into those dynamics and help change them for the better okay so we this is us this is us as an individual okay and we're where we see the Maven we see the influence that they have in other aspects of society and the dynamics that they're involved with and we say wow wouldn't it be awesome if we were able to wake up that maven that person clearly with more influence than me in this social dynamic or social situation or a family dynamic okay so you know you could look at the person to greet the green you know person icon at the top of that star as let's say someone like myself and the maven let's say it's someone like my mother right and I'm going to go to work on them I'm gonna put the word out here I am putting out the word okay I'm trying to reach their mind I'm trying to help them to see the truth I'm trying to help them to clear the cobwebs out and clear all the mind control out and get them to see reality as it is and I'm working on them and working on them and working on them and working on them and I'm taking information to them every day and I'm making them watch documentaries you know and I'm putting articles on their computer and I'm sending them email articles etc okay and you know what it's doing largely not a damn thing okay and we've all been there right all of us have been at that place I'm sure almost every one of us we have one individual we care a lot about we have one individual we really want to see get it and we try to work on them and there's like no progress right they're resistant they don't care they don't want to know they don't look at the stuff you try to send to them or give to them right I went so far as to walking in randomly into my mother's house you know just just arriving showing up walking in with a stack full a stack of DVDs walking into her house while she's watching something else shutting the regular television programming off putting a DVD into the DVD player hit and play and saying we're sitting here and watching this until it's over literally some storming into our house there and saying if if you want me to leave you're gonna have to call the police and then there's gonna be yet you're gonna be taking several people out in body bags literally did it okay I don't really recommend going to that level of an extreme but yes I actually did this okay that's how how much I'm not taking no for an answer when I decide I'm gonna help you to understand something if I think that it's important enough that you understand it and now I'm at a point now where after doing that for like 15 years that person does not argue or fight and kind of knows what I'm saying is the reality of the world knows that it's true but really isn't at a point where they're so awake that they're trying to influence others but they're not resistant to the reality of our world anymore and they can see it for themselves to a certain extent now certainly not to a huge you know oh encompassing extent but they're in a far greater position than they ever was without me ever having said a word okay then if I would have stayed silent not done that worked upon them they would have been in a colossal state of ignorance compared to where they are okay so but that's not going to be enough what you have to do is you have to get at least four other people who you know to understand the dynamic that you're trying to communicate and you have to get them also to influence the Maven I have found that this is the magic number it is a five to one ratio you have to have five people working together bringing similar information you could do it from a slightly different angle a slightly different perspective but that you have to all be speaking the truth toward the one influencer and if you do that with five people okay I'm gonna say you're gonna have reached that magic ratio where you can actually make them take that information in for themselves not just believe the five people but to look into it for themselves and then really start to then communicate that to the other people who trust them in their social circle okay and that's what we're trying to do here we are trying to influence the influencer you have to identify who has a lot of people's ear right who do people listen to and Trust who gives them their confidence and gives them their ear who they want to hear what they have to say and they like being around them and again admittedly that's not necessarily me socially certainly not in social or family situations again when it comes to the people who are hardcore about this like the water earth is happening viewing audience yes then I'm the Maven in that circle but again we're not just talking about someone like me you're you're trying to reach the Maven in your social dynamic that's the point here so you have to first identify who they are then you have to expose them to this knowledge from I'm going to say a minimum of five people okay I have found at least with someone like working on this with someone like my mother for example that probably she has heard this information now from about four people but there's this one more that I think if it came through okay and was steady you know hammering on the person steadily maybe there would be some more progress what you have to understand going back to this slide folks if we could cut back to it briefly what you have to understand is just picture on the outside of the Maven all the way around this star okay picture the poison signal right the poison signal of the mainstream media I didn't add this to this slide but perhaps I should have just imagine other of these radio wave graphics coming in from the outside but even bigger ones you know 50,000 watt ones okay coming in from the outside of every direction 360 degrees and they're all hammering that individual with untruths with lies with propaganda okay with fake news narratives okay and this person in there not fully awakened state is still susceptible to all that poisonous influence and social engineering so think about it when one person even steps away there the shield is down in that area okay if they all would step away they're being bombarded from every direction and in my case I was hammering them just from that one direction for ten years okay and then from every other direction or whenever I stepped away that poison influence came right back in like a tidal wave just swarming them okay so we have to understand that this is a dynamic of continual perseverance with an individual continual perseverance with a single individual because you know that the time investment is worth it because you know who they are then K working five people working on one would be better than 50 working on a thousand possibly okay because of how powerful and how many people that one person is capable of influencing the number that they're capable of influencing okay if you had 50 people who know the truth in a given geographic vicinity and they want to go to work on let's say a thousand people they might wake up ten out of those thousand people okay think about it you're not going to wake up everybody you bring the truth to okay so 50 people doing that with even a hundred people each you know who knows you might wake up like 10 or 15 20 people to that extent a maven however if those five people just worked on that one individual might wake up a thousand people that's how powerful the influence of the maven is and this is what we're failing to do we are failing as a network of people who know the truth about what's going on and are trying to bring that information to other people we're failing miserably at this dynamic at the identification of other social influencers we are not doing it effectively enough okay so we need to really try to bring bridge this dynamic and and to work on the people who we know are the influential among us identify them and work on them individually alright now one of the interesting things that I also thought is this is the whole concept of the man in the pentagram that is depicted in many different occult spiritual traditions okay this is this five to one ratio okay and then they're connected at the center of the beam okay in this image you could say well it might be connected at the sacrum chakra but I'd like to think of it as it's connected at the solar plexus chakra right in the center of the individual right at the solar plexus you could also look at it it's connected at the center of the heart chakra okay or really all of the chakras along the middle path and the ones that are the most important are obviously the third eye the heart and the solar plexus the that's the mind the heart the care okay the intelligence the care and to me most importantly in this dynamic the solar plexus chakra is where it all connects and comes together because that's the courage Center and this is about courage to speak this is about courage to put the truth out there especially in an age of censorship in an age of suppression of knowledge and ideas and information and imagine I I mean I look out my door I see other people in the area where I live and they are full-blown advocating Soviet style and Chinese style censorship it's disgusting thinking that people's freedom of speech should be limited and suppressed and they should be silenced I mean you have to be kidding this is where we're at in American society this is where we're at so you know this dynamic of the man and the pentagram or a woman in the pentagram it's it's incredibly symbolically powerful because it's talking about you know Brit bringing ideas together at a central focal point coming together from those five points of the star which represent earth air water fire and spirit okay you have to bring your resources the earth okay your general characteristics and personality and skill set together and work on those things you know that the the earth aspects of the individual of the personality work on those things and work with them to help to bridge this dynamic of influencing others but put them to work toward that purpose toward that goal and then you're using the other three aspects of the purse of the consciousness intelligence care and action okay so air is the intellect water is the emotional aspect care and then fire is the will taking action taking right action in the world you know so we have to bring all those things together for the higher spiritual purpose which is the quintessence the fifth element that's the head of the individual so earth air water and fire are those four you know aspects of the the extremities the limbs and then the ether or the quintessence or the spirit that's the head that's the guiding part of all of it that the other forces serve the forces of nature should serve powerful dynamic a very important ratio okay you could look at it as you know the you know one fifth aspect twenty percent okay that this is a very influential and very important factor in nature you look at the twenty to one hundred percent ratio okay the this is where I think the tipping point really would start to happen okay it's not going to be finalized until it flips over I would say fifty-one percent which is why that's a huge occultic magic number and use that places like area 51 or like May Day May first which is why they you know take this symbolism in the occult after the number 51 but the twenty percent factor I think is where momentum starts becoming almost irreversible toward the opposite dynamic that's where it can't be died not denied or marginalized any longer okay and I'm telling you this ratio in this dynamic is ultra important when it comes to what I call the Maven effect which is where it would be like setting off a chain of dominoes okay another aspect that I want to get into and reiterate in which I've been hammering on a lot is the critical importance of a competency and literacy when it comes to technology technological competency okay this is another area we are absolutely and utterly in sufficient in in the freedom community the so-called freedom community and we need to do way way better and way more work okay I have finally gotten some good technological help here at what on earth is happening after practically begging for it for a number of years and thank God it has arrived and arrived in a very big way and in a good way so I again thank the people on the team for coming forward however when I look at the wider network of people in the so-called freedom community anarchist community you know spiritual anarchist community half not half I'd say 95% of them are practically technologically illiterate half only have the basic very basic technological competency skill set if I'm being generous there I mean the very basic to like just do something like open a browser window pull up some information go to a video watch it type in a search in YouTube that's about it that's about all they know how to do okay maybe check email you know most people don't even know how to set up an email client you know they're still they use webmail you know they check their email in a web browser never even set up a mail client okay it's the things that I get asked how to do by an average individual who allegedly is awake and aware in any given week when it comes to technology or their appalling where I almost like it almost starts conflict between me and them because I'm almost insulting to them because I'm like it's the year 2019 and and you don't know how to do this really you know and I don't want to have to be I don't want to be like that I don't want to be insulting to people like that but when I like think of like how far in the game we are how far into this dynamic of censorship and thoth the total totalitarian shutdown of our society we are and the average person still doesn't even know how to set up an email client that wouldn't know how to network two computers together if their life depended on it you know knows nothing about how the internet works knows nothing about how to set up their own website as all anything that they put out into the world depending on whatever social media network that they're in into and therefore could be censored at any given time know how to do none of none of these things you know let alone put out their own media creation you know record video record audio do live-streaming make a podcast make a banner or you know a a poster make a presentation people don't know how to do any of that let alone one of it they don't know they don't know how to do all of it they don't know how to do one thing of it they don't know one aspect of any of those things and this is where we're at this late in this conflict this late into this war and it's unacceptable it's 100% completely unacceptable you know even with what we know how to do here we're still struggling with technology as you can see it's there certainly a loose connection somewhere along the line and that's okay it's alright we'll work our way through it as we always do because that's what this is about perseverance see it doesn't make a difference how much you have to keep struggling you keep going you keep going with it okay that's that's what a lot of people I see when it comes to this dynamic I'm going to stay on this topic for a second because I think it's very important when it comes to influence in society and how we can become the mavens of a society we could become the new media but how many people fell short in that task in that goal because they don't know how to go about it in any way and they're not learning see I I always give people the benefit of the doubt when they're open minded and willing to learn then I don't I don't hammer on them I don't get on their case as long as they're open-minded willing to learn willing to make changes willing to you know look at something new and say okay I didn't know how to do that but let me try it get into it see if I could do it the right way and just get involved then I don't have any problem with them it doesn't matter if they're not fully competent okay it's called trying it's called making a real effort to try and they're not afraid that means they're not afraid to fail see a lot of people people are like I'm afraid to fail I'm afraid I'll mess it up I'm afraid I'll break this or that and so I'm not gonna even start that's the act that total wrong attitude to take when it comes to this okay get a cheap tablet computer you know get a cheap two in one for a cup a few hundred dollars a couple hundred if you have to spend three four hundred do it okay and if you try new things and if you destroy it okay it's a couple hundred dollars you know I know a lot of people don't even have that you know kind of resources to put out there but it's like hey people go to the movies and buy all kinds of crap food and you know buy subscriptions all kinds of cable networks it's like invest that in a piece of technology that you can use as a learning platform you know and you could experiment a little bit with and try new things with and then maybe if you mess something up okay then you're not messing up your main computer all right this is what we have to do we have to take chances and get involved and try new things I see too many people they're like well I don't know how to do that and I don't want to I don't want to have to experiment because I you know I might mess something up and so they never even bother they never try and that's part of again taking it back to the dynamic of courage is a huge part of today's presentation because influence and and reaching other people is ultimately gonna come from a state of being encouraged not just being in knowledge and caring saying yes I do want to do it I care about this dynamic getting out there to a wider audience it's about having the courage to actually do it so you know at some point I really want to start going more into technology a teaching technology I feel like the teaching of the occult of the psychological aspect is of course it's the most important element but if it's not combined with the technological element what we are going to have is a bunch of people scattered to the four winds of the earth then know a lot about the psychological the philosophical the occult aspect and yet they can't do a goddamn thing with a computer to reach one other living soul anywhere on the Internet and this is the way information is propagated today folks it's not propagated by going and standing on a soapbox in the town square in case you haven't understood that it's propagated digitally and we're notwe're that war that space okay that that digital warfare space for the propagation of knowledge we're not doing very well in we're getting we're getting clobbered the Empire has struck back okay let's put it that way you know we might have initially hit them and you know blew up their first Death Star but let's put it this way you know they've they're rebuilding not just rebuilding they probably have rebuilt many of them the pole point here is we cannot take lightly the influence of the mainstream media and the social engineers and now there's a new technological god class the new tech elite you know these big tech firms like Google Apple Microsoft Facebook Twitter these they look at themselves as the new gods of our society because of what their technology and networks have made possible how they've made they have made it possible for people to communicate effectively on a mass scale and now they're trying to control that because they realize hey we can't we gave people too much too fast that's what happened folks that's what the social engineers realized they gave us powerful computing tools too much too fast so then they wanted to scale it back right they wanted to scale it back make it be less powerful mobile devices that are all about consumption of information that are coming from on high from from the sources that they put out there ok and down into the hands of the little person who only has this small little you know thumb device at their hands with an actual no human interface to actually really create anything ok except maybe take a few pictures or point a video point video at somebody okay and then share it on their own you know network that has only a few people paying attention to any given one of them you know when when people were learning how to build whole websites and there was a diverse ecosystem when it came to websites we were making grounds that's why it's when the apocalypse happened folks that's the apocalypse occurred past tense and it happened during the second way of a personal computer technology coming in you know Moore's law you know ramping up and taking off and powerful desktop systems enabling people to be media creation experts to become media creation experts and then be communication experts by reaching people with that media that's what personal computing advances in personal computing desktop computing advances in Internet technologies and speeds and advances in camera and lens technology made possible without a doubt ok now they've scaled it back because they realize we had too much too and they scaled it back giving people tap-tap-tap with their thumbs on some little crap screen that you can't really build any any media with okay and people think and that's what computing is all right it's a joke is what it is it's a sad laughing joke all right we need people becoming truly technically competent of what the internet is how it works okay how websites work building diverse ecosystems of websites again like we were doing in you know the early 2000s into the mid 2000s when social media came in it destroyed all of that and destroyed the influence it was having it destroyed the learning curve that was steadily ramping up almost asymptotically okay because it was a logarithmic scale of learning that was taken place folks all right people were learning how to build real websites then everybody got on Facebook and Twitter and that was it now that they have all those people in those platforms now the censorship begins and nobody knows how to set up anything elsewhere and that was the plan that was the plan the whole time all this time people could have been learning powerful you know web technologies and desktop computing how to really have a media set up media creation and communication and they weren't doing it because they're tapping away with the thumbs on Facebook and Twitter on their phone instead of really learning computing and really learning how to become the new media so this is what we have to do we ourselves have to learn how to become the new media and at some point in the future this is what I'm going to turn my attention to I'm thinking about possibly doing it when I get the one great work network up and running up off the ground and maybe that'll be part of the subscription model that I'm going to put together with that network with many other great hosts and communicators of information so you know maybe a part of what I do on that network a part of what my role in that network will do is actually on a weekly basis teaching people how to use different technological tools and just sharing my my computer screen in real time and doing like a a webinar based thing where people can come in ask me questions ask me how to do things ask me what I think the appropriate tool for a given job is I'm very good at things like that you know helping people set up computer systems you know showing them the best practices for things you know we could show people camera technology we could show people you know desktop computing laptops content management systems Photoshop you know presentations with a PowerPoint and Keynote how to make flyers in Photoshop or illustrator you know just or even open source tools you know learning what software is the best software for a particular job you know which software is optimized really well showing people open-source software if they don't have a lot of money to spend on software what the best free tools are okay and how to use this stuff how to really do things with it okay um it's something that I'm very seriously considering and trying to put together sort of a prototype classroom environment for and uh you know it'll take a while to get that up off the ground but I'm definitely going to do it in the not-too-distant future so that's what I wanted to say on how important technological competency right now we are like in it is like we're in an age where people don't know how to read and write and like a few people who have kept the the scrolls and kept the books and tried to communicate the knowledge are saying you know we better get out there and start teaching these people how to read and write that's where we're at okay that's the allegory because for people only to know how to consume media online and not know how to create it is 100 percent completely unacceptable and I'll tell you what that's where I'd say again 95 percent of the freedom community is there there is a core there is a you know a central core in the in the the you know the very heart of the community there are technologically inclined and know how to do this stuff because they recognize the importance of knowing how to do it but too few far too few okay so we're never going to make headway unless we learn how to use these communication devices called computers to the absolute maximum efficiency that we can possibly use them to okay it's never going to happen with the type of way that people are using computers today we're never gonna reach enough people we're certainly not going to reach the mavens of our society Malcolm Gladwell said that ideas and products and messages and behaviors spread like viruses do okay they get communicated very quickly from person to person and then it ramps up and then it covers a wide area geographically and geopolitically we have to understand that we can be those influencers of change okay we what we have to do is we have to be willing to learn what is necessary to put that information out there and we have to be vigilant to being able to identify who potential influencers in any given social circle or dynamic are so those two things we have to act as a maven ourselves but for mostly we should identify social influencers that are already present and already doing that work of influencing other people some people don't even know they're the mavens okay this is another dynamic you have to understand not only can mavens be anybody that some people don't even know there it they just do what they do and they don't even understand that this dynamic or what it could potentially the kind of change it could potentially lead to they're not aware of that okay they're just doing what they do naturally you know nobody a lot and I'd say 99% of mavens don't look for that position they don't go out there and say let me become a maven you know they just are natural leaders and influencers that gravitate to that position that other people trust so that being said you know as I said before it's like a domino effect okay a one thing doesn't seem like it can create that much change it doesn't seem like it could you know make that much of a difference you know this this whole presentation is about like how much of a factor or a difference can one individual make and I'm telling you a lot that doesn't mean that for the world dynamic to change whole large numbers of people need to change their behavior that still is true the question were that we're addressing here is to set off that change okay often small in amounts of individuals who people didn't think we're going to be able to have the influence that they have can set off that type of chain reaction so it is literally like setting up dominoes okay and uh you know that's the last slide that I have in the formal presentation before I go to some other housekeeping and go to calls I'm gonna exit from this and I want to see if I could bring up this video that I watched that was on YouTube which was about one small domino not being able to knock over a huge set of dominoes it's a very interesting one let me look it up and then I'll tell you to switch back to the laptop in a moment yeah it was an interesting video where this guy uses us he has a little tiny Domino the set the size of a like Pez candy in in a pair of tweezers and he's going to knock over a hundred pound Domino okay on the other side of this short chain of dominoes with a tiny little Domino about that big let me see if I can find it real quick and I think you'll appreciate this dynamic I'll post this video with the with the podcast yeah here it is it's called a domino chain reaction let me bring up the small one the short one we're not getting audio bear with us folks know about playing dominoes but what you may not know is that a domino can knock over another Domino which is about one and a half times larger so what I have here is a chain of dominoes each one has one and a half times larger than the previous one and the smallest Domino is about five millimeters high and one millimeter stick and I will carefully place it and there are 13 Domino's and the largest Domino it weighs about a hundred pounds and it's more than a meter tall ready boom that was 13 Domino's if I had 29 Domino's the last domino would be as tall as the Empire State Building amazing so you know the this is what the Maven effect is really about folks okay you know the Maven effect is about you know who are we as an individual to be able to influence and have change on in a wide overarching impact on society and I'm telling you we are all that individual potentially okay this is about what the potential for one individual is all about and how powerful one individual the amount of powerful change an effect an influencing effect for change one individual can have in all of society there's a movie that just came well it's a movie that came out this year that wrapped up a trilogy that a lot of people didn't even know was a trilogy it was the the unbreakable trilogy with the movies the sequence of movies that are allegorical films about this dynamic are unbreakable split and glass and glass is a new one that just came out in 2019 I'd like to recommend allegorical films to people and I think first of all these are done by M night Shyamalan who I think is a brilliant movie director I think he is one of the best allegorical producers of our time when it comes to allegorical films and spiritual films and this is a sensibly a comic book hero a real-life comic book story you know about like guys who think that they are comic-book heroes or villains and you know one of them has a condition where his bones are super brittle one of them has a condition where he's almost invincible where nothing can hurt or harm him and he never gets sick and another one is a split personality a di D dissociative identity disorder or they used to call an MPD multiple personality disorder where he has 24 individuals living with him and he has superhuman capabilities and um you know I don't want to spoil it for anybody but it's about having these potentially latent powers or abilities to influence society suppressed by a small minority that is interested in keeping the dynamic the way that it is where we don't have that power that's what the allegory is ultimately about in this series of films so I think they're not only very entertaining and well done movies I think that the you know what the person who really wrote these movies m-might somalian is probably one of the better allegorical film producers of our time on par with someone like Stanley Kubrick I would even go so far as saying so I'd highly recommend them and it is about this effect of influence this chain reaction this domino effect if you will the Maven effect as I would call it it's about how we as individuals that people would not immediately consider that we're so powerful as an individual being able to have a far-reaching impact and effect on others in society and this is how dynamics of change often go they are often set off like chain reactions like this so we have to understand we're that hand we are that potential influence that sets that into motion and sets it into effect in a wider way in our society and that's what we have to strive to be and you we have to have courage enough to start that process okay and it's a learning curve for us because it is going to involve if we're really going to reach a lot of people it's going to involve really learning media content creation alright so I salute the people who are doing that already and continue your efforts and the people who have not started that as of yet get involved and get on the playing field get on the battlefield and don't wait for orders from headquarters get out there and start and do what you can and learn as you go you know and the dynamic will get easier as you do it you don't have to know everything at first you don't you know what on earth is happening at first the very first week was not as polished of a show as it is today and you can see we're still polishing it and still making adjustments and changes you know it's always a process it's never something that's totally complete and in final form yeah life isn't okay so the whole point is get involved now do what you can do now as you could do more you ramp up your efforts that's what it's always about okay and with that said I think that that will conclude the formal slide presentations for today's show as always these shows are archived that what on earth is happening comm slash podcast I've been putting up the podcast on Mondays because I'm usually pretty drained after doing a three-hour program on Sunday nights and to be quite honest I'm gonna watch the series finale of Game of Thrones tonight I'm not going to be putting up the podcast tonight more likely than not okay yes I watch certain allegorical shows to see what the the allegorical content is I you know hope that they will do the right thing and destroy the throne itself tonight but we shall see okay I don't know if George Martin is such an awake allegorical writer or even the people he worked with but we'll see how it goes that being said a couple of quick things if you have found value in the water on earth is happening broadcast please go to gifts dot what on earth is happening calm here's a slide for the gift store and you can get all kinds of mementos here in return for a donation so we have t-shirts we have flash drives DVDs coasters keychains buttons stickers etc okay so go and check it out gifts thought what on earth is happening come we appreciate all your donation gifts that we've received here at what on earth is happening it keeps the operation going and moving forward also if you haven't taken me up on the offer for the Ark Drive I know a whole lot of people have because I've promoted it I want to continue to really promote this just about every week because the information that's on the ark Drive can have that maven effect okay and people are free to share it forward too so you go to what on earth is happening comm / ark the ark is a one terabyte hard drive filled to the brim with all of the research data that I put together here at what on earth is happening it's the best of the best of all of the media that I've collected over the years okay I send me a one terabyte hard drive I fill it up and send it back to you that's how the Ark offer works okay so check it out please sign up at the signup form for the Ark Drive and you'll get the after you fill in the form with your requested information you will get the instructions for shipping a whole lot of people been taking me up on the Ark Drive offer and I think that information is propagating pretty nicely I really like to see that and I hope that continues and finally if you want to make a straight donation to what on earth is happening you can go to the donate page click the donate tab or go to what on earth is happening comm / donate there are 10 different ways to donate five crypto currencies PayPal patreon check money order and right now what has our people have been very generously taking me up on donating this way and I really appreciate it and I also would hope that that would continue because it's really helping the efforts here at water on Earth is happening and that's that and that's donating technology directly and you could do that by clicking where it says on the right hand side donate supplies from our Amazon wish list it's called the what on earth is happening tech technology needs list the tech needs list and you'll see if you click that button it will take you to an Amazon wish list of technology that we need to continue to operate the what on earth is happening show website and office here so you know check out donate page and thank you so much to all the people who have very generously donated over the years to what on earth is happening it is keeping this cause in this effort going and growing so thank you so much and that will be all for the formalized presentation now I'm gonna put my headset on and we're gonna start to take your calls so calls are always as always taken on discord here at what on earth is happening do not listen at this point in your web browser or on any type of mobile device to the stream if your if your calls are being taken if you're just watching continue to watch that way but if you want your call taken and you're going to go into the the discord chat call in-room okay what you want to do is you want to listen only in discord with headphones because you will be getting me on a delay if you listen in the live stream okay so that being said let's saw get ready to go to your calls for the duration of the show any topic is on limits if you want to talk about the Maven effect your experiences with trying to reach an awakened a local maven that's fine but if you want to take it into any other area that is fine as well we're not limiting it just to that topic so any topic is fair game alright let's see let's go to links from the north links from the north you are live on what on earth is happening show number 209 welcome links are you with us you I thought I was I didn't see way in there oh it's down at the bottom sorry okay yeah I'm Way behind sorry okay all right I'm gonna jump sorry about that let's go to Andrew Rigby Andrew Rigby you are live on what on earth is happening number 209 welcome to the show greetings mark thanks so much last week I was on the show as y1c granite oh okay but you know the your show today inspired me you know what I am Who I am gonna call Andrew breaking my whole life so let's just keep it with the way it is the message not going to change I'm a I'm a Salesman as you described it and an aspiring Maiden ultimately I would say a Salesman I'm um what I really my passion is a connector I'm a connector I connect people to who have the right ideas to the right source of connections whatever it be they need expertise funding the sort of thing that's what I do I'm hosting my own database right now so I can spread a whole bunch of all of the knowledge that we're talking about here on the terabyte and even more so I'd love to figure out a way that we I can work with you and collaborate and figure out how we can get stuff that I've accumulated even hosting more and other servers and just building a whole network of servers that are hosting these all of this knowledge that it's getting out there so yeah like I think that is something people have suggested I'm gonna continue doing it but through the method I've been doing it directly with the arc but I think people putting up torrents is a very effective way of communicating information that cannot really be taken down or censored because you could share them with magnet links as well which are really only like hash tables and links you know so you send that out you send a magnet link out you could post that anywhere and nobody can stop a magnet you know you'd have to shut down the internet you have to shut down text you know you know you're gonna shut down hypertext you know it's like that's the whole technology the Internet is built upon so anywhere the text can be posted a magnet link can be shared so doesn't even require a centralized server yeah no doubt you've been a great inspiration to me to help me just get the word out there as many possible ways as I can inspire me to start writing do a whole bunch of other stuff so I'm really excited to share everything they have with you fantastic that offline as far as technology goes they'll mark my question is a really simple one what is the one area of technological research that you would say you're most excited of emerging research and advancement in the field of technology I would say that yeah my my eye has been on photonic computing if you research what photon based computing is it is going to be a radical advancement to computing architecture in the near future hopefully in the near future I don't know how far along they are with prototypes prototype models of photonic computers but essentially it's light based transference of data and it is going to increase speeds you know you know speeds of internal data is going to go into the it'll be like in the instead of transferring hundreds of megabytes per second will be transferring hundreds of terabytes per second like literally like the introductory prototype speeds that they're talking about or like it six terabits per second now I know that's not terabytes but like you know it'll get to a point where you know it'll be over a terabyte like to copy an arc would be a couple seconds literally right you know whereas now it's like four to five hours you know or more it right but like Wi-Fi technology where they're actually transmitting data like a Wi-Fi through a light that you'll have in your home no no this is this is actual desktop computing architecture that we're talking about so you know I'm sure this would eventually also then be taken into the realm of networks if it hasn't been you know theoretically discussed doing that but we're talking about a new computing architecture with something that's called universal memory some I think HP has worked on this with something called the memristor and it's something that basically is going to act as a universal form of memory so there will there won't be separate memory components in the architecture so you won't have RAM a cache harddrive you know anything like that it will be one form of memory and you know we're talking about you know beyond zero latency speeds you know you'll be able to copy whole libraries of data in literally seconds so yeah what would naturally would transhumanist agenda type style future I mean I don't think I don't think it necessarily must you know it could but I'm not I'm not the fearful technology you know a person who looks at technology in just that fearful way we're just it becoming powerful is gonna mean the end of humanity I think we have to just maintain control over it and use it as you know what it should be our servant instead of allowing it to become to become its servant you know I'm not a technological light a Luddite as people know I think that any of the advancements that have really led to a increase in human productivity and quality of life have been because of technology just about anything we use on a daily basis to make our lives easier is some form of technology or another when it comes to computing technology I think there are ways that we can make it better and cleaner and not as polluting and not as destructive to human physiology but I am for the advancement of technology in the sphere of communications this is where I think we are very capable of communicating information more effectively and completely and in a more efficient way I mean right now you look at how we're still doing things copying things slowly to thumb drives or you know just too often slow hard disk drives that aren't even solid-state in many cases you know or every computer I use now has an internal solid-state drive thank God I mean because the the old HDD hard disk drive magnetic platter technology just needs to go to the dustbin of history you know that stuff is his has been done should have been done like 20 years ago and only now the prices are coming down to affordability for the average consumer you know the average end-user so um you know I I think that what I look at toward the future is what has been referred to as photonic computing and Universal memory you want to definitely check those out absolutely thank you so much and I'll take it off the air but mark thank you for taking my call but I just wanted to also put a recommendation out there to your listeners as far as a book that's really worth reading by a gentleman by the name of PJ McClure he calls himself ironically based on the show the mindset maven okay and and his book is called flip the switch interesting you lost you've already you mentioned flip the switch on the story but he wrote the book titled it flipped the switch the mind by the guy he called himself to mindset maven PJ McClure it's available for free online he give this away he was PJ is in Paul PJ McClure Creek MCC oh you are great I'm not familiar with them so thank you for the recommendation and I'll definitely check it out all righty thank you very much money Andrew thank you so much for your call and hey thank you for your courage and putting your name out there you know I find that I find that personally commendable I'm not saying any everybody has to do that at your own choice I'm going to necessarily look you know negatively or down at you I'm just saying that like you know I think I'm not saying just in a discord room to take take your call you need to do that what I'm talking about is if you're going to go and put your information out there on a worldwide Way on youtube on Facebook on your own website you know associate your name with it it's your work you know what I mean don't make these people think that we're afraid of them we shouldn't be afraid of them you know I'm not saying they're not dangerous people I'm saying we show fear that's emboldened them that's all I'm saying okay all right so let's see we're implementing a queue today to see who got into the room earlier so I'm gonna try to stick with that if possible okay it's a new technology that we're working on and you know I'm gonna try to stay to that to honor people who have been in the room longer than others so let's move on to Francesco Francesco you're live on what on earth is happening welcome to the show hey good evening mark thank you for taking my call absolutely well so I guess well first of all this is what this was a great show and I guess another way that you sort of do your reality your reality checks for people yeah definitely like we need to find the courage to to get out there and try to influence the more people that we can and for for me you know in the beginning was quite a depressing show because I'm not that much great in influencing others at least person to person but I guess the the good the good side about it is that I you know I I took to the Internet so in a way to sort of try to to send the message in the bottle and see you know who will will be taking it so exactly we don't have to be we don't have to be all things to all people like if you're a better creator of media and and just putting it out there you know start up a channel or a site and be a content creator again as the last caller Andrew said he's a connector he may not be the Maven he may not be the sales person or even a creator of the media himself but he can connect people he can show people hey you might want to talk to this person or you might want to look at this person's information or sphere of knowledge and you know those connections are very important too so that's a type of influencer you know so you you you find what you're your strengths is and then you do it you put it to work you go out into the world and you put it out there for people I'm just trying to get people that like not be you know complaining about what's going on in the world but not really doing anything we have to take action it's not just about knowing what's going on and then saying oh woe is us you know what are we gonna do you then have to take some form of action and try to do it out in the digital space space if possible you reach the most people that way because this is the new town square quote-unquote this is the new way that you know again people don't physically leave their homes get up on soap boxes and try to raise their voice and and talk to all the people in the town square you know we still you know people still do little you know canvassing things and handing out flyers and then I'll call it business cards but really the digital space the web is where the new town square and where the new personal communications forum is at and knowing those technologies and how to use them is ultra important because that's where we're gonna reach the most people exactly well for me it was you know kind of seeing the the brick wall which I had to confront every time I try to speak about these issues you know in the in the physic in the physical world right but I guess so that the good thing is that that motivated me to to get get get more active you know to hurt the movement in the end yeah so let me ask you a question in how has the response that you've gotten when you've attempted to you know kind of Oh enlighten or help to awaken somebody or give them some information that you think is valuable and pertinent to their life how have the vast majority of people that you've attempted to do this for reacted give me like a ratio of percentage how many people would you say you were able to help somewhat reach somewhat or how many people were not interested at all I guess the reaction that they got most of the time with but at first in credulity then they say oh well you may be right but you know can do anything can do anything about it yeah that's a stage within the awakening process let me ask you something would you say like eight out of ten rejected it would you say six out of ten rejected it at first no probably probably probably even nine okay all right now how many have come back recently more recently and said I think there was something to what you've said there but I don't necessarily think there's much that we can do out of those out of those nine out of ten yeah probably another nine out of ten yeah probably yeah maybe you know okay so then there's still a few who think who kind of know what's going on and think we can do something there it's it's not you know everybody who is kind of has thrown in the tower or given up or said no we can't can't influence this for the better so there's you know that and that's that's what I'm saying I'm saying it's probably it's well under 10% folks you know that are even thinking we could turn this around at this point and again I'm still one of those people as much as I think it's really bad I wouldn't be on the air every week if I didn't think there was something we could do to make this better I wouldn't bother I wouldn't bother speaking so I think it's still possible although we're in a very dark time we're at a very dark aspect of this problem is maybe and then people that might say yeah right but I don't want to get involved because you know if I you know share share some of the things right some of the things that you passed me you know I I know Facebook I have a friend that it's I know some cops or whatever and I can't you know shows up you know who the cult of ultimate evil we're having some audio issues because of how the the laptop has been sort of glitching out a little bit today not again I'm not really sure what the source of that I'm gonna try something here and see if this corrects it at all but you know yeah I I can still hear you so I'm you know continue so you're talking about how people like they are afraid of the of what other people think of them you know that this is the thing that is holding most of us back is we're still in this fear of what other people think we're still in this fear of you know what will these people in my social circle think of me if I share this information this is what your you've encountered a lot of yes exactly as I said if I share this you know I know somebody that you know it's it's a co-op or works for the government so right I'm afraid of their reaction and and you know things like that see this is the stuff that I'm talking about folks you know this is what we have to move past as as us as a species as a people especially even in our social circle as potential influencers of other people you know there's so many people who do know this and they don't want to come forward Francesco I want to thank you so much for the call by the way a great point that you brought up regarding fear of what other people think and how other people in your peer group might might think of you might might look at you as if you share certain information you know I have briefly told this story I won't use any names I know somebody who's as highly knowledgeable as someone like myself in just about every area of this of all of this knowledge that we talk about here on what on earth is happening and because of a financial situation that they are involved in where they stand to inherent inherit I'm sorry a lot of money from a from a you know a financial empire so to speak from a product the person does not come forward and speak because they think that their family will cut them off and not they will not receive the potential inheritance that they could and so they just stay silent and again I've said it many many times in the past I think that's the worst karmic scenario to be in in any other out of any other scenario I think there is more karmic debt and suffering associated with knowing the truth and staying silent than there is with people who literally do heinous things to other people physically I think there's more karmic debt because of what you know to be true and that is a deep spiritual burden if you don't communicate that to other people so I can't say it any more strongly that if you do understand what's taking place it is your personal moral responsibility to communicate it to others okay let's continue on and let's go to Loki tow Loki tow you are live on what on earth is happening welcome to the show thank you mark for taking my call absolutely yeah I kind of just did a little late to the show but I hear that it's about influencing people yes and yes that's take a lot of time to influence somebody sometimes like with me because I do the Latin like I back in in your latest show where I said where I translated all your natural law seminar yes and I went through I did do a presentation I did a lot of announcements and I did do was more like an old school close to the Flyers everywhere and everything it it kind of didn't go too well because I practice run for me okay I only had like two people I showed well actually they were more interested anybody else but it showed me what I needed to do for the next time basically this is like a learning curve sure yeah that's the thing like like you can't be afraid to fail you can't be afraid of rejection or failure you try if you don't do it well and you fail you fail and you know eventually you do it again you persevere until you get better at it and then more people will will turn out and receive the message I mean you know I wasn't getting this type of viewership that I get now back you know in 2007 when I first started you know I started in a living room with like you know a handful of people sitting in you know folding chairs in a friend's living room that's how what on earth is happening started and most people don't even know that you know so you know it's it has a snowball effect you know you have to keep doing it if something is worth doing it's worth continuing to do but yeah even after that half it showed me what I needed to do and what I'm going to do different now is actually go talk to people personally with the Latin community it's a little different because in social media it's mostly or for family so Latin community that's what I have to do is actually go talk to him go to the flea markets go where they go and there you just have a flyer and then talk about the topic set I'm going to talk about cuz I've noticed that with the two that we're interested it's because I was talking about the topics that I'm gonna present you know just a brief overview and that kind grab them so that help me learn what I need to do like so next time so I'm gonna create a flier that has the topics that I'm going to talk about and just like a brief overview in Spanish basically this is this is an interesting dynamic here that you're talking about Latino because I have often myself wondered and a lot of people will you know try to take this as some type of you know race dividing statement but it isn't I think it's a it's a cultural and social dynamic that we have to explore more by discussing it and finding out where the factors are but I hear constantly and and and see people questioning you know why aren't there more you know african-american people or Latin American people you know or or Asian American people at events regarding freedom you know why why does it why is it seen or perceived as some sort of a white culture for freedom being a white cultural thing or horribly in many cases as seen being white racist you know which absolutely is not and the people in the freedom community are very very accepting and not racist at all you know and I but you don't see that many people from a more diverse series of ethnic backgrounds when it comes to you know conferences meetups etc and why would you as I'm assuming a Latino American am I correct okay what why would you think that that is the dynamic that we see take place I may do a whole show on this dynamic at some point or albeit admittedly a potentially controversial topic but I think it's something that needs to be fleshed out and understood better the there's a psychological dynamic that we're not really seeing or addressing in why this may be that way what why do you think it's that way or have you heard anything to that effect um well to what I've learned and I guess my opinion on it would be is because of the cultural differences and the it would be yeah morosely it'd be the cultural differences on the way that people are raised and said more comfortable with that type of I'll say programming of the way the culture is they're more comfortable with that but then at the same time it's is still the same language it's just it's just the difference in culture oh is it a more inherently sort of embalmer ingratiated sense of respect for authority in government in the culture because you know I mean there are you know traditions of Independence as well in the latin-american countries and cultures but you know it seems like maybe also the influence of socialism you know has pervaded in a lot of the Latin American communities as well or Latin communities I should say you know in in Central and South America so you know those factors I think have to be factored in as well but you would say it's more cultural and do you think it's like that way from how its taught to young children yes because like in the let religion yes and are in the Latin culture where they have that where we have to follow what the chefs in which it's okay up to a certain point but then you still got a question if it's right or wrong and most of it's wrong because they're falling with the laws of the government too and they teach that in religion where you really have to listen to Big Daddy right and they do that in the real in the church in the religion even with my background because I came from a Jehovah Witness type of religion which is kind and a really strict but I've noticed the similarities because it even in that culture they teach you you have to listen and follow the laws of the government and they they they they put it in their teachings and I believe that's heavily like I said it's heavily in the culture of the Latin community because religion is sort of heavy in the sure nine community but it's been kind of broken up because of the stroke school and the way information is provided and it's actually broken up a lot of families that way too because of the a lot of that information is out there but in my experience there's not enough information in Spanish and that's what led me to translate your word to help produce more cut minyan in spanish basically yeah there's definitely that language gap there as well you know and I think you know technology can also assist with that because there's definitely some automated translation that is capable of being used to bridge that language divide but not to go back to the point that you made and I want to thank you as well for the call great points that you've brought up and thank you for answering my questions when it comes to that dynamic culturally but they do too yeah I've got it one of the things that our lakita brought up there is the influence of religion and you know this goes hand in hand like hand in glove with government these are both authoritarian dynamics that play off against each other you know neither one of them wants to see you know the the the other lose their influence and power because it would diminish the influence and power of the other these are two arms of what I call the unholy trinity the unholy trinity of mind control and social control is a religion which is the father of it all that's the highest end of it it's all religion then you have the mother which is the monetary / financial system which works on our emotions and is the feminine dynamic influencing our desires for things and then of course you have the child which is the male you know active influence that comes together because of religion and money and that is government you know the religion of authority combined with money people being paid off to do to become older followers and you know hammer people into submission you know that's ultimately what government is all about you know because it is slavery so you know this is what people have to understand is that these three dynamics all work together as one cohesive unit and they're on the same page and the social engineers that put all these things together they're operating on the same page where were divided all over the place because they could put us into different dialectical positions to war with each other over you know just two different forms of control two different ways to get to the same prison cell you know you're gonna take the left path you're gonna take the right path but you're ending up in in a prison either way you go and they have people believing that they're radically different things but that's the power of mind control alright let's go back to our call queue and see who's next in here alright let's go to Greg Allen Greg Allen you're live on what on earth is happening episode number 209 the influence of the Maven awakening your local maven what do you have for us Greg we're having an audio problem although my producers telling me we're having some audio issue are we okay I'm hearing I'm hearing him fine it's not coming through the stream you sound fine to me do you want me to reconnect my headphones all right I'm gonna I'm gonna reconnect now this all right we're going to make a reconnection real quick to the computer hold on one moment Gregg are you still there yeah I'm still here mark okay that looks like it cleared up the audio issue that we were having thank you for your patience yeah no problem got a few gremlins in the works oh yeah apparently it's okay you know pesky little critters well if they weren't doing their stuff then you know we've obviously got them bothered I'm glad to talk with you I've been following your work now for a couple of months I'm a truck driver and I've been downloading your podcasts for you know you sure that's on iTunes and of course as you can imagine I spend a lot of time in the truck and you're really waiting my way through from episode one I think I'm up to episode 37 oh that's great of your podcast for so really some powerful information and confirmation of a lot of things that I've come across in my own research over the last 11 years I appreciate that thank you yeah no one saw every when I came across you in the last dozen years I thought you were still maybe working for the opposition but I get that a lot even to this day I mean how many years can you you know advocate for total human freedom and the destruction of the occult and the destruction of mind control and people still tell you that they're trying you're trying to do that you know it's a lot of people don't have still don't have very accurate powers of discernment when it comes to understanding who's the genuine article and who's controlled opposition but I think people with discernment you know do find that out or figure it out pretty pretty quickly mm-hmm well your own personal story touched the chord with me because I loved it usable my life was really down the toilet and it was a time in my life where you know I was at the lowest ebb human being could possibly be and rare one night I fell to my knees in tears and weaping and deep remorse and regrettin I sobbed my heart out like a baby for a long long time and it was at that moment when I would really suppose in the Gospels what to describe it he's you know looking up to the heavens and pleading to the creator of all creation to forgive me for every rotten word deed and act that I've ever done and I can't really explain it except say that he felt like at the time how was I had a deep warm glow into my chest and deep in my heart and it was literally felt like our weight was being lifted off my shoulders Wow yeah that's the psychological dark night of the soul you know that's yeah this is our hitting rock bottom and you know there's two ways to go from there there's death and then there's coming out of that abyss and rising up toward the light and it looks like you chose that path which I'm happy to hear that you went in that direction because often it takes that level of suffering and that extreme dark night of the soul for people to be able to turn their life around and see the truth for what it is and you know make progress toward the direction of the truth and and toward right so I I commend you for having that you know fortitude personally and spiritually to be able to do that because some people thank you they go in the of that other direction and they resigned themselves you know or they they just hit you know not just hit rock bottom they go right past it and they don't make it so it's aw it's a it's a testimony to your spiritual strength Greg well thank you one of the things that you said in your podcast that struck another chord was that there are the three little words the hardest words for any human being to say it was I was wrong and I think it was during that conversation that I was clearly with the Creator to forgive me for everything that I ever done wrong was you know I did say our job was wrong all of the things I've ever done said of what that path ever since and so yeah your podcasts are really coming from a place of good spirituality thank you I was just once all about her you know it's about it's about making that you know genuine effort you know that you know it's about trying again even if you fail you at least made the effort and no one can say you didn't try you know and that's where we have to get more people at that level of courage to say I don't know what's gonna happen but I'm damn well gonna try my very best you know and I just try to be a an influencer in the way that I try to lead by example of the efforts that I've put forward over the years and kept going even though I've had some dark points during that time you know I haven't given up I've kept going I've tried to refine the work and bring it up to a as high of a level as possible and just show people that that is possible to do you just have to set your mind to it I think somebody said once that the the Million Mile March begins with the first step and the first step in in that process is really admitting to yourself that you're recognizing that you you you are in the wrong and and it's the very reason as to why your life is a pile of crap you know and you need to do something about getting yourself out of that it's recognizing that you know maybe every wrong word the in action that you you've actually been doing and saying that is wrong that's been hurting people and see if you would if you acknowledge that to creation creation isn't gonna bury you for that it's not it's gonna say okay well you were wrong now what so if you make that apology and you say I'm willing to change my behavior my actual actions to do better the creation is not only not going to bury you for that it's not gonna you know beat you further down for that it's gonna actually come up underneath you and support your effort to change and that's what people have really gone through that process can testify to they can they can say in their own experience that that's what happened though you'll see it in the direct result in what happens to you in your life I saw the remarkable 180 degree turn around in my life and that you know I've had so many things happened to me in these last 11 years ago way beyond coincidence where I see the workings of the universe the Creator whatever you want whatever is comfortable for people to call it where things are just happened for me doors have opened for you no jobs of materialized contracts have opened for me you know I that she's a phenomena that I wanted to ask you about that a lot of the places where I go or see or do I can I come across the figures of seven one and seven which is my birthday first two first of July I see this all the time I see these numbers placed in front of me all the time warrant seven and I'm just wondering if you value anything of a similar experience where maybe the creation or he's trying to let you know that hey I'm with you I'm standing with this it's amazing that you would even bring that up and it's what's even further amazing is the synchronicity of the numbers because those are my numbers especially seven seven is the number that I see all the time I see triple seven seven seven seven and when I did the English geometry of my name my first middle and last name all add to seven and this is a very significant spiritual you know symbolic number representing coming to a place of knowledge care and and right action which is what 777 has represented has represented a cultic lee in occult gematria and the numbers one have come to me in the past mostly I still see them from time to time but in the form of eleven eleven eleven eleven has been called the the lightworkers call it's a a balancing numerological aspect and it also represents justice because justice is the the scales of justice are the balancing aspect in nature okay and the justice tarot card is card number eleven of the Major Arcana of the Tarot which when you lay out the cards in the Kabbalistic tree lay out comes to the top of the macrocosmic Tree of Life in the crown position of that tree of Kabbalah in that card layout representing that it is the highest force in the universe that law justice and law and natural law is is the what rules the entire all of creation so those numbers are probably what I would consider to be the most symbolically significant numbers at least in my life those are the ones that synchronistically or if you want to call it synchronistically reappeared to me over and over and over 1111 was happening before I went into what on earth is happening almost like you know like literally like driving me nuts eing it so much to a point where it was almost like saying you have to do something more than what you are doing knowing what you know having gone through the experiences that you're going through isn't enough this is a doorway they call they also call 11:11 a doorway it's like leaving one world and then entering another world like doors okay so like like you said doors have opened up for you okay I I consider the ones almost like opportunity presenting themselves or showing you what your work must be and the sevens are often I find at least I don't know if others will agree with me when it comes to gematria analysis you know occult numerology analysis but the sevens are almost like a nod from the universe that you're heading in the right direction that you're going in the correct direction they're like an affirmation at least that's how I interpret them okay again gematria and numerology are not what I would consider the biggest strong suit of mine in the occult studies what I would personally consider I have a very strong background in is you know Kabbalah Freemasonry Tarot those are the traditions that I have really delved the most into in the in the occult Sciences the occult Western mystery traditions but gematria has been an ancillary study of mine and it's uh my personal interpretations of both the 7 and the 1 are like that the the opportunities are there in the ones and then the 7s are almost like your Pat's on the back like you're heading in the right direction and this is affirmation that you are doing going in the right direction and doing the right thing well the strange that my first name is made of seven letters Greg or Gregory which I'm let's endure to believe in understanding these short for comes from the Grigory what the

Watchers write the religion was there are a wiser and better man understanding that you know the the great men like professor John Allegro Manchester University we send over to transcribe the Dead Sea Scrolls we published a lot of what he'd done all be in in rough form and then the Roman Catholic Church flipped when he published his word because he was taught the contradiction all the church dogma that they were putting out and that he'd realized that they'd conflate the two stories you know the the true story of a guy called Ahuja the teacher of righteousness and the the worship normal worship of Mithras that's a very combined in the combined the two together yeah yeah this guy did live but he was born in 160 BC and died 1880 I think it's 88 BC um he he was a radical and a rebel he was the leader of the yes in community and took the priestly Jewish hierarchy to task sadly one too many times and they grabbed all of them and they'll disaster the tree to her house where you get the story of the sky called Jesus Christ there seems knew he was you know the new he was just an ordinary mountain but not the the Jesus JC that bullshit that we get from you know the the church about organized Church in Christianity churchianity or as I like to call it constant Indiana tea because I came here ultimately from the Council of Nicaea and Constantine to maintain control in the Roman Empire Greg thank you so much for the points brought up a very very incredible spiritual dynamics there I want to thank you for what you have done to change yourself and wish you the best in your continued journey so thanks so much for the call really great stuff thank you mom you got it yeah I talked about that dynamic when it comes to you know the co-opting of true Christian ideals and philosophy in my fake-ass Christians presentation if people want to check that out I went into those dynamics that Greg was referring there in toward the end of his call in the fake-ass Christians presentation you can get that in my video section or on my youtube channel all right let's saw let's move on to another call let's see who we have here let's go to Ivan from Phoenix Ivan you're live on what on earth is happening welcome you have to unmute yourself I can see that you're still muted on your end Ivan from Phoenix I've unmuted you at the server end I'm showing that you're still muted on your end I'm gonna move on alright let's go to okay I'm try links again links you're live on what on earth is happening are you there I can there you go we got you ah great and nice to talk to you again you too so I want to talk about to to online personality study you know at least know them maybe you have like some some thoughts about because I I was actually - is it it's bit synchronicity because I was thinking like the other day that like I'd like to talk to you about these guys and maybe they would be what you would call a maven so and they kind of been going in in different directions so like I came across a guy in the shed a few weeks ago in the after our chat and he told me about an American guy that's a a Christian guy actually but I've been going into his work or listening to his live streams for a few weeks or now and his name is Owen Benjamin do you know about him I do actually yes I think that he has gone into quite a bit of information and there is some of his perspectives I don't agree with because they're a little bit too radicalized toward certain inaccuracies but then he gets the considerable part of the picture when it comes to what's really going on control wise he understands the pedophile aspect of it you know which is a huge aspect to really understand I don't think he really deeply understands some of the more occult aspects of it certainly not necessarily from the psychological position when it comes to the occult and I don't think he understands what Anarchy truly is that being said I don't think I don't think he would be an individual that would be able to understand those things he seems to have a very sharp mind so you know it's a someone that I wouldn't mind trying to you know pull over toward a even more aware position by making him aware of some other information he just hasn't looked deeply enough into as of yet but I have checked out some of his live streams and he does have a considerable viewing audience because of his status as a celebrity so you know a celebrity comedian so I do think he's a maven I agree with that contention I do think he has a tremendous potential as an influencer so you know I think maybe people should bring some of this information to his attention and maybe he can go even further in his understanding without a doubt yeah so I'm aware of him yeah so that's basically the conclusion that I've made us what you just told me that like he seems to have a pretty sharp mind and and be kind of aware of things and I like he's kind of like he's the first basically Christian person that I've felt that I you know he seems to be a good guy and he started a farm and you know he got thrown out of Hollywood kind of read open his mind about that stuff the under so - true theology a little bit and how that co-opted the original reel aspects of the Christian philosophy which is older than what we call Christianity and he understood the occult more I think he would a wider understanding of what's you know really taking place with the control system and how it incorporates religion into it would would dawn upon him but that information from what I've been able to gather hasn't hasn't quite reached him yet so you know again everybody has different pathways in their journey and learn different things at different times and at different rates so I definitely see you know potential in somebody like that their ability to learn and communicated but he's kind of unfurling it and you know doing that almost like in real time on is on some of these streams from what I've been able to gather and kind of odds just going deeper into learning about all this so the inter an interesting dynamic if someone like that does you know go even further and see how the control system would try to contain that you know because you know clearly they don't want people like that with large viewing audiences who they clearly influence really waking up fully they don't want anything like that happening yeah he got thrown off Twitter and he PayPal as well so wow something's up yeah mmm yeah they're trying to do that with more and more people you know and use them as an example of like you know make other people afraid you know it's like people can't give in they have to keep going and have courage even if somebody doesn't have every aspect of it right you know what I mean you know there's a you you have to be able to freely be able to speak and and make mistakes and get things wrong you know yeah this is how we we flush things out and come to an understanding of what's really taking place and they don't even want people to be able to go through that process they want you to receive the reality that they push toward you that's all they want you know and if people let that happen they deserve what happens to them you know yeah we have to resist this you know I think he's building his own network as well so so yeah that's cool true and I also like to talk about another part that you've been interviewed by before and in my regards he's been going in the totally wrong direction you know quite a few years now I'm kind of saddened by this because I used to listen to him and be a contribute to his work I do yes I just want to I just wanted everybody know we're still having some audio problems and I believe I know what the issue is I don't think we're going to be able to solve it on today what no matter what we unplug or move I know my producers been trying to figure out and trace it there's only one dynamic that's been changed on today's show and that's the introduction of an air conditioning unit into this room and I think this is an electrical issue with the power in the room because we may be almost overloading the the power the the electrical you know circuits in the room because of the air conditioning being on with all the other equipment in here so it's something I'm gonna have to look at maybe have my electrician come in and take a look at but I think I've noticed a correlation when the air conditioner compressor kicks that's when we're having the laptop caught briefly so I apologize for that you know we didn't want to swelter in here because it's a pretty hot day here in Philadelphia and it seems to be causing dropouts with the computer which is where the unfortunately the discordant audio is running from so if that comes through in the show I apologize for that there's not really anything we could do about it we'll we'll try to take care of this you know and get it sorted during the week so that doesn't happen on next week's program so I just wanted to say sorry about that links but let's let's just continue and you know power forward so is she coming through on the stream say something no you're not coming through I'm gonna make another disconnect and reconnect so just bear with us you you check ok sorry about that folks my producer is trying to correct a discord audio again I think it's a problem with the air conditioning unit being on so links are you still with us no I don't think you're coming through in the stream say something again she's not coming through yeah your your audio is not coming through in our stream that's the issue that we're having did we go off the stream just I know that you can hear me just give us a moment we're still dealing with a technical issue on the server and on the streaming end cut my mic you check okay all right so it looks like we may not be able to continue with calls I'm not really sure look link say something one more time so I can hear you but unfortunately you're not going out over the air so why don't you just ask a question and I'll repeat it that's how we're going to have to proceed because I am fairly certain you're not coming in let me quit discord and relaunch it I'm gonna quit discord well this is live production internet TV folks and it doesn't always you know it's not always trouble-free and I apologize that were seem to be having some severe issues going on today links can you still hear me okay she back check good say something yeah I can hear you but you're not coming over the stream so unfortunately we're going to have to do is just ask your question and then I'll repeat it and then I'll answer it so you you were talking about Henrik Palmgren okay so she's saying that she feels that Henrick palm grin is going in the wrong direction with you know what he's been covering on red ice and III do think that as well I have heard that he has gone in what you would call a white nationalist direction and this is a blow back from you know the kite type of forced cultural penetration that you have in Europe happening from trying to force cultural integration and bringing in a lot of Muslim migrants from the Middle East and other areas into Europe and when you have that type of a cultural clash it's going to be something that is not really going to produce a lot of optimum scenarios when it comes to how people are treating each other and getting along when it's done non naturally and done because of many different political factors this is something that is definitely happening in Europe and a lot of the a lot of it is creating a lot of tensions and conflicts and it's polarizing people and creating a dynamic where you're having this backlash toward you know a more elitist cultural view of you know Europeans whites etc and I think this is a dialectic that they want because it plays into their hand politically and I think that Henrick and for unfortunately in my eyes is someone who kind of fell into that dynamic you have to understand that it's all a polarization dialectic and it's done deliberately and instead of just you know moving it toward hating on people like you have to identify the political polarization for what it is and let people know that this is a divide and conquer strategy and a technique that is used by people too you know by the social engineers to set people against each other it's something that I think too few people are want to talk about because they're afraid of being attacked and labeled as you know being racist that by even bringing up the whole dynamic but you know to fall into it from just a you know racist mindset and take it into a realm of you know just hating people because of a cultural difference or skin colour difference isn't going to help anybody you know it's like we have to see all of this as a divide and conquer strategy and you know a lot of people don't really understand how that dynamic works they don't they don't see it fully for how it really operates and how it's been socially engineered and it's it's hard for people to even have the discussion because they don't understand social engineering that this is what is sort of disappointing as far as Henrick goes because he does understand those social engineering dialectics you know or as far as I can tell he does but this is like you know something that he's unwilling to you know put aside the the personal issues because of what's actually happening in their environment you see this dynamic with you know going on in England a lot as well you know because of their certain Sharia law coming in no-go zones for people where there are high levels of you know Muslim migrants etc and it's all designed that way you know it's all it's a political design and people can't really see the dialectic you know dynamic that's taking place they can't see it so it's something that I think it's going to take a deeper understanding of social engineering and mind control tactics for people to really get what's happening in that dynamic and to pull back from a reactionary Ansem just pushing back against the people these people don't even on who are being used for this political these political agendas don't even understand what's happening they just want to go into a place where they might think that they'll have some sort of better quality of life instead of actually making their a region of the world better you know I mean you see this happening at the u.s. southern border as well and I've talked about it a little bit and again I don't really believe in you know nation state borders either but at the same time you know I understand how this is all being used as a geopolitical divide and conquer strategy and as that's why it's very difficult to overcome these dynamics when you have one culture being pushed into another and there are cultural divides and values separation value differences how would you expect those people to legitimately you know integrate and get along when that's being done through completely artificial means as a dialectic you know so you realize this is a very complex issue not everybody understands the political motivations behind it and understand how it is a dialectic and an agenda and you know it affects things on a on a social scale it affect affects it on a political scale and it affects it on a financial scale and this is exactly what the globalists won and they want people divided and arguing over it and they want people who have the potential to become radicalized to radicalize themselves over it and then that creates further conflict and divide in society so the plan is working according to plan it's working perfectly according to schedule according to plan because not enough human beings are aware of the social engineering aspect of this they don't get why certain high-level globalist elitist would want to push cultures together like that and what they are the chaos that they are trying to create by doing that they don't understand that dynamic so that's my response to what you brought up about Henrik and I agree that I certainly agree that that individuals was a maven and bringing together bringing people together in the truth movement especially with the work he's done in red ice creations I also find the direction he went disappointing and I don't I think he's capable of coming back from that position if he acknowledges you know the ways that you know he was incorrect for having done so but you know that's going to involve you know that those three powerful yet hardest to say words so you know we'll see what happens with that again I've talked about uh we could you know discuss the work of other people and their potential effect on people as well as mavens again I do think Palmgren was one of them because you know the stuff that he did in the early days with red ice it put lots of people together it put a lot of people on the map you know and that work was invaluable so I definitely agree with your analysis as to the direction that he went so thank you for bringing that up links you got it no worries okay that was links thank you links for your call let's move on to another caller and I'll relay your message so get right to your question give me get say your question or come and quickly so let me repeat it and then I'll address it okay that's how we're going to have to proceed unfortunately and hey it's what it is and we'll sort out the electrical issue that we're having you know next week okay let's see who's next in the queue we have Arnold no yes Arnold from Paris Arnold from Paris you are live on what on earth is happening welcome not really sure if you're coming through strong in the stream my producer is saying no so let's just I'll get to your question or comment and I'll repeat it for the listening audience so I just we have your audio now we finally looks like we resolved something in software so we have your audio go ahead Oh fantastic thank you so first of all I want to say thanks for putting in some French expressions in your in your show at the beginning of this show that's really funny I just want to tell you that in France here things are you know things are going to pot here in France and I said you know sake why I can't say what yes yeah well the X Factor when it comes to a maven why are they trusted yeah I was trying to think what you were referring to but yeah I remember okay yeah in a sec why exactly yes I noticed something with the the influencers there's a the fact that the bigger the influencer is and the more influence they actually have the the mo that the more to have to lose yes agent yeah so whether this is sponsorship deals or character assassination media assassination censorship you know most of these people who have these big audiences it's at least the ones I see what is ad revenues they're just so scared that these guys their message that's why ya know can't rely on a revenue stream coming from these big social media giants you know if you're relying on a revenue stream you know I don't like to call revenue if you if you're making any amount of money or you know donations come in through YouTube or Facebook or Twitter like that's the wrong model that's just just an incorrect model okay it looks like your audio went again so just say they were saying just before so I'll respond to that he said the censorships getting so bad in Paris that people are literally getting jailed for certain political cartoons that they're putting out with political messages and yeah that that is that that is how far gone and some audio is coming through from your mic I'm hearing a loop coming through very strange what's happening as long as is my voice they'll come my voice isn't coming through my voice istel okay okay so it looks like I'm getting a loop coming through in discord it's making it very difficult to it now it just stopped so let me bring Arnold back on and now there it is again so I'm getting in my head head set my own voice looping through so I apologize about the technical problems for today it's I don't rule out the possibility that this is some some kind of check okay it stopped in discord at least now let me see if I can go back to Arnold and see if he's in there No so what I'm experiencing folks is um I am hearing in my own headset my own voice coming through which should not which should not be happening so I'm gonna I'm gonna cut the calls and just talk for the rest of the show okay so that's what's gonna have to happen so we're having we had a we had a problem with the laptop video today cutting in and out and now discord seems completely wonky where not only where the callers voice is not coming through to the stream but then somehow my voice has was echoing back into discord and then going into the headset that I use to actually listen to callers and take their calls so I'm going to just write out the show even though I don't have any slides you know prepared for this and we don't really have callers to take so I'll go on what we've really been making this show about which is not only influence but courage okay and this is what I'm hearing from Arnold and Arnold I apologize I know you wanted to call into the show that I did on veganism and we weren't able to take your call then and now we're having audio problems when you finally do reach us from Paris but he was saying that things are so bad in France that the censorship has gotten to a point where people are literally being jailed for what they are saying and writing and when you have a society that's being closed to that extent it's as far as I am concerned it's time for physical rebellion and when they are starting to start to do that here I will advocate for outright physical rebellion 1776 style like what the Founding Fathers did to the agents of the British crown out in the open advocate for out in the open publicly on-air okay that hasn't started happening here in the United States yet but if it does I say it's open season on anybody involved in any aspect of government who would dare to do that to someone speaking their mind and that's what the Second Amendment is for folks that's what the Second Amendment is therefore that's what gun rights period are therefore that's what those weapons exist to take out a tyrannical government that has become so tyrannical that they are jailing people for speaking their mind freely and if that's what's already happening in other countries it's long past the time for physically removing those people literally physically destroying them so you know that's what's going on in many areas of the world you know and this is why you can never allow yourself to be disarmed being allowing yourself to be disarmed as getting rid of your last aspect of the ability to defend yourself when a Tyra comes for your rights and that's what is occurring and that's the level of censorship that they want like is what is active in

North Korea and China these are these are countries these are governments that have long since should have been overthrown a long time ago by their people as as brutally as necessary physically for them to do you know and when people hear people say that they think that's radical that's not radical it's radical have speech closed down that's what's radical you know then it's radical that a whole society would tolerate that kind of shit that's what's radical it's radical that a society that is tolerating that kind of shit has already been disarmed to a large extent that's what's radical you know I mean this is the problem folks is that people don't have that kind of anger in them this is what I'm going to talk about in Arkadelphia the death of the sacred masculine aspect of being able to get angry at injustice that is clear injustice taking place in a society you know and another aspect Arnold brought up that I thought was extremely powerful is that the more people think that they have the lose the choir they become it's like you know you give somebody a little bit of comfort level you know they have money they have nice things they have a nice home or a nice car and then all of a sudden Oh since things are great for me it doesn't matter that this is happening in the world screw all these other people I'm doing pretty well the financial system is working for me so let me just shut up keep my mouth closed it doesn't matter what kind of other justices are taking place what whose rights are being raped and taken away and stolen you know let me just be quiet because I have a little bit to lose you know no you have a padded prison cell that's it that's all you have some padding on the walls of your prison cell that's all anybody like that has you know don't don't get it twisted and think just because you you might have a little more money and possessions than other people that that means you're not a slave like the rest of everybody okay because you're still living in a totally feudal system that's what this whole system is it's feudalism if you want to really be technical about the kind of government that really still exists the only government that exists okay we're just different feudal plantations carved up that's what countries are and the feudal lords are the government violent government system and they're thugs they're henchmen okay who are stealing the people's resources but yet allowing them to live on the land and calling it their their own land and mate pretending that they they have property no you're a feudal serf living on the landlord's land and that's all you are okay nobody owns their land or property outright you know the the government would say you're not allowed to do that you know not without paying them they're extortion called property tax you know not only do they want to take people's possessions take the product of their labor the fruit of their labor now they want to shut them up and say that they're not even allowed to speak about it because malevolent is taking place a very low level awakening at least mentally you know people aren't doing enough physically but at least some people are starting to understand because some people are speaking and that's what this is about reaching the influencers and then hopefully you awaken them to the extent that they become conscious enough and they become courageous enough to influence the people that they already have at their disposal who are listening to them and paying attention to them but as far as what Arnold is talking was talking about in his call is concerned they're jailing people for free expression already in Europe and they want to make it worse and worse you know I don't care how many people want to disagree with certain historical aspects and try to put forward revisionist history it's it should be their right to speak and if they're not correct about it the answer is to counter that with a correction to why they're wrong and continue to speak about it you know can you imagine me I don't agree with the flat-earthers okay could you imagine me saying all flat-earthers should be silenced I don't necessarily think they're so sharp in their math and science skills but that doesn't mean that I think that they should be silenced they should be allowed to speak where I get it where I have a problem is they want to harass me for not believing in their fucking religion now I got a big problem I'm not gonna be harassed you're not gonna harass me because I don't accept your religion any more than some government shithead is gonna harass me for not believing in Authority their bullshit religion you know you're not gonna harass me for not believing in your bullshit religion no more than I would allow some imbecile fake-ass Christian or some you know crazy radicalized Muslim or some lunatic Orthodox Judaic belief person who believes in that shit to come and say uh you're gonna have to believe in my religious belief or I'm gonna endlessly harass you watch what will happen to you physically you continue to do that I'm not gonna be I'm not gonna live my life harassed you think you're playing with some little boy you know you better think again you know and that that's what I would say is the same thing when they're telling you you have to accept the religion of authority and they're trying to Punk you out and say you know not only are you not going to rebel cuz we're going to take your weapons we're going to shut your mouth too and you're not even going to be able to speak and we'll throw you in a cage for speaking your mind folks any society that's already that closed down anybody who supports it should have been swinging from a rope a long time ago a long time ago or had their body full of holes a long time ago not now it's already largely too late for something like that largely not entirely but guess what that's why nobody's ever taken Americans weapons ever ever ever bet on it boys and girls bet on it like your life depends on it ok I wouldn't bet your life against it because you'd lose it because though well they will never disarm this country for that very reason because when they try to do that the weapons will come out know it like you know your fucking name ok I'm looking right at you and telling you the truth about what will happen you don't think so you have no clue what's here you have none zero clue would exist right here in America none ok so I I'm sorry to hear that that's happening there in Paris and and in other places in Europe but guess what every person who lived before you should have been more thoughtful when it came to laying down their rights to weaponry that's all I have to say because now a physical rebellion is going to cost tens of millions of lives whereas maybe it would only have to cost a couple hundred thousand if that but now it'll be in the realm it'll be a hundred times that factor a hundred times that factor easily maybe more because you've let a tyrannical government get the reins of society and they have a monopoly on the ability to use force through weaponry not here in America there's more privately owned weapons than there are people in America and I mean far more enough to arm every man woman and child if necessary ten times over probably okay or close to that all right not to mention probably the illegal and black market weapons which would amount to even more so that level of tolerating this type of abuse I don't care how much the leftists get control over bureaucracies in government the American population is never going to get to that level of first of all they're already so from people that I just talked to many of them are so fed up on what's happening with the social media clamped down that there's going to be a big blow back to this you don't think that there's going to be coming a huge blowback from freedom of speech advocates with what has happened in social media with with these clowns on Google and and Facebook and Twitter and Apple I mean you are trash communists I'm saying right here I'll say it right here on your own fucking platforms your trash communists your trash authoritarians your Nazis - I'll take ball attack both sides you know of your fake imagined political spectrum between left and right it doesn't matter what flavor of authoritarian you are you're an authoritarian piece of trash garbage scumbag who wants to shut down a society and make the government take over and take people's rights away including their freedom of speech and you ain't going to get away with it in America you're not going to get away with it because we're going to first combat you philosophically it's going to spill over into the political arena but if it has to it will spill over into physical combat if necessary and trust me you'll never win that you'll never win it you don't have the resolve to win that you're on the wrong side of history you're morally wrong and you're not as good fighters as the people who will fight you not even close so my suggestion is at least in America you want to try and press this you try and press it because you're gonna find out how bad you will lose okay but in Europe guess what they try to press it like they seem to be doing you guys are gonna have a real fucking bad time of it and I feel very very sorry for you but you should look to your not too distant ancestors for destroying your system your true natural rights and laying them down to tyrants because that hasn't happened here in America to the extent that it has happened in your region of the world and I'm telling you when it comes down to having to defend your rights physically you guys are going to get hit the hardest in the world maybe not as hard as China and and and as North Korea because they're gonna get hit the hardest in the whole planet on the whole planet but let me tell you you're gonna have a real hard time of it if it comes to that alright so I mean that's straight-up real talk alright responding to Arnold from Paris talking about this level of censorship that's taking place in France and you know they're trying to shut down all the social media the ability of people to scream what's going on with the the Yellow Jackets you know the protests with the Yellow Jackets they're in Paris you know they want to cut people's ability to even cover that in any kind of real time because they want to come in with their narrative you know and that's why I'm saying people have to be more bold you know we have to we have to really have a total pushback blowback on these tech giants when it comes to how they're trying to shut down speech your Chinese Communist trash your globalist trash your soviet-style Stalinist trash your Maoist trash okay your authoritarian Pig scum is what you are if you support that type of closure or freedom of speech because what you are as a person that wants a society that still has freedom of speech to become a closed society and that's called an immoral scumbag piece of dirt and that's what these tech giants are and that's what all the people who would support them are imagine what your the number your dirt bag parents did on you imagine what kind of trash scumbags your parents were to raise a child that would turn out into an adult that way what trash fucking parents you had you know imagine this imagine the kind of dirt that your your parents were and and probably your grandparents too that they have no values over what's right what's just what how what freedom really is you couldn't spell it and neither could your parents and grandparents you know and you would say you're trying to improve society wouldn't know the meaning of the term okay we have to be bold speak the truth and influence the other influencers and motivate them to courage learn the technology to put that out there learn the technology to circumvent censorship put the truth out there in the biggest way that you know how and tell everybody within the sound of your voice that government is slavery find the mavens influence them that influence their peer group you've been watching what on earth is happening we'll see you right here next week folks [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #210

Night Shyamalan as allegorical film directors, breaking free from conventional compensation systems for truth and artistic works, Censorship as a Powder-keg for a Hot Revolution*

freedom man that's what it's all about welcome to our listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome to the show everyone today is Sunday May 26th 2019 this is episode number 210 of what on earth is happening we have a great show lined up for you here today I'm going to be interviewing Benny wills of joy camp and his partner Sonya English singer songwriter should be a phenomenal and interesting interview really looking forward to talking with many we're gonna be taking your calls in the third hour of the show so that's coming up on this edition of what on earth is happening of a couple of very quick housekeeping tasks to take care of before we read Benny and Sonia's bio and bring them onto the show so I will be taking part in the first ever an arkadelphia conference on arkadelphia 2019 happening here in Philadelphia September 13th 14th and 15th right here in Philadelphia this is hosted by the guys at state of anarchy a great group of anarchist activists here in the city of Philadelphia and I'm honored to be taking part in this conference it's going to be a lot of other great speakers including max Egan Larkin rose and many others so I have the banner up on the homepage of what on earth is happening if we could show that on my laptop here you go - what on earth is happening calm and click the banner that'll take you to the an arc adelphia conference page and that's right here it's part of the state of anarchy website tickets are on sale and if you buy a ticket through with the promo code passio it'll save you 5% and 5% will be donated - what on earth is happening so check it out that's coming September 13th through 15th right here in Philadelphia I will also my presentation at an arkadelphia will be entitled the sacred gift of anger and it will be about how the powers that be in this world as well as other people involved in the New Age movement especially don't want us to express righteous indignation and righteous anger at the iniquities that are going on in our world so it's gonna be about anger as a potential spiritual motivator to motivate us to take right action in the world so that's gonna be what my main presentation at an arkadelphia is about and I will have a workshop that's going to be given at the hotel which is uh the hotel is actually in the naval base area of Philadelphia in South Philadelphia just a couple of blocks away from the the speaking venue so workshops will be actually done in the hotel and I'm going to be giving a workshop have not still decided on that workshop but you'll hear first here on what on earth is happening I will announce it on the website so let's get ready to go to our our guest actually let me just bring up if we cut back to the computer this is the banner that the guys at an arc adelphia made for the conference pretty good graphics work there by Pat Leach and it's looking uh looking pretty good so you could check that out this will be included with the with the graphics for today's show so this is the title card for the show today and I'll as I said I'll be interviewing Benny wills of joy camp and Sonya English so Benny wills is a stand-up poet as well as the co-creator of the conscious comedy YouTube channel joy camp he is a classically trained theatre actor holds two degrees in performing arts and has appeared in more than 50 stage productions around the world in 2004 benny declared himself to himself and the universe i want to the truth this Val led to the destruction of numerous paradigms and belief systems as well as an inevitable and uncomfortable breakup with his career as a professional actor stepping onto the path of truth was the best decision he could possibly have made however his life has since opened up in ways that he never could have imagined for Benny seeking the truth doing what is right and helping guide humanity out of its current conundrum is a moral obligation hence he has devoted himself to living with purpose being of service and hastening the awakening of this that this world so desperately needs Sonia English many wills his life partner is a singer and songwriter and she sings truth to power and power to the people after a stint as a newspaper reporter and another as an actor in Hollywood Sonia has had a front-row seat to two major pillars of deception after finally developing the eyes to see she looked to songwriting as a means to share what she had learned what would you say were the first things that made you become conscious I'm sorry so that's that's the end of the the BIOS I'm sorry I went went into my questions there for a second so ladies and gentlemen without any further ado I'm going to cut away for a moment and go to unmute their audio and bring them onto the show I also have to put my headset on because I'm going to be bringing them on via Skype let me get their skype video cued up please give me one moment to bring them in hey Mark hey Benny if you just argue muted up on skype just mute up on skype and we're going to do the audio through discord I apologize for the technical problems that we had starting the show today it looks like those are resolved let me unmute here in discord and let me unmute Benny here in discord Benny can you hear me good can you guys hear me yes you're a little hot if you could back off the mic a little bit and I'm gonna bring you full screen yes you're still a little bit this is exactly the way it's supposed to be there we go okay we could bring him in on the main interface now there are they cameras off you're on because I'm here guys welcome to the show yeah you have to unmute me through discord I can hear you fine can you hear me okay hello ello ello ello ello whoo hello let's see how this is going on discord we did a test run I am talking mm okay Benny can you hear me I can hear you yeah there we go okay just back off your mic a little bit because your mic is very hot okay there we go all right let me get rid of this chat here and we got it we got them full screen now there we go yes oh yes but now your video has frozen up if you could just turn your camera off and then back on through the skype interface what I think we'll be okay well that was probably from you can't alright i'll car call dropped I apologize for the tech problems folks this is you know a live interview let me go let me cut away from here looks like Benny's internet connection may have dropped I think that's what happened folks so we were gonna try to get him back yeah it looks like Benny's connection dropped well I'll tell you what we'll do while we're waiting to get him back on skype let's try to play a joy camp video I want to show you joy camps website as well so we can cut back over to the computer here is joy camps main website Benny's website is joy camp website calm okay and you could check that out all of the comedy and poetry is there and you could check out the podcast that Benny's been doing joy camp is just one of the best conscious comedy sketch comedy that you will ever see if you're not familiar with it I highly suggest you check out their website but also go to the joy camp YouTube channel you'll find it on YouTube just typing joy camp and just incredible videos up there really funny stuff so I'll let's see if we could bring Benny back and if not then I'll play some of that for you let's see let's go back to Skype and let's try to bring him back I think Benny's having internet connection issues Benni there you go okay yes you are and I think we're good to go bring him back up in the main interface and I think we're good to go excellent okay tell me I'm too hot with the mic the mic is very hot if you just back away from it just hold it for if you hold it like maybe in between you guys a little bit away from you I think it'll be fine and you can go back to them in the main interface there we go welcome guys I apologize for the tech difficulties to start off the show but I think we're okay now how are you guys doing and we've lost their audio I'll tell you it's it's technical problems plaguing this show over the last couple of couple of weeks try it again Benny can you hear me I can hear you fine now let me go back to your video there we go I think we're perfectly good now with the tech stuff okay so welcome to the show guys hey thanks mark glad to be here I apologize for the technical problems to start things off we actually had to restart the stream because our video encoder and stream are actually crashed at the beginning of the show today and we had to just reboot the computer and and just start to show over a little bit late but we're going strong now and I think things are going great so um you know I guess I'll just first ask you um you know how did you guys kind of what made you conscious of what's taking place in our world of the whole you know political machinations and the the whole slavery system that humanity is really living and what kind of started and make you questioning all of that and make you conscious to what's really taking place great question you wanna go first or should I go first well my my origin story goes back to me being a kid I mean this is just I've always just been a curious person and I have always had a hard time accepting what I've been what I was being told at any point of my life I was a really bad student in that I didn't listen very well and I didn't believe what they were saying and I always wanted to know what the other you know perspective was in any situation as a kid the pyramids learn about the pyramids in second grade were really was really mind-blowing and I wasn't that the explanation I got was not sufficient as to what they were what they represented I mean I was it was one of the most interested in school I ever was was when we learned about the pyramids it was in the second grade and then learning about the JFK assassination in third or fourth grade you know because that was before I was born and we learned about it and then we learned as a sidenote oh and by the way there's a conspiracy theory about this that it wasn't actually this guy and etc and I was really drawn to that I was like whoa whoa whoa what's the other story what's this other you know conspiracy story so it started a really young age for me and then I think 9/11 was really the catalyst that you know thrust me into really investigating alternative ideas and getting to the bottom of things and you know wanting to know the truth I think 9/11 was a really powerful motivating force for a lot of people when they understood that that event was not what was presented to us you know by the the government and the people who constructed the official mainstream narrative and that really inspired a lot of people to look to alternative sources of information when they realized that they were being lied to by the mainstream media regarding what happened on that day absolutely it was a portal I mean it was definitely what threw me off my other trajectory in life you know that's what really set the tone for my 20s because I was I think 20 years old when I really started looking into 9/11 truth and you know that set the tone for my entire life really was seeing that that was not what we were told and trying to get other people to see it too and then having not much success because people didn't want to hear it and then trying to figure out other tactics I could use to try to reach people and that really led to you know all my creative pursuits and otherwise so how about for yourself Sonya okay just give me a heads up that some this audio is a little shoddy so we're you see us listening really closely it's because it's it's a little but you're Sonia story sure I was I'm humble enough to say I was the opposite of Benny I in school and I was really a great repeater I did really well I loved it when I got out into the world I was pretty startled at not having somebody tell me what to do if I'm honest and so it was at a Thanksgiving dinner my brother-in-law's mother was having a weird exchange with his conspiracy-theory friend across the dinner table and I was like what are you talking about what's this thing you can talk about at the dinner table and she pulled me aside later and said we were talking about how steel melts how did the steel melt fire is not hot enough to melt steel beams so how did the towers come down and this was in this is like three years ago so I said what and I looked into it because she seemed really stressed out about it so I tried to figure out how the steel melted so that she could calm down and they could all go about having a good Thanksgiving and my reality started coming apart at the seams as you can imagine and it's a curious thing because that same family member is not somebody who's awake and not somebody who continued to pull at the thread I think she Trump got elected she got scared and stopped asking big questions for fear of what the answers might be but for me I just went luging down the rabbit hole and then she met me kind of the other half of it was a friend a conservative friend of mine knew that I was voting for Hillary and said you know have you ever heard this stuff about Hillary and what she does to Bill's mistresses she ruins their reputations they turn up dead I went what and I looked into it and honestly still haven't found much about that but what I did find was the truth about Hillary Clinton and that's when I met Benny and I said Hillary Clinton's a terrible person and he went not when she told me that see so I think it speaks to the the power of the ability of family members and friends to be able to influence us and just put us on to the right path even just by like casting a seed down and seeing what happens you know just putting an idea out there and see if you know we'll take that ball and run with it so I think that's a very profound story that led to your awakening Sonia and it forces you to uh it forces you to you know recalibrate and communicate better without a doubt now Benny um you've been doing joy camp for about how many years now boy it's been over seven years since we launched joy camp which is crazy yeah I've been a fan since the very beginning I love that type of sketch comedy and I think you guys are really brilliant at it like thanks how did joy camp get started like what led to the its creation yeah well it was uh it was the sort of like the how I say at the culmination of a lot of things you know I I was on a different path in life I was really wanting to be a professional actor from the time I was seven years old and so I was really dedicated to that path simultaneous to waking up and I mean might the majority of my research is coming while I was still in graduate school you know getting an MFA in acting and meanwhile Kevin who's my best friend and also co-founder of joy camp he was in school for writing and he was he'd always been making movies with his friends and editing and working with a camera so he had all these skills and we woke up together luckily so he said we always hit each other to talk to and we were always able to make you know make light of the situation to sort of you know release the tension and to not be so afraid so we'd make jokes about what we were learning because some of that's pretty ridiculous you know rabbit hole leads to some pretty just ridiculous things and so we'd be laughing at you know things that like reptilians or something and we wanted to participate because I was one of the other message messages that always came through from people that we admired they said you have to participate you have to do something and we didn't know what to do and we didn't make the connection right away so we first started going to 911 meetups and we were holding signs in hot Hollywood Boulevard you know passing out DVDs then being activists in that way and it just didn't feel right for us and then we made one video called pS a conspiracy theorist as a one-off we did it as a joke for ourselves more than anything but as we watch the finished product we were like oh my gosh we actually may have something on our hands here like this could actually be significant because one thing we saw was really lacking in you know the quote truth movement or an alternative movement was it was a sense of humor so we decided to really just go all-in and from there we made about five more videos and we so basically like we stockpiled some some videos and then release them all at once is like this launch and then yeah the rest is history and was again the perfect you know culmination of talent and years of research and sense of humor that's awesome I I'd really like to introduce the viewing audience to some of your sketch comedy so I think maybe we'll we'll play a couple of videos and maybe we could play a few more later on but which one do you think would be a good introduction I I've cued up several here on my computer so you tell me what you would like to play first well I think that you know we spoke earlier about the chemtrails video the conspiracy guy mm-hmm video and I think that's a good one to play because it's one of our first videos it created a character that has made appearances now several times over the years it became a non going series and it's still relevant today so it's this conspiracy guy chemtrails video and it's from 2012 and actually I think some of the things I say in it are more resonant now than they were back then okay so let's cut away for a moment I'll cue that up and let me produce order no one I'm ready okay hold on one moment I'm gonna temporarily moot you guys so I could play this video hold on you alright go to my machine fullscreen alright alright folks here we go we're going to play chemtrails from joy camp that long cloud it looks like a whisker oh yeah well like a mustache kinda oh how long like a really long mustache all right long white mustache I'll look over there look at tic-tac-toe board I'll be I'll be oh then okay okay look at that that looks like a like a toothpaste like like that little plane right there is the is the holder and then that long after do you think guys it's chemtrails you guys are looking at chemtrails those aren't real clouds oh it's such a nice it'd be better for were chemtrails we have a bright blue sky and stabbing at this milky white haze raining down on us guys don't understand the severity of the situation these chemtrails are poisoning us with heavy metals and sprinkles down on us we breathe it in it's on our soil it's in the grass we then become conductors to be able this metal in our body you see and they're turning us ultimately into robots who are gonna be robots that's the future nobody wants to talk about this oh hi look over there it's but Nokia's nose it's growing he's counting lies is he telling the truth he's that conspiracy guy alright let's cut back to them great stuff I mean that that is that's one of the I think classic conspiracy guy sketches and I think it like you know pretty much says it all it's like you know the public ignoring things and you calling attention to it in a comedic way you know trying to let people know yes this is going on this is something that we should be aware of but you you know you're having fun doing it and you know it's it's brilliantly put together we are really these chemtrails you guys were just part of the red pill Expo were you not I think um seated right I'm then seeing it actually in two weekends for so it hasn't happened yet you just came back from the a/v conference and I think alternative you attend in England or they caught were they cover in any geoengineering out there oh yeah for sure like fact I think gosh most of the presentations at least touched on it five five G was probably the biggest then we had a topic that was through most of the speeches in some way or another so in general what was that conference like and that was in England correct it was fantastic if anybody out there is familiar with Ian crane he puts it on and it's one of the best out there because he really runs a good conference he knows how to put it on he knows how to treat his speakers so the speakers are accommodated and comfortable and you know our crane has been doing this for so long and he put out a lot of put puts out a lot of great information and you know I would expect his conferences to be no difference so that that's awesome that you know he's doing yeah totally and he's able to keep such a good attitude throughout the whole thing he's a great he's you know he's the emcee for his own conference and okay he brings experts to speak and the informations rather heavy as you could imagine and he's able to you know bring some much-needed lightness interspersed throughout the presentations and it's excellent and then I get to be I get to be the entertainment at the end which is really cool so I you are you did your spoken word there was that correct I did yeah I did a about an hour set I brought Sonja on stage he's saying couple songs and it really helps we've found that really helps to get people feeling more enthusiastic rather than just depressed true and overwhelmed it's all coming in through your left brain and it's such important information you're going okay I need to find water I need to you know protect myself as much as I can protect my chilled you know you're in it you're in it you're in it and so to me I think lighting up people's right brain and getting them back into their hearts it's a relief it doesn't mean you know that any of the urgency or need for action that you were feeling is lessened but it's just relief and connection and a reminder that we're all in this together and look around there are people who see there are people on your team and were powerful in that so what was the community like out there in England like the the attendees what's the whole English yes they make the joke every year that they're Gerry activists because it's an older crowd who have lived through it and are looking back going oh wow I made all the wrong decisions I trusted all the wrong people and what can I do now yeah but similar to the crowd that you'd find it most of these conferences I mean I I find that the best people are drawn to these so it's very you know the end of what's the irony is that these are the same people that the media is teaching people who watch the media to be afraid of but they're always the sweetest most generous open-hearted open-minded thoughtful people and this conference is certainly no exception yeah you and I first met at a Newark apoco 2018 out by the pool at one of the pool parties there and you know we we both recognized that we were mutual fans of each other's work which was really great to see yeah you know then you are were part of an arc of poke Oh 2019 with you know your spoken word which you did throughout the conference which was fantastic I got to catch at least a couple of your sets there and I got to hear Sonia Singh there which was very great she has a beautiful singing voice so um you know what did you think of the Anika poco conference this year I always have a good time an hour ago I mean I've been going since the beginning it's been fun to watch it grow my I guess yeah I ever I really liked it I wish that I could have seen more that was my only like frustration as if they had so many stages I couldn't watch everything so I'm not going it was a lot going on a lot going on so some difficult decisions but ultimately it was great I mean we were beautiful location with beautiful people and yeah it was awesome and I feel like he does have so much going on on so many different stages but the people I caught on the side stages some really rocked my world and I thought how does Jeff Berwick or the team that puts this on how does he find out about all these different people with such different expertise astir don't seem to be on anybody's radar yet yeah without a doubt I mean that takes a lot of scouting definitely he has people that help out with that and they do a really good job because it is a diverse you know set of not just information you know conveyance but skill sets as well especially when it comes to the cryptocurrency stuff what you guys take a regarding cryptocurrency if you guys gotten involved in any of that Wow yeah we are involved I mean I I don't really know I mean I like cryptocurrency I suppose I'm a little I'm curious to see where it goes it's put it that way but I we are we definitely have some some invest investments and some quite a bit actually the economics of it and the decentralization of it is thrilling and it's you know it's it's marks of the bees you know it's like it's so in line also with the totalitarian tiptoe toward one world global governance that we very much want to avoid right which team the crypto is on I mean we're always curious and trying to be discerning while having hope you know there's also hope and power to the people so that's my take on it is I have no idea but I'm very interested to know I don't want to be contributing to what we don't want to bring in I think that's a balanced approach to take I'm kind of cautiously optimistic in the same way but as any with any technology there's going to be a struggle for power over and the direction of where it gets sent in the future yeah go ahead Benny you were going to say something regarding that oh I was gonna say yeah I mean I'm hoping for the best I'm just I'm trying to be I'm optimistic but I can tell I'm always a skeptic so I I want to I can't put all my faith behind cryptocurrency because it is a cashless currency and that does fit the mold pretty pretty exactly samogon for the best and I'll see what happens I'd like to know who created it I think that I think that that would be nice no create a Bitcoin blockchain and where did it come from it seems like it's something new Under the Sun do you know what I mean it sure I think credi right came out and was claiming to be Satoshi I don't know whether that's accurate or not but it seems like he's pretty adamant about that and has produced some documentation regarding it so we'd have to see where that goes know if you're hurting Craig right I haven't heard of him no I heard that name yeah if you check it out he's claiming that he is Satoshi and has come out and produced some documentation that he you know kind of authored the white paper of Bitcoin it's at least like the the Copyright Office of the United States has acknowledged this so whether it's actually really the case or not is left is left to be seen but we'll see how that plays out but I think it's you know a cautious approach is the way to take it as far as I'm concerned I got involved in in crypto currencies back in 2009 and have taken that cautiously optimistic approach I kind of like tend to like just try to do multiple things that to compete with the you know the the whole Colossus that is the dollar and I think anything that creates competition in that regard is probably a good thing it's just we can't let anything get too much power so exactly I had an interesting experience couple weeks ago traveling I had this really bizarre a weekend where everywhere I went wouldn't take my cash oh my and I hadn't really I hadn't come

I didn't come up against that yet but in in two days I flew to Chicago for a wedding they wouldn't let me pay for my rental car with cash I got back to LA they wouldn't let me pay for the shuttle bus to the train station with cash and then the next morning I went to go get a cup of coffee and the coffee shop wouldn't take my cash oh that's crazy it was all right I'll take cash for coffee exactly it was totally black near it was bizarre I think a good thing that happened recently in Philadelphia is not that I want government to pass any laws but they basically said that like people starting businesses here have to at least take cash as legal tender they can't just cut cash off and only take you know electronic forms of payment so I don't necessarily disagree with that I think people should just at least be given the choice to pay how they want you know exactly and la-la is like you know the birthplace for a lot of bad ideas so I think that it's probably it's probably not a coincidence and they're trying to just see how people take to it and you know there was absolutely no issue from what I saw it's dangerous when you go in that direction where you're saying you can't use any form of cash payment and you have to use electronic payment then you know they can cut people off from that and there you have actually the control aspect of it so I want to just go back briefly to the AV conference just the people in England how what is their general attitude about the loss of freedom particularly in Europe and the the the inroads into totalitarianism there especially when it comes to free speech that the EU has made and forced upon them well they there was a lot of jokes about brexit there because you know they they voted to leave and there's still a part of it and they're like doing the revote so they're just making this joke they're making lots of jokes about how they can't seem to no matter what the people say the government won't allow it to happen and I don't know if everybody is already aware of this but it was new to my radar but what they they had a speaker talking about brexit fine they voted that Britain would be out of the EU but there's this EU defense defense force something like that they were very specific that it wasn't the EU army but when people call it the EU army these politicians can say no no they're you know we're not part of the EU army but there's an EU defense force that's a different thing that Britain is very much at the heart of that's a you know a coalition and a very militarized force that is likely against the people yeah ready to turn against the people and they're showing up against the yellow vests in Paris and so that's why very much a component of what strain you know what's taking over and yeah Europe that was probably one of the most stomach well compelling presentations we they flew in a French lawyer who's a part of the yellow vest movement in Paris and she gave a presentation and she showed pictures from what's going on there and it was terrifying I mean obviously the media is if they're reporting on it at all they're lying about what they're showing they're showing looters and violence and it's not it's a peaceful protest there shouldn't be guys out in the earth literally shooting their eyes out they have these guns that shoot these rubber bullets and they're aiming at their faces and she showed one picture after another I mean probably half a dozen at least who are getting their eyeballs shot out without a doubt rubber bullets are no joke I mean they called them less lethal munitions but you can still actually be killed by them if they're far too close enough range and you can most certainly be blinded by them and yeah and you saw these guys too the soldiers or the cops they're wearing like adidas jackets and gas masks they're not wearing any sort of uniform and wearing jeans and t-shirts and you're like who are these guys this is really interesting there's local police and then alongside them are these street clothes with bulletproof vests and you know machine guns alongside them people are saying those guys don't speak French they're hearing them with Eastern European accents and they're part of this potentially defense force that's not yeah there are small mercenary army is what they really are you know brought in probably from some former Eastern Bloc nation yeah so you that we I was saying that there are probably mercenaries that are actually brought in there to do dirty work like that probably from some former Eastern Bloc country anything you're saying unfortunately okay so we're losing audio I'm just letting my producer know you just hang out okay it's cutting in and out through let's cut away for a moment I'll try to clear that up okay sorry about that it's weird how about now any better well that's great yeah yes I think so let's just see if you keep speaking complete sentences and if I can hear them okay alright so what I was saying is I think that these are hired mercenaries brought in him you know still cutting out all right I'm gonna try it any other word all right I'm gonna try to disconnect my my headset and reconnect it hold on one moment yep how about now well any better now we'll see I mean if you started off okay sometimes and then and then it's trailing off yeah I may be our connection I'm not sure it's hard to tell I guess that there's my first time using discord okay all right we'll try to do the best that we can hopefully you can hear the questions that I posed so um you know uh over in Europe and your travels like what is the general attitude regarding America and Americans that you've seen well you know this is a good question because it's hard to really say because we're hanging out with such yeah like minded people sure you know we don't fuck you know I've been traveling a lot for the last 11 years and I've never come across any one who is mad or treated me poorly because I was American I don't know if that's a misconception or if you I'm true people experience that to an extent sometimes but I've never had an issue because I was when I first heard of traveling internationally when I was in graduate school I was a little nervous I was I was even instructed to tell people I was from Canada but I've never really been met with any you know animosity because just because I was American I don't know though I think that just by going to the cities like going to Dublin Ireland and we're in London last year and you know we spent some time in Australia earlier this year and there is the same energy permeating through all these places so there's this you know gold how do you even say it like I guess a global wize deal homogenized to be a good way to put it homogenized cultureless materialistic world that's everywhere that most people are buying into and they're at it their attitudes are fine in you know one-on-one interactions but there's definitely an ignorance that's abundant and seems universal that the number of things people are being told to be afraid of is on the rise and the amount of you know interference and protection that's needed because of that is on the rise and that unfortunately is everywhere we've been where there's more and more control permeating the culture and more people just saying it's good you know we're thankful because it's so dangerous out there okay sorry my mic was muted there regarding traveling you guys have been on the move and been traveling by your you live in a mobile home and trying to from place the place is that correct yes if you couldn't tell by the excellent decor behind us we live in a travel trailer yeah we uh a little over a year ago actually just over a year ago we finally bought a condo we decided to sell all of our stuff get out of Los Angeles and move into an RV and not be in California anymore so now we're in Washington and we've been living in this thing for a little over a year and it's been really awesome it's been really liberating and cool yeah the feeling was we knew we wanted that we needed to get out of Los Angeles as soon as possible but we didn't have a where to go we knew away from here but toward what and the solution ended up being move into travel trailer so you don't have to make that decision right away and there's a lot of interesting things that we'd never thought about that go along with that as far as mobility and freedom and autonomy and you know money-saving and it ended up being the exact right perfect thing for at least this moment that's really great I think it's something that a lot of people have probably kicked around the idea of at one point or another in their lives because of that type of freedom that it would bring in that type of flexibility but very few people really developed the courage to go ahead with anything like that because they see it as such an uprooting of their lives and such an almost quote-unquote extreme thing to do so you know I commend you guys for taking that approach and just having you know faith that the universe will take you where you need to be well I like to say that and there are challenges but there are challenges to staying put - like Benny sing playing it safe is dangerous quote yeah I I I think that the universe rewards us for courage and boldness and you know that's what a lot of people a lot more people I think need to step into that consciousness dynamic and they will see the results when they do it in their lives when you're when you're putting yourself out there when you're doing the right thing when you're being creative when you're even taking chances but they're there chances that are calculated for the right reasons the universe is going to respond to that and support you in a very powerful and positive direction absolutely and something I wish I could instruct people on and tell them like this is something you are afraid to really accept what you know how dark the rabbit-hole can be and how dark these truths are and that the people in power as bad as they are but once you you know are willing enough to stare it down and not just be blindfolded about reality you have liberated yeah you you face a lot of really scary things but as a result you end up you know removing yourself from found and not be so you know blindly scared I can I can I'm yeah I'm liberated and I can now you know be more free it's it's my life is absolutely only improved since I stepped onto this path and really dedicated myself to helping people and to contributing in a positive way and contributing in a way that wasn't just self-serving and my life is awesome and I think that that something I wish I could you know get people understand and it's really important to acknowledge because they're I mean and I still AM Vic you know I succumb to this all the time is it's so bad it's worse than you could ever imagine in a way and so the more you learn about certain directions it's terrifying and it's awful but what you just articulated about how the universe very much supports you if your intention is right you know if you're acting with right action and right intention you're supported that's the best news you could ever get about your life and it's true and it is as good as everything is bad and so we have to we have to acknowledge and accept it as a gift because you know what we're dealing with is as bad as can be but that's as good as gonna be - that's right and you know when it comes to creativity I think that's another expression that like gets the universe to come to your support and even defense it's like we are all here to be creative individuals that's this the underlying power of the universe itself is the power to create to create something new to put something out there for others to take into themselves that can be a powerful transformer in their own personal lives so you know regarding that you know how how do you go about the creative process with joy camp and then with your with your singer song writing career you know whoever wants to go first and I want to ask Benny in particular about what possible plans there are for joy camp going into the future as well as an addendum to that question sure so the creative process for joy camp has always been very fluid I mean it was really kind of easy when Kevin and I used to be roommates for a majority of the time we were making joy cam videos from like 2012 to 2015 we lived in the same apartment so we would just come up with ideas I mean basically any topic that struck our fancy we would think where's the humor in this how do we make this funny and it was really great for us because it served as a way to you know as an outlet for us to release again that frustration about how bad these things can be and it also forced us to know as much as we could about the topic so we weren't misleading people so that was very fluid and I don't know we just the joy camp stuff always just comes up like an idea I mean it's just one of us to be like what about this and then we usually just run with it and it for the most part usually works because we we if we find it funny we just trust that other people are gonna find it funny too and then with poetry that's just discipline on my part I I write consistently and I don't give my so that's only a couple days out of a month that I actually really forced myself to be creative in that way but at the end of a year I have 12 pieces that I can share so it's and I've I've I know that all myself now cuz when I was younger I would be like I'm gonna do something every single day and when I did that then I'm I'm more likely to fail because I can't keep up with it so I'm just giving myself this very loose but consistent structure I'm able to produce something month after month at least one a month and it works for me and for Sonia yeah and then oh yeah I'll go back to the future soon for me and I'm just getting started and finding the discipline of how to put it out and produce it but for writing the songs it's honestly I mean I relate to how you tell your story mark and that you were consuming all this information on digesting it and becoming actually useful and what you knew but not putting anything out with it that would be helpful to other people and so I've been in my study zone trying to just figure out what I'm a part of and what this place is and still doing that will do that for the rest of my life but wanting to contribute in some way and living with Benny and being present to his poetry all the time was really inspiring and you know a constant reminder that you can create and produce and so I was taking notes and trying to write essays cuz I started as a journalist and I thought I can write articles about the stuff that you know about here's what changed my mind maybe this will change yours and I still want to do that but it was so unfun that I just didn't I wasn't doing it and when I sat down to write a song because we had this share night it was magnificent it was a completely different feeling and a different experience of being alive honestly is writing the song and I feel like the words came and instead of getting bogged down in the details of citing my sources and saying it in a way that I could stand behind journalistically and say I know this to be true which is actually very little songs you can distill it down to the idea the truth of it the story of it that I do know is and say it in a more poetic way and sing it which I love to do and I found that's at least my starting point because I can write these songs and I you know I watched natural law and ate our presentation and wrote a song about it I consumed a bunch of stefan molyneux learning about the principles of anarchy and about you know political philosophy and i wrote a song about it and that's it's kind of each rabbit hole I go down helps me cope with my takeaway from it I can write a song about it and now I'm setting to producing it so that I can actually share it and not just have it for myself and whoever will listen to me sing acapella that's fantastic I mean that this is what I talk about all the time folks there's no one way to do the great work you know it's whatever way that you are comfortable with it's whatever way that you have the talent to put it forward you know and you could do it in a creative way you know you could do it with writing you could do it with allegorical stories you could do it with singing you could do it with music artwork etc and then Benny does with poetry and comedy I mean you can see this is a total integrative creative process and it goes hand in hand with the knowledge and information that people learn and then you just take that and then you you roll it into a different creative expression and give it a new outlet for people and that's how a lot of people learn because they learn through different mediums of expression and some people will do really well learning through a podcast or some people will do really well reading a book some will do really well watching a documentary video and some will learn very well listening to a song or hearing a poem or watching a comedy sketch it'll reach people at a different fundamental level of their subconscious and conscious mind so that's why I keep telling people like find what your creative expression is and then get involved in doing it and put this work out there for other people don't wait you know just find what you're good at and I'll go ahead and don't wait for orders from headquarters just get to the work and put it out there and let the chips fall where they may and you may be a little bit you know awkward at first you know but then you'll work through that and you'll get better at doing it the second third and fourth time absolutely and again going back to also you know taking risks I mean I the this doing well I call it stand-up poetry doing this poetry now I stumbled into it it's an accident I didn't ever plan this to be I didn't think this was gonna be something that I was doing but it's because I took a risk I was starting to get invited to more places to speak and because of joy camp and I thought well I'm not really you know an expert on any particular subject I know a lot a little bit a lot and I could probably you know I'm good in conversation when it comes to lots of stuff but I'm not someone who can go up there with a PowerPoint presentation and you know give you a lesson on something and I thought I thought well I am a performer so I could use one of these hour-long speaking slots to just perform since I spend most of my life on the stage and we know it I like things that are good too you know they're good in the ear that sound good I'll write some poetry that is melodic and fun to hear and you see what happens and it was pretty scary to do but I thought you know even if I get booed off the stage I have a girlfriend who loves me I have friends who love me I'll be fine so the worst could happen is that I get you know I get pulled off the stage with a giant cane and throw tomatoes at me so I went out there and did it and I was met with a standing ovation and I was like okay well this be confirming and then I really stepped into it from there and so now in my 30s I'm a traveling performing all right and I still am just like in awe of how that came to be because it was a total accident that's really awesome I want to say something that before I let you talk about what the possible plans for joy camp in the future are if any but I want to say the first time I heard your poetry live was at the truth mine reality conference outside of Phoenix and I was just completely blown away by the set that you gave there at that conference that was a great event as well but that's the first time I actually heard your creative spoken word and I just thought it was one of the most unique ways of putting this out there to people that I had ever heard thanks man I really appreciate that yeah well I'm actually I think I'm better at this and I am at joy camp because I spent so long so many years on stage I mean I have two degrees in theater I start I mean I didn't I've done almost i thinka than fifty five stage plays I mean I've done a bunch of Shakespeare and Tennessee Williams and I mean I've done a lot so I'm really comfortable on stage so now that I'm able to like utilize all that you know all that work I put in on the front end in doing something that's completely unique and now that's my thing it's really exciting because for a while there I went through a time where I was pretty frustrated and I thought man I wasted all that time and all that money on something that I'm not pursuing anymore so this is like you know this is the perfect coalescence of all of my skills and way of healing that you know that sort of relationship with performance because I I mean I spent 20 years preparing for something that I didn't end up pursuing and it's morphed into something it's even more gratifying and therefore people I mean you can do a great performance in a play and sure someone might like it but it's not my words right it's not me the character it's someone else's story right this is my story and I'm getting to share it and it's awesome so yeah I mean I was really excited to be able to you know cheer for you in Arizona to come in yeah so yeah it's awesome it's awesome to be you know friends with people that you admire to be they have earned a seat at the table so to speak and yeah again I just I would encourage anybody out there to use just keep trying things until you find something if you don't have something already until it feels right because like you just said creativity is powerful and I'm always encouraging people to explore their creative potential in truth-telling because sure we can take a big idea and distill it down to something palatable yeah to its essence in a way that sometimes you can't unless you do it in a creative way so I your your work sort of almost reminds me of like conscious hip-hop and rap artists who say so much with so few words you pack so much informational content in a small amount of verse I think that's like an art form in and of itself to be able to do that Thanks yeah I like it it's really and its really therapeutic for me because I can it forces me again like to take a big topic say like racism and say how do i consolidate all these sort of chaotic thoughts I have about racism it's something that's cohesive that is shareable and shareable enough that someone will hear it and understand where I'm coming from and get them to think about it a little more deeply so it forces me to be disciplined and also you know articulate alright creative output is like sugar for the red pill to help it go down because we were trying this is I have to tell the story cuz it was such a powerful realization epiphany that we had people but it wasn't going anywhere it was so frustrating we were all upset you know upset that we were arguing all the time it's that we couldn't agree on anything little as well and they're trying to be good people but they weren't you know they just can't accept that anything's as bad as we say it is and we were just butting heads with neither of us wanting to concede and say you know okay agree to disagree because we both feel like it's so important and they feel just as strongly and so anyway it was terrible it was so awful and we just wanted to be having fun together and talking about anything that wasn't controversial but we couldn't find anything and so Benny said let's just have an arts night let's suggest we have a creative night where we all sit down and share something creative we've been working on and so they said sure sounds great cool and we sat down and heard some of my brother-in-law's book and it was wonderful and then Benny shared a poetry set of his from alternative view nine and I sang my songs and at the other end it was like the air in the room had a different quality to it instead of just being endless tension that was all dissolved and they asked a bunch of questions they said what did you mean when you said this and what you know when he said this in your poem what did you mean when he said this in your song what did that mean and we were having these conversations and everybody's guard was down and we were all complimenting each other and celebrating each other and it was awesome and we even you know my brother-in-law said wow you're really you're really hitting it's something that I feel in my heart that I just can't put words to and Benny got to say yeah that's exactly what my entire life is about is that itch and trying to scratch it and see this is what I've been trying to like subtly encourage people to do it's because I I'm the kind of straight ahead you know I'm just going to give you the information as it is and that's gonna be for the strongest among us to take in and I recognize fully that not everybody is going to be like that there are going to be people that will not be able to take the truth as I personally deliver it to people but what I think my goal has always been is not to reach every single individual I know no no one person is going to be able to do that I'm trying to reach the people out there who are part of or most of the way there and inspire them to then become teachers in their own way through their own unique expressive outlet and that's what I love seeing what you guys are doing are doing it in a completely different way than how someone like myself does it yet as you see it will reach people that most certainly you would not be able to you know hand to mark passio flash drive or DVD and say here watch this you know they would probably melt to the ground you know hearing some of the things that I have to say you know but but you guys would be able to bring it to them in it and it's in a slightly different way that we'll be able to reach them where they're at now I apologize we're still having some technical issues I think there's a problem on my laptop with the the power reaching the device that sends the signal out so we've been cutting out a few times as we did last week I'm going to just completely replace this piece of equipment next week so hopefully that should not happen anymore after after this week but I apologize I'm not gonna be able to switch it on the fly so if we cut out a couple of times like that it's it's just we're gonna have to deal with it and work through it so I you know what do you guys have to say regarding what I just said about like different people can hear it differently from different people yeah well what I was gonna say was it what's funny about you saying that is when people come to me and they want to know more because that has that happened actually you know a few times in last couple years people from my past who are now all of a sudden going you know things maybe aren't what I thought they were I'm gonna ask Benny what he thinks because I value this reputation I guess for a long time and I'll immediately send them in your direction I say watch this and I send them the natural raw presentation so you're the first thing first resources I give to people for them to really have a total blast of truth I appreciate that thanks yeah were that resource for me I wanted to know more and I wanted it I wanted it direct and I so appreciated your approach and I was so excited after writing natural law the first song I ever wrote was what I'd learned from natural law and about personal sovereignty that we own ourselves that's it was so well articulated to something that I was only just understanding in a more amorphous ambiguous way but then I was on the phone with my sister whom I love more than anything and telling her you have to watch it cuz I thought problem solved if she can watch this you know short eight hour and 45 minute presentation she'll get it and I was in the car with Benny and I was like you know he I was describing it and he was just nodding and kind of saying okay cut it off let her you know let her take it from there and instead I said he used to be a satanic priest so he really knows what he's talking about oh you know interesting she'd watch it but someday someday if she'll be ready yeah you gotta go little bite-size morsels when they see a curious rose they're gonna run away exactly so you know regarding possible you know tension or blowback you know has there been any issues you know with family and friends reactions to you guys coming out publicly and speaking about the things that you do in you know your daily life or in your performance art because are you a question yeah I was saying you know regarding coming out publicly and talking about the things that you do in your performance art you know has there been any tension or blowback with family and our friends oh yeah absolutely with family in particular you know it's interesting something else I was gonna comment on and earlier regarding the conspiracy guy chemtrails video what's interesting for us looking back on these conspiracy guys videos over the years I feel like we kind of without trying without meaning to we encapsulated where people were at as far as the reactions to conspiracy theorists are and in that one the guys just to me out they just feel like I'm not even there they just wait till I'm done and they keep going and if you watch the conspiracy guy videos by the time we get to our false flags one from about a year ago the guys are so angry at what I'm saying they kicked me out of the house they say get out of here they're so mad because of I'm challenging their their their their belief system their BS and I think that's what's happened so in my personal life while I feel like I'm only getting better as a person as I continue to evolve and grow and get older people's response to me who are not already at least questioning things a little bit is becoming more angry so whereas ten years ago they may have rolled their eyes and but I got whatever conspiracy theorists now they're saying you know do you man how dare you say that dangerous hate speech and I've definitely had to deal with some of that in my own family I mean my I have a well I have a niece who refuses to talk to me there's actually a poem that I sent to you that we might be able to play at some point it's called San Francisco pride and she identifies so fully with this lbgtq movement that she thinks I'm now gist and homophobic white supremacist all right Nazi spreading dangerous conspiracy theories in hate speech that she won't talk to me and this is someone I've known since she was born I mean I held her when she was a baby and I've been nothing but supportive and encouraging her entire life and paid for field trips and well I've just been a good uncle and because of what I'm speaking out about and because I'm not a liberal because I'm not on the Left this is very important because I'm not progressive I'm the enemy and she won't talk to me and my sister is having a hard time talking to me my sister keeps telling me I need to apologize to her I was like I mean apologize for I mean we're really talking about in that video was the kind of conformity and mass materialism that was taking place at the pride event that you attended it wasn't like you were attacking their lifestyle or their lifestyle choices in any way exactly yeah exactly so we have a bunch of other videos cued up we can go to some of those I could play that one if you want and you know then we could talk about where joy campus possibly headed in the future cuz I really want to hear more about but if you want all cue up that that pride video and we could check that one sure yes so then if anybody who's listening can see that you know my comment tip my comment on San Francisco pride in this video has nothing to do with again sexuality it's about what I experienced at this you know what you gonna call festival event oh yes yeah as I understood it it was more about like corporate materialism and pushing the corporate agenda more than anything else chaos it was just chaos sure it was chaos alright we'll cut away and I'll cue that up so in case you couldn't tell him from America and and last year I went to the San Francisco Pride Parade with my beautiful girlfriend Sonya and my best friend in the entire world who is gay and it was perhaps the most Orwellian experience of my life I was astounded by what I experienced there and her poem about it this is my experience San Francisco Pride abide or else celebrate diversity in advertising Google PayPal Microsoft eBay Apple Gap t-mobile Safeway Amazon Facebook AT&T Starbucks McDonald's and PG&E lesbian bisexual gay trans and queer sponsored by uber and Niccolo beer hashtag equality hashtag resist with a Wells Fargo rainbow to slap on your wrist meanwhile beneath the shadowy buildings of bankers greed amidst the stale piss soaked air on the streets of a flattened piece of paved earth people are sleeping and starving and crying and dying lots and lots and more and more and it's illegal for you to feed them and it's illegal for them to scavenge and the rest of the restaurant food and food like substance is thrown away in plastic bags to rot forever out of sight out of mind in the land far are far away because life ain't free pre 5g except for flu shots of course available now at CVS a proud advocate of Pride freedom won't be achieved with the support of Levi's jeans or Macy's or Pete's coffee real revolution is evolution of the mind and it will not be televised or funded by Smirnoff or endorsed by BMW hashtag resist government hashtag resist corporations hashtag resist hashtags I forgots say please please stop arguing over who has it worse it's bad and it's hard for everyone but hey what do I know I'm just a straight white cisgender male I'm probably missing the point brilliant brilliant you know I mean that is that is making it powerful impact and sang it in hold on let me on mute let me unmute Benny again there we go Benny I'm saying that that's just making such a tremendously powerful impact there and again I'm not attacking anyone's lifestyles I mean it's a FEMA everyone who sent along a lot are you hearing me okay it's always happens I don't think they're hearing me can you hear me looks like we're not Benny are you hearing me okay I'm gonna disconnect and reconnect Ben are you are you hearing me okay can you hear me there we go back turn your volume a little bit let me know if it's too out on your no worries it sounds good so I was saying that you know that's just like brilliantly done and you're saying so much in there about like the type of conformity and and the type of really censorship of expression that goes on within that community and how they're embracing you know the corporatism and materialism and advertising schemes but in nowhere you are ever attacking the lifestyle of the whole LGBT community it's just you know you're talking about the type of way that the the event was arranged and how it was Orwellian in the way it was set up so I think anybody listening can definitely tell that as long as they're not you know so rooted in this very you know leftist censorship mindset so um you know I think that comes through clear in the video and the video is very powerfully done I appreciate that Thanks and yeah I mean that's one of the problems that we're all coming up against I think is people heard that adamant about these leftist ideas they can't hear what you're saying they can't hear logic they can't hear objectivity and then if you approach them be neutrally without compat or with sorry if you personally neutrally objectively they think you lacked compassion so it's all this emotionally driven nonsense it's actually being fed to them to buy into but yeah I mean it's been really frustrating and that you know we went to that pride event and it was really disheartening as well because you see these people who do want a better world and it's just completely been hijacked and commandeered and redirected and you know when you see Starbucks and Chase Bank with rainbow filters over their logos that's not a revolution that's not you know that's not from the grassroots like people standing up against something that's probably sponsored they're trying to sell to that market that's all it's targeting a market demographic that's all it is yeah and still there hey there yes sir oh yeah and and there they're not celebrating anything that was my biggest problem with it that it was didn't feel like it was a celebration of anything it was just debauchery I mean it was people drinking and doing drugs in the streets and you know peeing in the streets or running around naked and showing off their transgender scars and it was uh and they own the crowd everybody into this one section like this one fence top area so everyone was just like in a cage running around naked and drinking and like this is not freedom this isn't this is debauchery this is sort of lightly organized chaos and yeah it was just crazy it was a totally crazy experience and so I wrote that poem about it and now a nice want to talk to me I think that a lot of people in any type of minority communities don't really understand equality under natural law they sort of want equality in the sense of uniformity instead of an understanding that we all have the same rights and we should all respect each other's natural innate human rights that's what's lacking in that on that understanding of equality under natural law it's what's lacking in a lot of alternative communities unfortunately yeah agreed and you know there's this there's just so much victim victimhood going on and blame everyone's to blame for everyone's you know you everyone's problems and it's there's no empowerment there's no like I want two people to be empowered and feel like they can you know if you face adversity you can move through it and you can let that be a seed towards growth and not just something that keeps you from ever progressing in life and it's quite a predicament we're in yeah I'll go ahead so you just seen that what I've been noticing a lot lately is the word diversity people are such champions of diversity as long as it doesn't mean diversity of political thought you better not be politically different or diversity it doesn't include being a white person you know more than ever I'm seeing people say like you know oh it's it's not diverse here and in Idaho say and just because it's there's primarily white people but you don't travel to India and get mad that there's not a white person making your burger but if you're in Idaho and you go to an Indian restaurant and it's a white person making your Indian food oh it's not diverse here but white is you know Irish is an ethnicity and German is an ethnicity and people their need for diversity doesn't include things that are white or Christian or conservative and that's ironic I mean that's why I like how you left it off in that poetry Benny where you're saying you know what do I know I'm just a white cisgendered male you know it's like the idea that like we cannot have an opinion because you know or you know can't have our views heard because we're like straight and white you know it's like yeah it shouldn't exclude anybody huh you know speaking out having an opinion or even just putting the truth out there should not exclude any racial group it should not exclude any sexual orientation you know and even political orientation like people need to be able to speak and express themselves I think that's what's so dangerous about the current climate of censorship that is going on throughout the world really bad it has gotten very bad in Europe and that that level of you know type of censorship of freedom of speech is starting to raise its head here in America and it's really being championed by the tech giants and the leftist community and it's a very dangerous dangerous slope that we're treading down you know what do you guys think about about what's going on with the whole attitude and the whole air of censorship that's coming about in America and especially when it comes to big tech well I mean I have may I have multiple thoughts on it on one hand it's horrible and it's you know they're they're silencing anybody who has a contradictory or nitin contradictory just an all a different perspective on something right at the same time I feel like that fact they have to resort to those measures is a good sign that there's a major threat against their narrative so it's a mixed it's a mixed bag so we are dealing with just horrible censorship but it's showing that I think there's way too many people out there speaking up or at least having you know they're breaking free to programming more and more all the time and they're trying to stop that as much as they can it's genius though because people aren't being exposed to that there are people having alternative perspectives and so they're getting this mainstream you know narrative of whatever the issue is if it's vaccinations for example and even though they're on Facebook all day and they see articles stream by and they you know they watch their late-night shows and get on YouTube things are not being suggested or you know memes aren't appearing that hold an alternate view and so it's otherwise good-hearted people who when you're the first person to say oh actually vaccines have not been appropriately safety tested and I would never trust a vaccine in my own child you sound like you're crazy when really maybe this person has maybe 60% of the people in their lives feel that way but they're not being exposed to it so the censorship is genius and awful it's a lot to be up against I think and we're all the women saying my body my choice about vaccinations right or even or even putting any kind of substance into their body that they so choose like you know they're so on the side of government and whatever laws want to be constructed in any given geographic area lost my son can you stop first again okay yeah I was saying like a lot of people who say you know and we had that glitch one more time sorry about that but a lot of people who say you know my body my choice that doesn't include the right to experiment with your conscious yeah it should be coming back now all right let me disconnect and reconnect again I apologize for this folks how about now how about now you just pop you pop again it's it'll just go silent for 20 seconds at a time okay I was saying the people who say my body my choice you know they don't extend that to using whatever substance you want to experiment with your own consciousness they'll agree with government when it comes to the prohibition of you know certain substances but then in in the other hand they'll support you know the right to abort you know children in the womb you know it's like and and like you said they want to force vaccinations upon people like well how is that respecting someone's personal sovereignty of their own body it's not yeah yeah I know there's so many contradictions in the in the in the logic you know on the left that's maddening yeah it's a lot of it's working instead of from first principles about self ownership it's it's working from a simple emotionally driven state that doesn't get down to philosophical principles and doesn't get down to the the basic building blocks of the difference between right and wrong behavior they never take the thought process down to that fundamental level of first principles that's what I find with people who argue only from an emotional point of view and that's what we have to kind of continuously try to bring it back to even if we can do it from a Socratic method perspective of asking questions of them about what they even think and then show them through a questioning method the contradictions that are inherent in their own thought process that could go a long way to helping them to see you know that they're not really congruent in the ways that they think and then behave yeah absolutely yeah and I think we don't I mean first principles was a concept new to me approaching 30 we don't have any sort of you know knowledge of the Trivium in school but once you find it it is really empowering but I think people sense that if they follow your logic sometimes if you know if you're drawing them out through questioning they sense that it's a trap it's not but that they might end up going where you hope they'll go and that they'll lose the group they know that all of their news anchors and late night shows and magazines and newspaper that they consume and all their friends have this perspective on any one thing abortion vaccinations and if they concede to your points and say gosh I might be feeling my mind change on this that they're gonna lose the support of the group and now the responsibility comes to them right they're going to have to face the entire crowd and say I've changed my mind and I know I'll be with you and I think they're on a human level of liking to be connected and liking to be liked and accepted that's too much for a lot of people to face they don't want to succumb to the pressure of having to acknowledge that they perhaps were wrong and then telling the rest of their you know group dynamics you know members that they're involved with that they are wrong as well they don't want to have that that budding of heads you know they don't want that tension or that conflict of that rocking the boat in their own interpersonal community and you know I think that that goes hand-in-hand with the courage to stand up and tell the truth even if you're in a minority of one and it's it's a rare thing you know it's something that not a lot of people you know want to dedicate their lives to because it can it doesn't have to but it can a li innate you from other people especially if you've surrounded yourself with people who are engaged in the illusion and perhaps to a deep extent you know then it will force people to ask well where will that leave me and my social dynamic if I go in the other direction yeah exactly and I relate to that because I'm like I feel like for Benny he's been questioning and based on his questioning his tribe formed early on you know he found his best friends as a result of waking up and asking questions these guys came along and I was in a different boat that everyone I know I mean even still thinks this kind of party line because I studied journalism and I loved reading magazines and listening to pop music and you I was in and so for me it was that and you are in you were in Hollywood for a while right so yeah just like the epicenter yeah and you know Hollywood I was born in Hollywood you were two actor parents so I've been inundated with show business my whole life I mean I there's no there's no like I don't know I never got starstruck as a result so I was in growing up in Los Angeles it was it was a natural fit for me as a career cuz I was like how everyone else around me is doing it I'll just do this and I really fell in love with it I fell in love with acting and it actually still kind of pisses me off that I couldn't pursue that career because it is so tainted you know I loved what I'm doing with poetry and all everything's working out fantastically and perfectly but you know I did want to be professional actor I wanted to make movies and you know tell stories and I couldn't do that because the industry is so corrupt to its core and it's such a pillar of propaganda and mind control that I couldn't participate in that and it pisses me off that something that's so that's so fun and has such power and storytelling were people that love stories and storytelling and I couldn't participate in it because I single-handedly can't change that industry and I had to walk away and it bothers me that it's you know that was an uncomfortable truth for me and that was one of the last ones I clearly had to face be like okay I have to accept that Hollywood is as dark as people are suggesting and it is the void of a heart at its core and I can't do this thing that I've that I've that's been my dream my whole life and you know again everything's great but still it sucks you know I had to I had to shatter that paradigm and it's because it's evil so few have the shrine to do that because of the tightener you know glamorous lifestyle that that could lead to the monetary compensation it can lead to so I a lot of people in Hollywood won't break out of that trance and won't speak the truth to questions related to this Sonya did you also grow up in that atmosphere and also for both of you you know have you maintained any connections in the former Hollywood sphere that might any you know a specific take on what's still going on inside Hollywood or maybe have insider information regarding you know what's taking place regarding the occult in Hollywood or you know Titan the type of pedophilic activity that goes on there which we all know has been a huge thing that has been broken forward by different you know whistleblowers in recent years ya know I grew up in Kansas and I so I feel like that's as far away from Hollywood is really I did get starstruck and I did think that actors lived inside of my television and when I saw them in the flesh in crosswalks in Hollywood it was like this is so exciting and thrilling and amazing and I get I I just get people who have role models in Hollywood who are saying all the things that the TV is saying and you want them to be right you want to agree with them because you love them and you feel like they're part of your life but not once you just engage it's clear that they're either pushing an agenda or they're just fast asleep themselves and saying what they need to say to say to stay in the status that they're in and not courageous enough to stand up and say anything if they did know and these are not role models they're people that we could take pity on because they're trapped in a system that doesn't serve them and doesn't serve humanity and they have the responsibility when they move on you know with that stain on their soul so it's a completely different perspective than what I came in with and I grew up not involved in Hollywood at all and regarding first-hand experience I didn't see anything really I mean you see you see the living there you feel the desperation and you feel that the the sort of frantic energy to have high status there's always come first so it's so much competition in Hollywood and very few people are actually satisfied with what they have I mean even people who are really successful cuz I think we both had to spend some time around people who were successful in Hollywood and they were always wanting more you know they were it's it's like that it's like when you see um you see the guy who played Kramer on Seinfeld have his meltdown whatever was Laugh Factory and you know call the black guy in the audience some pretty bad words he's having a meltdown because he's not in a lot he's not in favor anymore he'd you know he's on Seinfeld and that ship sailed and instead of taking those millions and millions of dollars and you know seeing the entire world what was important to him was relevancy making sure that he was still popular and so you seen having this meltdown and some comedy club in LA and it's really pathetic because he's at the end of his rope he's desperate because he wants that that Fame still and you see that everywhere all the women get plastic surgery I mean it's it's a it's a joke so you see that firsthand you know in spades everywhere as far as the occult stuff goes I mean I you just sense it I think most of these celebrities don't know what they're doing I think I think the few do I think a few do but I think most don't and they have no idea what they're participating in and I've asked questions because I have one friend in particular who's been in the business for a long time and I spent a lot of time with him and I would hint at things and he had no idea what I was talking about and he's a pretty successful guy and I haven't asked him about because he was friend he's be friends with Randy Quaid and Randy Quaid you know he came out a few years ago with the whole star walkers thing and you know I'm sure you've seen the video - shrimp plenty of people or listen to this I've seen that video where he stands in front of a bunch of reporters and he's shaking because he's terrified to say this in front of a crowd that he thinks that these Hollywood actors and superstars are being murdered as far as this star lacking being to get the riches to get their money in the property and all that and I asked my friend you know what do you think about Randy Quaid and the star whackers thing and he said well I think it's his wife I've heard that it's his wife he's having a bad influence on him and you know he's he's just too much in the influence of his wife like okay I'm interesting so there's really a detachment there is serious cognitive dissonance with actors about you know just how dark Hollywood can be even though there's so much death that comes out there in so many you know tree true Hollywood stories and all this and see what happens to pop stars and how they have their breakdowns and everyone kind just pretends like it's not happening I don't know I mean first hand after someone I lived in LA for first ten years of my life in the last eight years of my life I never once saw something that was blatant as far as like you know pedophilic or ritualistic satanic other than in films of course and but it's still that it's still there I think he's just I don't know I was I also feel like I got spared though in a way because I was a child actor and I was always too tall so I got I did I worked if there amount but I was up for some roles I was up for the role in a movie called the client if and he ended up dying with an overdose of drugs we knew that his early 20s and I was up for the younger brother role in that movie and I didn't get it because I was just a little too tall and that kept happening to me and my family ended up leaving LA but I feel like I got so lucky that I didn't have more success as a child because who knows what would have happened I think it's very compartmentalized and very few people have any idea what's going on and even fewer the perspective of why you know there's a lot of I think abuse of children and there's a lot of you know women sleeping for different opportunities and but I don't think I'd be curious to know who actually has a sense of the occult that you're talking about and the messaging that's being pumped into culture through Hollywood one thing I will say is I have heard some stories because I I again the irony of my niece being mad at me for that poem earlier I have a lot of gay friends and I've heard stories about what goes on at some of these gay bars and elsewhere in Hollywood nightclubs and stuff and I think that people will be surprised to know how many famous people are actually participating in some really gay stuff sure I mean you know I agree with you that more of the people in Hollywood are doing it for the status and the fame and the money and don't really know the agenda that lies behind some of the things that are laid out for them to do and to participate in that is often directed by the higher-ups in the industry and the people who are out there just seeking the fame and fortune will go along with whatever their agents or the people who are higher up in positions of power at levels much higher than them in the hierarchy that operates there than they are tell them to do so it's a it's a very much a hierarchy and compartmentalization as you would find in the military and law enforcement etc and the people who are low down on the totem pole who are just seeking Fame and wealth will just sell themselves out for that paycheck and do whatever they're told to do to get fame and status and they don't even care or ask why in many cases about what the potential implications are what the real agenda behind what they're being asked to do is shut costume party you know it's just it's fun and weird and it's just it's sexy Hollywood and I have talked people who have been to some of those yeah but again but in the same way that they don't there was they don't didn't know what their you know there was they didn't see anything that was other than like sexual behavior that was a you know satanic I guess but of cause they're just gonna say about that Oh commercials yeah I mean this is so Sonia and I made our money as commercial actors in Los Angeles and you know I thought that was first was it was pretty insulting coming out of graduate school and having you know I had an Master of Fine Arts degree in acting and I'd been doing Shakespeare and Moliere and then I went to Hollywood they're like alright that doesn't matter you know can you can you smile for the camera and you know sell this yeah I saw this cheeseburger and we'll give you ten thousand dollars kind of thing it was like what that's not in line with Who I am but I ended up doing it because you do need to make money in LA and commercials are a good way to make money but it's at a price and I was and especially as joy camp started to grow I was really at odds with myself cuz I was like this is absolutely you know in conflict with my integrity and while it did pay well when you can get get the work as it's highly competitive when you get the work it pays well but it's at a cost and I we fought and it also but not having a back-up plan so that was like my life you know I was making money doing commercials making joy cam videos and found myself oh well if I leave the commercials what am I gonna do I don't this I don't have a income source and you know being in the the truth business doesn't really pay that well so you know at the kind of leap of faith we take a leap of faith but it's hard they they ensnare actors who are talented I mean there's so much talent in that city but only this much of them actually work in like the movies and in series regulars on TV shows and everybody else is just clamoring for whatever they can get so they're basically getting everyone to exploit themselves to sell products to people that they don't need that not only do they not need them but most of the time are actually really harmful to their mental health or physical health we're very happy to be out of that business that's good that you guys went with that leap of faith and had developed our courage to go your own way you know and that's like what you said since the the majority of these corporations are just selling these huge amounts of products and services that people don't really need and if not are outright harmful to them that's where the majority of these jobs these lower end jobs go to actors like that and that's where you know that 95 or greater percent you know are taking jobs just to survive you feel lucky to get it we met in the commercial audition bring about something I was gonna ask about that about how actually how you actually did meet and that's how it was how we met yeah well it was that it was a commercial audition we had a very brief conversation and I sent her a friend request on facebook afterwards all the worst things well cuz we didn't even talk enough that I felt comfortable asking her for her number it was so brief but I felt something in the exchange I felt the spark and I was like you know what why not my Center at friend-request forgot about it and then I hope gosh probably two weeks later she finally responded to it and it's MEMS Susan said do I know you we did we went on a walk and Benny said I'm a poet and I thought oh boy and then we sat down and talked about Hillary Clinton and 9/11 and went home like ah I think I'm in love yeah I was right before the election and I was preparing myself I was like okay what am I gonna say when she brings up Bernie Sanders like I'm not gonna handle this conversation and instead she said I think Hillary Clinton is a horrible person and I told I got tongue-tied III think I think she's horrible - and the rest is history so um what if we play another video or two from the joy camp series or anything else that you want me to play where would you want to take it next so I think I know you said but can you repeat it just so I said what if we play another video from the joy camp series or anything that you want me to play next that I have queued up over here what do you think we shot uh I'm good seems have you a fan favorite all right great all right let's cut away and I'll cue that up cool you alright folks we have that queued up let me make it fullscreen and there we go okay we can cut to it are you doing man I'm good how are you doing I'm good how you doing I'm good you know I mean my knee is a little sore from jogging yesterday which makes me wonder if jogging is bad am i doing permanent damage to my knee by running on it is cardio in general bad does it speed up the aging process because we're this article on Facebook that says it does but as a matter anyway because I'm gonna keep doing it because I stay in shape I want to look good I'm not getting younger I'm 32 I'm single I'm lonely and I want to attract a partner or partners I guess because I also don't know if human beings by nature are monogamous or polygamous whatever I'm hanging in there I'm living the dream actually in the process of losing my dreams I'm avoiding inevitable death one day to time on collecting memories I'm feeling nostalgic I'm looking forward I'm trying to live in the moment I'm laughing when I can I'm simultaneously enjoying and hating my daily routines I woke up this morning feeling pretty groggy because I had one too many beers last night I'm trying really hard not to beat myself up over that decision no regrets but I am feeling restless and confused sometimes and antsy and freaked out and happy and excited and discouraged over my life is at and grateful at the same time and I'm experiencing my parents getting older and friends of mine from throughout my life are having babies which makes me wonder if I want to have babies and I'm contemplating purpose in life and the life path and desperately wanting to change the world but not knowing what to do I'm asking why things are the way they are how do we get here where are we going is the apocalypse imminent are we already in the apocalypse is the beginning of a Golden Age what is the deal with synchronicity what happens when we die are there ghosts bla bla bla I'm I'm chilling I'm just chillin observing a world run by lunatics where there's never-ending war a never-ending debt where there's empty houses and homeless people where obesity and starvation lives side by side where corporations donate money to cancer research when the chemicals in their products are most likely what's causing the cancer or financial wealth material gain and fame are considered success frankly I'm feeling pretty helpless because I'm too busy paying off my student loans and working two jobs to roof over my head and food on my plate and gas in my tank can focus on any tangible solutions and affect anybody but myself but I'm good as soon as I wonder if my posts are reaching anybody because I think my getting any likes feel like Facebook is like controlling what I'm posting you know I have over 2,000 followers on Instagram that's it I got 300 that's how many likes a guy my last photo classic so folks this is what you can expect from joy camp do check them out at joy camp website come and check out their YouTube channel I'm going to go back to Benny in one second we're in Kolbert okay and let me make sure I'm unmuted as well on the discord end give me a second okay Benny we're back cool all right yes so we just played I'm good that's a classic one thanks yeah I like it so uh any anywhere else that you want to take it before we start to go to calls in a few minutes I think we have another couple of videos cued up let's see what else we can go to just cut away for one second we have I'm a conspiracy theorist we have a irritable Trump syndrome that's an excellent one two and we have as much done okay so knees in that one yeah we have q and on identity revealed and we have words and phrases you're not allowed to say if I had my ending on how much time we have I think the Trump Boyd's with the I TS yeah a sensitive video would be great to show okay I'll play those two we'll go to the irritable Trump syndrome one next because as you said Sonja is in that one as well all right here we go I have a cued up and we can cut to it great feeling angry tired of bigotry and racism are you experiencing spontaneous bouts of complaining do you find yourself triggered by just about anything then you may be suffering from IBS irritable Trump syndrome also known as Trump boys I TS is an infection of the mind caused by the rapid spread of bullsh propaganda and fear as I TS attacks your consciousness it calcifies the pineal gland inhibiting critical thinking and the ability to receive information that challenges a pre-existing programmed paradigm other symptoms may include self-righteous that blame passive aggression validation through social media circular arc and depression arrogance stubbornness herd mentality teching those who do not agree with and again solidarity constipation stress state as extreme cognitive dissonance excuses the drain is smug bullying denial white guilt hate thinking you're smarter than ever and in some extreme cases from Porsche in the last few months IPS has gone viral and it's memeing hard it seems to be infecting everybody well we're here to tell you there's hope the cure to I TS is easier than you think first turn off your television and sign out of Facebook next go outside you remember outside right say hi to your neighbor and listen to what he has to say watch out though his kindness may surprise you great now that you've calmed the down a bit go ahead and ask yourself some bigger questions like what is my purpose how can I grow and be myself to the fullest of my potential why does the government infringe and my basic human rights why is there war why do I have to pay to be alive how can I leave this world a better place than how I found it what can I do to help by reducing your I TS information you can help reduce flare-ups and others when my Trump roads were raging I thought the swelling would never go down but then I remembered that I'm the cure and the answers I seek are within I guess you could say I trumped my roids but whatever you do don't consult your doctor about I TS this message is brought to you by the universe of Great Spirit and Source Energy in conjunction with Mother Nature earth and all those who came before you who dare to slip away from the herd and state woke irritable Trump syndrome just get over it already subscribe to joy camp support us on patreon and watch more joy camp by visiting our YouTube channel be careful though our videos may surprise you great stuff let me bring him back right Benny we're back cool Danny and Sonia okay that was a great one a lot of good acting in that one you know the whole you know it's memeing hard thing that one got me yeah so joy camp debut that was the first one that you were ever in yeah cool that's a great one and what was the other one that you wanted to you wanted to go with the desert yeah as long as okay that there's there some f-bombs in there that's all right oh that's okay you know it's all right you know this is a totally uncensored show you know we're not on any major networks here and we don't go over a.m. or FM radio so that's fine great all right it's uh yeah yeah this is yeah well I'll let it speak for itself okay I'll cue it up you have that video queued up so we can cut over to it I know I need to update my iOS but I don't have enough storage this thing is so retarded oh sorry alarm either little Johnny but you can't say that anymore what if my iPhone sucks no complaining is fine you just can't say the word retarded hi I'm Peter Podesta the progressive professor I don't get it professor what's wrong with saying retarded I'm glad you asked little Johnny the word retarded is highly offensive and we're trying to create a more tolerant progressive society that focuses on equality and acceptance rather than hate and bigotry take me for example I used to be blinded by my own privilege both as a cisgender male and as a white person whoa a double whammy but then I realized that I was the problem and I've been carrying that guilt ever since well jeez professor I don't want to seem insensitive can you please tell me what I am not allowed to say anymore I sure can Johnny let's start with skin color here are just some of the words and phrases you can't say anymore regarding race and ethnicity dark-skinned India Indian burn Indian giver Native American Aboriginal colored yellow cracker gypsy have a BA ching chong cuido Lyman Caucasian minority ethnic exotic urban refugee foreigners spicy latina black sheep uppity octoroon pickaninny hillbilly white-trash illegal immigrant illegal alien Uncle Tom as well as phrases like I'm not a racist I have several black friends all lives matter and Hollywood is run by Jews you know professor sometimes I wish I had a vagina instead of a stupid old penis am i normal of course you're normal little Billy but be careful with the V word a lot of progressive minded people are simply referring to it now as the front hole hmm I like that here's a list of words you can't say anymore regarding sexuality and gender stewardess masseuse waiter waitress carpet muncher circle jerk trash bossy sweetheart honey house white chicks stack girlie man mama's boy handsy smear the queer feminazi huh click Khun PUD see fuck boy and phrases like you throw like a girl I believe the most qualified person should get the job there are only two genders Wow professor you are so articulate did I say something racist no Timmy but you did use a microaggression micro what microaggressions are subtle discriminations that can marginalize someone's experience telling me I'm articulate is a compliment but also an insult here's a list of just a few of the many microaggressions you can't say anymore it was only a joke don't take things so seriously I don't see color you have such a pretty face when I say the same thing to other people like you they didn't mind you have no reason to be depressed I never owned slaves you should smile more there are also some things people say that are not only hurtful but dangerous like 9/11 was an inside job vaccines contain harmful ingredients I have some questions about World War two no one died at Sandy Hook pizza gate is real lock her up I'm proud of my European heritage the jury is still out on global warming the earth is flat I like Donald Trump well what will happen if I say some of those words professor well Timmy you could get publicly shamed for using hate speech or even worse banned from social media sites like Facebook Twitter and YouTube so what do we learn here today Jimmy sticks and stones can break your bones but words can break your heart they sure can Jimmy they sure can but I feel like we might have missed a word what word is that Johnny I don't know something's tell me that we're missing a really bad word well nothing's coming to mind well it comes to my mind is the worst word of them all there is absolutely nothing wrong with any of those words in and of themselves they're only words it's the context that counts it's the user it's the intention behind the words that makes them good or bad the words are completely neutral the words are innocence I get tired of people talking about bad words and bad language bullshit it's the context that makes them good or bad absolutely brilliant and you know putting George Carlin at the end there that's you know that's phenomenal because you know he's talking about the context of things this is like kind of what I talk about when it comes to occult knowledge people thinking it's bad you know thinking symbolism is inherently in and of themselves are bad you know it's it's the context that's the way it's used used it's who's using it and for what reason so I love that you interjected that in there and that was like an incredibly funny one and that's one that you know that'll that'll really burn the the hole left of sensors to the ground you know because you included every single denomination and everybody in there they they don't they won't know what to make of that and I like how you injected the idea of censorship and then even you know both you guys turned aside and pause there for a moment of silence have you been censored in any way on social media or YouTube yeah absolutely we noticed the difference in our just everything about our channel a few years ago we used to have a video called I don't if you've probably seen some of our award show videos we have and we had one that was called the Illuminati puppet of the year which was a Grammy video and it was far and away our most popular video in viewcount yeah it was a great was yeah it was uh it was trending and going viral and we were up to about I don't know three hundred thousand views or so and then YouTube took it down saying we were violating copyright etc and they've been shortly after that they took down one of our Oscar videos for and copyright stuff even though we're protected under fair use and priority law they didn't care and ever since then we've just noticed that things on the channel have been strange now granted we're not ones to put videos up every single day so we don't never really you know try to build momentum in that way but just little things like that video I'm good we have a screenshot of that video at 99 thousand views within maybe two days of putting in a line when we put it up a couple years ago and then the next morning it dropped all the way down to thirty thousand views so there's some tampering going on there are every time I go to speak at a conference overnight overnight the view count dropped by that much yeah exactly that's definitely deliberate yeah and so we people were dropped as subscribers all the time I coming up to me constantly saying they don't get our you know then I get notifications and their feed about us that they have an unsub to the channel and recently we had a video called Stand Up to Cancer causes which I filmed that in acapulco a few years ago and I mean people in it like Luke radowski and James Corbett and Simone and a lot of other people and the whole point of the video is to tell people like what causes cancer and how to avoid these things in order to maybe not get cancer and so it's an empowering video I will basically in the video we say sit down and do your work don't don't you know stand up to cancer by giving away your money sit down and do your own research and that video got taken down from YouTube and Facebook in the same day for inappropriate content so we've definitely felt the felt feedback lash somewhat I mean we're glad that our channel has been taken down but there's definitely we feel like it's been compromised for a couple of years and they've definitely out you know just blatantly taking videos down for sure so we felt we feel it oh yeah for music yeah that happens to you though yeah so we have yeah we definitely felt it yeah that really sucks I'm sorry that that happened I'm very surprised and almost amazed that I haven't you know right now been the you know the the target of censorship myself so far I stalk ttle bit last week I really don't think they even know what to make of my material and don't want to really call any attention to it so you know hopefully that'll continue but you know who knows where this will go how bad this will get in the future but I think it's definitely a slippery slope that we're on regarding it and I think more people have to speak out against it because these tech companies they they think they're God and they think they couldn't literally prescribe what thoughts people are allowed to have that's how bad it's gotten exactly and so I've been telling Sonia this all the time but I have a lot of you know I subscribe to a lot of other channels on YouTube so my feet is primarily alternative based stuff but they always try to recommend late night with state Seth Meyers Jimmy Kimmel CNN and Stephen cool every day I could manure recommended you to recommend a view I've never once clipping a Seth Meyers video yeah every day there it is recommended for me to watch so now I've just started reporting them every time they do it I'll get a little report button and reporting spam or for being misleading or abusive content every time just hours and I'm in in spite of that they're still putting them on my feet so I'm just a new algorithm they'll they'll decide what what exactly you know they recommend for you to watch you know trying to win it so I'm reporting CNN and Seth Meyers daily for spamming me your videos yeah I mean this is what we're up against you know it's like more people have to understand what's taking place and be like righteously angry about it and get enraged about it like because this is something that people shouldn't be angry about you know how dare companies try to prescribe opinions and thoughts to people like that you know that that they want them to have you know and what they want them to watch instead of what people's actual related interests are you know so though and again I may not agree with people of certain political persuasions or even worldviews like you know I don't particularly think that the flat earth community is on to the truth regarding you know what they believe but they should have a right to say it I don't know anybody censored there if they have freedom of speech to say what they want even if I feel that they are not correct so but they should be allowed to say it you know I don't particularly want that in infesting groups with my name on it because then it'll give people the impression that I believe that you know so I want to try to you know have the places that are my areas of the internet for my content and that's my right that's like you know what you want in your home is what you it's it's your aesthetic and that's what you want in there and nobody else can just throw things in your house that they want in there you know so it's like we should all have our own little corners of the internet build them up like we would build a physical space up that as our our own space and you know other people shouldn't intrude in there but if they're invited income in respectfully have discussion have debate etc you know but everybody should be allowed to speak and present their thoughts and and have their own unique outlet for their the expression of their consciousness and their ideas you know that's what freedom of speech is all about and we have to be champions of it and really speak out against this absolutely radical censorship that's going on and make sure that it doesn't get any worse than it already has gotten exactly and they're trying to convince people that hate speech is not free speech and ironically though the the limit to what you can say are direct calls for violence you know understandably so and yet more and more the left is calling people to stand up to people in Mogga hats for example by with violence is show them that what they believe is wrong and that we won't stand for you know Nazi take over and punch them in the face these calls for violence on mainstream CBS television shows and that's allowed all of a sudden and they don't get flagged on social media there's a double standard there you know which is very clear that it's a political politically driven agenda so guys I'm unless you want to add anything else yourself or just you know end the formal part of the interview on whatever terms you'd like and tell people anything you want then could go to calls on discord and bring in some some people in the community to ask questions on discord for you guys like to end the interview segment well I wonder was it something you alluded to earlier and talk about the future we camp for a second now if anybody been following Joe cam for a few years they probably notice that our output has slowed down somewhat and that's primarily because I don't live in Los Angeles anymore so I have a friend it was a been generous enough to who works for an airline who's been generous enough to allow me to fly standby under her standby privileges services and I'm able to go back to LA much more frequently than I thought I was going to be able to now living in Washington so whenever I go back to LA now I can film with Kevin and make joy cam videos then but that makes means our output is you know it's sporadic at best so the future of joy camp is still going to continue but it's gonna be basically whenever we can find the time that said I'm now finally at a point where I feel comfortable and ready to start a new channel and a new website that's just me because I've been doing this solo venture now for I think enough time that I feel that it's time to not confuse the issue anymore I think that I'm going to conference speaking and performing and people ice babies how can I find your work I'm like where you go to joy camp I like what's joy camp so I just want to make sure that there's a I don't know there's there's a there's a separation of creativity so that there's a joy camp group and then there's Benny wills the wit present or what have you so I'm launching this week actually before red pill launching Benny wills calm as well as of any wills YouTube channel where I'll take all the poetry that's on the joy cam channel now pluck it from there put it on this new channel and then start putting out new content on there so I'm finally taking a leap and doing that so Joe Campbell exists still but there's also going to be a new a new way which is just just me solo fantastic so joy camp website.com joy camp on YouTube and then launching very soon within a week or so you would say Benny will come exactly yeah the goal is to get it all up by time I got a red pill and what's the date on the red pill Expo red pill only bring up a calendar real quick it's I'm pleased the 7th 8th and 9th let me just that yep 7th 8th and 9th in Hartford Connecticut there are still plenty of tickets available I highly recommend the event it's posted by G or Griffin the legend himself yes and we went last year and it was awesome and I'm absolutely honored to be the emcee this year and they have some pretty excellent speakers lined up and if you're in you know if you seventh eighth and ninth and will you be emceeing and doing your performance order yeah yes yeah I'll be performing as well oh yeah you can use it if you scored joy camp you get a promo code joy can be a little bit of discount on your ticket and yeah I'll be performing there as well as emcee thing I have a really full plate when it comes to the red pill I might get a haircut for it we'll see great well good luck at that event I'm sure it's gonna be great jeah where Griffin's awesome I got a chance to speak with him briefly at an arc apoco 2019 again this year I've heard it's a great event that he puts on so you know I'm sure a lot of people are looking forward to seeing you perform there and I wish you the best luck with that event Thanks and then I'll also be emceeing an event called a narco Vegas at the end of July I think it's the 21st of July here in Las Vegas you want to brave the heat of that time of year and that in that city come check us out and of course you and I both be a10 arkadelphia that's right into summer that's right Danny Oh be at an arc adelphia as well so come on out to that in Philadelphia in September so Benny and Sonia thank you so much a brilliant interview and I think we could go to the collar lines and see what the listening audience the viewing audience wants to oppose to you as questions what do you think excellent man yeah it's been an honor Thanks okay all right let's go to the phone lines then just a very brief review folks please don't watch in the if you're having your call taken in discord don't watch on the live stream because it will be on a delay so just you should be listening with headphones and discord please use headphones in discord if you're calling in to the show in the callin room because it it can create an echo if you're not so we want to try to keep it as clean audio as possible and let's go to your calls let's go to essence of Anarchy essence of Anarchy you are live on what on earth is happening episode 210 with Benny wills and Sonia English welcome hey everybody can you hear me yes we can we can hear even for now yeah all right thanks well I think one of the problems we've been having earlier is that we're creating too much harmony on discord yeah that's right and I've got two questions and then a comment and I'll let you move on surance oh I've got a local radio here my name is Jason I'm from southern Illinois I got a local radio show and I've been searching for truth music it's pretty hard to come by so I'm interested there anywhere I can find your works own you know especially I'm interested in a natural law song of course yeah awesome um right now I just sing in acapella onstage with Benny and but I'm working with a guy here to put it to music just so it's more so it's something it's more palatable and consumable shareable so I'm working on that as soon as possible and it'll be on my youtube channel and probably

SoundCloud all for free and when that happens it'll come up on joy camp and Benny wills calm but thanks for your interest and that's my goal is to have music that can be played anywhere on the radio at your wedding whatever all right yeah well I'm definitely interested in that Thanks and then I got one for you Benny so have you ever thought of maybe doing a feature-length comedy truth movie because most of the comedy films out there these days are total garbage yeah I have thought about it we have to be the right I'd have to be I have to be inspired basically is what it comes down to is I have to find an idea that I'm passionate about enough to pursue it but that's actually something I do yeah what I would love to do was achieve some sort of financial a total financial independence so that I could fund my own movie I mean that's when we left Los Angeles it was with financial empowerment in mind because I got so sick of you know boring myself out to make paycheck so we're really on a quest to grow wealth in an ethical way which is which brings us to this trailer living in Washington and so then I'd love to be able to return home like hero's journey in a way and create content for film with my friends large scale if you go to our channel there is we do have some short films there the longest one is I think it's called spare change and it's about eight minutes long we also uh we did a television pilot a few years ago actually a year nap before I left or no about two years for I left uh play called kill switch and it's fully produced I mean we put it probably about twelve thousand dollars into it and it's we we planned it and filmed it over the course of maybe a full year or more so a lot of time a lot of energy a lot of resources that went into it if you did want to check something like that out it's on our channel about 15 minutes long called kill switch but answer your question yes I would love to make truth based comedy movies or whatever with my friends I mean that's one of the that's one of my main goals is to just keep letting this creative creative creative output continue and grow and create stuff that's really significant and memorable so yeah alright yeah you want to message your contact so that we can send you stuff when it is ready to go again yeah a sense of an arc owning anything else I had one more thing sure that I feel like a lot of people don't really understand about the transgender and the gender narrative at the moment because if you look at the kabali on you know we're all have male and female mental gender and spiritual gender is both gender and it seems like the gender how its portrayed in the media is all in the physical realm yes and it's partially I think to prevent people from going through the alchemical wedding keep them focused on the physical one of these the most important part and also the AI agenda would be to totally drain gender from people oh okay I'll chime in on that briefly because there's some experience that I have in the whole dark occult especially in Satanism here actually in the state of Pennsylvania believe it or not where there are factions of Satanism that are out rightly promoting androgyny and they do this because they know that the main cohesive bond in society is the bond between male and female and in order to weaken society in the the deepest way possible they want to end Rajan eyes people because of people who are more uniform in a sense of not having unique characteristics of their own and even forming a bond between the sexes is going to play into the the divide and conquer agenda and make people actually easier to control this is something that if you want to really look into on a deeper level you should try to find online and read some of the works of the Whitehall Church of Satan it's an organization that I was briefly involved when and involved with and had some affiliates with when I was involved in Satanism in my past its Whitehall as a small town outside of Allentown Pennsylvania and there's writings of this organization directly related with converting society to an androgynous path so it's something that definitely certain factions of the dark occult have within their tool set and it's part of their agenda no no question about it in my mind whatsoever so I just wanted to chime in with that aspect of law what as essence of anarchy was talking about yeah interesting I'll check that out sure guys have anything to conclude about that essence about America yeah over the course of yeah I have lots of thoughts about and all that sure but I won't go into detail but one thing that I think is I feel like this that this the gender the bloodlines of gender now the fact that they're trying to convince us that there's more than two genders is the real-world equivalent of two plus three equals five from 1984 they're trying to change something that is a fact and make us so that further it discombobulates us so that our sense of reality is no longer rooted in truth it's the real-life version that this idea that there's more than two genders is the direct in the inner world example of two postive equals five it's definitely that type of obfuscation that is that is taking place and they want people to believe that reality is whatever the the people who push the the official mainstream narrative say that it is that's where they want to get people's minds that's how weak-minded they of a state that they want to get people into where we just accept whatever they're pushed reality is that they you know force-feed down our throat through the mainstream narratives so let's let's hear from our chicken cam chicken can live on what on earth is happening welcome what's up mark it's cognitive state of Anarchy a Carmen how you doing what's up dude hey buddy how's it going Carmen one of the co-hosts of the an arc adelphia conference so armin what do you have for benny and sonia today i just i love how this arm sort of the focus seems to be on a whole gender bender thing that's something i weirdly watch like a three-hour documentary on the other day and got really into the the rabbit holes well that it's it's funny because I like how penny pointed out on how there seems it seems to be so aligned with this corporate agenda and it really destroys the whole like sort of rebellious vibe that the whole kind of movement claims to embody you know they really kind of are in line with like the powers that be and I'm not sure they realize it and that's something that we really have to I think make make a parent to people that's my opinion least who do you think Benny yeah well I think they've also I mean this term toxic masculinity is thrown around all the time which is just masculinity so they're they've demonized men so they basically anything a man has to say is now in danger being toxic and offensive to someone and if you've damask elated the population when you've damask laid at the part of the population that would stand up against the authority and stand up for that uprising so that if you have all women thinking and men are toxic that makes us all so weak that we won't be able to you know we won't have the balls to stand up to this tyranny I couldn't agree more man and it's funny I remember growing up in life like being pushed away from you know sort of natural behaviors that I learned later in life where just was just masculine energy do you I mean like expressing your opinion even if nobody asked for it tell me people like hey so other people figured that's like a super negative thing and in certain contexts you want to be a jerk or anything but like just in general the outward expansive energy of masculinity is demonized like it's got a whole new moniker on it and you're right it is to sort of quell you know it was the men of the of the world who got up and I mean still to do this day fighting the wars and stuff you were just that's kind of how it goes and like if you can take if you can take that out of the army of the the true the humans and the people who are like I guess like the plebeians is sort of like the term people are referring to the common man as now if you take that masculine element out of it it makes them that much easier to do in what the ideal feminine used to be which is feminine which is nurturing caring loving soft and now they're fighting to be more like men so that there's more female superheroes and women are just as good at fighting in battle as men are and it's all just so distorted yeah and it's a shame too because they're taking them away from what is a beautiful force of creation I mean femininity is the womb it's where you know like the truths the seats like the soil of which you know like future generations come from and that is a there's a beautiful mantle that for anybody to be you know to hold and like no no women should be like upset that that is like a hard it's just like no man should be upset that his heritage is one of the expansive and powerful nature and we're here to provide for these beautiful creatures that you know create our babies and move life forward and it's a beautiful thing but you know all this gender mentorship just tries to throw mud all over it drives me crazy the the dark occult always seeks to invert everything it seeks to invert because it can't create it can only really take what's there and twist and distort so inversion of everything is part of the agenda so you're taking the the Sacred Feminine and turning it into the unholy feminine so you're taking what would be a feminine nurturing nature that is there to guide and support and uplift and and direct and then you're turning that into something that is controlling wanting power you know wanting to be more like a man instead of being feminine and it's in and of itself in its own quality and then also a wanting control and power you know and then you're you're doing the same thing for with the sacred masculine which is a Protectorate force you know something that is there to provide defense when something is attacked and harmed when someone is attacked and harmed without right you know the in strength you know and something that is expansive as you said Carmen and you know continuously puts energy out there that's the will that's the the force of the will and they want to take that and they want to pervert that and turn that into the unholy masculine or you know the the the control freak mentality that we see in police military politicians you know any aspect of the state that this is all the controllers this is all the dark occult can do they can only invert distort and pervert they can never really create using truly creative energy they can only take what is there that nature has provided and given us and turn it into its polarized opposite twisting and distorting it and perverting it into the opposite that that nature intended it to be mark that is exactly what they do and I'll leave it on this one sort of eerie note that's an exact alignment with what you said about them taking nature and inverting it so that three-hour documentary that I walk one of the most disturbing parts of it was how how much photographic evidence there was that there are political figures celebrities I'm talking a listers that are actually kick male figures that are actually inverted they they're like in your guys audio I'm sorry Carmen we're having a video issue Benny and Sonya you're back in on your back in on discord but your Skype connection dropped I'm gonna try to drop the call and re-establish it I'm sorry about sorry about that continue Carmen I'll reestablish the call awesome well yeah the thing what they were doing was like certain a-list political figures and celebrities as part of this dark occult ISM part of taking nature and inverting it and perverting it were actually mutilating themselves and their children and essentially like disguising themselves as the opposite gender that was the premise of this video and they're showing photographic evidence of certain prominent women displaying masculine features such as like large shoulders there was they were getting into like all these different concepts about how like the shoulder width to like to waist ratio and law stuff and it was just a very interesting and honestly visually visually convincing argument and it just it goes in line with that satanic inversion role and everyone to put it past I guess look into that if you're into the creepy kind of stuff yeah great points I mean I think that's definitely part of the agenda that they want to put out there they want people confused they want people divided amongst themselves even internally divided so that they don't even really understand you know themselves so it looks like we have bene and Sonia back Lamia let me drop the connection there do we have you back on discord Benny I'm not hearing his audio Benny and Sonia if you could re-establish your connection on discord because that's how callers are going to be able to hear you I will bring you back in there but I'm not seeing you in the calling room yet so I'll give you a moment to start to launch that and come back but Carmen um you know setting aside you know that aspect of the discussion let's talk a little bit briefly while I have you on the line about the an arc adelphia conference and how that looks to be shaping up since Benny and myself and Sonia are all going to be a part of it how do you see it shaping up going forward everything's coming together perfectly we actually um I guess I'll make this a public announcement we acquired a second location directly across the street from our current location to sort of accommodate the expanding sort of request from the speakers to hold workshops and also showing films and stuff like that so we're actually we're actually expanding the actual venue because of interest and everybody's you know sort of like participation which is awesome but what else actually happening sort of on a macro scale which is even more exciting that Benny is also going to be at red pill and an ARCA Vegas which we're also going to be at so you're starting to see this in acapulco red pill Expo in Arkadelphia and Arco Vegas almost like equivalent to like an international like World Tour of anarchist conferences to like really spread and see this information and have people network and really build a network of connected freedom fighters and that's what I see happening above all these things which is super exciting and I love the raw of heart yeah and I mean you could add things like the AV conference in England to that you know there's so many events that are bringing people together all the world that's why I think you know the activist community should do more in this sense of trying to network people together again as we talked about last week with social media just general social influencers people who influence society as the mavens of their communities there is that aspect of the connector the networker the one who can bring people together they may not be the main influencers but they are ancillary influencers in the sense that they will bring the community together and bring the main influencers together in the same place as and Network them together to establish stronger bonds within the community and I think that's what the whole freedom movement needs much more of you know because it's still loosely conglomerated groupings of individuals who really have to again engage more to get down to those root core principles those first principles that Benny and Sonja and I were talking about earlier and get on the same page regarding those things that are about true objective morality and learning natural law and truly learning and exercising the difference between right and wrong behavior when we get on the same page about those first principles there is no telling how much this could expand and have an influence and there in the rest of society I completely agree and that's why it's so exciting to just go forward and be a part of it and I want to thank you and Benny and of course of course these lovely guests as invited in Arkadelphia as well I want to see all of these powerful Souls there I'm gonna have all this energy sort of like you know concentrate so that it can you know be that much more powerful and that I just can't wait man it's gonna be super super exciting you know in Arkadelphia coms you're interested to learn more mark thanks for having me on I don't know if Benny's back home but if he is thanks for hanging out Carmen thanks so much for calling in unfortunately it looks like we have lost Benny and Sonia it looks like their internet connection has failed on them if they are listening somehow through the stream maybe on their phone if you guys can just get connected on your phone through discord we can continue with calls for you guys without video for the duration of the show if you could just get connected back in discord if you download the discord app on your phone and connect there if you're having problems with your internet connection in your your vehicle so when you do a reestablish that kind of connection Benny and Sonia just get back into the w OE IH callin room okay and I'll bring you in through there and we can continue with audio only with the calls but if you could re-establish the connection on skype that would be that would be fine as well so whatever you're able to do you know I will bring you back in for now callers on discord you're just going to be presenting your questions to me for the duration of the show or unless Benny and Sonia are able to re-establish their internet connection I'm very happy that at least it lasted through the main part of the interview and I apologize that some callers will not get to pose questions to them okay looks like if Benny is back in the room let's go Benny are you there yes I can okay I'm gonna try to bring you back in via Skype as well if you're on skype let's try to reestablish your video as well and then just mute your connection on skype okay so all right there we go okay we had okay we just totally kicked off our internet no idea why yeah I figured that's what happened no worries you know and you know these things will happen and it's a live in like we were saying yeah Carmen and I sort of wrapped that up and just started talking a little bit about the an orca poco conference itself and how that's shaping I'm sorry Annika Ann arkadelphia conference itself and how that's shaping up and it looks to be really coming together so hopefully it's gonna that that momentum is going to continue and it's going to be a great event here in Philadelphia this fall so let's continue with our callers and let's go over to a pox a pox you're live on water on earth is happening episode 210 with Benny wills and Sonya English welcome to the show everyone thank you yeah yeah so my first question or I just have two comments I guess I'd like your take on them that's okay sure go right ahead okay so my first comment and question was about actually television because I know Benny was you know he's been acting for a long time so there's been some shows that I've been watching recently that were actually made in written in the in the 50 and I noticed there was quite a difference in the way like television and that type of media was produced back then compared to it is now so it seemed like back then like so the shows I'm specifically referring to are the Twilight Zone Outer Limits and combat so have you heard of any of those three shows oh yeah I've watched plenty Twilight Zone for sure and I find that these shows were created just like completely differently like it seemed like every episode there was a meaning or a message behind it like it was trying to teach you something and yeah and now it seems like you know every show like doggy there's still some good shows but there's a lot of sensationalized violence and sex and just based on shock value entertainment so I I was just wondering know do you know would you know why like why do you think this is this has changed so much because I feel like in the beginning of when television was being there were some good intentions behind the messages and and and meaning behind the shows well I yeah I think they there's a real agenda to control what we think about everything and it's becoming more and more blatant because I don't know things are just escalating I mean why do they do it so that we have an absolutely controlled narrative of everything so that we have so everything we think about there about any subject anything about history is now we have a point of reference when it comes to either a film or TV show and all of our thoughts are completely controlled by what we learned from the television and I had an interesting experience that might shed light not that I know who's in charge or whose idea this was or who's running the show or whether it's just mine you know brainwashed soldiers falling in line I don't know but in Hollywood you know it's very common to be a waitress or caterer to make money on the side and I catered for a very big director producer and in his production office there was an event that I you know signed people in for and it was a bunch of show runners of TV shows you know the biggest TV shows that are airing right now the show runners are the people who you know control the script and what the show will be about that season we're all meeting in a room quite literally physically around a literal table brainstorming ways to work Planned Parenthood into the storylines and they were doing it together so that they could all brainstorm together and not be identical but make sure that they all thread it in how important Planned Parenthood is and how important is that we support them and how under siege this you know wonderful organization is what's that sorry bye that's all right so anyway that was just I mean that shed light on at least the mechanics of how this stuff works cuz it does seem that way when you're watching television is we're all on the same page everybody's talking about racism or everybody's talking about Planned Parenthood or it and here at least is one reason why is they literally get together and decide to Wow that's well that's a very powerful yeah just connecting dots all of us together you know I think that it really takes away from the the creativity and you know the the art form when there's an agenda behind it because I feel like this shows that I thought I was referring to back in you know these are people coming forward with original ideas and I guess maybe they didn't have such a stranglehold on the content that was produced but now I guess we can see it in you know and things like Benny's videos and your guys Joy Kent videos where we actually see just like the true essence of art rather than something like Jenna's being shoehorned in there with you know if find Parenthood and stuff like that so I think it's pretty sad to hear to hear that that's the reality of the situation yeah as far as I know and I may be completely off-base with this but I'm pretty sure someone like was named rod Sterling that his name darling Sterling sorry he had full creative control over the toilet zone and I feel like that rarely happens these days clearly does someone have full creative control over the product that there that's being produced in order to produce something you have to acquiesce to whatever the producers want I mean that was one of the issues we were making this pilot a few years ago mm-hmm I mean we got financially backed by someone who was producer in Hollywood and really liked what we were doing and basically he saw dollar signs he's like nobody else is doing what you guys are doing now when we were trying to pitch it to who various various distributors like we went in that FX and AMC and and was the other one epics and Comedy Central MTV and a bunch of other ones the internet only ones and while everybody liked it nobody knew what do with it and I was actually kind of a relief in the end because I was nervous that if the show did get picked up that we wouldn't be able to stay what we wanted to say anymore because so much of what we say is absolutely contradictory to what Hollywood is putting out there and interesting now I mean I thought we couldn't even pitch that show now there four years ago we could because it was that was like when mr. robot was out and conspiracy culture was actually kind of like in and now it's not it's so far out it's considered all right you know white supremacists etc so I'd only maybe would have said a chance to get those meetings at this point but we definitely would have been compromised had we got a producer certain extends anyway I mean we'd have to run every idea by someone and I can't imagine my ideas making it through a you know a bunch of producers approval so in the tide might have turned during the Red Scare you know this big like communist infiltration in Hollywood that was thrown out as a total hoax wasn't a hoax you know that there were actually people with an agenda trying to get into the narratives that were being told on television that might have been the turning point but even back then I also think that there was some you know nefarious things going on behind the scenes back then even you know the origins of Hollywood are pretty dark from start to finish and you know they they've always exploited people were involved and I think it I don't think it's telling has ever been a point where how Hollywood was untainted I think it's always been a pretty tainted industry and you know if there's ever good work that comes out of there it's always pretty surprising and almost by accident sometimes I think I don't think sometimes filmmakers know the amount of like important truth they're putting into their films when they're doing it they're just like channeling it yeah I totally agree with that perspective Benny I it's something that obviously I haven't lived out there and seen it you know firsthand I've done some research into it and maybe plan on in the future talking about the types of allegorical wars that go on within a creative aspects of Hollywood because while I agree at the highest levels it's very much control by the darkest forces involved who have the reigns of these studios there are some producers that have tried to slip in allegorical content and put it out there if they can get it passed you know the eyes of certain people that are the gatekeepers within these studios and then they could reach a huge listening audience I think filmmakers who have done that in the past obviously Stanley Kubrick has to be the first one talked about he's done it in probably the biggest way out of any other producer in history and then you have people like M night Shyamalan who I think in the modern day is doing it to almost the level that Stanley Kubrick was with some of the allegorical content of his films you know then certain films that you could tell are never going to make it onto the Hollywood screen because of how powerful their messages allegorically you know probably one of the most popular science fiction novels of all time is Robert Heinlein's stranger in a strange land but because of the incredibly powerful content spiritually of that novel you're never going to see a Hollywood film made about that that that book it'll probably never happen I'm very surprised that HBO has an adaptation of Pullman's His Dark Materials coming out later this year because the the spiritual allegorical content of that trilogy of novels is extremely powerful I mean it hit the screen and a different adaptation called the Golden Compass and then when they taught and knew that it was all about you know the destruction of authority that you know they cut the funding for the other two films and the the second film never made it to the screen yeah well HBO has a few times put out shows where I'm really surprised at how much truth they're putting true detective the first season is sure it's jaw-dropping how much truth they drop in that as well as the wire tip if anyone's ever seen the wire the wire is just rife with reality so there's a lot of back-and-forth in that struggle in Hollywood you know at some point I have a presentation plan in the future about the occult war between the dark sorcerers in Hollywood that are putting out the poisonous content and the the other magicians within Hollywood if you will who are trying to make very creative allegories to reach people at a subconscious level so um you know something that we definitely talked about here on what on earth is happening and I appreciate you guys lending your perspective on you know what's going on within that that battle inside the Hollywood community absolutely I have it planned in the works it's not going to be out I'm not gonna be delivering that for a while that the the next big presentation I have as you know just for myself outside of a conference of course at the an arc adelphia conference I'll be doing the sacred gift of anger because Carmen particularly liked that topic and wanted me to focus on that at the conference so I agreed to that but I'll be doing probably an all-day seminar here in Philadelphia probably early next year sometime I'm guessing that's going to be called the occult origins of Nazism and communism and it's something that I've been planning for a long time it's going to be a whole lot of material where I delve into how these are religions which is what they are they're not just political movements but there are certainly religions share so much in common down to their ideology their methodology their symbology even down to their you know dates that they celebrate they're in the calendar year and the ways that they go about mind controlling the population so that's that's one of my next big independent lectures presentations if you will them so a pox I want to thank you for the call great points that you brought up thanks so much always a great caller let's let's hear from let's see who's next in the queue that's still hanging on here let's hear from let's hear from lioness lioness you're live on what on earth is happening welcome to the show lioness are you with us you have to unmute your connection I've on them no worries your live with Sony and Sonja and Benny welcome that was a great show I actually it's my story so similar to them to theirs I mean I wasn't born there or anything but I spent four years four very very tragic years handling and I mean I come from the film world but I'm now a poet so that was like oh my god III didn't see your message came up a little while ago I saw it yeah yeah I was like oh wow can't really make a living like we poet I just like the sound of that so much I don't make a living at it I mean I I do get paid it's a little bit but I couldn't I can possibly make a living off of what I make from poetry moment anyway maybe one day a little change you know I've been trying to change my holiday around that issue because you know I can find myself repeating oh you know I can't really make a living on poetry and I want to stop saying that yeah you know right I mean well I I haven't I have an idea about that you don't mind yes you have a question first I don't want to I don't want to just go ahead well so this is another part of my like just taking my own finances into my own hands I don't want which I don't need to pendant on money for my poetry because I feel like that puts a strain on my artwork if I get paid to perform poetry or if anyone you know after my book is published if people pay me for the book that's all that's a great energetic exchange and it's but it's like a cherry on top I feel like the moment that I do poetry in order to get paid it taints my integrity with it so I'm making sure the poetry is a something that stays pure and everything any money I get from it is just extra and awesome bonus money you know yeah I don't even I don't even write it to publish although I do publish a lot but you know if you lock me in a cell that's what I would do and I don't you know I don't hear that much about but that said you know I don't see why we could create our own universe and I was going bring that up when you guys were talking about censorship because in a way those two issues are kind of related but you know like we I think we have to get ahead and empower ourselves and you know find our own channels I don't know be chewed or I don't know what but you know we need to move on and and ignore this you know of course they're gonna do that right and we know they're gonna do that and we know we're gonna get censored and we know they're cheating I mean it's so obvious by now so I guess we can you know just find our own everything right so I was trying to figure out a way how could we undo everything and and you know of course they never won they would say to me was so cute we're like so that's two fringe that's two fringe but everybody's thinking about this before I really thinking about new ways to eat new ways to live new ways to teach their children you know that so he's never gonna happen through them but it can happen through us because like by the way your videos are awesome I was laughing hey guys I think what you guys do is so important no because it's kind of the bomb is the soothing part of all this shit it's hard what we're doing right I mean it's really hard and you're being alone and and it's really dark and it's me there's a lot of you know suffering involved in a way but when you make fun of it you know funny thing and yeah I think it's so needed and so important that that is a part of it it's super important and also I think is that very directly it's a very direct way to do it's like music right it bypasses the intellect a little bit yeah yeah absolutely well I think I really appreciate that feedback the bomb I I like that a lot it was awesome yeah and and and to mark if you could like show your you know your sensor videos as well and and that's something I think we need to do like what the heck are their sensory I mean that's alright I mean come on I think I have a couple more cued up maybe we could end the show on I'm not sure if Benny and Sonia have a preference they do one I'm not sure which ones we have queued up all the censored ones are not we we have backups that everything that's been censored but I didn't send you links because they're not public on our check not online right yeah so that's one thing I think I mean I think we need to take this very seriously because this is not okay like you know you have you created creative content and you put the effort and we have something to say and there's and we're grown-ups we there's no one that I can tell us whether we can show this or not I mean that's up to the public to say you know what I don't want to watch this let me mute it or I want to watch it you know we're all adults and the fact that they're taking things down is completely to where that doesn't happen yeah - I'm sorry lioness great points um I I want to say that like that the the censorship issue is one of the things that I think is one of the hot button issues that could lead this country down a very dark path of potential even war because when you make it impossible for the truth to be communicated you are leaving a lot of people no other option but a physical option and again I've been trying to bring the truth to the table regarding what's taking place in our world and in our communities for the last 12 years for the very reason that I want to see that eventualities everted I see it inexorably leading to that space of conflict and bloodshed quite frankly and that's not fear-mongering that's not talking trash that is looking at historical patterns honestly and openly and realizing what they are going to lead to socially and if people think that that can't happen they're extraordinarily naive if they're if they're seeing the world through rose-colored glasses and don't understand the powder keg that America could potentially become and already really is becoming and the censorship thing is gonna lead to that and people will say oh it's all controlled it's a dialectic yes again I've said many times in the past I understand that they're trying to push things toward that direction but that doesn't mean that you can let the manipulated walk all over you see only one side of a dialectical conflict needs to buy the lie the illusion for the conflict to kick off and start to become successful because it's like what are you going to just say oh well it's all mind controlled people I'm just gonna let them take my rights and walk all over me because they bought into an illusion well no the people who don't want their rights taken and want their sovereignty maintained and protected are going to say I know that you guys are under mind control I know that you're totally manipulated and brainwashed but we can't you to do what you're doing well that doesn't mean that just because you like a naive child has have let yourself in your weakened condition in your in your spiritually and psychologically weakened condition allowed yourself to be taken over okay and be cut off from true spirituality and any source of truth whatsoever that doesn't mean we're gonna let you as infantile spiritual children my brainwashed children take our rights as a truly awakened and spiritually understanding individuals you're not gonna take our rights away just because we understand you've been polarized into a dialectic thought process you know it's it's so so that's the whole idea is that we have to stop it nip it in the bud and stop it stop that manipulation from happening up front we haven't done our job in that regard and that's why we needed doubling down of our effort to try to really reach these people at some level to wake them up out of this trance otherwise inexorably especially here in America as this censorship agenda gets pushed more and more in freedom of speech gets taken away you're not going to see America back down in the ways that a lot of the rest of the countries of the world of back down because a culture of self-defense is way too strong in America for that to happen now you may not see on the scale that some of us would like to see it but I'm telling you it's going to be on a scale that is gonna if we allow it to go that far is going to be at an unimaginable level of suffering violence and bloodshed and that's what we're all really trying to avoid here and this is what what on earth is happening has all been about to try to bring this information about what's taking place politically behind the scenes and occultic lee behind the scenes you know regarding mind control we're trying to bring that forward to avert that eventualities so Bennie I'll let you respond to what you know lioness was saying and what I added on to that and Sonia as well holiday what I'm thinking leave some missing what was the kickoff what was the heart of her question well she's she's getting into like the the types of censorship that's going on blacklisting of people off of social media talking about that we have to start our own networks that hasn't really been very successful because you look at some of the alternative video sharing communities that are out there they pale in comparison to the numbers that things like YouTube and Facebook make possible yeah oh I think that the the problem with all these alternative platforms is that there's no incentive for people to leave platforms if they if they're but they're buying into the narrative from the mainstream media they have no incentive to leave Facebook we have no incentive to leave YouTube the ones who think that Senators of censorship is a good thing so that we end up getting put into an echo chamber where we're not gonna reach anybody but even for the people that do see the censorship taking place and they're affected by it when people say well let's form our own communities or platforms elsewhere they're there to me really aren't that many viable alternatives there there's a few that have been postulated as alternatives but if you really try to use them technologically they they're they're abject failures if were to be honest you know if we're to be really honest with ourselves like D tube has been proposed as a potential alternative and it's unusable if I'm sorry guys I love the crypto community I think the block putting things on blockchain is a great idea so that they can't be censored but if anybody has up practically tried to use bit tube I'm sorry D tube for our larger long videos I mean you try uploading a three-hour video every week you know I don't care how you have a compressed D tubes not really an option it's it's it's an abject technological failure and I really hope that anybody who might be involved in that community is listening and you know it reaches people who are developers in a platform like that because you know I love the idea but the implementation obviously needs to be improved so I no I want to add on to that sure well I I I really am a free-market capitalist enthusiast that said what I don't like about a lot of these alternative platforms is that as a financial incentive and I think that muddies the waters as well so then your your posting with money in mind to get points or to get some sort of like tokens or some right and that keeps it from being authentic and it becomes again a popularity contest the status thing so that sure you have more points than someone else and I just don't think that's wow that's an interesting addition I don't think it's necessary at all but even for people that are just using it to get a message out there on an alternative platform other than the tech giant's you know video sharing sites like YouTube it if you've tried to use it technologically it's really not a viable solution something also like what mike adams the health ranger put out with his brady on platform which was originally real video real dot video it's it's a technological disaster as far as I'm concerned I like him I like his work but you know that the platform is it's not a viable platform as far as I'm concerned and I it pains me to say that because I'd like I'd like to support it but it's like and also there's no viewership there it's like you know I'll put a video up on YouTube but I'll have a thousand views in less than an hour I'll put a video up on brighty on and in a month it won't have ten views yet because nobody is know traffic is being driven to that platform from anywhere so it's like it's it's very difficult to gain traction and we have a monopoly slash trust in the form of the tech giants you know YouTube constitutes this Facebook constitutes this Twitter constitutes this and in many ways Apple constitutes this so you know I think yeah and Google of course as well especially under the search platform although there are some viable alternatives in the search aspect you know they do have a lot of monopolies and in other ways and web services you know Amazon as well when it comes to you know selling items online you know so you know this is uh this is all like how these tech communities are consolidating power it's the same way governments consolidate power they're doing this in the Technosphere and you know again my original question to you guys building off of lionesses comments is this is a very dangerous slope to go down especially here in America because this is what's going to drive further political polarization and it's going to drive what I see as an inexorable civil war if we're not careful and again I've been trying to avert this and I think people need to be honest with themselves that this isn't gonna be there's there's too much of a culture of self-defense and a culture of weaponry here in America that the American public at some point is it's going to explode like a powder keg as far as I'm concerned I see it bubbling beneath the surface it may not be overt especially in urban environments but you you can see in other places the anger that's bubbling beneath the surface and if that powder keg goes off here in America there's no not going to be any any putting the lid back on that can we're stuffing the genie back in that bottle when it goes off the bomb will not be unexploded it will it will affect everybody and again that's what I'm trying to avert you know and I don't know if you guys have anything to add to that whole dynamic or how you see that going as far as censorship is concerned yeah well to piggyback on that I like what Mike Adam said actually and something I saw a few months ago he said do not shoot first what they're trying to do is provoke us those of both of us were the resistance against this who are the you know who have who are gun owners and believe in protection do not shoot first because they want us to shoot first because that would provoke that was above the city guys that's that's all the time we have thanks so much guys for being our very first guest here on the new video edition of what on earth is happening ladies and gentlemen Benny wills and Sonia English check out joy camp website calm Benny wills calm coming up ladies and gentlemen you've been watching what on earth is happening the government is slavery we'll see right here next week

What On Earth Is Happening Show #211

Topics: *A Discussion On Right Livelihood, Buddhist Philosophy, Esoteric Buddhism, The Four Noble Truths, Misconceptions and misinterpretations of Buddhist tenets, Self-Inflicted Suffering, Conquering suffering through changes in behavior, Knowing what we cannot change and what we should change, the Eight-Fold Path to end Self-Inflicted Suffering, What is Right Livelihood Knowing which occupations constitute Right Livelihood because they do NOT cause harm to others, Knowing which occupations do NOT constitute Right Livelihood because they DO cause harm to others, Right Livelihood's inseparable connection to Natural Law, the Real Law of Attraction, How the universe supports you when you choose to take Right Action, Examples of Right Livelihood and Wrong Livelihood, ALL Government jobs are Wrong Livelihood, Government is Slavery, Government jobs of any type are Immoral, ALL Police jobs are Wrong Livelihood and Immoral, ALL Military jobs are Wrong Livelihood and Immoral, Order-followers of any kind are Immoral, a Militia as a true fighting force for the cause of Freedom, Occult Mockery of Police and Military, Police and Military are the Strong-Arm of Slavery, Order-Following is the antithesis of Exercising Conscience, Judges are in Wrong Livelihood and are Psychopaths who think they are God, Lawyers are in Wrong Livelihood by supporting and giving credibility to the Slavery system called Government, Most Bankers are in Wrong Livelihood, Most Wall Street Financiers are in Wrong Livelihood, the Oil Industry and most Energy companies represent Wrong Livelihood, the Suppression of Free Energy technologies, Members of the Mainstream Media are paid propagandists and are in Wrong Livelihood, Most members of the Alternative Media are in Right Livelihood, Religious leaders are in Wrong Livelihood, Dark Occultist and those in positions of worldly power world behind the auspices of Exoteric Religion, Allopathic Medical Practitioners and those in the Pharmaceutical Industry are in Wrong Livelihood, Naturopathic Health Care Practitioners are in Right Livelihood, Animal Farming is Wrong Livelihood, Sustainable Plant-Based Farmers are in Right Livelihood, First Principles must always be applied to Work Ethos, Modern Outcome-Based "Educators" are in Wrong Livelihood, Science used in support of the Control/Slavery system is Wrong Livelihood, Scientific pursuits aimed at the betterment of Humanity is Right Livelihood, Inventors with the goal of the betterment of Humanity are in Right Livelihood, Stan Meyer's Water Fuel Cell, Stan Meyer's poisoning, Plumbing and Sanitation jobs are Right Livelihood, Plumbing and Sanitation has done more to promote human health than anything else in Human history, the Solution to Wrong Livelihood is to Quit your harmful occupation regardless of short-term suffering that may be invoked by doing so, Human beings continue endlessly to lie to themselves, Stop Lying To Yourself as the First Step of Occult Initiation, Impromptu call-in by Vinny Eastwood, Persistence in doing the Great Work of truly educating the masses of human beings through work in the Alternative Media* freedom man that's what it's all about [Music] you have to groove on three-dimensional space [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one on one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time today is Sunday June 2nd 2019 this is episode number 211 of what on earth is happening we have a great show lined up for you here today we're going to be talking about Right Livelihood it's a concept I've brought up in the past it is obviously a concept from the Buddhist philosophical tradition that relates directly with natural law but we are going to flush it out in detail today and I'm going to be giving some examples of what what Right Livelihood actually is and what it most certainly is not so that's coming up on this edition of what on earth is happening so a couple of quick housekeeping duties that I want to get to is that I will be speaking at an arkadelphia the first-ever inaugural and arkadelphia conference here in the autumn of 2019 this conference will be taking place here in Philadelphia on September 13th 14th and 15th the guys from the state of anarchy are the hosts of it I'll be one of the featured speakers I'll be giving a talk that is going to be called the sacred gift of anger in which I'll talk about how the powers that be want to diminish the emotion of anger of righteous anger righteous indignation in people and how they go about doing that and how anger can be a truly motivational emotion if it is used in the right way if it is processed properly and directed properly also a big part of annika Delphia will be the debut of my first ever documentary film which is called mark passio and the science of natural law a feature-length documentary film about natural law probably the first in the world as as I know and that we'll be debuting at an arkadelphia 2019 I'll also be giving a workshop I will have to decide on what that's going to be more likely than not I've been kicking around the idea that I will be giving a workshop on how to teach natural law for the potential teacher of natural law I'm going to be do probably doing a workshop with resources and information on how to actually go about doing this type of work that's more what I'm leaning toward it's not set in stone yet as what the workshop will be but that is what I've been leaning toward and it will probably have center around that in some way so that's an arkadelphia 2019 you can go to the water on earth is happening calm website shown here okay and then you could click on the an arc adelphia banner there to get tickets that will take you to their main conference page and if you use the coupon code passio at checkout for your tickets you will get five percent off your ticket sale and five percent of the ticket sale will go directly to me as a donation as an affiliate donation from the state of anarchy and an arkadelphia so do check that out and another quick announcement I was interviewed on The Wizard Factory which is a podcast that has been gaining some traction of late this is hosted by Logan Hart and Bryan Easterday and I was interviewed on this past week by them on The Wizard factory that interview is now up on my website it's also up on my Facebook page and you can check out the wizard factory on YouTube by going to the news article on water and earth is happening down here at latest news and in the latest news section or you could just click the news tab and you could watch that full length interview there so do check that out it went pretty well I was pretty impressed with the content of that interview so thanks to the guys from The Wizard Factory for bringing me to their podcast that being said I do have one other quick announcement and that is we are look we've put together a great staff here at what on earth is happening and we're always trying to expand and we're always looking for people to join the team and I want to say that the technical issues that we've been dealing with the last couple of weeks while they've been frustrating I think we have them all resolved we've got a new battery backup UPS system here which thank you to a viewer for sending that that was a wonderful gift and you know technology gifts we so appreciate here because we put them all into the work and we put them to use we don't waste any of the tech gifts that people send us they are put to use here at what on earth is happening in service of the great work so thank you to everyone who has donated in that capacity and I hope that trend will continue because that support is very much needed and it is very much appreciated so that being said we have been looking to get a kind of a technical support volunteer in here because almost all of the technical support duties fall to me when there are problems and I have to take myself off of other projects in order to solve technical problems when they do arise and they do arise you know so we could still use some help in that regard we have a couple of people who have expressed interest and I'll probably be meeting with some of them hopefully this coming week when I have some time in my schedule but we are looking for a technical support volunteer okay you you should be a qualified technical support an individual in the IT field who can come to the wall on earth is happening studio this isn't a you know remote job you have to be able to come here and work on the computers at the location here in Philadelphia in South Philadelphia okay so it is an in-house job please take note of that and if you're not from the area or cannot travel here on a weekly basis please don't respond to this call for help okay and what you would be doing here at the studio one day per week probably one day per week would be the trouble various technical issues as they arise and lend your you know your technical support expertise you must have a high level familiarity with the Macintosh and Windows operating systems we run the most recent versions we generally keep our operating systems and software and hardware pretty much up to date here we don't run ancient equipment here we pretty much run what is largely state-of-the-art equipment to try to bring out the best quality that we can so you know it's the latest version of Mac OS the latest version of Windows etc and you're running on modern machinery not ancient you know hardware so you should have familiarity with those operating systems high level familiarity with those operating systems ability to troubleshoot them and troubleshoot hardware you should have you know high level technical troubleshooting skills and good organizational skills because we do try to keep things pretty organized here as well so if you have those type of skills and you're local to the Philadelphia area and you want to join the great work and be part of the world on earth is happening team please get in touch with my assistant Lia Boone she'll be going through people who want to basically apply for this team membership in this position that we have available so her email address is Lea le IH a at what on earth is happening dot-com you see it right there in the lower third so again in touch with my assistant Lea and you know come and be part of the water on earth is happening team because we definitely need the help we could use this type of technical support from someone who is willing to come and volunteer one day a week so that's all the housekeeping that I have for today's show and I guess we can jump over into the slides so there is the an ARCA Delphia banner that the guys from state of anarchy made you could use again promo code passio to get five percent off your ticket sales and five percent they'll match and donate directly to me so that's coming up it's going to be a great conference a lot of fantastic speakers max Egan's gonna be a part of it Larkin rose you know Benny wills that I interviewed last week so so many people so many great people that are going to be part of this Anarchy related conference here in Philadelphia so do come and check it out so the show for today is a discussion on Right Livelihood and again I've mentioned this concept in the past when talking about natural law and this is so important to natural law it is really one of the most critical aspects of living in harmony with natural law as we will see thanks to Brett for making the title cards looking great as always and thank you to the whole staff for your work here my producer Mike's been doing a fantastic job really appreciate his efforts thanks to Tom and everyone else on the setup crew and of course my assistant Lea for keeping things running smoothly here at all times so you know we're going to talk about what Right Livelihood is and the first thing that we have to understand is yes this is a philosophical Buddhist concept that's where it comes from in the Eastern traditions at least I would say this is directly related with natural law and I'm going to explain why of course but you know in the traditional sense we get the the general philosophical viewpoint of Right Livelihood from the Buddhist tradition and you know I haven't really covered Buddhism too much here on what on earth is happening but we're going to talk a little bit about it today we of course study integral traditions here that means that there's no one path that is the only path to understanding the truth and understanding the world of the occult and natural law there are many different paths that can help lead us to that understanding and my approach has never been a single singular approach it has always been a multi-faceted approach to truth okay I would refer to it as an integral understanding of how things work together and that you take the best parts of all different traditions philosophically as they resonate with truth as you understand them to resonate with truth and you bring them all together so you know one week we could be talking about Freemasonry another week we could be delving into the tradition of Kabbalah in some weeks we will discuss things like Buddhism okay so this is the world's fourth largest religion actually but Buddhism is often not just considered a religion it does have some religious trappings but in general it's a philosophy on life that is characterized by a few overarching you know worldviews and and general points about what is taking place in the human condition so we're gonna get into that and then we're going to talk about right livelihood as part of what Buddhists would call the Eightfold Path and we'll talk about what that is so let's dive further into it here and look into the Four Noble Truths of Buddhism now again I'm not championing Buddhism as like the be-all and end-all I'm just saying that it's something that along someone's individual spiritual journey they can pick up something from and you know move forward with it because there is a lot that does resonate with truth and natural law that comes from this tradition as there are from many other traditions again I take pieces from Kabbalah from Tarot from Freemasonry from Rosicrucianism you know from Thelema etc you know so again the this is part of an integral approach to truth and an integral approach to understanding natural law principles and I think that these fit in very nicely with an understanding with a deep understanding of natural law and they certainly resonate with my worldview and my understanding of how things work if you get them down to their core esoteric principles again this can be perverted and turned into a religion okay into a form of control if we allow it to be okay if we allow that effect to happen and I'm not gonna tell you that Buddhism can't be just as corrupt as any other religion in the world because it most certainly can okay but when we look at the pure tradition from an esoteric point of view and we understand the subtle factors of these Four Noble Truths as I'm going to present them here today I think you can understand how real esoteric Buddhism could be as powerful as any other of the mystery traditions of consciousness and natural law so the first of the Four Noble Truths of Buddhism is that and people will often say this very very incorrectly as life is suffering that is a complete miss translation of how it is written in the original Buddhist texts okay it would be a good translation would be either life contains suffering or life is or can be stressful okay life is stressful is one of the ways that that could be actually translated correctly not life is suffering as you will hear many Buddhists who don't understand the esoteric aspect of that first noble truth presented very incorrectly I would say that the best wording of the first noble truth of Buddhism is that life innately contains suffering including self-inflicted suffering okay so there are many kinds of suffering that life contains as we make our journey through it but life itself is not suffering that is not what I how I would interpret the first noble truth and I don't think anyone else should either so life innately contains suffering and things that will cause suffering but what we really want to focus on and look at when we look at the whole Buddhist path and philosophy is that life contains certain elements that are self-inflicted aspects of suffering okay and that's very important to distinguish things that we cannot really control that we have no control over that may cause suffering in our lives for instance death which is a natural part of the life cycle okay we're going to experience you know other beings that we love people animals etc pass away okay and you know their consciousness go elsewhere this is part of life okay this is not a self-inflicted aspect of suffering but of course we will feel suffering when you know loved ones leave us so what we really want to look at here is that life contains self-inflicted suffering okay because this is part of making the distinction between what you do have power to change and what you don't really have power to change you don't have power to change the laws of nature you don't have power to change the way life itself you know generally functions okay that's going to be what it is as it was designed to be but what we do have power to change is aspects of suffering in our lives that are self-inflicted okay so we have to know that that exists life innately contains things that are going to cause suffering for us and a lot of that is self-inflicted that's the crucial part of the first noble truth the second of the four noble truths of Buddhism is that the cause of the self-inflicted suffering that we experience in our lives is attachment to desire now many people will wear this one way more simply than it should be and they'll say the cause of suffering is desire and it's way overly simplistic okay if you want to get down to a real esoteric philosophical understanding of real the real philosophical Buddhist tradition no one would word just that they would not word the first noble truth has life is suffering okay it contains suffering including self-inflicted suffering anyone who really understands the esoteric elements of Buddhism would never say the second noble truth as the cause of suffering is desire okay the cause of our self-inflicted suffering is attachment to desires that we have meaning that we are it's okay to experience desire we all do if we're in the 3d world we're going to have desires okay it doesn't mean that those are unnatural doesn't mean that we should try to squash them or suppress them it means that we should be aware of them watch them okay be able to move through them and be able to set them down when need be okay it's what really causes self-inflicted suffering is attachment to desire but I'm gonna go one step further than that and say it's attachment for the desire of reality to be a different way than that and how it actually is okay meaning we want natural law to work a different way we want the universe to work some different way we want to do things that cause bad things to happen but we want good things to happen as a result and the universe just doesn't function that way but we have an attachment to the desire for it to function the way we want it to instead of the way it actually does that's the main cause of saw of self-inflicted suffering in this world okay now that doesn't mean don't ever desire the world to be better than it is it doesn't it doesn't translate to don't understand that the world is in a bad condition and he the human condition is slavery and basically endless suffering because of the self-inflicted suffering we've caused ourselves okay through government through all the other ways of wrong thinking that we've implemented and hardened into institutionalized you know life here on earth okay and we've basically built a prison system we built a slavery system okay so it doesn't mean don't see that honestly for what it is and then try to change it okay it's saying don't have attachment to try to make things into a the opposite of reality the way that they actually do work okay because you don't like the way reality works then you have this attachment to a desire for it to work some different way that's what this means okay it's like the prayer of serenity okay give me the grace to accept that which I can't that that cannot be changed okay and yet your the courage to change that which should be changed and the wisdom to know the one from the other that's the real prayer of serenity okay what we're talking about here is when we want things that cannot really be changed to change okay like how natural law functions in our lives we don't want to understand that we want to ignore it we want to lie to ourselves that it doesn't exist and therefore we're in this state of continual self-inflicted suffering okay we're bringing that down upon ourselves no one else is doing it to us we're doing it to ourselves and that causes attachment to the desire for things to be some other way it's also the attachment of worldly desires that you know we just want to have for our selfish pleasure and selfish benefit not doing anything to help her assist the human condition you know when we when we give of ourselves at least part even part of our time and skills to help others and to really attempt to put the truth out into the world and attempt to better the human condition in whatever way we can and whatever way we know how then we're gonna see the universe come to our assistance in our life to flow more effortlessly and for less self-inflicted suffering to happen that's how karma really works folks that's how natural law really functions okay so that's the second of the Four Noble Truths the third of the four noble truths of Buddhism is that there is a way to alleviate self-inflicted suffering self-inflicted suffering can be conquered it is not a hopeless case we are not doomed to endlessly you know put our own hand over the fire of the stove or of the burning coals and burn our flush away there's a choice there is a way there it can be conquered it can be defeated now the non self inflicted aspects of suffering that come about naturally in the world there's going to be natural disasters there are going to be deaths of loved ones etc you know we're going to have accidents in our lives we're going to make mistakes there they're going to be sources of suffering for for us okay it doesn't mean that you can conquer every single form of suffering what it means is that you can conquer you can learn how to conquer the ways that you are holding yourself back and the ways that you are causing suffering in your own life needlessly that need not be that way alright that's what the third noble truth is so that's great news that means there is an answer to why we suffer there there's a reason why we suffer okay and it can be conquered there's a reason for the suffering and it can be conquered this is all good news good positive things to understand about reality instead of having a completely dark worldview that oh woe is me nothing can be done I'm just doomed to suffer here okay obviously we have control over certain things and other things other people have to make the decision to change their own minds their own hearts and their own behaviors and therefore change their own lives and impact you know the the collective quality of life here on earth for all so the this is actually largely good news okay and the fourth met the fourth noble truth of Buddhism is that the method for ending self-inflicted suffering is what is known as the Buddhist Eightfold Path or the Noble Eightfold Path of Buddhism okay so there is an Eightfold methodology by which self-inflicted suffering can be conquered now you know we could talk about all of these at some future point I'm only going to very briefly highlight some of them and these are the kind of very similar to the steps of initiation in the Western mystery traditions of occultism okay so let's look at what that path of alleviating suffering actually is it's called the Eightfold Path and it's right understanding right thought right speech right action Right Livelihood which was what the is what the bulk of the topic of today is I'm laying the groundwork for that here right effort right mindfulness and right concentration so what we're talking about really here is putting your consciousness into alignment and you know understanding thought speech and action those are the aspects of con business you know our thoughts our emotions our actions okay and our understanding means coming into knowledge of the truth and I my producers trying to get my attention just give us one moment you all right folks so I'm just being told that we're having technical difficulties that we cannot control that we have no ability to to solve because it looks like Vimeo is actually down the actual Vimeo site is completely down and it looks like YouTube is partially down as well so we are still streaming fine here we are still recording the show in real time people may have to check this out in podcast cuz it looks like there's some major internet difficulties at least here on the East Coast so my producer just wanted me to unmute and discord so people if they want to follow along in discord can can check out the show from the discord calling room so I just did that looks like that's okay and I just want to say you know it's a again it's always a house of cards when it comes to technological issues and some of it is not within our control the things that were self-inflicted we took care of in between last week and this week and we got some new electrical you know power surge equipment we got some we eliminated a couple of adapters and we're able to run some better cabling so it looks like we haven't been having any glitches so far I'm very happy about that but you know hey we can't control what happens with Vimeo and YouTube you know those are other services who knows what kind of technical issues they're wrestling with but again this it very much it's almost synchronistic it goes hand-in-hand with the topic today that some things are within our control to be able to fix and improve and some things are not that happen and that just has to be accepted as how it is okay so we just continue we press on we move on and we do the best that we can and you know we let the chips fall where they may okay but we make the right effort okay that's a huge part of this right you do what you can okay staying in mindfulness of the entirety of the situation and exercising right concentration focusing on the task at hand okay and when we put these all together what we're really talking about is I saying before is this is about bringing consciousness into alignment with itself within the individual okay such that we are not in contradiction we're bringing our thoughts our emotions our speech and our action all into alignment okay and all the different modalities of thought okay concentration contemplation or mindfulness okay right effort okay the willpower bringing the willpower to the task at hand and then of course the understanding of truth the understanding of what is right and what is wrong okay and right thoughts and right actions right speech and right actions we combine all of that together then with performing the right tasks that we need to perform on a daily basis to support ourselves and make a living in the world okay I don't really generally like that you know phrase make a living but you know we use it to mean supporting ourself in the resources that we need to get things done on a day to day basis okay to have the resources that we're gonna require to operate in the world and that's important and no one should shame anybody for that you know researchers who do a lot of hard work who are putting the word out in whatever capacity they can in whatever way that they can you know they should be supported in their efforts I've always agree with that I think there are ways that they could go about doing it where the hand of theft in the form of government taxation doesn't come into the play in the play as much by thwarting that and trying to do n runs around it I totally support that because I think we should pay in as little into this slavery system that those resources are then turned around and used to enslave us even further you know so I would like to see more people you know buck that entire system to the extent that they can but what we're really talking about here today is people who choose to do jobs on a daily basis that are actively causing harm to others as we will see so and that the real answer is that they should not perform those jobs regardless of what it for them in their life in their lives that's a very tough decision and a hard pill to swallow as we'll get to but going back to the Eightfold Path this is sort of the initiatory tradition within esoteric Buddhism okay and if we really understand what these things mean we'll see that if you you were to follow this Eightfold Path it puts the consciousness into alignment so that we are being that as we think so we feel so we act and that Trinity of consciousness is brought together as one and is not in internal contradiction within the individual that's going to open up tremendous doorways for anybody that gets into that that flow in that state of consciousness okay we're getting in touch with the higher self by doing that and we're putting ourself onto the initiate Spath so this very much resonates in many ways with the esoteric occult traditions of the West okay it's it's a it's a bridge between the East and the West the Eightfold Path and the initiate tradition so moving on from that let's look at that middle part of the Eightfold Path I believe let me just go back it was it was number five out of the eight okay and let's talk about what Right Livelihood actually is so Right Livelihood is an important aspect of the Eightfold Path of Buddhism true Buddhism encourages its disciples to engage in compassionate activity and to make their living in a way that does not cause harm to others what does this sound like folks sounds an awful lot to me like natural law this is part of natural law natural law is all about knowing the objective difference between right and wrong behavior knowing which actions are rights because they do not cause harm to others to other sentient beings and which actions are wrong wrongdoings or transgressions against natural law because the performance of them does cause harm to other sentient beings so in the Buddhist tradition this concept is there through Right Livelihood it's also there through right action of course okay so we should not be taking part in occupations that are inherently whether directly or indirectly causing harm to other sentient beings okay so and you know we can't talk about every single job every single occupation in the world every single profession we would be here for a month okay I'm gonna give a handful a couple of handfuls of jobs today and talk about whether they constitute Right Livelihood or not some of them are outrightly wrong livelihood some of them I would consider almost noble professions and some of them are sort of gray areas that it depends on the circumstances and you know you know who you're working for the capacity in which you're doing the job as we'll get to they are often do edged swords even though they you know you might even say it's the same job but it's it depends on again the circumstances that you're doing the job in so we'll look at examples a little bit later and then you know after the formal presentation probably in the third hour of the show depending on how the formal slide show goes we'll be taking your calls through discord you can go in through the the calling link on the show page and I want people maybe to think about some other professions that they might have questions about that uh whether or not they fall in with Right Livelihood and or comment on anything you know that I said here today or ask any questions that you'd like to so calls will be coming up most likely in the third hour so let's move on to the next slide so you know again I'm going to present general jobs occupations and we'll talk about whether they constitute Right Livelihood or not so continuing with what Right Livelihood is a Zen Buddhist monk by the name of teach not Han said to practice Right Livelihood you have to find a way to earn your living without transgressing without transgressing your ideals of love and compassion the way you support yourself can be an expression of your deepest self or it can be a source of suffering for you and others again there's that concept of it's not only causing harm to others but it also causing self-inflicted suffering so this is about what the real cause of the suffering that we experience from a self-inflicted aspect you know is all about and uh you know this this Buddhist monk is you know he's in his 90s now and he's been basically teaching the concept of Right Livelihood for a number of decades and I think it's very powerful that he's putting in there that this directly relates to our experience of the world okay it can change how we experience our lives ourselves and it also can change the quality of life for other people because you are affecting other people in the course of the work that you do on a daily basis and let me tell you something folks I know there's a lot of people out there in the freedom movement that are in a lot of internal contradiction when it comes to this okay a lot of people are still doing jobs that they themselves know that they shouldn't be involved with okay so this is sort of almost my it's not only teaching this concept but it's an appeal though there's going to be an appeal on that you should trust in the universe the universe will provide when you are doing the right thing we cannot only be we shouldn't be so fearful about what will happen without you know the amount of money that we're currently making okay I had to take a hit to do the right thing okay and now you know resources are very slowly coming back to the point where I'm able to support and grow this operation not just scrape by and that's great thing you know that's a testimony to the fact that I'm reaching people and having value in their lives and so are the people who helped out with the team to make this possible okay and that's what this is all about and when you're doing that the resources will come okay so we'll talk a little bit a little bit about that later the next part of this that I want to get into before we start looking at different examples of different occupations and talking about you know whether or not they are in alignment with Right Livelihood I want to talk about how Right Livelihood directly relates to natural law in very crucially and critically so Right Livelihood is an inseparable aspect of the understanding and application of natural law again natural law being the inherent non man-made eternal and immutable objective conditions that govern the consequences of behaviors of beings with the capacity for holistic intelligence and the capacity to understand right behavior from wrong behavior okay meaning human beings and anything that is a higher level order of organization than a human being as far as consciousness is concerned okay so to understand natural law means that you have to understand the difference between right and wrong behavior and therefore you must include Right Livelihood as a part of that understanding it means that you're in contradiction if you say you understand the difference between right behavior and wrong behavior and yet you're still in an occupation that is causing harm to others whether directly or indirectly okay so to truly bring our behavior into alignment with objective morality under natural law we must first know not think not believe not guess we must know if the tasks we perform in our daily work do not cause harm to others and are therefore in alignment with natural law and are therefore Right Livelihood that's what constitutes Right Livelihood so again this concept is not just a Buddhist concept it is a direct concept related to natural law and it's understanding and then of course our acting upon it which is what Kant the exercise of conscience is knowledge is the knowledge of the difference conscience is the knowledge between the difference between right and wrong behavior and the exercise of conscience is the freewill choice that we exercise to choose either right action / wrong action or unfortunately as so many people are doing by being in wrong livelihood wrong action / right action which is causing all the chaos and self-inflicted suffering in our world okay so when I talk about Right Livelihood yes this is something that is generally discussed as part of the Eastern traditions particularly the Buddhist philosophy but overarching Lee this is a natural law concept this is something that you have to understand and you have to apply in your life if you're really going to put natural law into practice in the world so if we engage in Right Livelihood on a daily basis as part of our understanding and application of natural law the law of freedom goes into effect the more people who will do that in the aggregate the more aggregate freedom we will have as a society the more people who will not engage in Right Livelihood and will continue to engage in wrong livelihood that is harmful to others the more chaos self-inflicted suffering and ultimately tyranny and enslavement we're going to have in the aggregate as a people as a whole society that's the law of freedom that is how it works in the world whether anybody really understands that or not or wants to accept it it doesn't require any belief day in and day out just as a brief aside to the presentation I talked with people who have literally attempted to apply natural law and then saw what they did if they don't apply it and compared and contrasted the quality of their life how because you could see it in your own understanding you don't need to believe me it's not a belief system it's not a religion it is not anything that any human being has invented okay it's not part of you know constructional ideas it's something that exists in Nate Lee - nature itself inherently in nature so you know I people say how did you understand natural law you know I actually did tests on behaviors my own behavior I lived a certain way you know not causing harm to people and see what would happen then deliberately did a test where you actually don't engage in drew objective morality and you know do things that are not really right and or honest and then see what happens and you watch the difference in quality of your life it's actually amazingly synchronistic it's unbelievably synchronistic how the quality of your life will change most people won't even have the courage to do an experiment like that I talked to more and more people who have actually tested it in their lives and that's how the scientific methodology works folks none of this is a belief none of this is a religion never asking anybody to believe a damn thing test it out in your life you know it's an extreme measure to go to but you will see how it works if you do and I guarantee you if you are stepping in the right livelihood and right action you are going to see the universe come to your support in more ways than I could ever possibly express it will become practically flowing and miraculous in some cases okay and you know I see how I lived before what the quality of my life was and I see what I'm doing now since I've been engaging in what on earth is happening and attempting to teach this stuff and the quality of my life has changed dramatically for the better now of course you know you can still look at the external world and see all the self-inflicted suffering going on and that can be depressing you know it does it's not a cure-all for everything it doesn't mean you're magically going to be happy all 24 hours a day okay it means that your life will proceed in the direction that it needs to proceed and you will not have obstacle after obstacle after obstacle thrown in your way and support that you need will come to the table I not I don't believe I know that if you step into right action and Right Livelihood the forces of the universe will come to your assistance and guide your life in the direction it needs to be without a doubt I know that's true so that being said this is a again a huge part of natural law understanding okay so we have to take it in holistically as not just a Buddhist concept but Right Livelihood is a critical and essential part an inseparable part as I've worded it here in this slide of natural law so how do we know again the key word on that last slide was you have to know whether you're your daily work is in harmony with Right Livelihood and therefore in harmony with natural law or not so how do we know if we are in right livelihood okay and you know the real answer of this question before I even read the the sentences on this slide is common sense and not lying to yourself okay it goes back to the first step of initiation stop lying especially to yourself alright so you know common sense has to be applied and we have to really be honest with ourself about what we're doing and too few people are willing to do that folks we're constantly lying to ourselves we're constantly telling ourselves things that are not true we're constantly believing our own here in humanity and that's part of the problem that generates self-inflicted suffering you know we don't want to look at ourselves in the mirror and honestly assess what we see and what we are doing on a daily basis people want to run away from that you know they want to run away from that internal shadow work alright so the key question that we have to ask ourselves when considering whether or not an occupation or profession constitutes Right Livelihood is this does the behavior that I am performing in the daily activity of this work caused harm or loss to others directly or indirectly and if we answer that question honestly not lie to ourselves but if we look at ourselves square in the soul and we answer that question honestly without lying to ourselves we will know whether or not we are in the condition of Right Livelihood it's not that hard folks all you have to do is say in what I am doing in my heart harming any other sentient beings am I taking anybody's property am i causing injury to them am i making their lives lower quality than what it was before am i helping them to be extorted or robbed by other people and my harming animals you know am i directly harming people or their rights their freedom etc you know am i harm people's financial situations robbing from them with hidden taxes like inflation okay like fryer part of the practices involved in fractional reserve banking usury etc okay so we'll talk about this but if you just simply look at the simple difference in the two images you know police with batons guns shields etc practically stomping over a woman and then a librarian trying to help a young girl you know become an avid reader okay it's common sense which one of these is Right Livelihood and which one is wrong livelihood okay and we'll talk about this in detail as we go through examples but this shouldn't be any hard brain work here ladies and gentlemen you know this should be something that we just look at ask ourselves honestly and come practically to an immediate conclusion you know if your brain is functioning correctly and again if you're not lying to yourself that's the key okay you could just look at you know you know shutting down free speech you know shutting down protests taking people's rights you know engaging in practices note with note whether it's moral or not if a politician says to do it they're following orders right there on its face that's immoral or followers any job that that you're an order follower and you're involved in a hierarchical chain of obedience okay command and obedience the innately inherently that's in a moral job that's wrong livelihood so we'll go through this I'm going to talk about some professions again that I consider what I would call all most noble professions that like their real service to to people to humanity in general and you know some people will debate that and they'll come up with examples where it's not the case but you know we're talking about generalities here okay not a lot of blanket statements okay when it comes to these jobs you're always going to find some accept to the rule alright but what we're really looking at here is the common sense application does the task that you're doing on a daily basis cause harm to others okay it should be very easy to see which ones do cause harm and which ones don't so let's start looking at some examples so you know obviously my listening audience should understand this my viewing audience people who might be new to this might not but you know as we talked about here on what on earth is happening government is slavery ladies and gentlemen whether you understand that statement whether you accept it or not it's absolutely true government is a ruling class of so-called lawmakers that makes up their arbitrary dictates their commands that they call laws that allegedly they've been given this ability by you know it being delegated to them even though no individual on the surface of the earth has rights like that to command others and you know we call that the delegation of rights that certain groups of people have oh it is is a master class you know that then thinks that they have the moral right to issue commands called laws to their subjects or slaves you know that is the subject class you know and that they have some kind of a moral obligation to obey the arbitrary dictates set by the masters called laws so if you're involved in government in any capacity I don't care what it is you could go all the way up to commander in chief you know to any kind of high-level politician all right anybody in Congress you know anybody in the judiciary all right anybody in any capacity down to a desk clerk working in an office of a local politician anyone involved in any capacity of government you're in wrong livelihood because you are participating in a system of slavery that's what government is and that's what you're supporting all the way up from the highest levels of that hierarchy all the way to the lowest levels of that hierarchy interfacing with the public that is wrong livelihood on its face because it's participate in human slavery whether you accept that or not if you don't understand that you don't understand the government is slavery you need to go back and listen to the podcast in order and you'd most certainly need to watch my entirety of my natural law seminar all three parts in their entirety you know I would I would very much expect my viewing audience to understand this point and understand why right on its face any aspect of government no matter how small no matter how seemingly insignificant if you're working for government you are working with stolen money you're receiving stolen money for your effort for your work and you are involved in slavery okay whether any role that you fulfill in that entire system you are involved in what constitutes and amounts to slavery and therefore you should not be doing that job if you're gonna bring your actions into alignment with Right Livelihood and natural law and again this goes down to any level politician you know anybody working for them in their offices even state federal state local okay or you know super estate you know international law you know UN EU all of that garbage okay any aspect of government all the way down to the local level alright so of course that includes the judiciary as well and this is just a priest class to think their God if imagine thinking you're the judge of other people you're the judge of other people you're gonna decide what happens to their lives see well and what whether they've actually committed harm or not that's the key I don't mind people judging people's behavior what but whether it's moral or not now whether it's legal or not screw whether it's legal whether the behavior is legal is meaningless whether the behavior is moral it means exercising personal discernment and judgment but to dress in a black robe as part of some priests class and actually believe that you're in a position of authority over other people and what happens to their lives I mean these people actually believe they're gods that walk amongst humans that's what they believe they think they have special rights that other people don't have they think they have the right to do things to other people that other people don't have the right to do could you imagine how up somebody's thinking has to be and how up their parents made these people to think like this you know and we'll talk about other examples that people are equally just as just shit-for-brains because I mean that's what these people are they're shit-for-brains children you know I'm gonna say it just like it is in plain street language okay these are psychopaths who think they're God that's what they are you ain't no God of me or anyone else Psychopaths all right you're a punk-ass bitch in a robe and that's all you'll ever be that's all you ever have been and that's all you'll ever be thinking you're god and you make the law and you judge other people yeah yeah yours sick in the head you're sick in the soul is what you really are that's what people like that really are their soul sick their soul dead largely as many of the other people we're going to talk about here in this section of the presentation so of course these people are involved in the government in a sick demented priest class capacity and their lunatic psychopaths every single one of them for even believing they have the rights that they think they imagine themselves to have all right complete wrong livelihood as is any aspect of government ever for all time in all places so let's get that straight no aspect of government can possibly be right livelihood because it is the belief that man is God man gets to make up what the law is and there is a master class in a slave class and if you're involved in it you're participating in slavery and that makes you an immoral person to do any aspect of that work you are immoral you are a bad person an immoral human being meaning you don't really deeply understand the difference between right and wrong behavior because you believe in slavery and you believe it must continue and that makes you a bad human being that's what makes you a bad person one of the many things that can make someone a bad person but that's one of the biggest how about all the order followers and enforcers of this slavery system called government like the military and I don't care which branch of the military it is Army Navy Air Force Marines National Guard doesn't matter you know let's let's go back to other agents of government real quick you know include Park Service in that include meter people in that meter maids Park Service people all of them anybody supporting government in any capacity okay and then you have a strong arm of the government you know for the people that don't want to come into line you have the military and the police the enforcers of man's law of men and women who think they're God on earth okay enforcing their dictates because that's all these order following dogs are no respect for them no one should have any respect for them have respect for people who fought as members of a militia to actually conquer tyranny that's what I have respect for that's a real fighting force not organized by a government bonded in there mutual respect for human freedom is the only fighting force

I have any respect for okay that's not the United States government that's not any States government okay anywhere on the earth that's not any nation's government ok the concept of militia has put forward in the Second Amendment is all about a fighting force of the people fighting for their individual rights to be protected coming together and bringing their well maintained regimen of weaponry and tactics together in military style with military weaponry to fight tyranny you know not this this is called stealing resources from other countries that the sick demented psychopathic politicians in the United States tell them to go and seize like all the poppy fields of Afghanistan how about how about that is one of the main aspects that this job entails you know securing the raw materials for the life destroying hard drugs that are brought in here to the United States and refined in factories here in the United States you know harvested in Afghanistan flown in to the east coast of the United States processed in East Coast factories to be distributed out through the rest of the the middle land u.s. West Coast all over the whole US and hook people on you know in into the opioid epidemic that we have whether it be done through the black market or whether it be done through legalized death drugs called opioids which is a complete epidemic in this country epidemic levels okay it's it's pandemic levels not just epidemic levels it's everywhere throughout our society like a plague and these are the people making it possible okay I'm all for putting any substance you want in your body but let me tell you something the kind of dangerous addiction and death do that is caused by you know hard opioid addiction it's it's going up by a thousand percent since we've been in Afghanistan and it's it's not just that it's what these people do militaristically like the barbarians that they are following any orders they're given to kill any civilians that they're told to kill you know invading other countries these are invaders is what they are they're invaders you know you want to put your skill toward serving humanity learn natural law and teach it to other people that's how you're going to bring about tremendous change in the world for the better not by going in following orders and wielding a weapon at somebody's face because you were told to you know these people don't have any real conscience they're joke followers that don't have any real courage either they think there's such big bad men your little boys that don't know how to think for yourself and you want other people to do your thinking for you that's what you are and there's nothing more sad or pathetic than that that's the most sad pathetic form of life that there is on this planet folks you know I don't care who I offend by saying that get as offended as you want get as offended as you like you're involved in the military in any capacity you're in a moral person and you are partaking in wrong livelihood absolutely not part of Right Livelihood you want to train with weaponry like that organized a true militia that is in keeping with the ideals of the American Revolution and why militias came together at that time the fight oppressors they were oppressing us you know on this land you know understand the difference between you know following orders as part of a being a lap dog for a government or any nation in the world and really being part of a true fighting force that's really fighting for freedom you're telling people you're fighting for their freedom you're doing no such thing never have been and never will okay so stop lying to yourself again this foot fits directly in line with the first step of a cult initiation right livelihoods directly related to that first step of initiation because for us to understand whether something's in Right Livelihood or not we have to stop lying to ourselves and that's what too many damn people are still doing they can't look themselves in the mirror and tell the truth about what they're involved in where that make even if it makes them uncomfortable they don't want to take the action to change it because they're too worried about who the short-term suffering that might result from me not having this job Oh insignificant next to the damage you're doing to other people and the damage you're doing to your own soul so if you're honest with yourself about those dynamics you'd step out of that role and you wouldn't do that behavior anymore and you'd find Right Livelihood let's look at the next example police well this is just a different form of the military in the modern world that's all it is this is just the standing army that the founding fathers told people about that we should never let rise up in our midst because this is just a mercenary army it's a mercenary standing army that's all I consider police forces anywhere in the world hired thugs paid to enforce the dictates of whatever slimeball politician tells them to go and carry out an order that's all it is and now and those orders are all coming down from on high from the dark occult orders that stand behind government institutions and these people don't think that that's true they don't think they're involved in the occult the dark occult they don't think that Satanists give them their orders let me tell you something little boy you are owned and controlled by dark occult sorcerers of mind control that's who owns your ass they own your mind they own your soul and they own your ass boy so get is offended about it as you like these people know nothing about what's going on in the power structure of our world think they do and our poor little mistaken misguided misdirected and completely misunderstanding souls that have no real knowledge haven't done any real deep reading on any practically anything don't know how the power structure of the world works know nothing about the occult even though they're wearing their symbology all over their bodies you know being ritually mocked you know watch my occult mockery presentation a cult mockery of police and military personnel see how these people are looked at as the occultists dogs they cut the dark occultist call them their dogs and their pets because they just blindly follow and are just completely obedient to their commands but like no will or mind of their own they only have a mind to serve their institutional body which is their proxy psychologically psychological proxy family their proxy parents because they every one of them have deep seeded mommy and daddy issues nested way deep down in their subconscious mind and in their underlying psychology unresolved psychological issues in all of them making them act psychopathically and just be willing to follow somebody else's orders without actually exercising true conscience because you've come to know what behaviors are right and what behaviors are wrong these people don't know that and they don't care all they do is act on orders so their order followers they're members of an institution that supports and is the strong arm of slavery they're not exercising true conscience because any being that is following orders cannot truly be exercising their own conscience they because their their actions are actually driven by just obedience in the following of an order you are not thinking about whether the the behavior is actually right or wrong or causes harm to others or does not cause harm to others all you're saying is I am willing to do that for a paycheck I am willing to do that to keep this job and that's what all order followers do if they didn't they wouldn't be order followers they wouldn't be in that profession in that occupation so all order followers including all military all police everybody involved in government it's all wrong livelihood it's all immoral behavior it's all an immoral way of supporting yourself in making a living every single one no exception blanket statement every single individual in every one of those institutions I mentioned 100% everyone and this is so hard for people to hear they don't want to hear it you know they think that's part of the attachment to suffering attachment to self-inflicted suffering through attachment to desire they don't want to accept that's the truth of the world not because I said so because if you really do deeply understand the difference between right action and wrong action you know that no one can have Rights delegated to them that don't exist for any another individual everybody's rights are exactly the same under natural law that's what equality under natural law means no one can delegate a right that they do not have so no one could be given or gifted okay rights that other people don't have and these people believe they have rights that others don't and can do behaviors that other people cannot do right there on its face you understand that it has to be amoral because you are inventing a right that doesn't exist under natural law and you're claiming that you have extra rights that other people don't have right there that's immorality and then what you're doing is you're supporting the slavery system of man's law and they're all just brainwashed little boys I mean just if you just look at them you just look at them just look and really see their eyes their faces look at these people barely want to call them people every one of them you could see has the gist the mind of a little child you can see it on their face they really think they're big bad men but look at them there's nothing there in the eyes there's nothing there in the soul they're stunted people stunted through trauma stunted through parental abandonment issues that they never worked through stunted through other inadequacies whether real or imagined stunted because they're they never did cognitive development or psychological developmental work probably dumb as a bag of screws okay and a lot less useful all right you dumb as a bag attacks you know and certainly not as sharp you know I'm gonna just look at their eyes and faces I mean just look at that image for a second just really look at the eyes and you're you're seeing a stunted child if you're honest with yourself I know that's all I see when I look they're not looking at a man not a one zero of them and you can go on and on down the line every single last one it's some stunted little boy that is craving power over other people because they have no true internalized power through their true self no connection with the power of the true self and deep down on the subconscious mind they know that they're in wrong livelihood they know that there are moral people they know they're on the wrong side of history every single one of them deep down in the subconscious mind you know and the only real level of I think no one should have any respect for them you know they're not there they're unworthy of respect respect is an earned thing it's something that first you have to give your give to yourself no one else can give it to you you have to have it for yourself and not other people you will earn the respect of other people when you have true self-respect no one in this pivot in this position of order follower can possibly have any true self-respect look at what you're saying you're saying my own judgment sucks so bad that I'm gonna just completely you know allow other people to make the decision making of regarding my behavior for me how could anybody in that position have a drop of self-respect stunted children that's all people like this are you know get as offended as you like nothing will ever make what I said they're untrue it's eternally true and again not because I said it because it's factually correct and accurate and that's how it really works when it comes to morality so get is offended about what I said as you like but you will never change the truthfulness of those statements there are eternal truths so military any branch any capacity any ancillary capacity wrong livelihood not right livelihood causing harm to others supporting the slavery system police any capacity dispatcher you know people who work on their cars it doesn't make a difference any capacity of people being involved with the police wrong livelihood not part of right livelihood under natural law supporting the slavery system following other people's orders whether they're right or not let's move on to the next example so you know ancillary aspects of government like lawyers okay again they're upholding man's law which is a slavery system I don't care whether you're a prosecuting attorney whether you're defending attorney doesn't make a difference why you got involved how much you want to help think you're gonna help people through this system the answer isn't to try to use the system to change the system okay it doesn't work like that you know you know go good you're going to go and join you know the forces you know of the orcs in Lord of the Rings and you're going to change that from the inside you know go and join sauer ons forces you know you're going to change that from the inside you're gonna go join with the white walkers of Game of Thrones you're gonna change that system from the gonna change the knight king system from the inside yeah it works like that yeah yeah that's how it works see all the ways we lie to ourselves we just keep telling ourselves the same lies over and over and over again humans love the reassurance of comforting lies especially when they're telling them than themselves so it's no different when it comes to any aspect of being a lawyer you know all you're doing is you're giving you're giving perceived legitimacy by taking part in this institution to the slavery system that's all you're giving of your time you're effort your mind to the perceived legitimacy of a system of slavery that is actively harming other people and you're partaking in it and receiving stolen money from it because that's all taxation is theft at the point of a gun we're being told you'll be kidnapped and thrown in a cage if you don't comply it's feudalism that's the only form of government we have worldwide it's all forms of feudalism folks that's all it is a class of people that claim to own everything and be what and have the right to take as much of anything that they want to take that's called feudalism and they just allow other people to exist on what they claim as their property that's called feudalism and it's a system of slavery surf them and that's all these people called lawyers are contributing to every one of them 100% blanket statement because you're giving legitimacy to the slavery called government so this is also wrong livelihood not right livelihood oh here's one of my favorites the banking system that's some good watermelon juice right there so here's the Federal Reserve System total thieves class of people that considers themselves legalized thieves stealing from the savings of everybody else through fractional reserve banking through the taxation system do the interest rates through the printing of money resulting in inflation which is a hidden tax on people's earnings and savings so what makes the perceived cost of things and services go up but it's not them their value going up it's the purchasing power of the unit of currency going down and therefore you need more of it to receive the same goods and services and that's a hidden form of theft so they're taking from people's earnings in many ways they're engaged in usury charging interest on lending money you know all of this is in a more are immoral practices the whole banking system as it is set up today I think people don't even understand like when America was founded banks weren't even allowed to really operate here we put in provisions into like the Articles of Confederation to like make sure that banks could not operate on banks and lawyers were not even allowed to operate in the or in early America I mean just go and research that and you'll see I'm telling the truth these institutions crept back in overtime you know and this was all part of the the reconquering of America by the British crown which it did very effectively you know royalty imagine that I mean that's what that's what these politicians and bankers think that they are then you have actual people who actually think that genetically they're royal you know that they have special powers and rights that other people don't have I mean it all comes down the line to oneself in thinking that certain people thinking their god on earth that's really this is all ultimately about so when we support those systems of slavery we're not in right livelihood and it's it's a hard pill for people to swallow and I'm telling you if it's a modern banking institution it doesn't matter what level of it down to from the the manager regional manager local manager all the way down to a standard clerk you're involved in an institution that's ultimately causing harm in people's lives not providing any true service to humanity but just trying to make money off of money and engaging in usury and other fraudulent practices when it comes to that level of banking and finance I mean all you have to do is look at the bailout here that took place in 2008 and the whole too-big-to-fail fiasco you know and how certain mega banks you know like goldman sachs came out on top of all that like because of the types of fraudulent banking practices they're they're undertaking the Federal Reserve does the same thing this is just a you know a system of regional management of banks in the United States it's a central banking system which is part of communism you know this is what people who don't understand what communism is and haven't really deeply understood and integrated into their mindset what the planks of the Communist Manifesto really are central banking is one of the largest and yet people would say this is a necessary institution they're legalized gangsters is what they are moving the the kinds of money around and engaging in the fraudulent financial practices that they engage in with impunity legalized gangsters okay so any aspect of the modern banking system is wrong livelihood you know and that goes for like people who work on Wall Street and are just engaged in rampant speculation when it comes to stocks etc you're not really providing any real service for people they're manipulating numbers on a screen that direct the course of people's lives it's legalized gambling but you know I'm not saying there's anything wrong with gambling just do it with your money you know these are people doing with tons of other people's money you know and then the greed that gets associated with that you know talk about attachment to desires creating self-inflicted suffering anything that just worships greed is not right livelihood and you think these people are serving humanity you think these people are serving truth you think these people are serving natural law you got to be joking gotta be kidding yourself these people are serving nothing but their own wallets - pure unadulterated rampant greed and selfishness going haywire any so-called occupation or profession that has that as as main characteristic is amoral and therefore not Right Livelihood so I would definitely include the manipulators on Wall Street sorry folks just taking another drink all right I'm gonna move on to the next slide here here's a huge one the energy industry you know and this is hurting people in so many different ways causing harm it's causing harm to the planet number one which is how we sustain life you know without the planet and its ability to you know sustain us on the surface of this world you know all life is going to take a negative impact so to do things that are ecologically unsound and polluting number one on its face is inherently immoral and this goes for energy production you know Big Oil you know drilling operations that look at the Gulf oil spill the ecological disaster that that was the types of energy production with nuclear reactors like what happened to Fukushima still to this day polluting the Pacific Ocean to unimaginable levels and all for greed all to keep the world on an energy paradigm that is unsustainable just because you know they set it up that way they profited from it and now they want to keep it in place they're doing things with inventors that are inventing systems of clean energy of potential free energy radiant energy inventors found dead poisoned you know that this industry is totally holding back modern innovation and technology totally holding back clean and renewable sources of energy that could be employed you know people say oh you know how would we run our cars how would we you know build the roads and the tires all that it depends on the oil industry we haven't needed any of that stuff for over a hundred years I've talked about endlessly Tesla prototype technology of you know hovering electrogravitic cars that that would have been refined by now to tremendous levels of you know complexity and technology and smoothness and the operation of that technology he just built prototypes and we don't need roads we haven't needed roads for over a hundred years if we wanted it if we wanted to implement that technology but again people just let these people rule and they let them harm the environment and the people and the animal life it's just unbelievable the environmental degradation and destruction that's been done through the polluting energy industry and that's really any modern form of the energy industry down to working in you know the electric companies that you know are just charging exorbitant prices for you know something that really should be a resource that we have the ability to just simply distribute it to people and allow them to use it as they need it and that people said that was that socialist no it isn't that's called harnessing the wheelwork of nature in the way that Nikola Tesla envisioned it because no one should own resources that serve the entirety of the people of this planet like all water or electrical you know systems of production and distribution was Tesla social a socialist or a communist because he thought that the real work of nature doesn't belong to certain individuals it belongs to it is there for everyone to access it doesn't really belong to anyone it Nature has provided us it to us for our benefit and we should have access to it that's why you know water is a thing it's not a right but access to water is a right for human beings and there are people who would say no we can own take up and own all the land all the water all the resources of nature no one has that right this is called knowing what right property is what true property rights are you know there is a legitimate form of property I own the camera I'm broadcasting on I own this computer I own the chair I'm sitting on I own this microphone in front of me I own my body I own my consciousness why because I'm not claiming I own every camera in the world there are every computer in the world there every microphone in the world or everybody in the world you see the difference it's what I'm using it's what I am I need do the things that I am doing you know I'm responsible for those things I acquired them rightfully there's a usage for them that I'm putting into effect and I'm responsible for their maintenance and upkeep you know and that stops where other people's property begins you know I could put what I want in my house or my car but I can't just put anything I want in somebody else's house or their or in their car just like I could put into my body what I want but I can't put into somebody else's body what they don't want in their body you know well just because I'm saying that you know energy doesn't belong to just small groups of people you know who have set up a blockade against other forms of true free energy technology and other ancillary you know non polluting forms of energy production and distribution certainly much more ecologically sound than what we have in place today it doesn't mean that I'm spouting some communist or socialist rhetoric I totally stand against those forms of statism you know this is truly sharing amongst ourselves the the harnessing of the wheelwork of nature and that's what a great scientist and inventor like Nikola Tesla was trying to do an envision for the world now we're gonna get to talking about you know people involved in technology and invention you know scientists and they're it's a dual edged sword you know and so can energy production and distribution be can it be done right yes it can then would it be right livelihood yes it would but the way we're doing it now it's harming human beings it's harming animals and most of all it's harming the planet that we both rely upon for the continuation of life and the life cycle and that is what makes it immoral so in the way that we're producing energy today it's wrong livelihood if we were to truly step into an alternative clean sustainable ecologically sound energy paradigm driven by the desired a better humanity and to clean up this planet then absolutely that would be right livelihood so this also could be one of the dual edged swords but most certainly the way we're doing it now is wrong livelihood oh the talking heads of the media I mean could you imagine the place karmically that these as gerald Celente likes to call them prostitutes are you know I mean but beautiful word for them I mean as David Icke calls them the repeaters they're the repeaters of the Dark occultists behind government blasting their worldview at humanity to mind-control them and could you imagine these amoral pieces of trash have taken that job for a paycheck sold out their fellow brothers and sisters of humanity many of them are darker cultists themselves are come from dark occult families without a doubt without any doubt okay you know I can't remember the daughter I can't remember her first name the daughter of us a business in ski that a high-level think-tank demon that is now gone you know from the trilateral commission he's now burning in hell you know allegorically at least you know his soul is just you know recycled but his daughter in a statement on the news actually like said publicly you know how dare Trump and his supporters try to tell people that the news media is fake and then try to offer an alternative worldview which I could care less about Trump and his supporters because it's all part of government slavery but she's like upset that other people are trying to compete with the entrenched media and calling them fake news and she goes you know it's like they're trying to tell other people what to think and believe and how dare they do that because that's our job actually came out in a television on-air report saying that they she considered it their job to get in the heads of other people to tell them what to think and believe to tell them what to believe I mean you talk about some psychopathic lunatic who thinks they're God on earth you piece of filth just demonic filth is what someone like that is and that's all of these people are they're talking head parrots taking a report from whatever government agency or a think-tank laid it on their desk sent it to them electronically and said you're gonna read this and you're gonna sell it to the people and you'll be paid well for doing it I mean I can't imagine that that's one of the lowest forms of any type of employment that there is in the world the media is largely responsible for how up the brain and mindset of the human beings in this country and throughout the world are and these people actively participated in that process of the degradation of truth and trying to blockade and and stop the true distribution of truth out to the world and there's the only word I can really use to describe that is utterly demonic that's how far I would go to say how wrong the behavior that these people engage in is it's as demonic and sick as the police and military's behavior the violence that they conduct except these people are doing it through lying they willfully lying to people they know that they're telling people total they know that they're not engaged in telling truth your whore Liars for dark occult aspects that lay behind the government that's what you are all the members of the mainstream press for a paycheck I mean there are like literate like the cut in the concept that there are special places resort reserved to torture people like this for eternity you know I I would say you know I don't believe in that traditional conception of Hell well let me tell you something I think that their consciousness journeys to a place upon the relinquish ink of the body which why many of them want to become transhumanist and prolong the inevitable you know passing of the body I'm telling you what I think happens is that their consciousness is going to be shown the error of their ways for what would seem like an eternity in the space that they're going to be in in the form of consciousness that they will be in and I wouldn't want to trade that kind of Karma for anything in life for any amount of success or happiness in life I wouldn't trade the Karma that these people have coming to them you know so obviously wrong livelihood not Right Livelihood doing harm to others through lying giving people false information when they should have a moral obligation to provide information to people that they should be taking in to make informed decision-making in their lives and these people are doing the exact opposite they're keeping people dumbed down so that they make wrong decision making in their lives and that continues the chaos and the enslavement in our world now the alternative media is I believe a different story now other people will say well that this spans a wide gamut and I agree okay there's not they're not all the same there are different people with different levels of understanding but what I think the difference maker here is they are actively trying to do their best to bring people information that they think they need to know and do their best to report on it honestly and tell the truth like legitimate journalists I mean I consider what I do here a form of legitimate journalism it is talking about what's really going on in the world but most of all it's talking about real spirituality and getting down into an understanding of true human psychology that has led to the human condition so I consider myself a member of the alternative media even though some people would not describe me as such they would say I'm more of a spiritual teacher and a person who you know analyzes some of the conspiratorial aspects of human history so you know I am a researcher certainly a researcher into the field of the occult I consider myself an occult petitioner not just a researcher okay and I'm a teacher of occultism and a teacher of natural law but that all plays hand-in-hand with using the new style of media which is putting information out there onto the Internet in the form of this show in the form of the podcast that this show has been in the form of for going on 10 years okay nine years now so that's what we have to understand is that the alternative media is at least making an effort to inform the population and that's why I would consider it largely Right Livelihood there are some people that do it much better than others but I believe that most people within the alternative media are actively willfully trying to report on things in the best way that they know how and I hope that that would continue and the quality of it would increase because as I said not all players are the same in this game okay so that being said I would say for for those who are actively making an honest effort being engaged in the alternative the true alternative media in the service of truth and freedom is Right Livelihood ha ha what can I say you know talk about some of the biggest liars that have ever lived religionists high-level religionists trying to co-opt the spiritual destinies of human beings since day one you know you want to talk about people who came into power as a result of human origins as a result of cosmic abandonment as I've talked about look no further than religious leaders and the institutions that really the highest level dark occult sorcerers are ultimately behind controlling the world from you know I've said before people think the world's controlled from New York City from London you know from Tokyo you know from Paris you know none these things are true the world is always controlled covertly through religious means because the spiritual the the perversion of the destiny of the spiritual life goes hand in hand with the perversion of the you know physical lives of people the psychological and the physical so you have to ultimately get to the spiritual corruption aspect that game is what really is controlling the whole game so the world is not controlled from New York through London through Tokyo etc the Beijing you know all those seeming places of power financially no the world is controlled as I've said many many times from Rome Jerusalem and Mecca you want that those are the places that are the real centers of power then you could say Tibet if you want to can put the Eastern traditions in with that that would be the fourth place but the Vatican okay a high-level rabbis in the Judaic tradition in Jerusalem and the high level religious leaders in the Islamic religion in Saudi Arabia in Mecca and Medina but largely Mecca that's where the world's really controlled from religion stands behind at all because then this the the dark priest class priest class of the world the dark occult priests class stands behind the ostensibly enthroned religious traditions you want to know where the real dark priest class is at it's in the halls of the Vatican you know it's in the religious centers were the highest level religious leaders in Jerusalem and Mecca are at that's where it's all the real power is conducted and then you want to talk about they direct this secret societies they direct the intelligence agencies how tied in with the intelligence agencies the religious institutions of the world are tied in with the CIA the NSA mi5 and six Pakistani

ISI the Mossad out of Israel and you can go on and on down into the occult orders like skull and bones the think tanks like the Club of Rome all being directed through religious agendas and dark occult agendas ultimately without any doubt if you study it and you're honest with yourself you'll come to that same conclusion this is the father of the control system religion it's all religion you know the mother of it that directs the emotional aspect and the desire aspect is the monetary system of what I call the unholy trinity religion money government government is the male child of action that controls it from the physical level you know and then the the ostensible places of power then are Washington DC with that the center of government and military strength of course the City of London the center of financial control particularly through the Rothschild banking dynasties and the other central banks they control and then of course the Rome which really acts as the center of the religious power because the Roman Empire never fell it just basically you know went behind the scenes and works through all institutionalized government and religions so obviously before I move on yeah anybody involved in organized religion from a traditional cultural religious point of view wrong livelihood you're not telling people the truth religion isn't the truth it's not real spirituality it's a proxy for real spirit quality and a lot of what they talk about is dogma its proxy for the real thing you're not giving anybody the real asset Eric traditions you're trying to get them to believe and pour money into your coffers that's all that's all these people are doing and ultimately controlling their minds it's a form of mind control it's a form of emotional and psychological control it's a form of monetary control through tithing and all the collections that they do and let's face it folks a large portion of the of these people are pedophiles and pedophile protectors and then the police and military are also pedophile protectors for them and the judges and the politicians etc you know they all work hand in hand together religion and government need each other it's one of the good lessons allegorical lessons of Game of Thrones even though it ended like you know five pounds of in a 2-pound sack you know by them voting in a new king instead of just destroying the throne and leaving it be at that which no one can seem to do you know the only places that seem to be done in was Conan the Barbarian and Harry Potter you know but anyway digressing from looking at allegorical movie traditions you know the these these people you know get Game of Thrones was talking about how the state and and the the church need each other they rely on each other they're of there a magic arch okay they form a strength a structure of strength and stability that would not be there if the other you know side of the other pillar of the arch was not in place you know those two institutions have to work hand in hand you know when if one Falls the other will shortly fall thereafter because they're both forms of each other you know religion is really the enthroned government we're truly behind the scenes and government is just a form of religion that's all it is it's a form of belief it's all it really is is a belief system that's not based in anything real it's based in a belief that is just dogmatic and erroneous meaning it's not true it's a false belief system so anybody involving involving themselves in it and propagating it is in wrong livelihood so let's look at health care medicine in general now again this one's a dual edged sword because I would say there are ways that you can be involved in medicine slash health care and do it in right livelihood and then there are certainly ways that it can be harmful and damaging to people as is the majority of healthcare in America and that's because we have two overarching worldviews when it comes to health care in medicine and that is the allopathic worldview which is basically based on the Rockefeller protocols instituted around the turn of the last century the 1900s okay when you were wiping out not natural Pathak and homeopathic remedies and replacing it with the pharmaceutical industry and the surgery you know and the death care and surgery and pharmaceutical industries okay so I would say allopathic practice is part of this destructive and harmful worldview and system that is entrenched in modern healthcare especially government overtaking and government driven healthcare and a lot of it's run through government money and grant money you know pharmaceutical industry absolutely tied in with all of that you know so big pharma you know plays hand-in-hand with the the allopathic medical industry and that's all this is is a big business it's a big industry of disease okay I recommend Sonia Barrett's work called the business of disease which gets into it in detail and it's a great documentary so what you have to do is be honest with yourself and say is this really helping people to get better to learn about nutrition to learn about how to really put the things into the body that they truly need instead of selling them on pharmaceutical drugs and surgery because that's mostly what allopathic medicine is doing it's treating the worldview is Newtonian it's the Newtonian paradigm the out scientific Paris so-called scientific paradigm of Newtonian materialism that matter is prime and if we just get down to the basic building blocks of matter we're gonna find the cause for everything and this assumes one overarching wrong way of thinking and that is that the universe and life within it is a machine it is not a machine it is based upon spirit ultimately and there are aspects of it that can work like a machine but that doesn't mean it is a machine that's where this conflation happens okay we can study things to understand their basic workings in nature but we have to understand that their essence is not just the matter okay the matter is an expression of the spirit of pure energy and consciousness and if we understand and treat things from from those levels that we're moving into a more holistic approach to medicine a more holistic approach to health in general and this is known as naturopathy okay some people in the past called it homeopathy but generally we call it naturopathy now okay it's treating things from a holistic integral approach when it comes to health instead of being deaf care it's true health care because it's integrating mind body and spirit or soul with the the symptoms that are presented at the physical level but we're going deeper than the physical level to understand things at the cure so I would say allopathic medicine wrong livelihood naturopathic medicine Right Livelihood because you're truly trying not to do harm you know doctors were supposed to take the whole you know thought hypocrite ease the Hippocratic oath to say I will endeavor to do no harm to my patient you know who's coming to me and trusting me with a problem that they were having with their health I think most doctors today in the allopathic fields are doing more harm than good you know they won't tell anybody any natural solutions because they can't make money from it you know they just want to prescribe drugs and surgery I'll just give an example I'm gonna just come out and say some personal information as a you know an anecdotal example my mother came came over here and spent a little bit of time with me this past week not a lot of time just you know hey you know less than half a day and we got to talking and she told me that she's developing what her primary doctor called severe arthritis a severe arthritic condition in her knees and she doesn't eat right and she doesn't really take care of her body properly I've tried to explain you know the dynamics of health and nutrition to her and put her on the right path when it comes to taking care of herself doesn't want to do it you know says she's too weak willed doesn't want to change her sense8 tastes pleasures you know very very attached to desires when it comes to that see this goes back to the Four Noble Truths and the Eightfold Path okay will not let go of the attachments to wanting certain tastes present when she eats and therefore is undermining her health in doing so well not when she doesn't understand yet anyway and it's difficult to teach you know someone who's very rooted in their ways new ways of doing things when they're set in a certain way by a certain age and that's okay you know I also get ups a little upset about it it's gonna be what it is you know what I mean certain things that you have you could do what you can and certain things some if somebody has to develop the willpower on their own and that's just it that's the way that it is you know so you know I've been trying to tell her for years get on turmeric it's an excellent anti-inflammatory and you got to take a lot of it you can't take little you know pissant you know amounts of it you got a load up on that stuff you know like if you're gonna take turmeric like take you know 15 turmeric pills a day you know capsules I should say because pills conjures you know pharmaceutical imagery take capsules of turmeric you know 15 times a day you know you just swallow swallow them with a little bit of liquid throughout the course of the day put that in your body it's incredible for what it will do you know to your joints you know for inflammation in your tissue etc that's the source of all diseases inflammation I've been telling her that for years won't buy term turmeric cheap - and you go to a local you know ethnic food store that sells like you know Asian foods etc and Indian foods I mean wow you can get turmeric bulk high-quality bulk turmeric like sir rock-bottom prices you know I have a tin of turmeric in a big coffee tin like this big you know and it was like hardly it was like nothing it was a few few dollars you know and you know I just went out to a local you know middle eastern Mediterranean style food market in University City here and you know great selections of things that you might not find in a regular supermarket especially in the bulk that you can get them at a place like that but anyway going back to the story about the difference between allopathic medicine and holistic healthcare you know they won't tell her about this you know her doctors won't tell her about this they were recommending surgery on her knees and like hundreds of thousands of dollars you know cuz their insurance company's gonna pay them very well for that that's their main product and service they want to sell that surgery you know she goes and get a second opinion in and the other doctor says hey I'm by the way on the air I'm like violating this a family members HIPAA rights so but hey I'm gonna use it as an example because I think it's a great example of you know the difference between these two worldviews so you know she goes to get a second opinion and uh you know the second doctor says oh I don't agree at all I think this is a mild case at best it's it's yes you have some arthritis there but it's not as certainly not as advanced as your other doctor would have you believe and I certainly don't recommend surgery so like they'll even tell you completely contradictory things but like you know he wanted to do injections of like certain types of pharmaceutical grade gels into her knee I'm like you don't need any of that first of all it's gonna not gonna really be absorbed in the right places where it needs to be it's only going to provide probably temporary relief you know I was explaining to or higher hyaluronic acid this is another thing that people should be very aware of and how much it will help with your joints you know I could you know briefly you know tell you that I've had other friends that have had arthritic conditions and you know had you know been recommended surgery especially in the knee area and they started taking large amounts of hyaluronic acid and turmeric especially if you take those in conjunction with each other and that in that condition will improve radically in a short amount of time it won't be an instant or immediate but I'm telling you you you take decent amount I mean you can't take the recommended dose on the bottle of capsules you know you gotta like eight fold that minimum eight times that much you know cuz they're giving you like these little tiny recommended doses that's not how if you're gonna really load up on a supplement you take them you have to load up on them so I'd like say you know if they tell you to capsules take 16 times it by eight and you'll be around the right area you need to be okay you know so I was telling her we'll look into hyaluronic acid it's not that expensive you could buy it in bulk online cap it up yourself get a capping machine and cap it up and take it every day you know doesn't want to do it doesn't want to swallow the pills doesn't want to put it in smoothies you know it's like you got to be willing to do the work you know that's another part of it it's not gonna just things aren't just gonna automatically happen for us we have to exert will that's right effort you know of that Eightfold Path so you know a holistic practitioner of true holistic health care naturopathy would probably have told her about hyaluronic acid and turmeric and probably some other so supplementation adaptogens and whatnot that she could do or anybody in that condition can do and you know that's why I consider this Right Livelihood you're trying to do what is the most efficient and best for the person to alleviate the suffering or the cause of their suffering okay you're not trying to do the shortcut just because you will profit the most from that and that's why I think allopathic medicine wrong livelihood and holistic naturopathy is Right Livelihood so moving on from that you know so-called feud so-called food production you know there are factory farms that are just torturing animals all day long non-stop you know and this is absolutely directly causing harm to other sentient beings you know so farming of animals wrong livelihood well you know we talked about this in the shows that I did on carnism versus a plant-based diet recently and you know if people can't get this from a common sense perspective that there's a drastic difference in the sources that we can take into ourselves in the form of food then I don't know what to tell them like they're your there cut off from their soul that's that's all really comes down to they're cut off from empathy and compassion toward creatures that are you know of less complexity than ourselves okay so this is a very clear-cut one as far as I'm concerned if you're involved in the farming of animals it's wrong livelihood because it's directly creating harm and suffering to other sentient beings namely animals okay and it's not doing good things for the health and well-being of human beings either with the ecological impact of factory farming and any animal farming really and these you know input into the body of something that suffered though in the ways that these animals do and that's doing a damage on the physical level and on the spiritual level and I've talked about that in the past on the podcasts the audio podcast that I did on carnism when I went into the occult aspects of the meat diet so you could look back into that I believe it was around 122 123 something like that anyway there's an obvious difference in the image you just saw and the one that's on the screen now and if you can't see that I feel very sorry for you as a human being and get his offended about that as you want because to just engage in organic farming of you know plant and vegetable matter is how we are intended to really grow things and that's what we're intended to eat as human beings so I would say that you know natural plant-based farming practices are Right Livelihood as compared with especially factory farming practices and you know animal abuse that takes place on on farming on farms throughout the world which I would certainly consider wrong livelihood now and again we have to just stop lying to ourselves and apply very simple moral principles from a fundamental first principles philosophical perspective when we do that honestly common sense can just very easily be applied to these situations and we can know the difference which one is Right Livelihood which one is wrong livelihood it isn't that hard folks we want to overcomplicate it and over complexify and that's what really all forms of evil really want to do it's one of the methods of mind control is obfuscation and complexification you know anything that's bad for us really wants to obfuscate the issue of make it way more complex overly complexify it so that it you know creates a you know a mesmerising of the brain a hypnotism if you will and you know what is right and what is common-sense is infinitely elegant and infinitely less complex it's simplistic we know it in our heart you can't overthink it with the mind you have to apply heart based intelligence which is what actually the topic was I should have mentioned on the wizard factory podcast that I did heart based intelligence as a true part of whole intelligence and the understanding and application of natural law and we have to apply heart based intelligence when it comes to understanding which daily work practices are Right Livelihood and which are not and I think if we're being honest with ourselves that's not hard to do so moving on from that education teaching many different methods of doing it but you know if people are gonna you know take part in the outcome based education system that we have here in the United States and really throughout most of the world there it's doing a lot of harm to young people because it's putting them through a ringer of in dr. indoctrination instead of truly leading them out of Darkness which is what true education through the classical liberal arts methodology known as the Trivium is supposed to do but most teachers aren't doing that in the world they're engaged in following a curriculum to get a paycheck pumping out socialist and often outright communist propaganda in many cases they are involved in brainwashing techniques they are involved in just going along to get along to get a paycheck you know instead of really trying to reach the minds and lives and hearts of the students that they are charged to teach and to bring up to a higher level of understanding and in that sense the educational system has been an abject failure the formal education system and that's why I would say as much as this may pain people to hear most people in the formal you know public state-run education system are not in right livelihood you know that's a hard one for most people to hear and to accept but when you know how overtaken it is by the government by forces that are at work inside of it corrupting it you know the answer is not to keep putting our effort toward these decaying dead systems it's to start building new systems to really do what these ones were intended to do ostensibly but it failed miserably and that's why I think that home schooling is one of the noble professions that an occupation talking about and most people will receive no money for that but alternative methods of teaching alternative schooling okay there are different forms of schooling and unschooling coming up here in the United States especially they're gaining a lot of traction those type of teachers I would also consider engaged in a noble profession so teachers who are truly trying to be educators of the young and it teach them how to think not just what to think but how to think and how to come to conclusions on their own and engage in critical thinking skills and in the Trivium process of truth discovery we should value teachers like that and I think conscious parenting is a big part of this you want to talk about what the most important job that there is and what could be the most noble it's it's being a parent okay a conscious parent all right you know and you know while that's a path that I have not you know chosen to put in place for myself in this lifetime I I highly respect parents who truly do their job as parents to educate and truly raise their children in a moral capacity there's no more noble job or profession than that as far as I'm concerned okay so those are the two distinct roles in the different forms of education being a indoctrinate er which is not right livelihood and just going along to get along for a paycheck and then being a true educator which we need many many more of which is Right Livelihood you know I'd put librarians in that you know obviously you know there's a lot of books that are untrue in a library many that are but librarians can if they act in the right capacity direct people to the reading the right books or helping them find the right ones you know so I I have kind of a very deep respect for books and collections of books built down deep into my DNA you know so this is a profession that I've often wanted to be involved in it's something that if I didn't have to do what I do here from a moral obligation perspective with what on earth is happening I might pursue a career in because I want to be around books you know I would love to work in a bookstore I would love to be a librarian of some kind I feel like I have that in my in the essence of my ancestry in my DNA and it's carried over obviously in this lifetime with the amount of books and knowledge that comes with them that I have accrued so I consider librarians Right Livelihood tech careers or careers in the IT industry as I just put out an ad seeking help you know it's a dual edged sword it depends on what you're doing it for you know you want to go and work for somebody like Lockheed Martin you know or other defense contractors you know supporting the government and the military and helping them drop bombs on foreign countries that didn't harm us then I'm gonna say you're not in right livelihood but you know if you take a career in IT and you learn you know web technologies or programming and you get involved in the battle to get information out there to people you know help do the great work that's absolutely a noble profession you know it's I did IT and was engaged in wrong livelihood in it but because the institution's the institution that I work for and some was right livelihood and some was wrong when I recognized the institutions that I was working for were just really doing a lot of harm to animals I stepped away from that you know IT work that was a you know part of Penn's research in their School of Medicine because I was employed there in the past so you know the whole tech sector can definitely be both wrong livelihood and right livelihood depending on who you're working for what the purpose of the work is and again common sense and natural law principles have to be applied to determine which you know jobs in the IT field are within right livelihood in which you should steer clear from science as well it's very similar you know to the tech field okay so some scientists can be engaging in things that are truly moving humanity forward and that should be the goal of Science and invention it should have as its goal as Tesla said the betterment of humanity and if it doesn't have that as its main goal it is only a perversion of itself so you know scientists can be involved depending on what they're doing and what institution they happen to be working for they can be engaged in Right Livelihood or they can be doing things you know covertly for the government you know intelligence agencies and really doing harmful things to people the environment animals etc so again science is a dual edged sword its knowledge again that's where the word science comes from from the the Latin verb ski RA which means to know or to understand when we develop knowledge about how things work in the natural world we have to make a decision through our conscience through our knowledge of whether something is right or wrong because it either doesn't cause harm or does cause harm whether what we're using it for is right action and therefore whether we are engaged in Right Livelihood so science is another one of those dual edged swords you know inventors this is the last one that I really want to get into invention is another thing that I think maybe if I had some mentoring and pursued a slightly different educational path I may have tried my hand at I think I have a mind for it or maybe could have developed a mind for it however I don't want to invent anything that's just gonna be crushed you know by the system of slavery that's in place which is why I think you know people making patents and you know basically handing the the technology to the government through the patent system is just it's unconscionable so but there are inventors who were really trying like Stan Meyer pictured here who built the water fuel cell for cars basically it was a water splitter that split the water molecule into its constituent elements hydrogen and oxygen powered the car with a hydrogen based cell and then output oxygen rich oxygen into the environment as its quota waste product I mean you talk about a genius this man was poisoned to death in a restaurant basically clasping his throat and saying collapsing while saying I'm poisoned and then they rule it like natural causes from a heart attack yeah because the poison stopped his heart you know wasn't a heart attack it was poisoning which caused cardiac arrest meaning the stoppage of the heart yeah the guy who invented a car that will run on water invented this the battery that would fuel any car on water alone okay that's what that's what happens to people like that so you know inventors can be a very noble profession okay I consider if they're doing it like someone like Stan Meyer was doing it for the right reasons for the uplift and betterment of humanity through the technology I consider that Right Livelihood and a outrightly noble profession and I did forget one more really two more professions and guess what folks I consider them very noble professions and that is plumbing and sanitation I know that's gonna be a big shock for some people okay III generally consider them almost exclusively right livelihood professions okay do you realize how much plumbers and sanitation workers have contributed to the health of human beings and the general longevity of human beings and the better quality of life of human beings if we as human beings did not have people to engage in these in this work human beings would be back where they were in the dark ages during the the bubonic plague okay we would have literal disease and plagues around every corner plumbers and sanitation workers have done more to increase the health and well-being of human beings probably more than any class of people in human history including teachers including so-called educators okay because they're given them the physical conditions to be able to live on continual disease so that they can learn and improve their mind and therefore improve their soul so this is actually a job you know I don't people look down on jobs like this no way you know I consider them practically noble professions okay and it's like something like that literally if we honestly I'm saying this honestly like if we solved the human condition of slavery and we were actually free living in a state of anarchy and just you know engaging in voluntary behavior and dealing with the Psychopaths that were left in the world that we would have to deal with you know but there was no ruling class and we actually built an anarchic Society in all honesty folks I'm gonna do a few things I'm gonna paint I'm gonna garden and I probably take a job as a sanitation worker seriously not joking not a joke not laughing about it at all okay I find what they do to be honorable okay and again plumbers and sanitation workers if we didn't have them you you would not even imagine what our society would look like especially in urban environments good god is all I have to say so I'd say that these two categories of labors that I'm mentioning here as an example plumbers and sanitation Right Livelihood and I think I'll end on just talking about what the solution to wrong livelihood is you know because this is what people will say well water what are we supposed to do if we're in the fields that you talk about as being wrong livelihood and again there's millions of other fields and professions that we didn't talk about here today I probably had you know profound oversights that I should have included but didn't but there's only so much time on every show okay so this is the most difficult pill to swallow folks and listen up and listen up real good okay clean your ears out and listen really well to what I'm not to say because this is the take away from all of it the most difficult thing that most people do not want to hear or accept and they don't want to tell the truth of themselves about it when it comes to being out of alignment with Right Livelihood is that they should stop doing the harm causing occupation immediately no matter what the short-term cost may be for them or their immediate family members I'm gonna read that again because it's so profoundly important to understand the most difficult thing that most people do not want to hear regarding this whole topic we've been talking about today of Right Livelihood they don't want to hear it they don't want to accept it they don't want to tell the truth to themselves about it when it comes to being out of alignment with Right Livelihood the solution is they should stop doing the harm causing occupation immediately no matter what the short-term cost may be for them or their immediate family members and I fully understand and appreciate what I am saying and asking in full conscious in full consciousness and awareness of what I am saying and asking of people that means you may have to suffer in the short term but you will no longer be harming others you will be taking the karmic debt of what you have already done through the short-term suffering but the long-term karmic debt will turn your life around for the better you don't need to believe that the only leap of faith that you need to take is to do it and you'll see and you'll know that what I'm telling you is the truth this is a pill that no one wants to swallow but it is absolutely true nonetheless the solution is to quit the job that is causing harm and find work that is in alignment with morality under natural law and there is no shortage of those occupations or jobs they're everywhere around us we can do something that is not something that is causing harm or is involved in a institution that is causing direct or indirect harm to other human beings or animals the environment it is possible many people do it on a daily basis so this is a meme here when you want to quit your job because you know it's not the right thing to be doing but you you know that you need money to survive no one's saying that this is easy it can be very difficult all I'm telling you is it's the right thing to do and if you do it you will see your life turn around for the better perhaps not in the immediate short-term because you're gonna have to take the brunt of the karmic debt that is coming your way whether you like that or not or want it or not and that may be the suffering that you have to go through in the short term to quit that job and maybe not have the resources that you need and you might need to struggle and your family may even need to struggle and I'm telling you take that accept that directly telling you that's a better choice than what you will be doing to your soul long term if you continue to do the harmful job that you're in that is not in alignment with Right Livelihood when you're in wrong livelihood that could be one of the most powerful phrases that a human being can ever speak I quit quit your harmful job quit your cult quit the thing that is responsible for causing harm to other human beings to animals to the environment and most of all to your own soul ladies and gentlemen that concludes the formal part of the presentation material for today's show I hope you enjoyed it this was episode number 211 if you have enjoyed and appreciate and have found value in what I present here on what on earth is happening please visit the what on earth is happening donation gifts area on my website by clicking on the gifts tab that will take you to gifts not one on earth is happening calm you can get hard copies of all of my presentations on the site there are also t-shirts flash drives coasters DVDs keychains button stickers just a lot of you know memorabilia that you can take a look at for yourself or maybe get as a gift for a friend or a family member to help wake them up so also if you want to go further in your own knowledge and this is what I hope many more people will continue to do many people have been taking me up on this offer I hope it continues well into the future and even increases in number take me up on the Ark Drive offer the ark is known as the amazing repository of knowledge it is a one terabyte external hard drive that you plug into any computer and years and years and years of research data that I downloaded from the internet to come to the understanding that I have come to here at what on earth is happening in the work that I do is aggregated and copied onto this one terabyte hard drive that you provide to me and I ship it back to you full of one terabyte that's one thousand gigabytes of data of the research that I took in the best research that I took in to come to the level of understanding that I have come to regarding what is taking place in our world and in the human condition so you can get the shipping instructions for the ark drive by going to what on earth is happening comm slash arc AR K or you could just click the arc tab on the tab section at the top of the what on earth is happening comm website and finally if you want to simply make a straight donation to the cause of what on earth is happening we take donations here in ten different ways you can use PayPal or you could become a patreon subscriber I've gotten many patreon followers and I'm very glad to see that I thank my patreon supporters the people who have made pledges on a monthly basis to what on earth is happening that is so helping and you know it's really helping with my daily living here you know it's helping with you know food costs and bill payments and things like that it's directly helping in my personal life which is what I'd like to dedicate that whole patreon aspect for whereas other donations will go right to the work that we do here at what on earth is happening so if people continue to you know subscribe and pledge to patreon I'd love to see that thank you so much to all the people who have offered very generous donations and support there's cryptocurrency options to donate on the website you could do it the old-fashioned way through and thank you for all the people who have donated cryptocurrency I love seeing that form of competition to the Federal Reserve System come into play and people use that toward the great work so thank you to people who've donated that way and another method is you could click on the donate supplies image there on the right and that will take you to our Amazon wish list and occasionally I will put up technology items that we require for daily operation here at what on earth is happening so you could buy that and ship the technology item directly to me so you know how your donation was spent toward the cause you know that you're getting an item that we are using here on a daily basis to do the show and to do all the other ancillary operations for what on earth is happening here at my home studio studio and headquarters in office so thank you to everyone who has generously donated - what on earth is happening we appreciate it so much I and the whole staff appreciate your generosity so thank you and uh you know pay pay it forward by helping people to learn and understand this information by speaking it and putting them on to this information whenever and wherever you can so thank you so much and let's move on to our calls what we're gonna take some calls till the end of the show and all the topic is going to be right livelihood I'd prefer you know mostly prefer staying with the topic if we can if people really want to bring up something else it's that's not all you know that's not out of bounds you can bring up whatever you want but I generally like to field questions if if you know we can on the concept of Right Livelihood today so it was making me aware that we have a great addition in the water on earth is happening call room and it's Vinny Eastwood I very much consider Vinny Eastwood appear I consider him a friend I consider him someone who is engaged in Right Livelihood and who has seen the in practice the things that I've talked about here on this show today I believe that maybe what brought him into the room so I'm gonna go to him first as a special caller Vinny Eastwood you are live on what on earth is happening welcome to the show my friend so Vinny you need to unmute yourself in discord I've unmuted you at the server end hopefully you're there I'm seeing that you're still muted yourself so let's try just look for the unmute there you go there it is Vinny welcome it's great great to see you are in the calling room we're working on that I may be implementing a custom solution I have a couple of developers that are helping with that task we may be implementing a simple web-based solution without all the complexity of discord and that may be coming it's in the Alpha stages of testing right now so it's not going to be here for a few weeks but we may be implementing a new very simple call system that works right through your web browser and makes it easier for me to manage calls on the backend as well so you know hopefully that will clear up some of the technological confusion that is often happening with discord but I thank you for persisting through it and being part of the show today streaming and various other tweaks and things like that but I've mixing microfinance and and geese won all of these things were either free or donated to me by listeners I mean it's phenomenal like you realize how much people are willing to put some of their resources where their understanding is and help support a cause and that is because you were generous with your time and your knowledge and you did the work you know and you dedicated your life to trying to tell the truth to people and put that knowledge out there so you know the universe returned that in the form of generosity that was displayed to you from other people that you brought value to their lives and that's how this dynamic works yeah social kitty whereby if you do good work for society I had a realization the other day you know how everybody comes up to your mark and they say keep up the good work yes it didn't actually occur to me into the other day what keep up the good work actually means what's that yes they're great that's right that's right when people tell you to keep up the good work what they're doing is they're acknowledging the fact that you've asked the who what when where why and how and you understand something so that if somebody else questions you and asks you the who what when where how you're able to answer that and now you have adopted the mode of the teacher and that's what people are saying when they say keep up the good work they mean keep teaching people the things that you're teaching them because if you don't society itself suffers that is why it is the good work and that's why you have to keep it up persistence persistence is a huge part of it you know you may not see the dividends pay immediately it's something that you have to continue to do it's like anything else you go to the gym one day you're not going to you know you know lose tons of weight and be in perfect peak condition one day you have to habituate it you have to do it continuously you know you get on to a healthy diet you don't do that for a week and then stop you know you habituate it you make it part of your daily routine it's the same thing with doing the work it's the same thing with being in right livelihood it's something that you have to make part of the whole integral makeup of your life and continue to do it with persistence it's a point that you're making there you know they see me that have any interview that's going to be there do I interview them no and in fact if I know who they are and I have followed their work and stuff like that it complicates the situation because I get this kind of fawning sort of a little girl with pigtails type of type of mentality like oh my god and it can often be uncomfortable for people and I think that it's a hell of a lot more easy to get to know someone by asking them and they tell me who you are and what it is you do than it is by investigating the stuff that they've done because often the only person who truly understands who they are and what they do is the person you're talking to and so when you make assumptions and deductions about all you must think this or you must do then or whatever you get out of kilter and that makes it very difficult to forge a relationship and my idea behind a talk radio interview is to forge a relationship probably within about 30 seconds I want to forge a relationship with either a listener or a or a guest or something of that nature because that's all the attention span really allows for a very modern society you you have to be open you have to be honest and you you really have to go straight for the the throat of the issues otherwise you're meandering BS and I think that comes off very clearly as well to the viewing or listening audience if they have any you know general deductive reasoning and powers of intuition they're going to come to an accurate conclusion whether someone is the real deal or whether they're fake fairly quickly and like you said time only allows in the type of thing that we do talking to people where we have to kind of you know be honest and open enough to get into that space where we form a quick connection with the other person and then really hear what they're saying and then be able to respond to it so you know a big part of that is that you know basic respect for self and the other you know and that is part of what we talked about here today you know and I just want to say that I respect the work that you have done and I consider you an inspiration in the great work because you are you've been doing this for such a long time you've been persistent with it you know you're doing it through you know donations funding it you know and all of this I consider is the right way of going about doing this type of work so you know I want to personally thank you for what you've been doing and uh you know I want to you know direct my listening audience to say that this is an example of how someone can get involved and do the great work you know follow Vinny's work look at you know all the work that he has done in the past it's a tremendous incredible body of work and you know he's still at it and doing it and persisting with it you know we all take certain amounts of time off to rest and rejuvenate but always back at it and not doing it to the best of his ability so Vinnie you know I want to say that uh you know I really consider you an example of Right Livelihood and would direct my viewing audience to check out your work and understand that's really what life right livelihood through the alternative media is all about I think you you're correct in saying that because there's there's Right Livelihood in media and then wrong lively yeah and that's good because it comes full circle with what I was just about to say in it as that I was having a conversation with the listener and I considered what my work to be BES alright and what I mean by that is their works that are real okay they actually manifest things in the three dimensional realm they actually do physically exist somebody built a bridge somebody built a home somebody built a cell phone tower or something like that these are things that are actually manifested into physical reality these are what I call people who do the real work without without which all of these pieces of technology and everything like that that we're using wouldn't exist all the people that are building the servers and the systems and doing will be the background work the real work right whereas everybody else has been doing bs work now that doesn't necessarily mean to say that BS is bad because every single human being alive requires at least a little bit of BS to survive alright and what I mean by that is the entertainments that we choose to absorb whether it be Game of Thrones or the latest Avengers or whatever these things are be is they don't actually exist they yes in reality there are physical augmentation they don't actually change anything in the physical realm and it reminded me of what an old Zen master said he said before enlightenment you must chop wood and carry water and after enlightenment you must chop and carry water yeah because just because you learn something new just because you were entertained for a bit doesn't mean it actually makes any difference it is your actions based upon the BS how do you react to the Spears is a good BS that make that fills you full of hope and and a sense of imagination to be able to go and create new things or is it be if that makes you feel afraid and drawn and insular and make you kill yourself eventually after taking too many pharmaceutical drugs you see it see there's good vis and there's bad BS and as I always say never underestimate a man's ability to play mind games with himself and come off the winner that's re you know and that's what part of is all about is it's that first step of initiation the the true beginning of the spiritual journey is stop lying to yourself above all else yes stop lying to other people but we have to first stop lying to ourselves that's part of self-respect you know and this is what two too few people are willing to do too many continue to tell the the whole themselves the whole BS story about how the job that they're doing is necessary and right and it's all justifications none of it holds any real you know weight when it comes to objective morality and natural law so you know I I think that you know we we do need a certain amount of what perhaps you could call it distraction and or you know lightheartedness because the the great work can be very heavy at many times and if you try to just can continue non-stop it can burn you out so you know we all have to you know have our little distractions and you know little times that we engage in you know some light hardness and or even outright fantasy but then we come back down to the ground where the work is still there for us to do and we have to come back you know somewhat rejuvenated and renewed from that little temporary distraction to continue to do it to the best of our ability and you know as I said again I I consider you appear in that work so thank you for the work that you've done and I want to thank you for you know the insights that you brought to the table today as a caller exactly one week off and then I see my pals live that's great very fortuitous timing that's that's what synchronicities are all about Vinnie I want to say thank you again and enjoy the rest your holiday today is Queen's birthday weaking in so for those of us and the former British colonies I want people to remember one thing that's very very important we're all still slaves of the British Empire that's right because they created the banking system and the court system and nary a person can escape from that reality so ladies and gentlemen if you are in a colony or if you're not in the colony you still belong to the Colonials and today is Queen's birthday weekend and I was talking about this this little meme it's got the Queen you know with the little smile and their little wave is happy creams birthday weekend slaves oh my god you imagine people still having respect for royalty amazing it's the year 2019 going on 2020 and they still think royalty is a good thing well it's everybody's thought royalty was a good thing for a long time because everybody was raised on royal education and served in the Royal Army and so and held high standing in the Royal Courts and they basically said that hey if you put royal in the name of anything it's it suddenly becomes so much better than it actually is you know it's a basic principle of scamming and we have to throw off that feudal colonialism and I have a real true revolution in consciousness worldwide you know that's what really is very much necessary and I think that's why more people have to get involved in the great work and become a real educator and a real teacher and a true journalist you know as I consider that's what you do Veni and you know if more people stepped up into that role of being a truth teller and are doing it fearlessly they'd see how the quality of their lives would improve and how the universe would reward them for that work long term I am so sorry to still keep yammering on but there's so many important this is that like for example after the Christchurch mosque Massacre happened I'm so far the only alternative journalist who's actually been to Christ interviewed the president of the mosque interviewed one of the survivors from the app and gotten some people to do proper video analysis and things like that and oh sorry no worries okay so the the question is what's happening down in here in New Zealand directly after this Christchurch mosque massacre and what's actually happening is they're trying to take the guns off of everybody like they're turning up to people who work for the New Zealand military at two o'clock in the morning and taking their weapons off them that kind of thing right without a member and without a member of parliament or justice of the peace present which is what you have to do to comply with the law here and that's um under New Zealand law specifically to prevent the the case where the military people might start shooting the police who are unlawfully coming onto their property and trying to seize their firearms and things of that nature in some kind of insurrection is incident you know it's kind of like Posse Comitatus right in Reverse and nowadays we've got this massive neat censorship going like I can't use the word false flag and in my video titles otherwise they do they they get a flag automatically and I've got maybe another eighteen days that's why I'm actually coming off of my holiday on the 18th because I had all of these flags and things like that and if I got one more I'd be I'd be dead this is the point where at I got censored in real time never happened to me before Mike on the day after the shooting I got we live with holy I saw that episode I saw that yes and may that that's never happened to me before never happened to Holly before I've been doing this ten years he's been doing that 25 yeah this is them this is them practicing or putting into a beta phase the actual artificial intelligence algorithm for certain things they don't want said I believe that's what's really going on you know behind the scenes that they're networks absolutely and and there's also the physical chilling effect I've been visited by the cops five times and and inside of for talking for talking on the Internet airwaves imagine this imagine I one of my listeners he slam $1,200 in cash down on my thing and he says if any I want you to go to Christchurch I want you to get the story down are you afraid to do this because it's going into the Lions Den two weeks after it freaking happen what do you think is going to happen right you know and so I do announce on on air that you know I'm raising money to go down there and that kind of thing whole thing and then all of a sudden the cops turn up at my door and I'm like okay wait away really quickly let's comment them all all all chipper and Tyrion things like that even though meanwhile my heart's going through and it's absolutely terrifying because when they turn up not once not twice but three four five time you start to give a message beyond what they told you and you know what they told me nothing they told me absolutely nothing they didn't ask any questions you know and that's like oh that's incredible intimidation tactics right because they probably know that I'm a journalist and youtuber and all of the pureness doesn't anything they say or anything they do is probably going to get spread throughout the social media so what did they say and what do they do they do nothing and say nothing right just trying to intimidate the viewing and listening audience you know as if to say don't speak out or you'll be paid a visit to you know we can't back down to that more people have to just stand up to this tell these people you're you're not going to shut down freedom of speech you're not going to shut down let's put it this way they're not shutting down freedom of speech without a full-scale worldwide war it's not going to happen it's certainly not happening here in America and if they want to try it here in America you're gonna get a war that is going to spill over into every other country of the world that's what they're gonna have to do it forget about even ideologically fighting it like will ideologically fight it but they keep pressing the issue and pressing the issue and pressing the issue I guarantee you they will not avoid the powder keg of America exploding in their face it will not happen without bloodshed that's within their power to stop what they're doing but when it comes to the censorship issue and I'll keep repeating this just about every week if it's pressed and it's pressed to its full conclusion they're gonna have a war that there's no absolutely no possible way that they can win a physical hot war not a war of ideologies they're gonna have a physical hot shooting war on their hands that they're theirs they're not going to be able to unexploded is gonna explode in their face and they will have caused it so I don't know maybe that's what they want are they maybe they just you know they're like the bully in a school that like is begging to be punched in the face as hard as the person who's been you know trying to withhold their their anger at their bad behavior doesn't want to do but eventually they crack them in the face and break their jaw and shatter their nose all over their face that's what's gonna happen with the them poking the the you know whole of America with the stick you know it's good because they're not gonna be able to control what was I'm trying to explain to people would I know to be a fact a lot of people don't know about the American the underground American culture of weapons ownership because most of the world doesn't engage in it and doesn't see it I'm trying to explain to people take every sports fan in the world triple that number and then quadruple the number of guns and put them in those people's hands and that's what you have in America and now and then you're going to try to shut down their freedom of speech so you know there's this video of this you know heavyset kid being bullied by a little thin kid you know I guess he's calling him fat looking at him and he starts actually hitting him and like the kid is the big kids using so much restraint because he's like three times bigger than this little skinny runt Punk in this video maybe I'll post it with the podcast and you know finally the kid just snaps picks up grabs the kid in a bear hug picks him up turns him upside down and literally almost pile drives them into the ground practically on his neck or in his head his obviously his leg gets really messed up I mean he slams him to the ground harder than a professional wrestler would you know fake you know slam you know not really attempting to hurt there you know you know opponent where the ending is rigged you know but you know I mean he slams him on concrete the way a wrestler would you know slam somebody on a on a mat that has a lot of padding and give to it you know and I mean you know with full force you know and it's like I think the young kid got off easy you know walking away with maybe a broken bone or two and you know a little bit of a concussion you know it's like that's what they are literally trying to do to America and you know the thing is is a lot of people think it's such a bad thing to say if you don't stop it's gonna come to a physical fight I'm I'll tell any politician that to their face I'll tell any cop that to their face I'll tell any judge that to their face I'll tell any lawyer that to their face cuz they're in the wrong I'm standing in the right the people who don't want their rights taken and abused or standing in the right freedom of speech is the right side of history the censorship of the freedom of speech is the wrong side of history and anybody that would support that you're there not only in the wrong side of history they're so dead sick psychopathic lunatic people who think they are God in this world and they're gonna exactly find out how much they're not God and it's not tough talk it's not picking a fight it's telling people that when they want to bring the fight by trying to stop freedom of speech you've closed down the avenue for the communication of truth that's gonna lead to a hot war and it's gonna be a word you're not gonna win I don't care you could have every army in the world at your beck and call to win it win quote unquote you're gonna have to saturation hydrogen bomb the earth to defeat the American public that's what you'll have to do and then there won't be any winners because you'll have no slaves to command so I say if we can't do it ideologically I'm ok with pushing it to that I'll just come out and just be as Extreme as possible I would be fine perfectly fine it would be a moral just war and absolutely there is such a thing as a moral just war fought with by the people who organized into militias to stop that kind of a fighting force and the numbers that are here in America you would have to drop hydrogen bombs on the entire surface of the country and you wouldn't get everybody you'd have to do it pretty much to the whole planet and doing that would basically cause a nuclear winter on the whole planet anyway so you would show people how much of a psychopath you are by trying to maintain control of that level and you would you'd wipe out your slave population anyway so slavery would be ended and you'd have to reset the slavery system anyway so I'm okay with it being pushed that far I don't fear that eventualities or that result I don't fear it a lot of people think it wouldn't go down that way because they don't understand the actual numbers they don't have an accurate understanding of what exists here in America as far as weaponry is concerned and zero understanding of it none whatsoever it's that's exactly what Prime Minister just under I don't see because honey you--you'll the prime sunnis term of African colony okay that didn't rebel successfully against the crown okay that's what you don't understand you don't understand what it's like to fight for something and now I have been in my life and probably still AM today to a certain extent a real oh okay and and and the thing about that is I've been punched in the face many many times Minnie Minnie Minnie tougher every time it was for a different reason so I sort of like run through the gamut of getting punched in the face for different reason after a different reason at a different reason and each time getting punched in the face I learned not to do that one particular thing so I've improved somewhat and I'm happy to say that for the last ten years I have not been punched in the face once because I figured out what was what I was doing wrong and it's just like Mark said you know if you come into accordance with natural law a whole bunch of bad things that could happen to you won't frickin happen to you that's right that's right and see that this is we have to stand in solidarity with the members of the alternative media we have to say we're not going to take this censorship it doesn't matter if they sense or somebody I don't agree with I would fight for their right to continue to say what I don't agree with like I don't but I don't think that they should be censoring Flat Earth videos I don't agree with it but I don't think it should be censored I think that should be at least out there for people's consideration if they want to click on it and view it and try to gain an understanding of what is being said whether they agree with it or not you know I think religious stuff if whether I agree with it or not that's freedom of speech you should be able to put out there what you want to put out there as long as you're not advocating for harm being done to other people you know I'm talking about self defensive rights when people are doing harm to our bodies and our freedom you know don't expect people here in America to take that nonsense because it don't they'll take it to a certain extent but when it becomes uncomfortable enough for them you'll see that eventually again the powder keg that is America will will detonate like a bomb first it will happen here first more likely than not and then other countries will follow the example they're waiting for us to start the second American Revolution worldwide you know and I think you know I don't I don't want it to come to it having to be done like that I think that that will inevitably prolong it and delay it and we'll have to do it again at some other point in consciousness I think that if we do it in justise if we do it the right way if we do it through an understanding of what right and wrong are we won't have to go through that you know dark night of the soul for the vast majority of the human population in the form of bloodshed you know I would much rather do it through understanding this is something I wanted to ask you as well because of me being punched in the face many times and in retrospect probably for good reasons what is the point where you can actually just lash out to someone physically when they haven't actually physically lashed out at you you know that kind of thing because one of my mates Barak he's got he's got this this dude who comes around to his place and every now and again he said he said to actually like use physical force to get him off the freakin company the guy hasn't committed any violence or any threat yeah but if he's if if somebody's on your property and you tell them to leave that's that's an act of aggression as far as I'm concerned if I tell someone to leave my home and they don't that's an act of aggression that means that means you are you're you're implying that violence could be started at any time because you're not leaving something that you don't own you know and I would say if you're on your private property and someone tells you I'm not leaving then it's on as far as I'm concerned I mean I wouldn't tolerate that if I asked somebody leave and they refuse to leave I would lay hands on them you know so I think that's totally in keeping with natural law as well you know because that's that's a violation of your rights in your own property that that's called trespass once you're asked to leave a place when you're you're made aware this isn't your space this is my space and I own this area or I'm living here and this is where I live and I'm asking you to leave and they don't that's called trespass and that's a transgression against your natural law right to remain secure in your living space so that's where I would say that comes into play in a public space I would say you know only ever respond to physical physical act of aggression and don't begin it you know but I think in your own property when someone refuses to leave that is the initiation of a physical act of just by remaining there is a physical act of aggression well my my cause of it is like I would probably be a much worse person if I hadn't been violently attacked but I'm not but I'm not sure if that's the that's the best way to teach people is to just violently attack them whenever they displease you or do something annoying no certainly not like certainly not just with words but again in the example you were giving there with your friend if he it's his private space and someone has refused to leave that's you know that that's definitely a violation of of your natural law rights in your own property so you know that's one example I would say a physical you know strike doesn't have to happen but you have the right to physically remove somebody you could try to do it with the least amount of force possible but in all honesty I would say it's up to it's up to the person who's being aggressed a pond then to determine what amount of force they'd have to exert yeah and I think maybe having experience and that kind of thing I mean you grew up in the main streets didn't didn't you Mike you know usually it's not really I would say that there were you know it was not a terrible neighborhood where I grew up so there was not a whole lot of physical street violence but I've seen some of it and you know had to defend myself in some cases but like you know I've seen some things that there were repercussions due to certain organized crime operations taking place where people had crossed some other people in organized crime and I've seen I've seen some physical things go down where you knew it was something involved in organized crime and somebody took a very very bad beating so that's about the extent that I've seen it here in South Philadelphia I haven't you know directly seen a whole lot of you know street violence you know in some places you you had to know don't walk through this area because it's controlled by certain people who are you know engaged in you know drug activity etc and so you just steered clear of certain areas that's gotten somewhat better and the cities cleaned up in that regard but there are still areas that I would say you would know you know this isn't gonna be safer you might be a cost that if you walk alone open at night that's why in general in general if I'm walking out in public I'm carrying a gun you know III carry every pretty much every day where I go so if anything were to occur you know even though generally it's perfectly safe and people generally treat each other pretty well but if there were a situation I don't want to be caught with my pants down I want to be ready for it that's what preparation and preparedness is you know so that's why I think everybody should be armed I personally think everybody should have the ability to stop a violent attack with whatever weapon they choose by carrying that with them wherever they go I think there should be no restrictions on carrying weaponry of any kind that's our natural human right and people can't understand that from from a lot of their perspective they don't see that as being peaceful there's no aggression when I walk on the street with a firearm there's no aggression taking place on my part I would not initiate aggression it is there to respond to an act of potentially deadly aggression that's what it's there for and I would try to use non-lethal then move up the semi lethal and then move up to lethal force if it was required and that's what you should do to try to minimize it but in all honesty I think that you know if someone is aggressed upon they really have the right to use whatever means at their disposal to defend their life in their property quite frankly I think it's a very clear-cut thing so if any I'm gonna try to squeeze one more caller in but thank you so much I'm really glad that you called in thank continue with your work and I believe your website your main website is the vinny Eastwood show com is that correct that's right that's Vinny with the why because it's the most important question and Eastwood like go ahead make my news it's the lighter side of genocide just because we're being exterminated doesn't mean we can't make it fun otherwise what's the point of being killed the Vinny Eastwood showed the only thing worse than the truth is for these jokes there you go see there's Vinny it's a unique brand of humor that he injects in there keeping it very dark topics as he does discuss as I do toward the lighter side with his unique humor and personality so check out the vinny eastwood show calm ladies you don't have any thanks so much for calling in to the show today let's see if we can bring one more person in if we have time I think we have a couple of minutes alright I'm gonna go to Joe Brogan Joe Brogan you are live on what on earth is happening Wilson thank you mister pashya mark can you hear me okay yes I can you're coming in loud and clear Joe we limited time so go right to your passion or coma I understand mark I know that your preferred format is let you present all the info first ask questions later I think that's the most efficient way so I'll just ask for the same respect explain to your listeners I'm a former Iraq Afghanistan veteran member of the US Army current pension collector from the US Treasury based on a disability that I collect from being injured in Iraq I just have a few notes and whatever resonates with you you can reply on on an open-ended segment we've got less than survived minutes last sigh I don't want to disrupt the listeners any more with a back and forth so I just have some quick notes you talk about the questions being related to Right Livelihood so I will suggest a guidance for the notes I talked about a society of meaning and what I like all your listeners to know who are anarchists and individualistic fighters for freedom for order followers who are coming out at the Pythian system tithing system or tariff related agreement where we have been signed into captivity by the United States government or whatever government we have been indoctrinated to support I just want you guys to know it's an inch by inch fight for order followers to escape these government controls and and manipulations on their consciousness in order to exercise our own free will so it takes a while so I would just offer some some criticisms to to the way your program is going mark I I know you're such a metaphysical guy and you talk in broad distances and lengthy strides about the metaphysical and long-term implications of these choices of immorality but I would just pose these few challenges to you real quickly in less than two minutes here when we're Americans fighting for commercialism or industrialized society in the West and we agree with women's rights we agree with freedom of choice etc to a large degree when we're trying to talk about slavery and our corporate owners our bank owners our government owners but we've been indoctrinated into a system to support going to war for fascist communist dictatorships for example in the Middle East where the where the women have no rights whatsoever they have to stand six feet behind the men and wear masks around their face in order to talk they have to have certain acceptance I would ask about that and how this where do you draw the line between true freedom of the individual and and supporting the elimination of these complete control systems it's like this cagillion dialectic that only you could provide insight into if you ever chose to provide political commentary which I think you should and I truly believe you should one note I have about you being a political activist in a way is your notes on a narco poco this most recent segment you you gave a two-hour presentation on what anarchists are not doing and perhaps what they should do I would suggest when you're talking to the military you've given that's all the time we have for this edition of what on earth is happening I'll probably continue with the question and answer session next week folks so remember what on earth is happening government is slavery we'll see you right here next week thanks for watching everyone have a great week [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #212

Topics: *Call-In Show on Right Livelihood, Mark to host "Teaching Natural Law" workshop an Anarchadelphia 2019, How the ending of the WOEIH live show is set up, Review of Right Livelihood key concepts, Right livelihood is an essential component of observing Natural Law principles, the Truth community's inability to see the full scope of ignorance in the general public, people still trust the media to tell the truth, people still trust allopathic doctors, Honesty in self-assessment of our choices of behavior and occupations, Answering honestly the question "Do the actions we perform at our job cause harm to other sentient beings?," Dark Occultists and Social Engineers destroying humanity, the Truth community does not truly know who and what they are up against, the Truth community's lack of deep research into the Occult, Evil always wants to over-complexity everything to obfuscate the simplicity and elegance of Truth, the endless babble of the Ego, shutting off the ego identity and mental chatter, the realistic Biblical allegorical portrayal of Jesus in the movie "Mary Magdalene," Self-sacrifice and Personal Responsibility may be painful in order to stop hurting others, Quitting your job is the solution to wrong livelihood, There is no painless path or easy solution to alignment with Right Livelihood, False spirituality vs. the hard-core Truth and True Spirituality, trusting in the universe to assist in providing abundance when one is living in truth and righteousness, Many hands make Light Work, Freedom will emerge when more people learn and teach First Principles, the Insanity of doing the same thing you have always done and expecting a different manifested result, Neuro-Linguistic Programming (NLP), NLP entrainment techniques, Breaking free from Emotional Mind Control, Conquering the Fear of what will happen in the short-term when quitting a Wrong Livelihood occupation,Lack of trust in the Universe holds people back from quitting Wrong Livelihood, Ignorant people are hurting others and are therfore bad people, Allopathic doctors don't care about their patients and only care about Money, Your internet search IS more valuable than a doctor's medical degree, The Lost Word "NO!," Doctors are immorally causing irreparable harm to children through vaccinations, Autism is a constructed term to cover a broad spectrum of vaccine-caused damage to human health, Healing techniques including meditation, art, EFT (tapping), the failure of the Left-brain imbalanced to understand objective morality, Lack of Heart-Based Intelligence, the Force of Syntropy manifested through the Power of the Will, the Ego always poses the extreme "exception" to the Rule of Objective Morality to derail people from an understanding of First Principles, the Ego prevents Heart-Based Intelligence, Humanity fears that the Truth is Absolute*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're watching what on earth is happening i'm your host mark pacio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome to the show everyone thanks for being here today is sunday june 9th 2019. this is episode number 211 of what on earth is happening and we have a great show planned for you here today we're going to be following up last week's discussion on right livelihood the concept that certain occupations and professions are moral because they don't cause harm to others and often can help humanity and then other jobs occupations professions are immoral and are examples of wrong livelihood because they actually cause harm to other sentient beings so we're going to continue and follow up on this topic today with an all call-in show there are some things that i want to discuss before we get to your calls to get out of the way but then we're going to be doing a uh total call-in show for the remainder of the time here on this episode of what on earth is happening so you could join us at what on earth is happening dot com slash show where you can get the link for the call-in room on discord right now we are using discord as the uh ability to call into the show and if you uh go to the one on earth is happening dot com show page you can then click on the link that says call in live and uh that will take you to our discord server and that's the waiting room to get in to call into the show so um one of the things that i want to talk about well really before we even uh get to that there's a couple things i want to uh briefly let people know about first of all if we can go over to the uh to my slides um i'll just jump in right here and remind people that i will be speaking at uh the first ever the inaugural anarch adelphia conference here in philadelphia this is hosted by uh the uh folks over at um the state of anarchy which is a great youtube site and website and um they're going to be hosting a conference this summer with many speakers from all over the world uh max egan's going to be a part of it lark and rose benny benny wills and many others and i'll be giving a talk at anarch adelphia 2019 that is going to be called the sacred gift of anger where i talk about how the powers that be and the establishment and the mainstream media and the new age movement etc want to shut down the emotion of righteous justified anger in people because they don't want that coming out and sparing people on to god forbid right action you know anger can be a powerful emotion if channeled properly it could be a productive and positive emotion you know we think about it all wrong in many cases because we don't understand there is a valid role for all emotions even the so-called negative ones so that's going to be my talk my workshop we have pretty much uh come together with a plan for that and it is going to be called teaching natural law with mark passio where i am going to give advice lessons and material on how to go about teaching natural law to other people a lot of people have asked for this a lot of people have you know thought that they don't know where to begin or don't have a good framework for speaking to other people regarding this topic and don't have a lot of confidence in their ability to convey the critical aspects of the idea about natural law and you know to help people to really understand it to get it so um we're going to put together a workshop called teaching natural law and that's going to be the workshop that i'm going to deliver at anarch adelphia 2019 so this is coming up this september the 13th through the 15th september 13th 14th and 15th here in philadelphia you could use passio promo code at checkout to get five percent off your tickets and five percent of the ticket sales will be donated to myself uh to the cause here at what on earth is happening so check that out there's a banner link on the home page of what on earth is happening dot com regarding uh my involvement with the anarch adelphia 2019 conference that being said um today's show is going to be a follow-up call-in show from last week's topic which was a discussion on right livelihood which is a buddhist concept in the esoteric buddhist religion of course however it is an integral part of natural law of the understanding of how natural law works and how it functions in our lives and how we can bring our behavior into alignment and into accordance with natural law right livelihood is an essential and critical part of that now before we actually go to the calls on discord i want to talk briefly about a couple of things the first thing is i want to talk about how the end of the water on earth is happening show works because many people are unaware of this and i kind of want to just like make this be the one time and for all time um you know declaration uh explaining to viewers of this show uh how the show is set up okay because i've actually gotten some flack about this during the week surprisingly uh the last caller last week uh who you know i tried to uh take a couple of calls at the end vinnie eastwood popped in and of course i put him to the front of the line i consider vinnie a friend and a peer in the great work so i wasn't expecting vinnie to call in so when i saw him uh i decided to put him to the front of the line of the call cue to see what vinnie had to say and that's great i think it went really great at the end of the uh the show during the one hour that we were taking calls uh you know however we didn't leave a lot of time for other callers now a caller did get into the at the end of the show and i tried to inform him that there were only a couple of minutes left and to get to the the topic you know or the the question or comment as quickly as possible uh he did a little you know setup of the question so didn't really wasn't even really able to completely finish framing what he wanted to ask and uh then the title card came down you know the end sequence came down and the outro started playing and then some people seem to think that i somehow didn't like what he had to say i was listening attentively to what he was saying was going to respond to it and i'm going to do that today actually before we actually go to the calls i'm going to talk about a little bit about the content of the call and respond to what i feel the the the question he was posing uh that being said um some people thought that i cut the gentleman off because the show was ending and for people who don't know please listen attentively right now regarding how the what on earth is happening show is formatted because i don't i don't personally appreciate people thinking that i somehow behave in a way that i don't behave because they don't have the picture you know this is what a lot of people do though folks they make a quick snap judgment about something because they don't have the pattern because they haven't watched or listened over and over and over again see this is what really truly forming correct pattern recognition is about and it's why so few people really have it okay and it it sort of aggravates me because i see how poorly people do this function and that's why they don't understand the world it's one of the reasons it's one of the main reasons they don't really understand what's taking place around them or within them and sadly they think that they do this is what happens in many many many cases and i'm not talking about any one person in particular here folks because like i caught some flack from multiple people over this who haven't even watched two shows strung back you know back to back apparently to understand that the show every single week is exactly three hours long no one has any control over that it's an automated streaming process in a piece of streaming live television production environment software and the show document is just set up for three hours if i try i have no power to extend the show by one second okay understand this know it okay so let this be the formal you know time of me saying this go back and refer to this clip back when it's a podcast maybe i'll put this clip on the on the live show page and or refer it to people to understand understand how the end of the show works and if you're one of the people i call upon near the end of the show have an understanding of how the ending of the show works and have some respect for other callers because if i say okay we got five minutes left or we have 10 minutes left and i want to get a few calls in right get to your question or comment quickly as quickly as you can okay i'm not going to keep cutting over somebody to say two minutes left a minute and a half left 30 seconds left okay look at your clock at 6 00 pm eastern time or at whatever time zone you're in translate it over to 6 pm eastern the show goes off the air and that includes time for the outro which is one uh minute and ten seconds in its entirety okay so that means the show starts going off the air at um five fifty eight fifty okay so let's let's establish that once and for all the title the outro card of the show with the outro music drops at 5 58 5 out 5 p.m 58 minutes and 50 seconds the last one minute and 10 seconds of the show is outro music which if i speak on my microphone the sound is ducked where you can hear what i'm saying over the outro music to take the show out okay and then the outro plays till the end of the show at six zero zero zero zero that's six hours six pm okay zero minutes zero seconds and i have no ability to extend the show by one second past six pm eastern time i don't want to i don't want a fourth hour okay i feel like i already do too much of this shit quite frankly and have done too much of it that has made me largely a better human being because i know it's not received it's not really understood not in its fullness or in its entirety because people won't do the work they want a sound bite or they want to think that their intuition is so good that they could see a little blip flash of something and understand how it works and guess what your intuition ain't that good boys and girls hate to break you the news but that's the case okay you know how you increase your pattern recognition you study you watch you close your mouth and you listen and learn okay you don't try to make snap fucking judgments immediately where you think you're so good at making a blip judgment based on a little thin slice of something that you understand how the entirety of it works because most people are not that good okay so i'm just trying to you know let people understand one i'm really sick of people demanding more of me and like making fucking uh critical judgments of me when they're doing exactly squat balls okay so i'm fired up right at the beginning of today's show i'm fired up because of the topic because i don't think people really understand what i said last week i'm fired up because of how imbeciles in our culture still trust these professions and i see it every day i see it amongst acquaintances i see it amongst friends i see it amongst family members i see it out there on the street every damn day where people actually think the media is trying to tell people the truth people actually think doctors actually care about your health and they want you to be well yeah uh-huh i mean i just can't even believe how naive people are i can't believe it and i can't believe how bad people's powers of perception and judgment and discernment are and rapidly growing worse on a daily basis rapidly growing worse on a daily basis there's no awakening there's no improvement happening amongst human beings tiny little handful is really ultimately trying to help themselves and improve and then you just have resistant people who want to think they know better well what they've done is the same thing they've always done and it's never yielded a different result and they want to think these people are out to help them the media is out to help you the media wants to tell you the truth doctors are here to tell you the truth about human health and nutrition so you could be well lawyers want to help you and help you understand your rights and freedom you know politicians are here to improve the quality of people's lives and jackass retards actually believe this shit i mean you have to be kidding me it's a joke people are a joke they're a laughing joke is what they are it's very serious it's a very serious thing that and that even my watching my viewing audience my listening audience cannot understand that this is the case because they have myopic tunnel vision and they're seeing the world only from their closed perspective because they've they've shut out people like this and they're viewing the world through rose-colored glasses only from the perspective of people they hang out with on a daily basis they don't go out into the world they don't go out into average society and interact with the people the vast hordes of people hordes who think this way and they don't understand how shut down the human mind is and human psychology and most of all the human intuition to be able to intuit what is actually happening to them they have no powers of perception discernment and intuition and let me tell you something a lot of the people who are even watching this show their their powers of uh intuition and discernment aren't really up to snuff and certainly not up to snuff to the extent that they think they are okay so i don't really care who i offend i'll offend my own listening audience my own viewing audience i'm saying what's true and people have to really sit and listen and really hear what i'm saying okay because they don't understand they don't so once and for all let's establish the show begins exactly 3 p.m unless there's a a technical problem on the east coast it's exactly three hours zero minutes zero seconds long the title card drops at 250 850 to go out the outro card i should say okay and there is no one's ability not mine not my producer no one's ability to extend the show by one second and i won it that way that's how i designed it i set up the show that way in the production software in the production environment and there's a reason because i don't want to do this shit any more than three hours a week live on the air that's it this is how i set it up because this is the amount of time i'm willing to give of my personal fucking time every week do you understand now as far as the material went last week i think i presented an excellent presentation okay and i'm going to briefly review some of the key concepts of that presentation when we go to the slides okay i obviously didn't get to the extent of the calls that i want so i want most of the show to be calls today okay so please also observe the rules when you log in to the discord server read the rules of the call-in okay be ready be unmuted you're muted from the server end i will call on you there's no call screener your call will be live have your question or comment ready be respectful i i let people talk i do let people talk okay i don't cut people off i think if you go back into the archives of my shows you'll recognize there's always a good report between me and my callers and i let people talk okay but at so at some point do get to a question or comment that's the whole point of the discussion you know it's like if you want to just do a dialogue you know or a monologue i should say point a camera yourself go on youtube live go on facebook live do your own podcast okay so there should be a discussion where we go back and forth okay and just try to you know and not not try to definitely use headphones use headphones or earbuds you must plug into your device headphones or ear phones if i hear echo coming through the speakers i got to start abruptly cutting people off for that folks i have to i don't want it like i want it to be as positive quality as possible as as good quality as possible and if people hear us echoing like it it's annoying to me it interferes with our ability to think clearly because we're hearing our own voice coming back at us and it's just not respectful for all the viewing and listening audience so please use headphones as i have asked don't call in and let your audio be coming through speakers you must use headphones you must okay if i if i hear that you're not using headphones i'm very abruptly going to end your call very abruptly and rudely going to just server mute you and that's going to be it for your call and then i'm going to actually be probably gun shy to ever put your name through on the air again because you weren't listening the first time when i respectfully asked you to use headphones of some kind okay so please observe that that's all i ask okay so you know take care of the quality on your end you know try to use a decent mic a decent set of head phones and the call experience will be much better all you got to do folks just get a 30 or 20 you could get these for 15 get a usb headset with a mic on the side of the ear earphones you know you could find these on ebay or amazon for like 15 right the price of a couple of cups of coffee so just make a minimum investment like first of all for people who are listening to this type of material you should be trying to get involved in doing communication with other people networking with other people that means you're going to use skype or zoom or you know discord or some other communication software this should be part this should be part of anybody who's really understanding what's going on in the world and listening to a show like this this should be part of your technological arsenal okay a fifteen twenty thirty dollar set a usb headset for your computer you know but i know everybody wants to do things on their mobile devices nowadays you know we want to call in through the phone you know our best buddy you know the the the the the black monolith that's you know gonna gonna keep us enslaved you know the candy that they dangled out in front of us to pull us away from actual creative tools i i get it i understand you know so you know all right i think i've uh you know rambled and uh you know ranted enough so let's go back to the uh presentation slides and uh i want to thank uh everybody in the crew uh everybody's been doing a great job uh mike josh tom leah uh brett doing these graphics uh everybody else who's helping uh joel okay i i the the crew has been rock solid so thank you for all your efforts and uh your willingness to do this work with me so that being said uh today's uh main focus is a discussion on right livelihood as we did last week but we're going to take your calls and i want people really i do want people to stay with this topic i'd like that to be the show i'm not going to completely outlaw talking about other things like but we do have a general topic of discussion today and it is right livelihood now last week on on the show and uh i am trying to there we go stepping my slide forward okay um i talked a little bit about what right livelihood actually is so light right livelihood is a buddhist concept it comes out of the buddhist religion comes out of the re the truly esoteric part of it but even in the exoteric aspect of buddhism uh it is an important aspect of what they call the eightfold path the eightfold path is the methodology to relieve alleviate self-inflicted suffering it's the the actual method that the buddha taught that could take humanity out of a state of self-inflicted suffering and slavery and among with many other things right living right making your living your daily resources that you need to survive in the world making that in a moral capacity is one of the aspects of the eightfold path of buddhism true buddhism encourages its disciples to engage in compassionate activity and to make their living in a way that does not cause harm to other sentient beings again that's the exact concept of what natural law of what bringing our behavior into alignment with natural law it means you not only should you not do that in your daily life experience of course you should not do that through whatever occupation you quote unquote make a living doing on a daily basis so we saw last week that right livelihood is inseparable inextricably connected to natural law principles right livelihood is an inseparable aspect of the understanding and application of natural law to truly bring our behavior into alignment with objective morality we must first know not think not believe not guess at definitively no if the tasks we perform in our daily work do not cause harm to others and are therefore in alignment with natural law conversely we must definitively know if what we are doing in our daily work does cause harm to other sentient beings and therefore would be out of alignment with natural law or in other words would be a transgression against natural law in other words some form of theft because that's what all transgressions that's what all immoral behaviors are they are forms of theft the next concept that we talked about is how do we make that definitive knowing if we are in right livelihood how do we come to that understanding and you know it's common sense folks we have to ask ourselves a very simple question when considering whether or not an occupation or profession constitutes right livelihood and that simple question is does the behavior i am performing in the daily activity of this work cause harm or loss to others directly or indirectly and that see then there comes the mirror there comes looking into the mirror and being honest with your own reflection looking at yourself and saying i'm not going to bullshit myself see because this is what humanity still wants to do day in and day out we want to lie to ourselves we want to liar ourselves about who we are on the inside we want to lie to ourselves about how we behave toward others we want to lie to ourselves about the type of work that we take and choose to do we want to lie to ourselves that we have no other choice that there isn't another choice when there always is another choice you know and this is why people want to go light on people they want to say oh they might have to quit their job and you know uh not have money to put food on their table yes exactly that's exactly right and no one should go easy on people like that you put yourself in that position you're the one who ended up in that job i don't care what life circumstances brought you to that point your decisions brought you there ultimately your willpower and decisions have to bring you out of that point there is no easy answer it's what everybody wants to a fucking easy answer well there isn't one it's a hard choice do you gotta look at yourself and you gotta make and you gotta buck up and make it everybody wants me to go easy on people i'm not the one causing the fucking problem other people who continue to do work that is immoral toward other people are the fucking problem not me i'm sick of the excuses people make and then people demanding more of me i'm not the problem i'm not the one causing the damn problem i'm in right livelihood people have a lot of nerve the shit that they come up with and the shit that they say when they've done nothing i'm done i'm done folks if you can't tell i'm done all right and i'm going to be berating about it because people aren't getting they're not getting it they're it's not getting through the thick fucking skull it's not getting through so i'm going to get deadly serious and even berating about it because i'm tired of it and here's the key to this part of this review okay if we answer that question about what we're doing on a daily basis does it cause harm to others or not we have to be honest with ourselves when we answer and here's the problem human beings are just bullshitters to their cell themselves and others that's all that's all it really comes down to they don't want to be honest they're liars you know how many people even in my listening audience are lying to themselves lying to themselves i'm not i'm not the one to be easy on anybody including you whoever you are listening i'm talking to you right now i'm not going to be easy on you i'm going to tell you the harsh hardcore truth that's what my job is to do here that's what i am charged to do as a teacher this ain't your new age bullshit class you want that go turn this show off go go to some new age website that's going to blow smoke up your ass all day and go listen with your rose-colored glasses okay put your nice little pink glasses on and go look at the world like it's some shiny happy fucking place listen to people who are going to tell you what you want to hear you ain't going to get that here on what on earth is happening jackass okay all right you got to be honest with yourself that's the first step of initiation if you're not you're not an initiate and you're not on the damn path all right you want to get on the path you got to start hardcore telling yourself the truth first and foremost stop with the little baby fight i'm gonna spin food spoon feed a tea ready here comes the airplane you're not getting that here on what on earth is happening all right you got to buck up and man up and it doesn't matter what gender you happen to be take the phrase for what it means it means get your damn attachments out of the way this is why people are so messed up this is why they're not strong this is why they're not prepared to take on our rulers this is why they're kicking our ass like bruce lee round kicking a baby in the fucking face okay and we're the baby with drool coming out of its mouth sitting in a fucking high chair and getting kicked by the greatest martial artists of our time somebody with infinite amount of skill practically a superhuman level of skill and somebody who doesn't even know who they are what the fuck they're doing that's what we're up against that's we're the baby up against that power and that's what the so the social engineers are that master martial artist that master magician okay it's an it's an allegory folks okay it's an analogy okay it means you're playing against the against the greatest chess champion of all time and you don't even know the rules of how the pieces of the chessboard move how long you think it's going to take how long you think that the game the game is going to play out for you're going to get your ass kicked swiftly you know it's like not knowing a thing about boxing and trying to box mike tyson at the height of his career you're going to get put down simply easily and swiftly and people don't want to acknowledge that that's where this movement is this movement has no no real deep level understanding has no deep level skill sets it's a joke the truth and freedom movement are fucking jokes i've been trying to explain this to people for years and no movement has taken place no progress has taken place you still have a bunch of people who are just fighting each other on social media don't even understand they're in a fucking war at all they don't understand it at all they don't know who they're up against they don't know what their actual real situation is anybody fighting on social media you don't know what your situation is you don't know the situation you are actually embedded in you don't know you think you do and you're completely fucking wrong because you don't know who you're up against trust me if you did you wouldn't be acting the way that you do this community would not act the way that it does if it really genuinely knew what it was up against you'd be doing everything within the fiber of your being to try to teach natural law to other people that's what you would be doing you know but instead we're having whacked out facebook discussion people calling people's names or then trying to you know get all up in the face of somebody who actually has been doing something for more than 12 years with this shit work that's going nowhere and then everybody wants to tap me on the back pat me on the back oh mark please don't quit you're doing such a great job i'm not asking you to tap pat me on the back and tell me how well i'm doing as a matter of fact that actually annoys me pat me on the back by getting involved in the work yourself and doing a good job of it and not being a jackass on social media thinking that you're actually putting a dent in something you're not putting no dent in anything your powers of observation ain't as sharp as you think they are and your intuition certainly in the shitter this is what i see in the truth movement okay and it's all because of the first step of initiation is not honored and is not practiced because people don't understand the occult they know nothing about the real inner work of the occult you think you know the occult because you you've looked into a little bit about what the the sorcerers of our world who are misusing abusing and perverting occult principles are are doing with it you don't know the first fucking thing about the world of the occult because if you did you'd start putting the actual practices to work on your own self upon your own self in your own life on a daily basis and the first step of that process is being honest with yourself and that's here where we're at is i don't see people genuinely being honest with themselves i people i see people constantly telling themselves a bunch of bullshit about themselves that isn't true that they're further along on the path than they think they are than they actually are i should say they want they want to believe that they're further along in this path and in knowledge that they actually are than they actually really genuinely are that's what the ego always wants to do wants to inflate the lower case s self so really heed what i'm saying here see is it people want to make it too complex and that's one of the things i want to talk about what the last caller got into on last week's show don't over overly complexify this it doesn't need to be overly complexified read the book the end of all evil by jeremy locke in the very beginning toward the very beginning he talks about what is evil's end goal it is to control the essence the nature of evil is to control this is what people still don't understand 12 years running into this i there are people who still don't understand that the essence and nature of evil is to lock down possibility and choice by control so that other people can't learn and grow this isn't about and it does that by overly complexifying and obfuscating the elegance and simplicity that the truth always contains always invariably truth is elegant and simple and if you overthink it or you try to add too many layers of complexity to it you're not seeing the forest for the trees you're getting hung up on the minutia and then it becomes overly complexified and then all kinds of doubt and misunderstandings creep in instead of the elegance and simplicity of truth entering the heart this is where people are way off the path it's too much head not enough heart based intelligence and guess what heart-based intelligence can come in the form of tough fucking love you know i'm not here to tell you you're so good and doing such a great job because you're not i'm here to give you the tough love that you need to explain to you how horrifically this movement is failing but the words are falling on deaf ears i know that they are i can see it i can see it i'm very finely attuned to what's really taking place that's why i try not to even gargle with that sewage as jay parker likes to say because that's all it is it's like gargling with sewage to pay more and more attention to how fucked up people's heads are in this community because they're all going with unresolved psychological trauma because of this dynamic that i'm talking about right here in this slide they don't want to be honest with themselves they don't want to look in the mirror see the simplicity and elegance contained within the understanding of right livelihood is the common sense knowledge are you hurting somebody by doing it that's it you don't need to ask or think about any other dynamic see you got when other things creep in you gotta force the ego to shut up this is what meditation is for right meditation right methodology is a meditation it's to silence the chambering gibbering fucking idiot ego that's just blabbing away blah blah blah but but but but this but this but that with that but that but that what about this what about this what about this what about this there's no end to it it'll go on for eternity and at some point the heart has to say to the head shut the fuck up that's what it needs to say okay and say you don't know what the fuck you're talking about this does you know how few people can actually do that hardly any hardly any because they're wrapped up and attached in their emotions they're attached in their identity in their ego bound identity and they can't be honest with themselves because being honest means death to that ego-bound aspect that is attached it's attached to its psychological makeup it's attached to its emotional makeup it's attached to its mental makeup but there's real no real true deep spirituality that is learned about from the real core teachings of the occult coming through and truly taking resonance in that being and truly ruling that being because that looks entirely different than what people expect it to look like and that means coming into real genuine adulthood as a human being and taking responsibility over your behaviors instead of getting caught up in fucking endless drama so right livelihood doesn't mean tapping away as a keyboard commando on facebook and youtube folks that's called being a jackass okay and here's the part i'm talking about that i think uh again i want to chime in before we go to the calls to talk about the last viewer the last caller last week what i think was taking some umbrage with my solution which is a simple and elegant solution and it's the truth it's not just my opinion the solution to wrong livelihood is this it isn't my opinion that it is this it is this in point of fact in nature okay let's get that clear what i'm going to say in these this slide is not my opinion it is fact it is fact in the universe objectively in nature okay let's get that straight not because i say that it is because it actually objectively is that way and all we can do is understand that fact we can discover it we can understand it and we can apply it and the reason we're in the slavery system that we are is because we don't understand and apply it we haven't discovered it we don't understand it we're not applying it the most difficult thing that most people do not want to hear yeah believe me they don't want to hear it because their ego comes gibber jabbering away but what if but what if but oh but these people will be angry about it they'll be offended they're too damaged i don't care that's not my concern ladies and gentlemen listen to what i am saying it is not my concern whether you get offended by what i'm saying i'm not here not to offend you i am here to tell harsh truths that may destroy your ego not only offend you but annihilate the person that you think that you are devastate it crumble it crush it into dust that's what i'm here to do that's why one of my mo my most favorite sayings within scripture within the the new testament is when the the christ figure in the allegory comes forward and says don't think that i have come to the world to bring peace i didn't come here to be a peacemaker i came here to bring the sword to turn people against each other over what is true and right that i will turn a father against his own daughter a mother against her own son spouses against each other family members against each other i just watched um this week a very good piece of film called mary magdalene okay now people can say whatever they want about biblical allegories i don't really care whether you're religious or not personally i think all religion is the problem and needs to be destroyed i've said that many times people don't understand what i mean by the word religion i i think i got to do an entirety of a show like literally i still haven't hammered that concept in hard enough that when people hear the word religion they still think what they fucking want to think religion means and still don't understand the wider definition of the word i think i have to take a three-hour show with no calls and for three hours beat and hammer on the concept of what the word religion actually means that people still will insist will insist that it does not mean and that their definition in their mind is the correct definition of the word religion instead of the actual definition of the word they will not accept it they won't accept it and then they'll want to argue that their religion is correct and all the other ones are wrong just theirs is fine it's untouched it's unpolluted you know it wasn't uh infiltrated it's correct and uninfiltrated and pure but everybody's everybody else's is wrong and those all got infiltrated just the one that they believe in is is perfectly pure smacked asses all the way around but uh this this movie called mary magdalene uh the way that jesus was uh portrayed in it was very well done the actor did the the role very good actually all the acting was pretty good in it and um he's asked by i believe the father of mary magdalene you would separate me and my daughter and he said absolutely without a doubt if what you're trying to uh the the thumb you're trying to put her under does not go with the will of creation the will of god god's law god's kingdom whatever you want to call it natural law i would absolutely pit you against each other people think oh you know even in the biblical allegory jesus was so kind and nice to everyone wrong wrong watch this movie and it gives an accurate portrayal of probably what the personality of the allegorical figure or if you consider it a historical figure i don't really care whether you do or not but it paints a more accurate um portrayal of the personality personality characteristics of the being jesus whether you think he was an actual historical figure or just an allegory uh in an allegorical story i tend to lean more toward the latter but i don't dis dismiss that maybe the character was based on teachers in uh you know the middle east at the time of the first century or earlier than that so that's to me irrelevant the teachings are what's relevant you know and this is the whole point that people have to be willing to stand up for what's right you know at the end you know he's also talking about you know women are asking him what if the men in my life like my brothers my father etc are telling me to do something that contradicts what god is telling us to do and the jesus character just replies without any hesitation follow what god tells you and ignore what they tell you doesn't matter what happens in the in the physical world this is what so few people are prepared to hear that we might have to hurt ourselves in the short term not to hurt others in the long term put ourselves in this position folks our forebearers put ourselves in this position the sins of the father and mother are visited upon the children that's an unfortunate aspect of how the universe works when other people who were fucked up did fucked up things and then they had us and conditioned us into this fucked up way of being we're largely gonna stay traumatized and continue the fucked up ways of being sorry to break the news to you folks that's how the abuse victim cycle works buck up and understand how it works and accept it and accept it you might have to go through a period of pain that you might even have to bring down upon yourself it's the same thing with the economy oh we don't want to end the federal reserve look at what a disaster that might be to the economy short term yeah it might you're absolutely right it might be chaotic but guess what long term you're not going to do anything better it's just going to continue to be more and more degraded with what we're doing by keeping the federal reserve system in place well it's the same thing that people are doing with uh the the the solution to right livelihood they don't want to rip the bandage off and feel the immediate pain that they have to go through for a short time they want to think there's some other easy answer or easy solution and i'm trying to explain to you get the notion that there's an easy answer to this that is painless out of your goddamn ego-driven head there isn't one there's never gonna be one and i'm tired of people blowing smoke up people's asses telling them that there's some easy solution to this there is not whoever is teaching that is teaching you false spirituality they're teaching you false new age bullshit spirituality that has nothing to do with real spirituality so this the solution that most people don't want to hear or accept is that they should stop doing the harm-causing occupation immediately no matter what the short-term cost may be for them or their immediate family members this is a pill it's a bitter pill that no one wants to swallow but it is absolutely true nonetheless and nothing anyone says will ever change that because it is eternal immutable universal truth the solution to being in wrong livelihood is to quit your job that is causing harm to other sentient beings and find work that is in alignment with morality under natural law the end period full stop the end never going to be anything else after that that's the solution is to say this is immoral and i'm not going to be part of doing the behavior anymore and that's the very heart of the matter folks take note where the card is right over the heart only heart-based intelligence will ever bring that correct solution to one it will never be brought about by intellectual understanding it can only be brought about by holistic heart-based intelligence combined with mental understanding of right livelihood but you know what makes that decision to not be involved in the harmful behavior anymore true care and the heart that's what makes that decision the mind doesn't make it i hope some people can hear that and integrate it into their being but guess what i'll bet you 99 can't even hear it let alone act rightly upon it because they're too scared they're too deeply in fear they want to believe that they're more important and more powerful than the entire creation that's what the ego is that's what satanism is that's what being an internal contradiction means it means you think you're more powerful than all of creation combined you think you're more important than all of creation combined because you won't trust in the healing power of creation and in the nurturing power of creation for when you are doing the right thing and when you are in life right livelihood the universe will come to your support and assistance and people are two in their head two in their ego and two deeply ensconced in fear which is what shuts down the heart-based intelligence and makes them continue to do the wrong thing i don't care what any who's offended i don't care who thinks otherwise this is correct and you're wrong what i'm laying forward is correct and you're incorrect and i'm going to tell you straight to your damn face i'm not interested in what people think about me i'm interested in when jackasses complain about the work i'm doing when they're doing nothing there are people that would have absolutely right to complain about how i do something you know who it is it's peers in this work who have done as much and as quality work as me and i can count them on one hand and that's who i would take constructive criticism from without saying what have you done jackass okay i can count them on a hand and that's as sad as sad gets that's as sad as sad gets okay that that's how few there are who are doing this work to this level you know i'm gonna come out here getting harsher and harsher on people folks because as i get older i have less and less tolerance for people's bullshit about themselves and about the world they're living in and you know what i try to approach it from an even keeled perspective with people who i want to establish a rapport with or who i don't want to be super harsh with but you know what i'm really losing that ability i'm losing that ability it's not getting tempered as i get older the temperance is is leaving as i get older and i'm just going to be more and more vicious to people about it because they're not making any effort to understand learn and grow and change no effort no effort i don't see any effort i see people who are just completely given over to the ego all wrapped up in their selves and in their fucking head that's what i see out there 24 7. you know and they can't hear what's being said they can't hear it i'm not saying it any nicer than i've been saying i'm not gonna you wanna know why i know i'm not talking to a fucking child okay i don't care what trauma you went through as a child it's your responsibility to desire to fix it as a result and then actually do the homework to learn how to fix it and then actually exert the will to fix it that's all of our personal responsibility as an adult and guess what it's what i got to start saying to people out in the open instead of trying to be nice this is the problem because i want to be a nice human being see i want i want to take it beyond the realm of morality and into the realm of ethical behavior but guess what people aren't they aren't even deserving of that they're not deserving of the extra nicety because they're so wrapped up in their fucking head they're so wrapped up in the ego they always perceive that niceness as weakness and if i try that approach most people are like they they want to try to walk on you so i got to be an asshole i don't want to be that asshole but guess what until things start to change maybe i need to be you want to baby spoon fucking feed it to people do that your way don't tell me i need to fucking do it that way i don't need to do anything i owe you nothing but non-aggression toward your body your property and your rights that's the only thing i owe anybody that's the only thing anybody owes me under fucking understand that all the jackasses out there who demand shit of people you have no right no entitlement no right to demand anything from anyone except the non-aggression principle i don't need to tell you a damn thing i do this out of the kindness that is in inside the inner core my being and because creation charges me to do it and that's my cosmic job that's why i do what i do at a moral responsibility and then people want to say i don't like the way you're doing i don't give a fuck go do it the way you want to do it then but what are you doing right now you're sitting on your ass in front of a keyboard tapping away spouting your bullshit about what you want to see happen when you're doing balls i for one am sick of it i'm not i'm i don't want to hear it i don't want to hear it go do your own fucking thing okay turn this off if you don't like it go listen to some new age bullshitter who's gonna cram fucking rainbows up your ass all day okay go do that you're not getting that here not from me that's all i have to say in the presentation part i went on i ran it again i took almost an hour to do it and that's how that's how it is so we're going to go to your calls now if you found value in what i've put forward on what on earth is happening and for the ones who have the eyes and ears to hear you realize you're not going to get anything like you just heard here anywhere else i know it i'm 100 certain of it and guess what i'll say so you know this idea of false humility there's no show like this there's no show like this in the on earth and you know what that's the saddest thing of all that's the saddest thing of all so many people are so worried about what other people think about them they won't come forward and say what they really know i'm not here to blow smoke up people's ass i'm here to tell you the harsh truth and if you find value in the actual truth consider making a donation to what on earth is happening by going up to donation gifts at gifts. what on earth is happening you could pick up a hard copy of any of the presentations that i've done we have t-shirts up there and other gift items thank you to all who have contributed that way by the way it really helps you know we've we've able to it produce pretty decent production quality hammer out some kinks get new equipment thank you to all the donors of equipment oh my god like we've had such generosity in the form of people donating equipment everybody out there who has done that you know who you are you know they're not members of actual members of my staff so i don't want to say names because i don't know whether they want that information public but you guys know who you are and it's it's it's it's heartfelt gratitude coming my way and members of my team for what you've enabled allowed to happen here by donating the technological equipment that you have so thank you from the bottom of our hearts also if you haven't taken me up on the arc drive offer this is years and years and years of my research since i was online you know on usenet on irc on the web on bittorrent downloading feverishly as an information archiver and hoarder okay and uh the amount of information i've downloaded is mind staggering a friend of mine a while back asked me to put the best stuff that i ever downloaded on a one terabyte hard drive for him that he downloaded this one terabyte hard drives or like six seven eight hundred dollars almost almost a thousand dollars he hands me a terabyte hard drive i'm like damn you know he's like load this up fill it up i'm like fill it completely he's like yeah can you do that oh yeah i could probably fill ten of these up or more okay so he's like well take the best stuff that you have fill it up so that's what i did and i made a copy of it you know i got one of those drives i made a copy of it i said i'm going to copy this for people who want it and that's that's the arc you know over twenty thousand audio files eighteen hundred video files you know about seven almost seven thousand books in the form of pdf and epub documents mostly pdf i'm working on building up a bigger epub collection now probably on the second incarnation of the arc maybe later this year or next year hopefully i could get to that and uh you know there'll be more epubs on it but if you're interested in it go up to what on earth is happening dot com slash arc or just click the arc tab or button on the site that'll take you to the form that you could fill in to get the shipping directions for the arc please do have respect for the offer and follow them precisely when you get the shipping instructions as a pdf document if you want to make a straight donation there's 10 ways to do that through paypal through patreon i want to thank all the people who have donated through paypal and patreon people who have become patrons through patreon thank you uh there's five cryptocurrencies up there you could donate the old-fashioned way through check or money order and then there are there's the amazon wish list which is our tech needs list the a list of uh technology supplies that we require for the continual operation of what on earth is happening and uh i'm happy to say that's empty there's no items on it because my viewing audience purchased every item that i had on that list and that is very humbling so thank you to everyone who has done that that's that means a lot and it helps us continue to go here and do what we need to do here at what on earth is happening so thank you with that being said i think uh we will go to the calls on discord for the duration of the show so let me just get set up all right i think everybody in the discord chat room can now hear me well and if we're ready to do this let's see who was in the call cue let's go to our first caller essence of anarchy essence of anarchy you are live on what on earth is happening episode 212 following call up show on right livelihood welcome to the show hey thanks mark can you hear me loud and clear thanks for calling in all right yeah thanks for having me and i'd like to say i'm up to about episode 155 of your radio show and i've never been offended by anything you say because i don't like to be offended by the truth and choice right it's a choice oh yeah totally and for anybody out there that is listening to mark and you think he's helped you in any way or you don't want to see him this angry get out there and do the great work because the thing that's going to make you not angry is freedom and people not controlling everybody i don't understand what people find so difficult about that understanding if you get involved in the work and there's more people doing it more people will yeah i mean it seems first principles you know yeah it seems pretty clear and i'll uh ask me this ask me this what do you think the causal factor is in why people don't want to get involved or they stay silent or they think just them knowing is good enough what what's going on in their psychology what's going on really deep down nested maybe in their subconscious psychology why can't they actually convert it into right action i mean i would probably say it has a little something to do with inertia maybe you know you're just stuck in your way and you need some sort of event to kick-start you into motion and i mean for you for me part of that was you and how harshly you do speak sometimes to really make me realize yeah i do have to do something i need to get off my ass isn't comfort you you basically mentioned inertia i would like sort of word that is their comfort level they get so comfortable they don't want to learn anything new they don't want to venture into new territory they they're so comfortable staying where they're at that they'd rather accept lifelong pain rather than change their comfort level do something that might make them uncomfortable in the short term and it might be painful in the short term but it's going to lead to long term betterment of their lives and betterment of other people's lives and betterment of the human condition i don't understand why people are so willing to trade temporary comfort in the short term for like long-term betterment of their lives yeah go ahead well a lot of people out there you see it seems like they might be comfortable physically but they're in such states of depression and anxiety and that's right and it's all based in this whole control system that there is and if they just get off their ass they could get rid of their depression they could get rid of their anxiety they could actually make a good difference they also want to tell themselves that like traditional solutions are somehow set up to help them i don't i don't it's almost unfathomable to my way of thinking because i understand how much this is a lie and set up as a control system like you tell people you know the media is not here for your betterment you continuing to watch this nonsense this puppet show is not going to help your understanding of the world or yourself or your role in it it's only going to make your worldview more poisoned and yet they continue to go on as television watchers watching this nonsense you know you tell people like you you have always eaten the way that you have eaten what what is your state of health oh i'm in and out of doctor's offices i'm in and out of you know getting medical procedures done and it's like and have you changed your outlook toward nutrition and looked up how a truly holistic nutritional uh setup would work for for yourself and your body no no because they're too comfortable in the way that they've always done something but again go back to the traditional definition of what an insane person is it's a person who does the same behavior repeatedly and expects a different result when the only result they've ever gotten is the same result and then they expect one day to do the same behavior and to get a different result that gives them a better you know uh you know manifestation on the other side and the the universal laws of creation don't work that way in order to get a different manifested result in our lives which we say we want we cannot continue to stay attached to the same patterns of behavior because they've never gotten us that result and yet we believe erroneously in ego that somehow we're going to get a different result i don't understand where that thinking comes from i don't because while i may have been locked into that thinking for a while after not getting the result that i wanted to get i did start to think hey i haven't gotten the result with this method maybe there is some kind of a problem and see then people will go well it's you right when it comes to what on earth is happening no it's not me folks it doesn't work that way i'm trying to explain to the people who have the willpower who can bring themselves up i'm not the the totally broken that are so broken that like they're like you know shooting themselves up with drugs and or you know just beating themselves down to the point where they're they're not they're they're not even surviving in the physical world this show isn't for people like that i'm not pretending to speak to them okay i'm speaking to people who have at least an aspect of their act together where they can listen to a show watch take time to watch and really absorb what's being said to a show on the internet in the alternative media and then develop the willpower to actually get involved in the game okay to get on the battlefield to get on the playing field and do something that's who my voice has always been going out to don't think it's just for every single average joe shmoe okay it isn't for everyone okay in that sense i've always been honest with my viewing audience my listening audience that this is sort of an elitist show i recognize i'm not so i don't think that i am so out of touch you know that i don't have an understanding that not everybody's going to be able to receive this as i am laying it down i get that i fully understand and appreciate that dynamic okay and i'm being honest with my audience about that dynamic this show mark passio is not for everyone most people are not going to be able to handle mark pacio i get it okay i'm not going to give you some false identity this is who i am i'm not going to go and give you some false personality as a matter of fact i consider that i really did do that when starting out i really tried to temper myself and who i was because i knew i'm such an electrical outlet that you plug directly in it's going to blow a fuse in most people okay i'm high voltage and that's that's the point you can't you have to step that down you can't give that to most people because they're too frail okay they don't have any thick skin they're so timid and afraid and just all worried and the first little thing that is said that it like hurts their feelings and like they're done you can't go through life like that you know well and for anybody that you know thinks that your message is presented too harshly make a video series called natural law with a baby spoon i mean all you've presented all this information already and it's around it's been around forever wonderful translate that into a very calm voice and put that out there that's what they want you to do don't try to force you to do it go do that yourself i do i think that's a wonderful idea and i think people should go and do things like that the reason i don't do it like that is i am trying to directly communicate to people who are somewhat aware of how mind control works that the very technique of there there is a an actual technique of mind control to only speak in that calm quiet reserved voice and to entrain people to think that only people who talk that way are giving you accurate information that's why the news broadcasters do that it's a it's an nlp technique nlp stands for neuro linguistic programming okay they are using a master occult technique of speech and speech patterns and speech inflections to entrain people in their mindset to set to think to themselves wow this is how truth is delivered because this is the news and it's on tv so it must be true and look at how calm and the calm quiet reserved demeanor that this liar is telling me what's going on in the world but that's all he is that's all he or she is they're a damn liar okay a paid liar and the technique works so well because then people go out into the rest of the world where people are trying to tell them the truth and they may get emotional about it because they realize how much harm is being done to people and when you you get a little angry that not only are people being harmed and people are continuing to do these harmful things that they have no right to do but then people actually believe that this is good for them and is needed and is necessary and they're not getting the message they're not getting the message of first principles and looking at things from a heart-based position of heart-based intelligence and then you get a little angry about that because that's treading all over your rights and the rights of other people that you care about and that shouldn't inspire righteous anger and that's this is why i have to do this presentation at anarch adelphia you know that anger is a gift that anger is something we should never try to dispel we should feel it let it flow through us and then do something with it you know not try to squash it out of our entire personality out of our entire makeup so and for anybody out there that does want to teach natural law and does want to get into the new work good work and likes your presentations but can't handle the anger and the emotion well they're under the emotional mind control so maybe just listen to a little bit maybe listen to a little bit until you get to the point where your emotions are starting to get the better of you pause it you know recollect yourself then listen to some more so if you can get to the point where you can go through all the material and no matter how angrily you're presenting it i mean if you're really in control of your emotions someone should be able to stand in your face and scream the truth at you and you should be able to go yeah you're right i'm with you on that and conversely they could even i i've gotten in situations where people hear what i have to say and are so offended that they're almost screaming in my face and i don't get excited about it because it's like look you can do whatever you want you can go crazy shout from the mountaintop truth is still going to remain the truth and i could say that in a calm demeanor to them that makes them even angrier because they think i'm saying it's only the truth because i'm saying it i've never said i've never made that claim that it's the truth because i'm saying it it's the exact opposite i'm only saying it because it's the truth you know i i tried to to have my research very well performed before i start talking on a topic i think people can see that i think they understand i do my homework and i try to present it in a formal way that is structured to make sense to people but then you know uh it's like i look i go back on some of these things uh and i watch them myself and you know what i don't i don't go oh wow i really got angry there maybe i should reel that in i i never do that i listen and i watch it all the way through and i listen to what i'm saying as i'm angry to the actual content of what i'm saying while i'm displaying a particular emotion that is part of me okay and you know what i come away with you know what i come out of it with i am always astounded and i know this sounds egotistical to people i know it does and i i get it okay but i'm going to tell you the truth i'm always astounded at the at how well i performed the job that i was actually trying to set out to perform in the impassioned explanation of the topic that i was covering and what i think to myself is almost i've never heard that from almost any other human being in person or on the airwaves of any kind radio television internet etc and i'm like therein lies the problem that's what the problem is is that i should have heard this already from thousands upon thousands upon thousands of other individual individuals and i have to say wow i myself am one of the only people that i've ever heard say that just as blatantly and in your face as i said it there in that segment and that crushes me crushes me yeah i mean you did do a great job of really consolidating everything and piecing it together so simply to understand that like you said you've been doing it for 12 years so that knowledge has been presented in that way so people are failing to take it and run with it well maybe we could do something to turn that around at this point i'm really beginning to think that it's getting to the point where it's too late you know i i don't want to believe that i don't want to come to that conclusion and i've said before that i will continue to talk until as long as i think there is an ability to do something about this we are getting to the point where i am borderline thinking that we're we're we don't have the ability anymore to get beyond the slavery of the human condition that we've allowed ourselves to be put in and when they take the ability to broadcast the truth away from people which they're rapidly doing it's going to decline worse and worse and worse because when i leave the house the the pure imbecile behavior and thought process that i see on a daily basis is so overwhelmingly mind-bogglingly colossal that i can't imagine how we're ever going to crawl out of the hole that we've dug for ourselves my imagination has a hard time believing that it can be done at this point essence of anarchy thank you so much for the call and the insights always appreciate it uh great caller as always let's go on to uh let's see let's go to arnold from paris arnold from paris you're live on what on earth is happening welcome hello mark good evening good evening how are you doing i'm doing very well thank you um this is uh thanks for taking my call this is this important you know topic and i'm happy to make the call today as a matter of fact um i i fully understand this topic and it resonates deeply with me i'm gonna tell you why because when i first discovered your work and that was back in 2014 i was studying at the top three university in the world for political sciences and international studies here in paris france and i was on a path that was you know very well defined to joining that world um specifically you know being pushed by you know my family and ambition and all this so i fully understand that making the decision to completely change the direction your course is is could be difficult but i think there's no way around it you know there's a lot to lose in the game there's the expectations from your family friends there's the financial security you know the benefits of having a job the prestige status power every all these things just weigh in the balance that prevents people from from making this decision but i'm happy to report that um during that my last year of studies there i finished i finished my studies there but i decided to do something else and not join that world and if i can do it and being so entrenched in that world and rubbing elbows with you know this this university is where all the presidents of the the last republic here that's where they studied right and if i can do it then find a resource do it and today i'm happy to be doing something i really love and i'm passionate about and that is working in the end of the field of alternative health and helping people transition to a plant-based diet to get their health back because you can't that's that's very commendable let me ask you let me ask you a brief question if i may yes how long was the period of adjustment when you decided i don't feel that i'm doing something that is really in a moral capacity and i want to pull back from that and i want to start to do something that i think really could have a better positive impact for human beings was there a period of uh quote suffering adjustment you know where you had the struggle and if so how long did it last when from the time you made that decision to the time that you went into your your new form of right livelihood yeah that's a very good question and i always saw myself as an outsider in that university and i was always into alternative you know sources of of information and but but not nothing consequential enough to make me make this big decision i remember exactly the day i was in my house and i was i saw your interviewer on info dot com you were interviewed by um one of the the journalists there and you were talking about the occult and i was seeking for this information because i had more questions than answers at that point on what am i doing is this the right path for me and i was sort of like a rebel right but without the proper piece of information that was missing which occult right and one as soon as that com came into the picture i would say that you know i i i felt like that was what i was looking for and that a year before i you know finished my studies see that i already married at that point you know that makes me very happy to hear you don't want to know why because i continuously bring back the the understanding that that the main piece of the puzzle that is missing for most people who don't really understand the real dynamic of what is taking place in our world is that they don't understand the occult they don't understand the occult aspects of what's happening in our world and they don't really get the occult teachings okay they don't understand what that really means for the self to do the internal work so they don't understand the external aspects of how the occult is being perverted and used against them as a weapon and they certainly don't understand more so even they don't understand the internal dynamics of how this knowledge could be used to actually instead of enslave improve the human condition if we all make it take it out of the realm of the occult and make it common sense knowledge and it just makes me feel good that like that was the impetus that the push that you needed to really make that decision was to really get that part of it the occult aspects of it i wish more people would look into that aspect of reality and stop thinking that it is some you know just uh you know conspiracy theory or you know something that isn't required for them to take into themselves and really understand how it works because it's the most essential and critical information and this is what the sorcerers of our world the mind controllers the social engineers of the world are counting on that people will never look into and therefore the playing field of knowledge will never be leveled and they will always maintain a power differential because they maintain that differential in knowledge and they keep other people in the uh you know relative level of ignorance that they are in regarding the occult so that makes me feel great that that was one of the turning points for you and that's what led to it yeah exactly most people get like blocked by the simple term and there there is a level of open-mindedness that needs to come into play um because people would just see that word and completely be like hey that's not you know conspiracy theories i'm not gonna do that way so there's a level of you know open-mindedness that plays but you know it gets even worse because my specialty in that school was actually what's considered international security and i was considering at some point before getting in touch with this piece this body of knowledge um that you presented i was on the path of going down the route of joining a parallel school and being a high ranking in the military wow in in a capacity of you know decision making because of you know the advance level of my degrees is entering as a master's degree i could have gone up the ranks right boy without having taken you down down a path of wrong livelihood for certain you know so yeah absolutely and and that's that was really you know that's that's the path i was going down that's that's what i to do you know and what i really realized you know the thing is with retrospect because i was also working and traveling abroad i downloaded all your podcasts um on my phone before i traveled and i was listening to them in haiti with no internet connection you know every single day i would listen to them and it's a great way it's a great way of doing it you know because it's like that's what digital devices make possible i think that's one of the positive aspects of phones and tablets like and most people don't use them like that they're real dependent on that internet connection but that's a great way of doing it and being able to do it while you're doing other things like driving or you know if you're working a job that just involves some labor that you don't have to focus in too intently on and divide your your attention between you know you could do it if you're doing you know sort of uh you know regular uh laborious work uh and um you know that's uh that's a great way of using a digital device and i i think more people should use it like that and that's kind of where the name podcast came from it's like you could take it with you uh you know you don't have to be sitting at a a computer with a wired internet connection you could actually just you know load that up and you know download them and take it with you and listen wherever so i think it's a great use of it that's how i wish more people would use the podcasts yeah there are always options and you know i wanted to say something is working with a coach now and you know people knowing open opening up about their lives and and so on we work with that but we work a lot with careers and i think this is very relevant to the topic today is that most people who come to me they come for the diet but you realize that they're completely unfulfilled right in their jobs right you know and part of my work is is consciously to try to show them and this is the message that it did you know that resonates with most people is there always options there are always options you know people i've had people like quit their nine to fives and you know the wrong you know livelihood path and go to work online to stay with their children and stuff like that so there are always options especially today with the with the internet and working remotely i think it just has you just have to um spend some time and investigate what's going to work right for what's going to be right for you and and make that decision you know and what what i come to realize with my clients is biggest obstacle that they're confronted with is what people are going to think about them that's right what is x going to say what is my family going to say what is going to think of me of having failed or changed careers or or making less money or all stuff it's a big big obstacle it's important of other people's minds that's exactly right and that can only be overcome internally in the person's own self you can't battle that outside of the self that's an internal battle that only you can wage and win arnold fantastic points i mean really really uh great points that you brought to the table there because that is what's holding most people back you know it's not only fear of what's going to happen in the short term you know which you can't you can't necessarily see but you do have to have a certain level of trust in creation you know and that that is that is a required leap of faith you know i say you know belief is largely irrelevant but guess what there are certain forms of leaps of faith you may have to take when getting involved with the truth the first is that the truth exists that's a leap of faith you don't know for sure you're going to come to an understanding of the truth when you don't know something and you're just setting out on the process of learning you have to have faith that there's the truth that lies around the corner that you're going to discover and it is there you know but at first that is a leap of faith same thing when it comes to changing careers when you know you're doing something that's wrong you have to be honest with yourselves you can't keep bullshitting yourself and telling yourself that it's okay or regardless of why you got involved with it and like arnold said there if there's always a choice it is a personal choice in every moment for people to continue to do what they are doing as a career a choice you know while okay i my path in life led me to doing this i have a choice i could stop doing this at any moment i could walk out of this room right now if i want i choose not to do that okay but we have free will we have free will exercise it take your own power claim your own personal power in that regard you're not powerless you know but before i go to the next calls i want to talk a little bit about that in the form of one the final question from last week's show from joe and two i want to talk about a little bit about the dynamic of respect before i go to the next caller joe was saying that you know he thought that like we should give more options and you know support for people coming out of the military well guess what there's a job there's there's there's an aspect that you can get involved with and do yeah again again it doesn't have not all avenues of fulfillment have to be done and created and fulfilled through what on earth is happening folks okay what on earth is happening can do what it does okay state of anarchy can do what it does venezuela could do it he does anybody can do what what they do okay you know i wouldn't presume to say to state of anarchy guys you must do this it's like you know they're going to cover the things they want to cover free thought projects going to cover the things they want to cover okay it's like we we are playing a role okay so it's like if you have an idea of something that you think isn't being fulfilled in the community or in this field you do it don't tell somebody else to do it or think that they should have that base covered you cover that base you go do that task form an alliance with other people who have some skill sets if you don't or you learn the skill sets and go out and do that task provide support for the military looking to quit their jobs you know i mean i said i have the domain quit your cult points to what on earth is happening dot com if you type quit your cult dot com okay it goes to what on earth is happening dot com we were gonna have like a whole thing of how to get out of the military and the police maybe somebody should take that whole idea and run with it you know i could you know ask the person who's pointing the domain quit your cult.com if somebody else does a good enough job and sets up a site about that dynamic and provides all kinds of support we'll point the domain to them instead of to what on earth is happening or i'll link i'll put a big banner button on what earth is happening and link over to it if i think you're doing a good job you know it's like you don't need i nothing has to run through me folks i want to do what i want to do i want to talk about what i feel is important to talk about right there are plenty of other things and other options that people are going to want to come up with that i don't mark passio does not need to do okay maybe mr or miss x can go and do that role and they'll probably do it better than me because they thought it was important whereas i didn't think it was the most critical thing to talk about or do or focus on so that's what i'm saying don't wait for me to talk about it or do it if you think it's important get out there and do it it's very simple convert your actual thought in your mind to an action that leads to a manifested result in the real world now we're two in our heads this is the problem folks i see it over and over and over and over and over we're two in our heads we want to constantly just think think think think think bring it from the realm of thought to the realm of doing that's one of my biggest pieces of advice for everybody stop living in your head live in your body in the real world this is about boots on the ground spirituality that's what what on earth is happening has always been about taking action too few people are taking action way too many people are flapping their gums the next thing i want to talk about is respect i'm not talking about like oh respect me i have respect for i'm talking about respect toward people who are in fields of wrong livelihood who are not in right livelihood i constantly hear all the these terms of endearment and respect oh thank you to our military for your service thank you to the police for keeping people safe thank you to the bankers for running the economy thank you to the media for telling people the news all this undeserved respect for people who are just immoral trash i don't care who i'm offended offending by saying that you deserve to be offended if you don't acknowledge and understand that what i said there is true the people in these positions people all so much respect oh he graduated from medical school you know how much oh we should have a big party so much respect you're going you're basically going to be going contributing to the degradation of human health because that's what doctors do don't give a fuck what you think about that or what you have to say about it i don't care it's true whether you acknowledge it or believe it or think that it's true or not you don't understand what's going on you don't people think they do and think that these people are helping but they don't understand how controlled this dynamic is they don't understand who's making the real top level decisions and they don't understand that they're fucking satanists there are people who are psychopaths who only give a rat's ass about themselves and the money that they make and the power that it affords them that's it i think these doctors and lawyers and politicians give a shit about you they don't care about you at fucking all not even the in the tiniest little sense of the word they don't care about you at all they care about power and wealth and nothing else and only things that the trust that they care about is what can lead to that power and wealth that's the only form of trust with their patient relationship they care about they want to hook you and get you on board with with you believing that they care about you that's what all their behavior is designed to do that's what a fucking psychopath gears all their behavior to do and you can't tell anybody you can't tell anybody this people they they just they'll despise you for wanting to tell them because they know better they know better well guess what keep doing what you're doing and fuck yourself up motherfucker that's what i have to say keep doing the nonsense shit that you're doing and get more fucked up because you ain't gonna learn by words you're gonna learn by being that's how you're gonna learn you gotta hurt yourself worse so go and take the fucking poison and listen to the people who are the psychopathic jerk-offs telling you that they know what's best for you and your body when they they're not telling you anything about nutrition they're not telling you anything about mind control they're not telling you anything about what's really going in the world on the world's power structure they know nothing about the occult they know nothing about how things really work and then jerk offs like this have the hubris to like post placards in their offices saying your google search is not the equivalent of my medical degree no you're right it's not it's very superior to it asshole it's very superior to it smacked fucking asshole okay very superior to it because people can do a wide variety of eclectic research cross comparing different things that you're not doing for the safety and well-being of your patients because all you give a fuck about is the two lexuses in your four cargo family garage that's all you give a rat fuck about and and when it comes to respect this is the dynamic i'm talking about people you still have respect for people like this or a lot of whole lot of people walking out on the street do a whole lot of people in my family and friends group do no good things should be being said about these people there's no redeeming qualities in them they're not good people they're not good people for the very ignorance that they dwell in this is what you got to understand stupid people are bad people they're not holistically intelligent nor are most people in the world that's why the world is filled with bad people they don't have it right they don't have the answers they haven't done the research they haven't done the homework they haven't come to the truth and because they're so ignorant that's what makes them make bad decisions and therefore become immoral bad people ignorant people are bad people i don't want to hear make excuses for them because they're bad god forgive them because they know not what they do fuck that that's bullshit we should be harder on the ignorant because the ignorant are doing tasks in their wrongness about what they think they understand that are hurting other people so yeah you're damn right my search engine search isn't the equivalent of your asshole rockefeller and rothschild foundation fucking funded medical degree that is poisoning people where your only product is drugs pharmaceuticals and surgery that you want to sell people on to get rich and keep yourself in the position of power that you're in because you're an egoic prick nobody should have respect for these people respect for the police respect for soldiers you order following trash that they are people who have given up their own moral decision making capacities to go and follow other people's fucking orders i have respect for that you're a piece of trash a piece of fucking trash i'm done i'm done people i'm done if you can't tell i'm done if you can't tell i've been doing this shit too long too long burned out on it tired of it tired of other people's fucking moronic ignorance and trust thinking trying to put out the idea that they know something you don't know squat is what you know and here's the thing the people who actually do know are staying too damn silent and not making this a confrontative thing between people and telling them how much their heads up their ass and how much they don't know and how wrong they are until it's so uncomfortable that they find their ego breaks and they do look at it that is nowhere near and has never been tried and has never been tried and has never been tried okay people want to say oh that wouldn't work you don't know the first fucking thing about whether that would work because you never fucking tried it and it's certainly never been tried on a mass scale and that's why i'm aggravated with the condition of humanity 12 12 years on doing this bullshit when the world and the world's in a far worse state than the day i fucking started because people don't want to get involved and open their damn mouth because they're too cowardly yeah i'm going to be bitter and harsh about it how about so harsh shut the fucking show off and go out into the world and do something don't watch my stream don't watch the show go do something go get people out change their mind hammer on their mind till they quit their job if they're in wrong livelihood don't leave them alone about it sever your relationship with them say if you don't quit i'm done with you as a person yeah that's called that's called the sword that needs to be brought to the earth to divide people against each other make no mistake i'm i'm trying to bring people together in the spirit of the truth but if they don't dwell in the spirit of the truth we have to be willing to cut those people out of our lives and say if you're going to do this you're going to do it on your own with no support from me how many jackass order followers wives and mothers will say that to them or sisters or brothers no because they're such cowardly chicken shit pieces of dirt patty lager you're live on what on earth is happening welcome my friend hello mark how are you today well i know that how you are you're incredibly passionate and i truly appreciate it and you um honestly i speak for myself here but you give me so much strength through your passion because this is this is the type of voice we all need to have we have to say no to this insanity the most powerful word of all time in the whole universe is the word no so somebody actually just sent me it's a very synchronous very synchronistic patty that you would mention the lost word uh and uh somebody actually just sent me an email no i don't i'm not going to bother it's not worth mentioning their name it probably they probably want to remain anonymous anime anyway and i wouldn't even bother to care to mention their name but they actually said like you need to get out of the idea of using the word no you should never say the word no and just think about that they just use the concept of negation to tell me that i should not use the word no just think about the contradiction right there okay but they're saying you should try to frame everything in the affirmative and then positive and never tell anybody no it's like the you this the the colossal ignorance of the world of the occult is what i'm saying this comes from the pure polluted new age garbage stream that's out there of what spirituality is that people have bought onto they've bought into and believe it as a religion like with religious fervor they believe these nonsensical ideas that are coming at them from happy flower land well remember the the the simpsons thing where he's talking to mart homer's talking to marge in the bedroom i gotta play it and said that this is the new age he goes look at me i'm the magical man from happy land i live in a gingerbread house on gumdrop lane you know i gotta play that quote on what one earth is happening one day because this is how the new age people this is how they see the world this is the naive children that they are inside in their psychology like they're stunted emotionally and spiritually stunted children that never grew up and became an actual adult in their mindset and then they're saying other people should take the same naive approach to life that they're taking that is led exactly where oh that's right to a total enslaved society the worst free speech is now being shut down that's where the new age has gotten us the new age hasn't solved this problem not a bit the lost word would solve it though i can guarantee you that and guess what if the lost word isn't respected we may have to use the last word to solve the problem and that won't solve it that'll extend it that'll extend it you know and i want it not to have to come down to that but guess what i am another thing we got to talk about again on this show in addition to the lost word is one of them what religion really is these ideas are still not grounded they're not grounded in people's mentality i know people like yourself understand and patty and i'm going to let you get back to it in a minute and you could take some time but it's like we need to revisit some things we need to revisit religion we need to revisit taking your power through saying no we need to revisit new age bullshit you know again you know uh and people really have to uh deeply understand what the real occult spirituality is because they're buying into these notions of we should never get angry we should never say no teaching through negation and saying what not to do is somehow the wrong way of doing it it's just such a babyish naive approach to life and reality and real spirituality that i don't understand how there's so much information in the world about the the falseness of these narratives that people still never encounter the truth regarding what is really taking place i i i there's so much poison signal that's the problem they're still in the poison stream of taking in poisoned information and false spirituality so very synchronistic that you would say that the real answer is to say no quitting an immoral job is a form of using the lost word no it's saying no i will not cooperate with evil anymore i will not cooperate with the control system i will not cooperate with something that is doing harm to other beings no i am stopping i am not going to continue any further exactly and and it's like what you said earlier you know this is all part of how they control us um when you mention jeremy locke's book it's it's all about control and and you know where i see this where i'm coming from i was like one of your previous callers today i i was on an educational path that was going to send me into a very dark place and i could see it i could feel what they were doing and i was in medicine you know i almost completed my allopathic medical training and when i saw what was being done i had to i had to get out of it i'm like i cannot treat people with these pharmaceutical suppressing drugs and then the big push for vaccinations came and i remember they were really pushing me to get the flu vaccine i'm like what the hell the flu is not even that dangerous why do i need to be vaccinated against this and the more i saw and then i you know and then i started a phd program in immunology because i thought well maybe if i get out of medicine i can really understand why they're pushing these vaccines by getting a phd in immunology and there i was and all of those people that had phds behind their name and they're going into this research they're pushing these vaccines like there's some glorious type of you know thing that's going to save humanity and all i could see was that it's suppressing us it's a huge part of their income as well when they sell the resell those vaccines to people well it's harming us more than anything it's creating a society of idiots it's creating a society of i really think people are more dumb after having been vaccinated of course i can't understand it's shown that it will uh lower iq and it's it's it's responsible for all the emerging autoimmune diseases that we're seeing probably diabetes uh certainly autism i mean you know autism is just a word for vaccine damage you know it's uh that's an invented word folks if you don't understand that you know the medical industry actually invented the word autism because they're seeing all the types different types of vaccine damage that uh you know was was occurring and was emerging and they needed a blanket term to explain to talk about all of them as one umbrella term and so they came up with the word autism as this quote disease but really all they're really talking about in the medical industry when they use the word autism is various forms of vaccine vaccination damage that occurs to people when they take vaccines it is and and so i switched to a naturopathic program and now i'm a naturopathic doctor and i i'm not licensed i don't want to be restricted in that way i've had three clients in a short period of time all who have had children that were vaccine damaged and one it breaks my heart this little boy he is he was so inflamed by this vaccine at the age of three and by the way they were all the mmr vaccines all three of these cases shortly after their beautiful vibrant children shut down they're in so much pain the pain is overwhelming they can't speak they're hitting their heads against the walls i mean families lives are disrupted this one man he was living for his family was in india he was working in japan to support his family he had to leave his job because his family was going to be kicked out of their small apartment because their son was hitting their head against the wall oh my god and it's just this is what they're doing to these children and so i can't support this if there's just a half of a percent that this could happen these vaccines are dangerous you believe not only in the medical industry but in the average population there are still people that do not want to tell the truth and accept the truth that uh all of these vaccines are damaging children in in these capacities i can't believe people are still in that level of denial we're not even at the point where we're acknowledging the problem or the origin of the problem we're still in a place of total denial as a society regarding this stuff and it's because people haven't done the research they haven't really deeply and eclectically looked into it and they want to believe people who have a vested interest in keeping the status quo the way that it is because they make a tremendous amount of money through these established industries and i don't understand how can people not understand that how could you not understand this person's receiving an enormous amount of money from doing this behavior why would you believe that the person would look at the truth and go oh you know what that's true but i gotta give up 12 million a year salary to go back to making maybe 30 000 a year if i quit this job and take something else you know there's there's one person in i'd say 10 million we're not even looking at a one in a million ratio one person in that position in 10 million is going to have a moral core of themselves when that knowledge reaches them they're going to say i must quit this job 1 in 10 million is the number that i think it's about at that's the ratio okay i'm so i'm not like naive thinking people are going to hear mark pacio's words and then there's going to be a mass exodus from the police and military i get it i get how deeply entrenched and owned by the ego people are you know i one of the quotes that i see going around in a meme on social media by me is it isn't so much that everybody has an ego it's that the ego has everyone that's one of my favorite quotes that i've said because it's true everybody is owned by the ego you know it's this force that just owns people in their lives and their their behavior and they can't break free from it they're not spiritually strong enough to break that trance to get out of its thrall you know they're like a puppet on a string and the ego is just pulling those strings and making them dance and they can't be honest with themselves enough and then to do the shadow work the occult shadow work to deal with it and you know this is one of the things i briefly talked about when i was on the wizard factory is we have to learn these techniques you got to learn meditative techniques you gotta learn potentially uh breathing techniques that takes you into uh higher and altered states of consciousness you know you i just look at the some of the trans personal breathing techniques wim hof uses to do some of the incredible feats with the immune system that he does for people that aren't familiar with his work i suggest becoming familiar with it you know look at the the transformative power of tapping on meridian lines of the energy body you know this is known as eft or emotional freedom technique there there's concentrative uh tasks that you could perform i think this is what computer the computer field can help people with focus who lack focus by learning things that are structured in like programming and or other aspects of computing and then you have meta not a contemplative techniques like literal daydreaming and art and music these are these are combining different layers of creativity and and daydreaming functions that we then you know recombine to create you know different artistic uh expressions i talked about this in this interview but it's like these are techniques that i think people who really find healing eventually have to employ and we have to learn which ones are you know we're good at which ones we can work at you know and and do them on on a steady daily basis you know martial arts could be a part of that you know um uh you know just general exercise you know and and you could do walking meditations you could do meditation while biking you know that you've heard people say this puts people in the zone this is part of holistic health of the psyche and the spirit you know it goes hand in hand with nutrition and naturopathic techniques you know it's it's all an integral approach that's why i say my entire approach here of what on earth is happening is not looking at one thing or one avenue or one path or one aspect it's like you've got to have a whole integral approach and combine different aspects and take the best from every tradition and every potential spiritual pathway and combine them into a total integral solution so patty i i just want to say thank you for choosing to come out of that allopathic harmful aspect when it comes to medicine and alleged healing and to really do the work that you're put here to do you answered that true vocational call of going into the the work of naturopathy and i i you know salute your courage to perhaps go through whatever type of period of readjustment that you had to when making that decision so tell me a little bit about what that was like for you well leaving medical school was was incredibly hard i mean my um my mom especially wanted me to be a doctor she wanted a doctor in the family and since i was a little girl she kept telling everyone i was going to be a doctor and i knew how much she had on the line but can i step in there briefly and then i'll let you get right back to it but see the thing that she needs to understand is that you are see you are a doctor okay you are helping people like that okay you're just helping a different way than what was in her preconceived expectation you know my mother saw me doing a tutoring session with a computer student one time she stopped in to like you know have some interaction with me or get something that she needed and i was tutoring a computer student and she goes you really explained that really well like why didn't you should have become a teacher and i just go i am a teacher you know this is what i do every day you know not just with that but this like didn't even compute to her that what i do on what earnest is happening is i'm a teacher okay it's like so you know this goes to how controlled people are in their perceptions that she does still doesn't see you as that you know uh and it's like you know you just have to like readjust attempt to tweak or readjust their perception go that's exactly what i am that's what i do there is a doctor in the family you are that that being it doesn't matter what letters are after your name you have the ability to help people to heal themselves through the knowledge you've taken in and share with them so i'm sorry continue no that's okay and and so it you know it was it was very challenging um because i do love my parents so much but you know at the same time you have to embrace that power that each of us has within us to be able to be the example that they then have to make the decision are they going to embrace who you really are are they going to love the daughter or the son that you are at your core because that's what we put her on this earth to do we each have that special gift within us and if we don't dig deep to find that so that we can share it we're just here again a drone uh you know the dead we're the walking dead just following the orders and all of the little desires that the powers that should not be have us doing i mean we're not even living life the program is just living through us it's just you know operating through our body yeah go ahead no go ahead well i'm just amazed at how many people that i consider you know heavily educated still do insane things that believe this nonsense and you know i've had friends in phd programs in immunology who have had their own children vaccinated and they they think it's normal that the child breaks out with a fever hours after the vaccination yeah like that is the precursor to brain inflammation that's part of this response that you should not be trying to evoke that's right you know with these i mean even the the antigen that they're injecting whether it be a dead or an attenuated virus that's dangerous of itself but then they're adding all of these adjuvants the mercury the dead beetle cells all of this other nonsense and so i see you know myself you know as i learn more about science because i've always been very passionate in understanding how the human body works in my desire to help others free themselves as i look into this all i want to do is share you know the truth of what is really taking place in the body and so when i work with clients as a naturopathic doctor that's my job and and i tell them this is what your body's doing and this is how you can help get out of its way so it can get back to a state of mind that's right that's right to stop putting the toxins in and to start putting the building blocks that it needs for self-repair you know into it you know and imagine that they believe people who are as you said allegedly educated they're not really educated they're indoctrinated they haven't done any of the real searching to really truly educate and deprogram themselves but they actually believe these people whose brains are capable of understanding okay let's put it that way in that sense uh they have the potential for being educated but they believe in their current mind controlled condition that putting soft metals into a child like aluminum and mercury is going to actually help that person's immune system this is how far into mind control humanity is and it's it's you know what it's about it's about attachment to the ego they went through the ringer of trying to you know you know go through the gauntlet that set up gauntlet of you're going to go through this step and then this step and then this step and then finally you're going to get that degree you're going to graduate and you're going to be able to have a practice of your own and then you're going to make a lot of money and it's all ego attachment it's all like look at my status look at what i endured look at what i went through it's a story they're telling themselves but they're not actually looking at what are the results of the behavior that you're putting forward that's what they're never seeing they're just saying hey look at how i'm being rewarded for jumping through the hoops that i jumped through like a good little boy and a good little girl but they're never looking at the actual manifested result in the real 3d world upon other living beings that their behavior is having that requires heart-based intelligence and so you had that heart-based intelligence that's what's still lacking that's a spiritual development that they haven't gone through they haven't done that internal work to develop that spiritual knowing that spiritual intelligence you know and this is why people have to get out of their head they got to stop living from the head they got to get out of the ego i'm not saying that brain function isn't incredibly important and you have to have all of that too you have to combine it but if you're only living from the head and there's no heart based intelligence that's a recipe for annihilation disaster death chaos and slavery long term and in my opinion too one way you can strengthen that connection between the head and heart is to speak the truth because where's the throat chakra right in between that's right you have to get that out there and that will establish that connection and the more you speak it the more you connect and share with others the more we're going to actually change this planet and hopefully get us back on track because we are enslaved here and we're just going along with the flow and it's getting worse and worse like you said but the more of us can speak up we're going to get outside that's right that's exactly the answer the universe is spoken into existence we are the vehicle by which truth is expressed in our world patty 100 magnificent um you know aspects that you brought to the table uh thanks so much for calling in thank you mark for everything you got it see it's like and this is what i have to say and i say it all the time it's it is very humbling like my callers people who call into the show who care enough to call in and say something they really get it they really know where it's at like they've really done their research they've done their study they have life experience it's not just like book knowledge folks these people that i talk to have actual real life experience okay and it puts them in a position where they're able to speak on this stuff you know they just might have to refine it work on it a little bit come into their comfort zone with it you know but these are all potential teachers here you know what i mean and uh the the callers that i have as part of what on earth is happening are the absolute best in any form of internet radio ever in the history of really talk radio as far as i'm concerned i mean i i've listened to talk radio pretty much my whole life on the regular am mostly am airways but am an fm and i've listened to many many many podcasts and you know uh types of different types of interactive shows on the internet and i just you know have to reiterate once again there's never been any callers better than the what callers to call into what on earth is happening in all of my experience listening or watching any types of shows like that so thank you and i you know hope that that continues into the future with the quality of of calls and uh things that people bring up when they do call into this show so let's keep it going and let's uh go to our next caller in the queue let's go to nicholas peter nicholas peter you are live hey mark how's it going doing really well as far as can i not hear you the work um i should be coming through your your your headset might be muted so let's try it again nicholas can you hear me now i may have to come back to you uh let try to resolve that you're definitely unmuted on the server and we can hear you fine but if you're not hearing me your headset may be muted so if you can unmute that in the discord interface uh you would then be able to hear me coming through so i'm going to let p nicholas peter go and we can come back to him all right let's try another caller let's go to let's go to apox apox you're live on what on earth is happening episode 212. welcome hi mark how you doing i'm doing well welcome back to the show yeah thanks for taking my call um it was it's been a pretty good good show so far thank you um so i had a question it's not exactly about livelihood but i think it's very closely intertwined with it okay um so my question is um i've been trying to to talk and bring these issues to other people um and i find that when i'm when i talk to other people and try to explain these concepts to them it really helps myself understand the concepts better and see where the holes in the understanding are in terms of like my knowledge on the issue so i find that to be a i'm sure you've found this as well but it's a self-teaching process as well you learn from the interaction of interacting with other people regarding where the psychological resistance factors are what they're going to say as a rebuttal you know how they're going to be in denial of certain aspects of truth and where you how and where you have to speak to them regarding these different dynamics because the mainstream media and the established institutions are very very good at the brainwashing and nlp techniques that they use so they have people very much right in line with i mean lock step in line with how they want them to think and it's a very difficult process to break down but i agree with you apox when you when you do engage in that dynamic discussion with others you learn yourself it's a self-teaching process whereby you get better at being able to respond and help people to to come to an understanding of truth uh for themselves for sure so yeah i agree i find it a very um rewarding process um so right now like from listening to all your material and you know in terms of right livelihood and everything i find that it's one of the the blocks that i've come to is um in terms of morality explicit like how to really help people understand that that it's objective so i can like when i spoke about this with a with a few people i've i can kind of intuitively understand how morality is objective because you know it's ingrained in our physiology um from an intuition um perspective we can find that through right brain thinking and holistic holistic approach thinking but um i i find it hard like i so i deal with a lot of left brain uh left brain oriented if i if i'm if i may briefly i'll i'll um anticipate this a little and just talk about like because you're talking about dealing with left brain people who are largely into the whole paradigm of the primacy of matter and the newtonian materialistic worldview correct in general yeah yeah okay so they certainly understand the world of matter to an extent okay and they're they're pragmatic okay so what i would say is you you would start and this is very much related to right livelihood as a matter of fact because objective morality is what right livelihood is all about okay bringing our behavior into alignment with objective morality by choosing a moral uh set of tasks to perform as part of making our daily bread okay so you know part of it is um you want to speak to them from that perspective if that's where they're more geared to because if you start just coming out with advanced spiritual knowledge you're going to be like oh this is all woowoo you know so i would just say well you believe that we are physical beings we live in the world of matter right do you think our actions exist in some nebulous uh you know other dimension or do our actions also exist in the physical world of matter in the 3d physical world of matter and 100 of them are going to tell you that they believe that our behavior our actions exist in the physical world of matter okay aside from words that we speak to each other but really those are still in the physical world of matter because it's a vibration that i'm making with my throat my vocal cords pushing air over them out my mouth and then that's reaching your ear there's a physical interaction that even comes with speaking of words okay and then also through digital communication then it's just transferred over different digital media so they're all going to agree yes behaviors that we physically take in the world exist in nature in the natural world no one for coming from that left brain paradigm is going to say no they exist somewhere else because then they're going to have to explain where and then they're going to find themselves in a conundrum they're going to automatically logically defeat themselves if they say the body exists in the physical domain but the behaviors that the body performs does not that of course they're going to say the behaviors that the body performs that we choose exist in the physical domain well there's your moral objectivism right there how could a behavior exist in the physical world and the attributes of the behavior not exist in the physical world but only exist in some mental realm somewhere the attributes of the behavior since the behavior exists in the physical world also exist in the physical world and therefore have to have objective properties it's it's a logical it's an unwavering perfect logical conclusion if somebody from a religious point of view should come to that conclusion just with just simple logic of it being explained that way if they can't i almost move to the point right there that i think there's something very seriously physically damaged with their brain i literally go to that point i personally in a discussion i were if i were to be having a discussion with them and it led to that point and they told me the body exists in the physical world the behavior either doesn't exist in the physical world or then if they tried to say the aspects of the behavior then can't exist in the physical world i would say right there you're not being honest with yourself you're trying to lie to yourself and to me about what is really objectively the truth there because you want the conclusion to be some other way than it actually is and i would say you're not being honest it's it's just it's like at that point if they just said i think the body exists in in the physical domain i think the behavior exists in the physical domain but then magically the the aspects or attributes of the behavior float off into some nebulous constructual world i would just say you want that to be true but you deep down inside you know that it isn't you know that it is logically and objectively true that the characteristics of that behavior must also play out in the physical world and if they're being honest with themselves you know there is no relativism after that that means that the behavior has objective results and therefore there are objective qualities to it regarding whether it harms someone or does not cause harm to someone and those things are objective because you could define them through the apophatic ways of defining a right anything that does not cause physical harm or just loss to another sentient being is is a right if it does it's a form of theft and then you could define the forms of theft this is what get sussing out and working to to logical understanding of what first principles are you know then you could define the forms of theft murder taking of life assault taking of well-being to theft taking a property rape taking of sexual association trespass taking of security in one's living space coercion taking of someone's free will rights you know right to exercise their free will and lying taking of necessary information that people need to make informed decisions you know all of these are forms of theft they have an objective result of harm that happens in the manifested 3d world to another being when that behavior is taken and like i can't believe how many people don't think that like behaviors either do or don't have an objective result of harm see this is over complexification and this is obfuscation of a simple elegant truth that should be common sense we don't need thousand page discourses written on it the the truth of whether you're harming someone is written in your heart this is what people have to understand we don't need to analyze it endlessly but i i hear what you're saying in that when you are bringing this dynamic up they've done such little spiritual work upon themselves that they are largely coming at this from a perspective of only left brain physical thinking but even from that perspective you can show them their logical fallacy because if they even at this point in their spiritual development are at the point where they are still accepting and believing in the uh paradigm of the primacy of matter through the newtonian uh you know materialistic paradigm of science you can still take them to the logical conclusion through that left brain doorway by talking about is the body a physical thing is the behaviors that we do with the body if i just hit someone for no reason that just happened in the physical world right so then are the characteristics of me punching that person just all constructional or they have results in the physical domain of matter that's why they matter you know there's a reason why the words are the way we speak them how they ended up that way so you can take people to that understanding through the left brain doorway it's just a matter of learning the technique of doing that i see yeah thank you i i understand what you're saying in that it's it's almost it's a logical perspective of why that it's it's uh objective and it's i understand those people who they haven't done enough research into the left brain into looking at things from the left brain or they would understand that it is objective i agree it's it's almost like they're not uh far enough in their development of the logical faculties or they would come to the correct conclusion about objective morality that does involve left brain development as well as heart based intelligence and heuristic holistic right brain understanding you know that acts as the the parallel processor of the brain that sees the wide picture the wide view from many different points of view you know they need you need all of that that's that's the real trinity of the self you know those two hemispheres of the brain combined with the heart then you could say there's the quadrivium of combining that in the world of action with our our will center our guts you know so there's these are all brains like we have three brains our guts are our brain literally our intestines are like a brain our heart has a brain and it literally has a brain in it that exerts a more powerful and dynamic range magnetic field than does the human brain and then of course our actual physical brain is the the actual third brain in the body but we have three brains literal three central systems of intelligence that operate in the body and it's the the heart the mind and the guts you know and this is what we have to develop care intelligence and and right action you know it's that's that's what the real trinity of the holy trinity of consciousness is really all about yes i understand um i'd just like to say what so thank you for that and i'll try to when i talk to people now i'll try to bring up those um um those those arguments and frame them in a left-brained manner to help them really question their beliefs um from now on yeah you know it's like um what it's like uh is uh when you're uh engaging uh in any kind of uh competitive or even perhaps real combative uh aspect with martial arts uh you always want to try to adapt to what you are facing because if you don't adapt you're going to be in in this rigid you know way of of looking at this confrontation see and that's why when it comes to the great work everybody's going to have their speciality everybody's going to have their way of doing it but you have to learn different adaptive techniques as well so you can come at a problem from a different aspect or perspective you know see what i want to see is people who are completely different people than me that are going to do this differently and they're going to come at it from one perspective hey we need i may never write a children's book on natural law i mean maybe at some point i may but maybe there's people who this is their forte this is what they do maybe they've already written children's books and they know really how to get into that psychological center of the young mind the developing mind right and so maybe somebody else who puts this work out make a children's book that's what you're going to be better way better at than someone like me right maybe you're a vector artist i was never a great vector artist are drawing things by hand or even translating that to to the digital space i'm a good digital manipulator right but maybe a vector artist might come out and make incredible paintings i mean look at android jones how he's approaching the world of uh putting spirituality out there through his digital art i mean if you've ever seen this guy's stuff it's unreal you know uh you know so art is a pathway for it but again this is an adaptive way of doing things it's an adaptive set of techniques and just like in martial arts hey this other guy might be a way better striker or fighter well then you're not going to want to stand toe to toe with that person because they'll probably do a number on you if you try to stand toe to toe with them if that's their forte you might want to then adapt to try to go to a ground game you know and submit the person or put them in some type of a lock or choke like you're not going to want to sit there and battle somebody on the very dynamic that they're the strongest on right so when when you see here's where the person's coming from that's going to show you an adaptive technique to go to their logical weakness where you can slip it in you can get in uh the the understanding through a method that they weren't expecting this is part of like you know the jkd aspect of when you see an opening you strike into it strike into empty space is part of you know one of the aspects of that form of martial art so when you see an opening or a doorway into some aspect of their psychology you have to take it you have to be able to identify adapt and then take that pathway because that's what's going to open up the greatest avenue of understanding for that particular person somebody else may be a completely different set of techniques that needs to be employed i see i think that makes a lot of sense and that's an interesting analogy to um to martial arts so i'll definitely try to integrate that and i also like to say that um you know mention you mentioning that there's different ways to express natural law i really think that's a like the beautiful part of life is that knowledge and you know allegory and meaning and messages can be portrayed in such different ways that you know it's a really beautiful thing that um you know like you said you have one style of um portraying information but you know i i the way i would do it would be a little different and the way anyone else would be a little different but together i mean i guess it comes together to the to the great work and and you know what sir like you know the whole thing here is i don't complain when people actually get on the battlefield and do something if you're contributing i say you're contributing in the way that you contribute and that's great we need way more people just making the decision to get involved and contribute so you know i don't have a lot of harsh words to people that are actually doing something i think that they should continue they should refine what they do become even better at it you know you could always add to your learning and perspective and understanding of something but as long as you're actively putting something forth to try to help the problem wonderful it's i use the allegory of carrying a great weight across a room it's like it's not just going to magically get from one corner of the room to the other so if you have two people doing it it may be very very hard you may not even be able to do it but then if you know 20 people come in you know and grab part of it and say okay we're going to all move this together you can get it done many hands make for light work and that's what i want to see more of and we just haven't seen enough of it it's not going at a fast enough pace to actually make a dent or an impact in how treacherously fast and downhill this train of slavery is now rolling because it is it has gotten really really bad and people are literally almost cheering it on at this point so you know we as people who do understand these dynamics need to really exert our will and get on that on that battlefield and start you know doing what is going to be required to perform and accomplish the great work and as long as people are doing that i don't have many harsh words of criticism for them you know it's like just get involved and do something and stop being afraid to get started you know the hardest part of any moment getting any momentum going is beginning you know the first law of motion is objects at rest tend to stay at rest okay you know that's inertia you know when we get used to not doing anything things go downhill okay that's that's that's just the the law of entropy of the universe you don't exert your will upon something entropy is the result you know we exert our will that's the the syntropic synthropy s-y-n-t-r-o-p okay the central the force of syntropy is the ordering force that is accomplished as a result of exercising the will you know and this is a very powerful important occult understanding that nothing is going to just magically change on its own entropy is the default condition it isn't the only condition we can exercise our will and then we can bring order to things that were previously destined to just decay and go into entropy but that's not the it's not the way that it must be that's what we're here to learn how to do we are here to learn how to exercise our will in the right way to create the right manifested outcome that we say we want to see so uh apocs i hope that uh you know helps in your uh you know uh i guess debates and or you know just uh general interactions with people and uh bring you an understanding of like how we sort of need to be adaptive when it comes to that and that's something that we can you know study on our own it's like that's like preparation that's like training you know then like actually doing that with someone else you know that's the quote spiritual battle you know that's that's the combat at that point you know and uh the more prepared we are in our own personal lives when we study these techniques the more prepared we're going to be in a a combat situation quote unquote if you will okay in a real world discussion with somebody who's resistant to the truth yes i thank you um i had one more thing to bring up if unless you want to go to another car no go right ahead okay so this yeah this has helped a lot so thank you um i guess another thing that i've been thinking about and that's come my way is when i do try to talk to people about objective morality they always bring up these um like they bring up these situations where you know they say okay what would you do in this situation where there's there might be a gray area of morality or there might not be a clear objective answer and the extreme exception to the general rule of how we would should be behaving on a daily basis in our interactions with every other human being around us they want the extreme situation there's a kitty cat on this track and then there's a switch here and then there's a little puppy on this track you know you're never going to be in that situation it's called a hypothetical to try to detract from the first principle and it's like what you have to do is say does that really exert any true common sense are you really you really believe that teaches some moral lesson or imparts any real understanding about how we should be living and behaving toward each other in the real very real world on a daily basis where there are practical applications of morality really that's what you as an adult as an adult human being wants to focus on see i i take that approach where i'm like what's at that point what's wrong with your mind can't you see that there's something in the the there's something broken inside that is trying to find the extremity of the exception to the law or the rule okay it doesn't want to just say yes this is a better way of being this is a better way of behaving this is what we should all strive for even though we may not do it perfectly this should be the ideal we should strive toward instead what surfaces that see see if if we were honest with ourselves that would be what i just said there would be the heart based intelligence surfacing and saying i recognize the wisdom in this i can see what it will do what it will bring how much better of a state it will bring the world to but what what speaks instead apox what emerges and comes forward and presents itself instead the ego that's right that's exactly right the ego comes forward and it says screw all this stuff i don't care whether that's better for the world i don't care whether these are true eternally true principles i want to imagine that the world works the way i want it to work and i'm going to come up with the most extreme ridiculous scenario to try to say this law doesn't always hold a reply and you know what you have to do in that sense you have to do what i just did there you have to call them on their bullshit and say you're not even trying to reason from first principles that's the ego talking in you because you're afraid of what it might mean if what i just said is absolutely true and that's humanity's greatest fear is that the truth is absolute and it doesn't care of all about all of our excuses it doesn't care why you kept doing the immoral job it doesn't care why you kept performing the immoral behavior it doesn't care why you made the decision not to work on yourself it doesn't care why you stayed in left-brained intelligence and never developed true integrative holistic heart-based intelligence the universe doesn't care about all those reasons there are endless reasons for all those things and always will be all that the universe cares about is that you didn't work on yourself improve yourself and come to the right conclusions and then strive for that correct proper ideal even though you may fail it's about being starting the process and being honest with yourself about where you are in the process and moving forward that's what it's really about and that's what you have to you have to tell people that when they go in and if they're still resistant then you just got to walk away and you'll be like there's i can give you no help you are unteachable and i've done this with many people like right to their face like what are they gonna do worst thing they could do is take a swing at me and they're gonna be sorely disappointed in the result okay so i say it right to their face like you don't really want to help yourself you don't really want to learn you don't really want to grow in your understanding you want to stay right where you're at and you want to suffer so that's what should happen you've chosen that and that's what you should get i've said it right to people's face you know and i've said you don't know how to argue from first principles your ego's two in the way until you suffer enough the you may be so calcified in ego that the only thing that will ever take you out of that state of consciousness is to suffer hard enough and that's a hard thing for people to hear when that's said right from one person's face to another person's face in person not over a phone not over the internet you know right to their face in person very few people have ever done that to another human being i've done that to several people and then just said there's nothing you can learn from me i i'm i'm staying silent from this point forward and i'm not going to engage you because you're too broken to engage and you need to suffer more to the point where either you die or you decide you're going to come up from the very floor of the house the basement floor okay and then you could start learning and i'll still be there to tell you the truth if you want it but at some point i do say to someone else you're too fucked up for me to teach you i say i'll say that right to someone's face and it's true there are some things that you will never turn someone away from their course it doesn't matter how powerful you are as an individual or how learned you are some people are determined to self-sabotage and bring self-inflicted suffering into their lives no matter what information is around them and that's a heart that's a hard pill for people like us to swallow we want to help them not do that self-inflicted suffering and we want them to be okay and be better but some people you're never going to help they are they are damaged and traumatically damaged to the point where they may not get it in this lifetime you know and the problem is so many people are like that that the world is becoming significantly and severely imbalanced to a point where we're literally creating a state of physical hard slavery that we're going to be moving into you know but again we can learn techniques to try to mitigate it and to try to be as effective as possible when doing this and this is something that you just got to work at and you got to be courageous enough to get out there and have these conversations with people and guess what it is sometimes brutal you know i mean sometimes i i may just find myself in a dialogue with somebody not really having asked for it or wanting it but you know you know occasionally i'll i'll say i'm going to engage this and see where it goes i'm going to see where this person's head is what kind of a number the social engineers have done upon them you know and it's difficult because knowing what i know i mean you you have to realize i'm i'm walking around like it's like the highest end engineer in a particular field talking to someone that has never done any mathematics higher than like uh kindergarten level arithmetic you know i mean imagine that differential in knowledge that here's where i'm at in the understanding of what's going on in the human psyche and all the social engineering aspects that have led to it and this way down here is where i'm trying to operate with somebody from it's it's one of the most difficult things to do and and it's very draining because you hear repeatedly over and over and over and over again the swill of the mind control that is coming through the social engineers you know wands they're waving their wands boom there's the spell i'm casting on you through social engineering you know figuratively obviously but you know not so much it really is literally a source or a spell and then you know you're literally hearing that mind control cause pouring out of the voice of people thinking that they know thinking that they're talking from a position of knowledge because the ego doesn't want to get out of the way and just make them say you know what i don't know i know practically nothing about the real solution to this and then they're even even if they their ego is broken down to the point where they are at least acknowledging that you know okay i don't know much about this and i'm still in a bad position they're resistant to the solution as you know you see many people will be when it comes to right livelihood you know they don't want to hear that the solution is you might have to suffer short term and not have a lot of money or be extremely destitute poor that's the answer that's the correct solution there is no easier way of doing it where oh yeah build up a side project until it gets so much that it can support you and then quit no that's not the answer you're lying to yourself you know at some point you have to look someone right in the face and say i don't care if you have six children you need to quit your job and your children may need to be hungry you and your children may need to eat stale crackers and out of cans of beans for the next eight months so that you're not harming other people and you may need to beg your other family members to give you some support in the form of food that might cost a little bit more money so that you can keep your health up yes that's the answer that's the actual objective real world answer no no let me pat you on the back while you try to pick yourself up and do as best as you can like quit now immediately immediately don't worry about your finances let the universe handle that do the right thing and that will come but people don't have the spiritual strength or the trust in creation to do that because all they give a shit about is money that's what it means in the new testament that you can't serve two masters you can't serve the god of creation that created all the laws of nature and simultaneously serve mammon there is no such thing as doing those two things simultaneously either you care about what is true and right or you care about money there's no there's no splitting your loyalty between those things you could say okay i could i want to be supported and i want to have enough money through what i do you know and the universe will provide that if you're doing the right thing now there are members of my family just as a little brief aside i'll say thank you to apox for the call always great yeah thanks so much always great talking with you always great dynamics that you bring to the table for discussion so thank you but i'll bring up a brief anecdote like there are people in my family that can not believe that i am got myself to the point of doing this where i am at least able to meek out an eager living on a day-to-day basis and you know pay the bills that i need to pay and have food and have a decent you know work workspace and setup where i'm at like and would say oh you must have some other you know uh person taking care of you or providing all that for you or paying your bills etc because they can't even fathom that people would find value enough in what i put forward through this work to make voluntary contributions in the form of donations to help me and help this effort and help me stay afloat they can't conceive of it they would actually call me a liar i've been called a liar by family members when they say you know where do you get your money to live from and i say my viewership my listenership is very generous and they're uh you know providing voluntary donations it's not an it doesn't make for an extreme uh extravagant lifestyle i have to be frugal with how i spend money you know obviously i get the technology that i need to continue to do this that i'm i don't really uh pinch pennies on that i if i have to you know go to donations for that i do but if i need to get something i spend money on that because i want things to work smoothly and work right because i want to deliver an effective message so i don't i don't i don't pinch when it comes to technology and i try to keep myself as healthy as possible because i need to be healthy physically and mentally to do this but you know i mean can you believe that stepping into right livelihood and being supported by creation for doing so in the capacity that i am i have family members that have called me a liar and say you must have some other secret source of income that you don't tell anybody about members of my own family saying this to me like i'm out on the street corner selling crack or something you know of my own family because they can't believe or accept that if you do do the right thing and you bring that message out into creation and you're helping creations will by doing that the creation will give back to you the energy that you need to continue on you know why because they haven't done it for one second of their damn lives and that's why they don't know that it's true so great call by apocs there thank you all right we have about 20 minutes left in the broadcast a little less than that let's see let's go to the next caller oh let's go to links links you are live on what on earth is happening welcome hi mark can you hear me yes i can loud and clear yeah um so um i appreciated patty lager's call before yeah she's always great i love i love the whole dynamic that she came out of allopathic medicine and went to the right livelihood of naturopathic medicine because i think that's where the future of uh health is really at or it's where it should be and people should really understand that more so i i love the dynamics that she did that yeah so i want to finish in on on that too because both from my own personal perspective i've been sick for quite a few years now many years in lyme disease oh that's a hard one i think that's a that's a biological weapon so it is safer yeah 100 100 um yeah that's i mean i i got to learn the the hard way and i i know more than probably any doctor about this you believe there are people who still don't think they're they're still like allopathic doctors who still refuse to accept it there's such a thing as chronic lyme you know they won't even acknowledge that there is a condition of chronic lyme disease and therefore they misdiagnose or don't even treat patients that have that condition you know and it's because they haven't looked at the bio warfare aspect of that disease or where it came from but yeah continue that's a tough one to live with and to deal with yeah it's been 13 years now so it's pretty pretty rough um but yeah talking about you know the right livelihoods i've i've kind of always been in tune with animals and i wanted to become a veterinarian for like all my life but then i got sick so i've basically been battling this disease now for the past 13 years and it's also yeah and it's also uh made me you know like i have animals like a dog and a cat and two rabbits and they get sick and sometimes i have to take them to the veterinarian and unfortunately it is as bad in the veterinary industry as it is in the medical you know for humans oh the kind of uh you know flea and tick and treatments that they give uh dogs and cats i mean it's insane like the the toxic nature of things that they want people to put on their on on animals it's like you know and the the vaccines that they get injected with you know these lead to all kinds of health problems in the in the future for for animals and you know it's it's it's terrible that you know their health should be in a much more positive state as well and life spans even longer and at a better quality of life even older into life and many animals don't have that and they have all these different autoimmune dysfunctions and cancers at early ages it's it's it's awful like it it breaks my heart because it's like a lot of that is the result of what uh allopathic uh veterinary medicine is doing uh where it should also be holistic in the in the same sense that human health care should be holistic yeah and like basically they they um ignore the existence of chronic lyme disease even in the veterinary world and so basically this is like a uh you know worldwide agenda it's pretty obvious for for the for us who have been looking into it for many years but but i've been thinking like i'm kind of at a point where like i have to decide whether or not i should should i go that route because like i want to be if i'm gonna do the veterinary route i want to work holistically but but to be able to get a license you have to go down the university you know and like be indoctrinated for like five and a half to six years with like probably 99 of people that are like you know licensing is just operating with permission of the state as well and so i understand it puts uh doctors even teachers into a conundrum like you know you have to play ball with the state to even get into these fields that's why i'm more of a an advocate of doing something completely outside of what you would consider taking a traditional job and just making money from other individuals that see the value and worth and what you do and want to you know contribute but that's very very difficult to do see it may be the right thing but it isn't the easy thing it's hard to make enough to stay afloat just to do the regular things that i need to do on a daily basis by doing this the way that i do it instead of taking things from you know quote official sources uh you know quote um you know merchant accounts you know playing into the whole system you know it's it's doing it outside of all of those constraints makes it difficult and i talk to people in the alternative research community and the alternative media community and ask how many of them are doing it by the book you know and paying into the system and almost all of them are there are so few people that operate just through donations because that but this shows you how unwilling people are to simply pay people outside of a traditional pre-existing uh system that is part of the whole institutionalized systems of earth okay and to just operate with them as sovereign beings as one-on-one individuals so few people are unwilling to do that you know if i went through the whole traditional system got a merchant account of doing business as or you know made this an llc which what on earth is happening is not never will be it is just me it's just me giving information to people and if they find value in it they make voluntary donations personally to me there is no business there is no corporation there is no llc nothing is registered and never will be okay so but do you realize how much i cut off and disallow by doing it that way probably 75 to 80 percent of in addition to what i could be doing i could do do 80 to 90 percent more i would say only about 10 are going to want to interact with you personally individually where they'll say okay i can't put a credit card number into this and just get this you know because he's selling it as a merchant no no you got to make a donation through a one-to-one donation to me as an individual so how many people right there am i cutting out that don't want the inconvenience of just understanding that's how i do things you know they want to do it just by rote because hey this is how i've always done it and this is the way i just always need to do it you know take my credit card you know well i don't do that you know you have cryptocurrency i'll take your cryptocurrency payment you know which we're working on still expanding that we're probably going to add a few more cryptocurrencies to donation gifts but my my point here is we have to get out of the mental habit of operating within the system and part of getting out of that mental habit is fear of lack fear that we will not have what we need to continue and to survive the the more people that stay in that fear the more the momentum is going to build toward what we've always done the more people that come out of that fear the more the momentum is going to be choose to do something different make a different decision and actually do things differently and a different result will manifest this is an internal process of conquering fear that has to be worked through in each individual and i'm though again folks you have to really hear what i'm saying i am not naive looking at this like everybody's going to do this this is for the strongest among us this is for those who really know not think that they know not have gathered a little bit of information who truly know who and what we are up against who and what we are truly up against because if you really really know that definitively know it every single aspect and fiber of your being will make you fight with every breath that you have to turn your behavior away from this system and to do something different and that means quitting whatever immoral job you are involved with doing things differently monetarily financially okay you know to the extent that is within our power we have to let those systems crumble and walk away from them and say no i'm not going to cooperate i'm not going to partake because ultimately it's evil so you know that's uh yeah that's the challenge for most people and it is challenging it's difficult i never i will never lie to anybody and say that's an easy thing to do it's very difficult and takes enormous spiritual strength and enormous courage yeah i i guess i i'm just you know i'm feeling a lack of you know holistic veterinary health care yeah in sweden we have basically no holistic veterinarians so i feel maybe maybe i would maybe this would be my calling that i would have to do like well you're in a tough location uh you know i didn't i didn't know you were from sweden and yeah that's very very tough here man that's one of the worst countries in the world i mean that is that system they make it there so people it's very difficult for people to operate in any way outside of the the quote system of control there there because that is socialism is at a very advanced stage in sweden unfortunately oh very advanced yes yeah i feel for you that that's where you're operating from i want to work holistically with health i mean i i i kind of need to heal my my own body because you know it's sure it's not so great but um that starts with that world view change that's also that internal process you know so i had a discussion with the with the another dog owner today in the sl regarding vaccines and like you know i'm not the best rhetorically yet you know with right the but she just wouldn't listen she just came with all the ordinary just the normal you know yeah but her immunity and this and that and i just like yeah okay whatever you know and i told her like the story about like when i i vaccinated my cat like for the first vaccination i kind of knew even back then that i shouldn't do it but i still still did it unfortunately right and and his nose fell off you know it fucking fell off the day after like it's just a big sore and like it was he he got that big of an abscess from you know how how the toxins in the vaccine yeah it was that's bad and i've even talked to people about this and like you know i've seen it with my own eyes like with my cat you know he's he like he his nose fell off and they're like yeah but he's not sure that it was actually the vaccine never connected it wasn't there never after you know like yeah never connected to their their god their religion can't be that could whatever you need like i've seen it with my own eyes and that's still not enough for people you know like you know what when they'll get it like honestly again it's a very hard thing to say and links i want to thank you for the call uh it's a very very very hard thing to say to people but at some point the only way people like that like like the doctors that links is referring to are ever going to reverse their position is when something like that happens to their own child that's what really has to happen you know and i don't really wish that on people but i do acknowledge that that's how far into the ego people like that are is unless your child is hurt you're not going to change your viewpoint and that's what it will take for people like that i think we might have time for one more caller we're short on time so we have less than five minutes about four minutes left in the show so i'm going to take it out with uh if i can get my mouse working i'm going to take it out with ivan from phoenix ivan you're live on what on earth is happening welcome all right ivan you have to unmute because i see that you are still muted on your end i have unmuted you on the server and i think this has been a problem unfortunately in your setup but i'll give you a minute to try to work it out ivan from phoenix going once you gotta unmute yourself you are definitely unmuted on the server and going twice all right i'll try to come back to you let's see who else do we have here waiting in the queue um let's go to let's go to spios fio you're live on what on earth is happening welcome hey how you doing man i'm uh testing out a new mic can you hear me yes it's a little echoey but i can hear you okay um let me just think i'll turn the tv off completely all right i'm so glad to be talking uh to hear on um calling it um yeah thanks for calling in man you're able to uh take my call um you know i'm uh i'm um a plumbing contractor myself as you know yes um i've helped you on some of your projects yes and i i just like to say you know reiterate how how grateful i am um and a tremendous gratitude i feel for uh um the the knowledge that you impart to the world and to everybody um i could barely contain myself in in in expressing that uh and and just joy and and um just a vision that that i have been able to um to create in my life uh because of that now i mean we have one minute one minute to go all right i've been pretty uh late in the game i mean uh you know i've been in the game uh in terms of like uh alternative knowledge in quite some time but your your information has really uh solidified and constructed that um i i appreciate that did you did you get a chance to listen to last week's show on right livelihood when i talked about plumbing and sanitation because i consider that a profession that is definitely in right livelihood yeah and i'd like to add to that you know in in terms of building in in all forms like people that maintain people's houses and you know build houses and it just goes to show how few people uh really deal with uh people on a daily basis and can really uh understand what it takes to deal with people and contract with that folks that's all steve thank you so much for calling and that's all the time we have for this episode of what on earth is happening thank you to all the wonderful callers ladies and gentlemen government is slavery my website one on earth is happening.com we'll see you right here next week thanks for watching don't you ever don't ever you

What On Earth Is Happening Show #213

Topics: *The Public's Misplaced Trust In Mainstream Institutions, Society is completely backwards, inflammatory responses to the episodes on Right Livelihood, Harsh judgement toward those who are engaged in Wrong Livelihood, Speaking uncomfortable Truth, People's trust in mainstream institutions is part of our underlying problem as a species, Lack of Awakening in society, Wrong thinking leading to wrong behavior, the Seven Deadly World Institutions, Religion ostensibly connects a person with the Creator and Spirituality, Institutional Belief Systems, Ostensible Purposes of Mainstream Institutions, Religion is the overarching problem leading to wrong thinking, Faulty observations and perceptions through cultural brainwashing, Infiltration of Religious institutions by the Dark Occult, Religion pushing Communism, Ostensible purposes of Government, True purpose of Government exists to control and enslave its subjects, Media personnel are paid liars, Ostensible purposes of Media, True purpose of Media is to deceive people to further the Government Agenda of Mass Control, the Zeitgeist of Human Consciousness, Operation Mockingbird, Jim Keith, Intelligence Agencies infiltration into Media, Ostensible purposes of Education, True purpose of Education is to indoctrinate the youth to Government Agendas in all fields, Ostensible purposes of Banking and Financial Institutions, True purpose of Banking and Financial Institutions is to maintain a wealth gap between rich and poor and direct the economy to serve the Ruling Class, Ostensible purposes of the Health Care and Medical Industry, True purpose of Medical Institutions is to profit from the sick and undermine true holistic health, Ostensible purposes of Science, True purpose of modern "Science" is to direct new discoveries for government purposes and control the public's perception of what is possible, the Paradigm Shift that didn't happen, the Illusory Left-vs.-Right Political Paradigm, Unresolved Psychological Parental Abandonment Issues, Shadow Work to resolve psychological issues that cause naive childlike trust in the Mainstream Institutions, Psychological Transference to Proxy Parental Figures represented by Mainstream Institutions, Awareness of social attitudes outside of your own circle to observe worldviews and mindsets, the Hordes of Unconscious Humanity, Different roles for different people doing the Great Work, Righteous Anger, Juicing for health and wellness, Natural Cures, Legality does not equate to Morality, Community Support in the Truth and Freedom movement, Teaching Natural Law in other countries, It is Possible for Humanity to awaken but will we WILL that Awakening into existence?*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome to the show today ladies and gentlemen today is Sunday June 16 2019 this is episode number 213 of what on earth is happening and we have a great show lined up for you here today I'm going to be discussing the public's continued naive and misplaced trust in established mainstream institutions we're going to be talking about the institutions that the public has placed their trust in unfounded ly and we're going to be most of all really delving into the psychological reasons why this condition continues to be the case and why it is so difficult to wake people up to the true intentions and motivations of mainstream institutions and why they are so completely lockstep in their mind still believing that these institutions are set up there for their betterment and the betterment of our species so that's coming up today on this episode of what on earth is happening we'll be taking your calls in the third hour of the show through the discord app you can get the show of the call invite link on the show page at what on earth is happening calm slash show we're also of course simulcasting on Vimeo Facebook and YouTube live so I do have a few housekeeping announcements for today's show and if we can briefly switch over to my computer to my web browser I'll get into those announcements so essentially I will be a featured speaker at this year's and arkadelphia conference it's the inaugural and arkadelphia this year 2019 this will be taking place here in Philadelphia September 13th 14th and 15th and tickets are on sale now I put a banner up on the homepage of the site if you click that banner it will take you to the an arc adelphia website the event website and just posted underneath the workshops under anak adelphia I also put a article on the homepage of what on earth is happening let me just go back and show you that in the news section if you scroll down and go to latest news you can click that first link there and I put up an article on the homepage that I'm going to be hosting the teaching natural law with mark passio workshop at anak adelphia as well my main lecture will be entitled for the main part of the event sorry about that folks let me uh looks like my laptop may have may have locked up here hold on one moment there we go I just was able to get it out of full screen mode sorry about that let's switch back over okay so I'm at the main event of an arkadelphia I'm a featured speaker and I'm going to be giving the lecture called the sacred gift of anger just take a look at all of these amazing speakers as part of the event they have all star lineup it's going to be myself Lynn Albright max Egan derek bros mackenzie wolf zachary Hubbard and dick scary welder Josh Sigurdsson Laura Larkin Rose Amanda ratchets luke rudkowski sterling Lujan Gina car Clive de Carl at 10 de Lobo ta Erin Nakamoto Sasha day game Benny wills Lea Thompson dance isom Omar Baum Katie Anna Nina Anna Nina ken Bocek Chuck Williams and Leah Boone and more to come so I mean they have a tremendous lineup here for the inaugural year of Anarchy Adelphia and again on the main website they just added the workshop so I made an article regarding that on my website it links over to that workshop where can get tickets and this is the abstract for the workshop that was just posted so check out the an arc adelphia website it's gonna be a great event here right here in Philadelphia actually in my neck of the woods in South Philadelphia so the state of Anarchy is hosting this event great guys that are doing great work to promote the entire worldview of Anarchy accurately and you know if you're so inclined start getting your tickets now five if you use checkout code passio the promo code passio at checkout then five percent of ticket sales will be deducted from your ticket and five percent will actually be donated to me - what on earth is happening for you know us to be able to continue the work that we do here so that's one of the main event announcements I wanted to go over initially and as well let me see what else I have just bringing up my notes here we are doing a summer clearance sale at gifts at what on earth is happening donation gifts so let me refresh this page because the button should be coming up here it doesn't look like it's coming up but if you click this it'll take you to donation gifts you have to click into the page by agreeing to that caveat there but we are doing a summer clearance sale on all t-shirts now this is going to be very limited there's um you know a few colors and sizes left I just checked my inventory we have less than 40 shirts left in inventory I'm just trying to get these cleared out and get some new t-shirts ordered get some new colors in for the summer so we're doing an early summer clearance sale over 50% off all t-shirts in water on earth is happening donation gifts okay so t-shirts are now on sale right now for $12 probably the cheapest that you'll ever be able to get them on the one earth is happening donation gift site I just want to show you some of the things that are left here we have iris blue left in the Lexx Rex or natural law shirt we have a few colors sorry about that we have a few colors left in men's one great work design we have a red blue green and purple left there and then we do have both colors left in the women's t-shirt design for natural law one great work and what on earth is happening so and also men's what on earth is happening we have in both black and and dark Heather so check that out it's a great sale it's um you know good to go up there and maybe you know get shirts and combine that with some other things that we have up there like DVDs flash drives etc so you know no better time than now to participate in that sale because I'm telling you that's not gonna last too long less than 40 t-shirts total left in inventory before we go and print print some new ones and I might redo the one on earth is happening t-shirt design and do a color design a multicolored design there I'm thinking about that so I think that's that covers the bulk of the event announcements oh we I do have one more we are potentially going to be taking a couple of days off of what on earth is happening so we may not be doing a show next week and the following week I will announce that definitively on the show website so stay tuned on the the website particularly on the show page for that announcement but it looks like next weekend and the weekend following we probably will not be doing a live show so we'll probably be returning three weeks from today so I don't know that definitively we're gonna see how things work out but right as of right now it looks like the next two weeks we will be taking a little bit of time off so I just wanted to announce that before you know we step into the main part of the presentation now few people just everybody just give me one moment cuz I do want to make one very small adjustment to my slide presentation because we just got the add graphic in for for the Annika polka for the Anarch Adelphia workshop so I'm just adding that into my slide presentation real quick and we can step over to the slides right now we can go live to the slide presentation in the main window please if we could switch over to the slide presentation in the main window bring it up in in the main window please thank you okay so here we go all right so as I said an arkadelphia first inaugural event of an arkadelphia this is the first one that they're hosting you can get five percent off your ticket sale with promo code passio you can click this banner that I have up on the homepage of what on earth is happening and as well the teaching natural law workshop which is going to be taking place the Monday after an arkadelphia so it's the the Monday right after the main event which is a Friday Saturday and Sunday the 13th through the 15th my workshop will be an all-day event on Monday September 16th 10 a.m. to 5 p.m. taking place at a breakout location Papi's restaurant which is just down the street from the main event hall okay of an arkadelphia the tickets for the workshop an all-day event from 10 a.m. to 5 p.m. are $120 you can get tickets at an ORAC adelphia calm that being said I think that covers all of the announcements that I wanted to go through before jumping into the bulk of the material for today's presentation so thank you to the crew they always do a great job thank you to my producer and backup producer the setup crew lighting and of course graphics Thank You Brett for doing a great job with the the title card for this week's show which is the public's misplaced trust in mainstream institutions and um you know this is an homage here to the great film the great science fiction allegorical film about what's going on in today's society they live by John Carpenter for anybody in the truth and freedom movement that has not seen they live you know I don't know what's keeping you back because that's a must see and if you're not familiar with it watching it will help you to understand why this is certainly an appropriate title card for the show today so let's jump into this material the I guess you could call him a self-help author and spiritualist Michael Ellner David Icke is has actually quoted him many times he's actually put this quote by him in one of his in a few of his main presentations said just look at us everything is backwards everything is upside down doctors destroy health lawyers destroy justice psychiatrists destroy minds scientists destroy truth major media destroys information religions destroy spirituality and governments destroy freedom I don't think truer words were ever spoken and I think this sentiment is you know what I'm opening this presentation with this episode this week with because I think Ellner here accurately encapsulate exactly what is and has been for a long time taking place with the mainstream institutions of our society and people who don't agree with this quote I would suggest are extraordinarily asleep now one of the things I want to say is last week I went pretty hard on people okay I you know had a pretty intense blow-up on the air because I'll tell you why the last couple of shows actually were some of the most I would say not poorly received they were very they were well received by people but they included some of the hardest resistance to the message of what on earth is happening that I have ever received by even my base audience okay and that is because the information that I was laying out in the last couple of episodes is some of the hardest in the world to hear what we were talking about in the last couple of episodes was right livelihood and this show kind of in a way is an adjunct to that and it is a continuation of that topic in some ways it's slightly different but in many ways it is so closely related because it is about what the perceived purposes of the mainstream institutions are versus what they do in real life to human beings okay and that's the clear thing that we have to be have the discernment and the faculties of mind to distinguish between one is an intended purpose and then there's the thing that they are really doing in the real world which is harmful okay and when I was talking about being involved as a person who takes their paycheck who makes their living for their daily expenses of life through working for some of these institutions I got a lot of blowback from people who wanted to say no mark this is going too far okay you're attacking the people's livelihood and their ability to put food on their table yes that's exactly what I was doing because there is no excuse for doing harm to other people when we know what the right thing to do is and we know what the wrong thing to do is and what I was being so harsh and judgmental on people and getting so angry about it righteously angry about it is there is no excuse to be made for why one should continue to do things that are harmful just to receive a paycheck and see this is the problem with the world folks this is the problem this is the unspoken problem that no one wants to just directly confront right to someone's face looking them in the face and say you are an immoral person because you continue to receive a paycheck by participating in a job that is part of an institution that is causing harm to other people and it doesn't matter whether you're feeding your family with that paycheck see this is what I'll say to people because I am NOT taking part in it I have removed myself from those institutions I am doing independent work and I am making the living that I make morally so those in glass houses shouldn't throw stones while I'm not living in the glass house see so I can speak on it and I can be harsh and judgmental about it and yes we should be judgmental to those who are causing harm it isn't about just taking their nonsense and bullshit and saying that it's okay it's not okay it never has been okay and it never will be and that's the problem with people they're too soft and people have too thin of a skin and get too easily offended when you tell them you know what what you're doing is wrong you should stop doing it it doesn't matter if you are poor as a result if you must be poor for a time you should quit your job and stop participating in the institution that is causing harm maybe you'll have to struggle for a while and that's the harsh truth of the matter there's no there's no dance around you know there's there's no uh you know white winding paths that you could do this this end run around the issue okay no it's a straight direct confrontation then if what you are doing is causing harm to other people and therefore is not a right then you should desist in that activity even if it harms your ability to put food on your own table or the table of your family in the short term there's always other things that you could be doing there's always other jobs there's always other positions that you could take and you don't need to continue to do that just because you don't see any way out of it or you define yourself by that thing is not anybody's concern least of all mine okay that has no bearing on whether the thing that you're doing is moral or not okay so know it isn't going too far it isn't you know being too harsh or judgmental it's actually just speaking uncomfortable truth to people that don't want to fucking hear it that's all it really comes down to okay so the same thing is going to apply today and some people will say well this is common knowledge by the people who are aware and awake and what I'm going to address that because part of this show today is not just making not just reiterate eating something or you know going over a material that may be the the choir already knows okay it's not just speaking to the choir because the last part of this the middle part of this whole presentation is going to be about the psychological factors and reasons that people behave this way in the first place and the last part of it is going to be about how the people who are in the truth movement think that the whole world is waking up because some people happen to be on the same page with them and understand what they understand and they don't understand that that isn't what's happening okay they're seeing the world through rose-colored glasses as I've said they are seeing it from a skewed individuated perspective and they don't understand just how much ignorance and darkness there is all around us and I don't say that to try to discourage people okay but if you think that everybody agrees with this quote that is this first presentation slide okay cut cut back over to the slide full screen please okay if you actually believe that the vast majority of people in the world actually agree with this gentleman making this quote you're absolutely out of your mind because the vast majority of the people of this planet absolutely believe that the very institutions that he just mentioned in this quote are their God are their actual complete God and Savior and would do anything to protect them and have the and speak about them with the utmost respect and reverence okay and I see it every day I see it every single day ever any place I go in public there nobody is is attacking any of these institutions they believe that the health care system is wonderful they believe the media is trying to tell them the truth they believe government cares about them and is necessary and on and on down the line of brainwashed imbecile ISM okay and I mean they're out there in hordes and droves my own family is the perfect example I just had a conversation with a family member I said you know I don't even go around the family that much okay just as an already an aside and anecdote okay I don't go around the family that much anymore I said why don't you tell me what the rest of the family thinks about like you know what's do they ever talk about corruption in politics do they ever talk about how you know totally screwed up the whole banking system is and and how in bed with you know corruption and in politics that all is do they ever talk about how bad of a job the mainstream media is doing and how they're just a propaganda wing of the government do they ever talk about how science is just funded by government anymore and it's not really a pursuit of truth do they ever talk about you know how the medical field is actually detrimental to human health and the the family member I was talking to go it goes no not one single member of the family ever touches on any of those subjects or topics and never talks about any of those institutions with a condemnation with criticism let alone condemnation and I would suggest that this is probably the general zeitgeist everywhere not just in my family not just on the street in the city that I live in in this communist craphole that I live in called Philadelphia you know but um I'd suggest that it's probably across the entire planet over the entire world that is the sentiment there's a tiny tiny tiny small small tiny fraction of people who get that all of these institutions are broken and are the problem themselves most people think it's all just a tiny few bad people that are the problem no it isn't it's almost everybody that's the problem you know I think I was guilty of planning that seed in people's minds in my earlier presentations I talked about the sorcerer's of the world being the crux of the problem and that's not the case while there are a huge problem they're not they're the causal factor of the problem what we're going to be talking about here today is the causal factor of the problem and that's people's trust in the institutional bodies of our society which do absolutely nothing to make any aspect of life better for for the human species zero and not only don't we need them were infinitely worse with them in place so let's jump forward here and start looking of looking into what I'm actually talking about what I would consider the seven deadly mainstream institutions we could liken these to the seven deadly sins okay these are the seven Hydra heads okay of evil in our society today the big daddy of all of them religion and ultimately every single one of these things is a form of religion okay again I'm using religion in the wider sense I've said last week that I think I need to go back and revisit the term religion maybe over and over again maybe harp on it until people are so tired of hearing me harp on it that they finally start spreading the real definition of what religion is in an overarching sense not just some person's limited cultural definition of some stupid religion that they happen to believe in or are considering I'm talking about religion in the big sense of the term meaning it holds you back from truth it's a belief system it's an institutionalized belief system that holds you back from the truth regarding reality regarding the reality that has taken place around you and within you in your own psyche that's what all religion is it doesn't have to be a formalized religion with doctrine and ritual banking is a religion okay the medical system as we know it today is a religion science as we know it today is a religion the media is a religion the educational system is a religion okay government is a religion money is a religion this is what people don't understand they say the word religion and they're totally brainwashed as to the actual definition they think it means only the limited definition that they've been hammered into their their soft soggy brain that the word means and they can't perceive something from a more multi-dimensional angle to encompass a wider understanding of what the word religion actually means and that's why I say when I'm talking about religion here I'm talking about the cultural religions in general well when I use the word religion in a wider sense I am talking about indoctrinated belief systems institutional belief systems that hold us back from an accurate understanding of the world and prevent our forward progress in consciousness that's what the word religion in and of itself means so religion is the one and only problem that humanity faces because everything all of the problems that humanity faces are subsets of the one overarching problem and that's wrong thinking and that is exactly what religion Fosters and foments wrong thinking incorrect thinking non critical thinking belief based thinking emotion based thinking instead of logic from facts that have been gathered and dealing with reality head-on and dealing with what's going on in ourselves head-on now we don't want any part in that we want belief and we want to be told the world is just hunky-dory and there's no problem with the mainstream institutions so these seven deadly institutions the seven heads of the Hydra okay that we're up against in humanity religion government media education banking and finance healthcare and medicine and science okay and you you can name other ones that are huge parts of the problem but I would endeavour to say these are the biggest problem causers in the entire human world and that the fact that people still reverently believe that these things are doing what they claim that they are doing and that we need them and that if we didn't have them human beings would be worse off instead of better the fact that most people still believe that is the the nature of the problem here on earth and you know I don't hear other people talking about this you know again when I turn on alternative news media I don't hear anybody really delving deep into the issues that are going on they're talking about nonsense most of the time they're talking about political nonsense look in it look at it all over my new show studying the the veins on the leaf of the tree instead of pulling back and seeing the forest for what it is that's what they're doing they have tunnel vision and minutiae vision they don't look at big picture trends they don't look at big picture thought processes that are actually steering humanity in a certain direction and that's the problem the inability to pull back and actually see the large picture and that's why I'm reviewing this topic you know I went into this and called it you know identification with institutionalized belief systems in the past on what on earth is happening we're actually looking at the actual trust that people place in these institutions in the modern world they actually believe that they are here to serve what I'm calling their ostensible purpose so let's look at this dynamic okay we want to look at what is the difference between an ostensible purpose and the actual true purpose of what these institutions are doing so the word ostensible is not a colloquial word it's not a word that we use in everyday conversation or speech you don't hear the word ostensible a lot so some people might not even know what the definition of the word ostensible means so I want to give everybody a very clear working definition of the word ostensible as I am using it here throughout this slide presentation okay the word ostensible means represented or appearing as such not actually being what appearance indicates suggesting an appearance to unaided senses not borne out by rigorous examination or greater knowledge based on deceptive resemblance or faulty observation or influenced by a mo Shin's that present a clear view illusory I mean I think that is probably the best definition of ostensible the best working definition of ostensible that I could possibly lay down okay represented or appearing as such meaning it's not actually that thing it's just appearing to be it not actually being what appearance indicates suggesting an appearance - here's the key on aidid sense is not borne out by rigorous examination or greater knowledge it means the people who accept the ostensible representation of that thing have not done their homework they have not actually rigorously examined a thing to determine what it's really doing or what it really is they're just looking at it cursorily and saying oh yeah I believe that that's it's it's real purpose for existing they're not really delving down below the surface and looking at what's really going on so they don't have written they're not doing rigorous investigation and they don't have greater knowledge to understand what that thing is based on deceptive resemblance meaning it's very much trying to appear as the real thing but it's it's not that thing okay or faulty observation here's the key the people who are looking at these institutions do not have the observational capabilities or discernment to accurately observe what they are doing and what they truly mean what they truly represent so they have faulty observation that they're looking at these institutions with influenced by emotions that prevent a clear view illusory there there you have it that's exactly what I was talking about we can't come to the truth of something by just emotionally reacting to it okay you could have emotional reaction that's perfectly valid okay but you're not going to come to the truth about something through that at best what that will do is drive you drive your actions and your behavior to do something about it when you have an emotional adverse reaction regarding how wrong that thing is or how wrong the set of that institution is in the harm that it's doing in our society to the people of our society you could have all the adverse emotional reactions you want once you understand the actual nature of that institution and then maybe that you know true righteous indignation that emotion of true righteous indignation righteous anger is going to drive you to actually do something about it to create real world change that's the whole purpose of the emotion of anger as I'll be talking about at Annika Ann arkadelphia okay so that is what the word extensible actually means what we are going to do here today is look at the mainstream institutions and we are going to compare and contrast there are ostensibly purposes the purposes that they state that they are there to do and try to portray to the public that they the the role that they are actually fulfilling in society versus the true purpose of these institutions and what they are really doing through their actions to the people of our society okay all right so one of the things that I want to say is this is what our society really is like this is what the average every man and every woman okay the average Joe Schmo and Mary Schmo okay really look like going through their daily lives okay they are wandering through life blindfolded faulty observation faulty perceptions never really knowing what right and wrong you are never really knowing what is good for them and what is truly bad for them okay because of the brainwashing that is done culturally through all the institutions I'm talking about here today so there is no ability to discern truth on the part of the average member of the population and the part of a bigger part of the problem actually is that the people who are awakened aware and understand the material I'm going to present here today actually believe erroneously believe because they want to believe that the world is better than it is because they want hope they're addicted to the drug called hope okay they want to believe that the average Joe and Mary Schmo actually know what's going on and are aware just like they're somewhat aware of the nature of the situation that we are in ok the awake person I'm talking about that they're somewhat aware at least okay maybe not completely because they might not know the occult aspects of things but they're at least aware of the 3d you know institutional degradation and corruption aspect of our society but they portray they push that off onto other people they are it's a transference thus a process of psychological transference is taking place whereby the semi or possibly very awake person attributes to the rest of society that is walking around completely brainwashed and blindfolded as we see in this slide okay they attribute their sense of discernment and understanding to that average member of the population and that's a huge problem okay and I'm gonna be talking about that toward the end of the slide presentation here today so don't try to ascribe your own powers of discernment and judgment to the average member of the population the great work is to know the proportions of what is taking place in society it's part of it it's a big part of it okay so don't make the mistake of thinking just because you're awake and a large portion of your friends may be awake to not think that we're in a very very tiny minority and the vast majority of human beings in the world are exactly in this situation that you see here so let's look at the first the granddaddy of them all that is actually a form of what our all the other institutions are and that's religion now again we could define religion until the end of time and people are still going to insist that that's not what it means religion does come from the Latin verb relig RA and that verb does mean to bind to hold back by tying or to thwart from forward progress you know in the word religion definitively and definitely means that as a positive connotation word religion can mean to reconnect to rebind to okay that is also an acceptable connotative definition of the word religion meaning if we are exercising true religion we can reconnect with the truth and with the laws of nature natural law okay but in the overarching sense that I am always using the word religion as meaning a problem in the world a problem in society okay I am always generally referring to religion in the negative aspect meaning it's something that holds us back from the truth and holds us back from a forward progress in consciousness all of the religions of the world the cultural religions of the world make these overarching ostensibly aims of their troop of their purpose but these are this is their ostensible purpose meaning it's not the real thing it's the one that they want you to believe that they're doing and that is religion claims that it is connecting people with God or spirituality or quote reconnecting which is one of them connotative definitions of the word religion to reconnect so does the cult do the cultural religions really fulfill that promise they claim to be showing people a better way of living through a moral way of life through their allegorical stories they're parables they're you know teachings etc and that moral way of life is wood if it will really be done would be coming into an accord living in accordance with natural law the moral laws of creation okay this is the ostensible purpose of all of the religions of the world no matter what they are okay they claim we're connecting people to truth to God to spirituality etc and they say that we're showing people the way that we should really be living because we're showing them how to be a moral person and I claim a huge crock of bullshit on that ostensibly clean I don't think that's what religion ever as done I don't think it's what it's doing now I don't think it's what it's going to do in the future I don't think it will ever do that I think that is a claim in name only okay or an ostensible purpose but it isn't the real thing it isn't what religion really does in the real world of nature to human beings in our society you know if you really want to look religions been one of the biggest killers of human beings in the history of humanity one of the things that has started probably more wars than any other dynamic in human society so let's look at the true purpose of religion what is it actually really doing in the real world if we're being honest with ourselves see you again once again I think that's why there was so much blowback folks over the last couple of shows when I talked about that if you're in a position where you're doing a job and it is immoral and it is harming other people and it is very easy to know whether it's harming other people because their lives are being harmed their rights are being harmed their property is being harmed they're being held back from being able to do things that are their rights etc okay it's very easy to see whether something that you're doing is actually creating harm toward other people but the key factor there is if you're being honest with yourself and I think that's why I got so much negative feedback and blowback in the last couple shows it isn't because what I'm saying isn't relevant it isn't because I'm saying is somehow old-hat or anything like that okay it's because what people are are complete fucking liars to themselves above all else that's the truth of the matter they don't want to be honest with themselves and tell themselves the truth about the person they really are they want to blow smoke up their own assholes and tell total lies about the person that they really are instead of confronting that person in the mirror directly confront ativ Lee and acknowledging what they have really been a party to okay they don't want it they don't want to look at that they want to blow smoke up their own ass and blow smoke up other people's ass and lie to themselves and others about what they're actually doing in life when what they're doing in life is either absolutely nothing and a big crock of garbage or its self self-serving nonsense or it's actually harming other individuals their rights are their property if we're being honest with our ourselves and that's the key term here so let's look at religions true purpose if we're being honest with ourselves you know so I think that that scares off most people that don't want to be honest with themselves you know and well I don't know I'm not interested in those people quite frankly then again this show has never been about tailoring and and baby spoon feeding people and making everybody comfortable and reaching the greatest amount of people it's never been that I know that that's never gonna be my role in my function in this in this work my role is to reach the people who have the will to be honest with themselves and then who will take this framework and run with it and teach others in whatever way they can and that will reach more people that will reach the largest amount of people possible I'm looking for the other potential teachers regardless of whether you want to teach it in my style or not most people are not gonna hear this style I fully acknowledge that I'm not looking for most people okay I'm telling you yes eventually this message has to reach most people but that's not what what on earth is happening is for what on earth is happening is for the teachers with thick skin that's who it's really for if the truth be told if we're being honest with ourselves here so I'm trying to be honest with you about who this show is the dynamic of the show is actually designed for since day one I've just been ramping up the intensity to try to help those people develop the thick skin they're gonna need to do this work because most people can't hear it you plug them into the like I said into the electrical circuit that I am you're gonna you're gonna blow them to kingdom come that energy has to be stepped down or slowly ramped up so that they can take it and that's who I'm looking for so the true purpose of religion if we're being honest with ourselves is to misdirect the spiritual lives of people in order to make them more easily controllable that's the whole purpose of religion the whole purpose of religion is that get people hooked on dogma promises of an afterlife promises of a savior okay not to really teach people what real true morality is the true purpose is to hide or occult the true moral laws of creation to hide or occult natural law religion is there so that you never really truly look into what the natural law is of morality in life in creation in nature these institutions are actually different legs of the spider that is the world of the occult that is the whole network of dark occultism worldwide that is are really the controller's of the world religion is just their one of their main outlets for the way that they actually perform their mind-control upon people and the true purpose is to get you running in circles of dogma and misunderstanding regarding what true morality is instead of actually hitting the bull's eye and really understanding what natural law is and how it functions in our lives the true purpose of religion is also to make people more accepting and docile so that they accept government rulership it's to work upon the right brain to put people in a state of right brain imbalance which is belief based which is unworthiness based based meaning oh we're such bad people we're on where the only God can save us instead of thinking we have to become worthy through taking in knowledge of truth and save ourselves oh no no we have to wait for external forces and external saviours to come and rescue us from our own bullshit ignorance yeah that's how it works folks don't you know and if we're being honest with ourselves exactly what I have on this slide here today folks is exactly what religion does misdirects the spiritual lives of the people of the earth to make them more controllable it a cults true moral law called natural law and it makes people more accepting and docile through keeping them in the imbalance of the right brain so you know take it for what it's worth accept it or don't that's not the extensible purpose of religion that's the true reason that the religious institutions are operating on the face of the earth and everybody will go oh yeah it's all the other religions just not mine mine is completely untouched by that corruption but all the other ones yeah they're bad they're broken they're corrupt just not my mind made it through all the way to the modern world from the ancient world were these things these systems of mind control dogmatic systems of mind control were invented okay to enslave humanity and all the way up to the modern world every other one got corrupted mine just made it through that gauntlet untouched unscathed yeah keep lying to yourself dunce you know I mean this is how stupid people sound and let me tell you something folks people think over the influence of religion isn't as strong as it used to be you're out of your damn mind if you think so religion is as strong if not stronger than it ever has been in our society and it's weaving its spider web into our lives and new and unforeseen ways you know yet the dark aspects of the church have infiltrated the whole socialist movement and leftist movement in the United States and they're raising up total communists Jesus camps there's tons of them right here in Philadelphia combining fake-ass Christianity with socialism and communism you don't think so you got to just look around and really see what's going on and put your finger on the pulse of it and open your eyes and look around as to what's really taking place and beyond with yourself about it as most people don't even know this let me tell you something's going on in just about all the major populated cities of the United States and religions on the upswing not the down let's go go back here we go moving forward government my favorite everybody's favorite who listens the one on earth is happening right once again not on the wane completely on the rise trusted more than it ever has been in the history of the world and I'm telling you it everybody defines their whole identity through what kind of politics they believe in this is our entire society's identity and and the freedom movement wants to say oh people are waking up they're really you know not trusting government and just opening their eyes and seeing how corrupt it is what planet do you live on what planet do you live on the vast majority of people still watching the news as we're gonna talk about still believe the mainstream media still believe the government's there to protect them and care for them so people naively misplace their trust in this institution because they identify with and believe in its ostensible purpose and the ostensible purpose of government is to maintain critical infrastructure protect people's lives rights and property punish wrongdoers preserve justice in our society and defend freedom from potential enemies whether they be foreign or domestic enemies to freedom this is what government tells you it's doing you know we're going to build and maintain the critical infrastructure of the country you know the road system the transportation system the communication system the electrical system etc water gas etc all the necessities of life right we're gonna protect people's lives rights and property we're not gonna take those things we're not gonna subject them and enslave them we're gonna protect your rights punish the wrongdoers somebody's got to do it all people out it would turn into a society of cannibals and murderers if not for government right somebody's got a you know bring those wrongdoers to justice and defend our freedom from enemies lurking around every corner I mean what kind of a smacked ass does someone have to be to actually believe this nonsense but yet that's 98 percent of probably our entire society I'm gonna say minimum minimum number 95 percent of society believes that that is the extensible purpose of government and they're smacked ass clowns period I mean there's no other there's no polite or nice way to say it they're brainwashed children who never grew up emotionally mentally or spiritually never grew up stunted child development almost always through what I'm going to talk about here today which is childhood trauma through a particular type of psychological abuse I'm going to get into the underlying psychological reasons for this belief for the trust and belief in these institutions for believing all of the ostensible purposes of these institutional bodies so let's look at the true purpose of government if we're being honest with ourselves once again you could lie to yourselves all day if you want but if we're going to get down to the meat and potatoes of this if we're going to get down to the nitty-gritty and we're gonna really tell ourselves the truth this is what government is here on the earth to actually do the true purpose of government is to control and ultimately enslave the people who are its subjects government sees itself the people in government sees itself as a master class of commanders of other people lawmakers those who others must obey or be punished for not obeying and you know that's called folks I don't care what name you want to give it that's called slavery you want to you for my zit you can you for my zit whatever way you're little naive tiny broken and thin-skinned mind you know once to you but if you're a big boy and a big girl you're gonna call government for what it is and stop you from isin it and saying that it's some other thing you're gonna say exactly what it is and that's slavery that's what government is it's one class of people who are masters who who believe they have the moral right to issue commands to others that they call laws which are often arbitrary often conflicting often the different things in different places and different times which makes them completely morally relative and not in keeping with the moral laws of creation which do not change with time or location and are not relative and are not subjective the real laws of morality are objective so that's what governments really doing folks if we're being honest with ourselves it is enslaving humanity the true purpose of government is to dictate commands called laws to protect its own interests and limit any threat to its continued control that's what government wants to do that's its primary purpose to continue to survive to continue to grow and to continue to limit the freedom of others so that any threat that those others may pose to its continuation is limited and or disposed and that's what laws are for and that's why there's more and more of them every single day the third true purpose of government is to conduct abject violence in the name of safety and security getting the naive children that are its slaves to believe that it's protecting them and keeping them safe when in fact all it's really doing is conducting abject violence in other areas to take resources that at once or to shut down rights shut down freedom and let me tell you something folks it's not in here police and military are not in these this list of the seven deadly institutions but they are part of government obviously you have to take note of that this is what I'm talking about these are the conductors of the Jek violence these are the people that actually perform it the order followers you know all government is is one huge chain of obedience up from the order at the top the order givers to all the way at the bottom of the order followers the police in the military order following trash the dogs of the commanders at the highest end of government and and those who really are the occultists the Darko cultists who sit enthroned behind in the shadows be you know behind ostensible government power so the people who are really conducting the actual behaviors are the ones who are getting hit karmically the hardest as the karmic clowns of the controller class at the highest ends of government and the occult they call them their dogs their pets their animals that's what they call the police and military and yet they're just all too happy like a slathering dog you know a slathering dog just you know with its tongue hanging out saliva dripping down tell me what to do next master I mean just think about that for a minute you know not to belabor the whole topic of order followers we've done whole shows on that you know but just what kind of a person who even considers themselves a human being let alone like considers themselves men are gonna make their job like make their life you imagine saying I'm gonna make my life just doing the behaviors that other people command me to do me what kind of a total ass retard do you have to be to think like that seriously like how broken does your brain and soul and most of all your heart have to be to just say to yourself what my entire life is going to consist of is I am going to stop thinking for myself about what's right and wrong and I'm going to listen to what other people tell me to do as far as my actual behavior is concerned could you imagine and then and you think you're a man with courage you're a fucking ignorant child a bolas ignorant coward child that's what you are all of them 100% all of them all our followers are that bolas ignorant child cowards I'll say it to your fucking face and people should be saying it to your face that's what government is folks whether you think so or not that's the truth eternal truth of the matter the next institution media here's some of the lowest arch demons of Hell quite frankly you know to put it in simple words as I can they're the the bottom-feeding arch demons of Hell that's who these people are if there's anybody that I think are like even lower than the order followers it's the media I personally don't think so I think the order followers are lowest of the low they're the scumbags of the scumbags but the media are right down there with them because what these people are paid liars that's what they've always been but that's not what the public thinks that's not what the mainstream public things and folks I'm trying to explain to you today what your work is the people who are listening to me really trying to get it trying to understand what I'm trying to get accomplished what I want actually done in society what I would like to see happen in society is for people to understand the difference between the ostensible purpose of these institutions and the true purpose but guess what folks that is not happening if you believe that that is occurring and happening you yourself are naive child a naive ignorant child all you have to do is do some social experiments see most people just don't have even have the courage or the balls to do that do some social experiments in your own town or city go into your own local pub or venue a music venue wherever a restaurant okay and ask people do you think the mainstream media does a fair job in trying to act you accurately report what's taking place you think that that's their intended purpose like do you think that that's what the people who actually you know dress in their suit and tie or they're you know you know business type outfit and go into work every day as part of the mainstream media is their goal in their mind to say I want to try to accurately report what's happening in the world and accurately report truth so that other people can make informed decision making just do that experiment and see the results that you get the answers that you get and I'm telling you if you're not shocked and horrified like you I don't know what to tell you you're not paying attention you're not paying attention to the zeitgeist the zeitgeist the general mindset and worldview of the people all around us you think because you've seen through the facade that other people have and it's not the case and it isn't that you could say oh numbers are growing slowly no it does it's not that numbers are growing slowly percentages are staying the same as the population grows that's why some more people are aware of this because the population is growing but if you actually looked at percentages they're not really changing this is why the great work is not succeeding the potential teachers are not coming forward and courage and speaking the truth to the average member of the public like I said I asked a family member does anybody ever complain about the mainstream media no they watch it do I go into family members homes they're watching the the 6 o'clock news around dinnertime perk in their ear up when they won't hear here's something that they think interest them and but not in their head believing that that's what going on you believe that but I'm telling you it's it's everywhere I I'm not doing this to try to people will go oh um somehow an agent working for the dark side because I'm telling people all these bad things about what's going on in society I'm trying to accurately portray what I see and it doesn't matter where I go I go to any town city in the United States I've traveled just about every single state in the entire United States and I've traveled to many foreign countries I mean not not like a better portion of the world but I've traveled to enough places that I've seen other cultures and it's no better than it is here anywhere anywhere not a bit as a matter of fact I think America percentage-wise probably has the greatest percentage of the oven awake population than any other country in the world and that's sad that's not saying much folks that's a very very sad dynamic so the ostensible purpose of the mainstream media is to provide accurate information to people so that people can make informed decisions regarding what type of behavior they're going to choose to take people want their behavior and their decision-making to be based on reality right so that's what the media's allegedly here to do to provide that accurate information about what's taking place in the world so people can make their decision making accurately based on informed decisions based on accurate information and they're supposed to act in a power checking capacity to corruption in other institutions like government that's why it's been called the fourth arm of the government in addition to the executive letter legislative and judicial branches it's been called the fourth the state the fourth branch of government okay has been a nickname given to the media because that's what it's supposed to do that's what real journalists would be charged to do we don't have that that's not what the media is today you look at operations like Project Mockingbird operation Mockingbird a CIA you know I believe that's one of the reasons that Jim Keith was taken out he did a lot to expose that in his books you know and um you know talking about how many people and the intelligence agencies are on the payroll of mainstream media feeding it disinformation and just concocting fake news stories to brainwash the population and to change the world view of the whole population and these this research was done back in the 1970s and there were hundreds and hundreds of people embedded from intelligence operations like the CIA that aren't supposed to operate on US soil but are supposed to be intelligence foreign intelligence gathering outfits and hundreds of them were operating within the mainstream media back in the 70s imagine how many thousands are now no folks the true purpose of the media is to control the world view of the government subjects to control the minds of the government slaves that's what the purpose of the media is to feed you the narrative that the government wants you fed and wants you believing that's the true purpose of the media if we're being honest with ourselves it's the spread government and corporate propaganda lies and misdirection to get people not able to discern truth from falsehood because you're feeding their minds with so much garbage you could group Intel you can group entertainment right in with this because most entertainment is the same form of mind you know polluting garbage and ultimately it is to control the public's perception of what is possible mostly what is socially possible that's the purpose of the mainstream media to get you thinking Oh change is impossible look at how bad people are to each other you know we can never not have a society without government you hear that from the day you're born through these paid prostitute Liars you're going to eventually come to believe it and that's most of society is that not only do they believe the propaganda that's being shoved down their throat by the media they actually believe the extensible purpose of the media is to tell them the truth and they believe they're doing a good job at it in social experiments I've done asking just about every single person in a pub a local venue here in Philadelphia do you think the mainstream media is doing a good job or trying to do as good of a job is within their ability to do to report what they come to learn accurately regarding what's taking place in the world 100 folks that this is one of the most terrifying horrifying results I've ever gotten in a social experiment in a pub that is also a music venue in the just past like the Northern Liberties area maybe up toward the North Philly area of the city which is somewhat of a hipster area these days I myself and a friend did a small social experiment asking people do they actually believe the media are trying to tell people the truth to the best of their ability 100% of the people in the pub said yes they are one every single individual every single one not one person said no I think they're paid liars and they don't care about anything but their paycheck not one zero not one person and and people think the world is waking up and let me tell you something folks I'll bet you I'd go do it all over again and get the same exact result because this population is asleep hard-core asleep education here's one of the reasons why the public is as dumb as it is here's one of the reasons that population is as docile and naive as it is one of the reasons the public doesn't have the critical thinking skills they need to discern when they're being brainwashed propagandize and ultimately deceived the ostensible purpose of so-called education whether it be all the way down to grade school education all the way up through higher education through the universities I don't care what level we're talking about the ostensible purpose that people believe that it's serving is to teach the young the necess to teach to the young the necessary information and life skills required for successful living and secondly to provide the toolset for critical thinking and informed decision making is the mainstream education system actually succeeding in that role is it actually attempting really to do that is that its real purpose and I'll tell you what you go and ask people I'll go and ask friends of friends family members who are involved is this what the education system is really set up for no mm-hmm yep yes doing as best as they can with the limited resources that they have you know and teachers are have the best of intentions and they're not just following a script that is harmed harming children to get a paycheck and to just keep the status quo and stop not rock the boat so that they have a paycheck to feed themselves in their family no it isn't that it's that they're really trying to educate people and teach them truth and teach them critical thinking skills and discernment skills yeah mm-hmm and I'll tell you what assholes in my own family believe that shit they believe the ostensible purpose of the education system because some of them are involved in it and they actually believe that bullshit because they're lying to themselves and they don't want to acknowledge that they may be involved in something that is harmful to others namely the developing minds of young children and impressionable youth and it's their paycheck it's their bread and butter so god forbid you talk anything bad about that you know this is my identity I consider myself a teacher in the public school system or whatever how dare you attack that that's attacking me no that's just what you do and the institution you're involved in doing it through that's not who you are it shouldn't be the view of who you are but that's the problem is people identified themselves with the job that they do it's called ego identification cultural identification and then we have political identification you know identity politics job identity people can't see that there's something beyond that that they themselves are something beyond that in consciousness and awareness no I am my job so I'll take offense to a critique of my job or the institution that I work within instead of being honest with what you are actually participating in and what is the actual end result of that in the real world what's the true purpose of the so-called education system it is to indoctrinate the young into the worldview of the state so that they aren't easy to control shouldn't say easily it's just a more easily controllable or easier to control matter of fact I'm gonna fix it in real time how about that all right back to the slide all right it's fixed indoctrinate the young end of the world view of the state so they are easy to control present a skewed depiction of both past history and current social events politically brainwash the young and impressionable that's the real purpose of so-called mainstream education and I would add a fourth one it's to prepare people to do jobs where they become obedient workers as George Carlin said that's why you're never going to have or you're not going to through these in institutions you're never going to have an informed population capable of critical thinking because the owners of the world don't want that the owners of society want obedient workers and that's what the education system is there to churn out again if we're being honest with ourselves you want to lie to yourself all day that this is set up to actually edify and enlighten people and give them accurate information about the world and what's happening what's taking place lie to yourself all day all damn day you can lie to yourself good you know go look in a mirror and practice lying to yourself about that you know you can get better and better at it so if we're being honest with ourself education is just another aspect of state indoctrination it's the state putting their people in point positions to brainwash the young to make them ignorant and docile so that they are easy to control by the state that's all the modern and doctrine ation system really is if we're being honest with ourselves and you know there there's you know exceptions to the rule in general like you have some teachers that are gonna try to slip some things in with children that happens okay there's some schools that do try to teach critical thinking or some programs that try to teach children critical thinking skills okay so you know I'm stopping short of making 100% entire blankets regarding this but in general it holds very true as a rule banking and finance were some of the highest level occultus operate from this world there ostensibly is to maintain the value of established currencies that the people use to provide stability and safety for people's financial resources and to assist economic growth and prosperity throughout society this is the ostensible purpose of the banking and finance institutions and again I would suggest that anybody believes that that's actually what these institutions do behind the scenes is an extremely naive child not capable of true critical thinking and you know wants to lie to themselves and tell themselves pretty you know you know light-hearted stories about what's taking place in our reality instead of actually looking at the cold hard truth once again I'm not here to make people feel good or feel better about what's taking place I'm here to try to get people to accurately see what is truly taking place and that is ugly it isn't wonderful and beautiful the truth right now where we stand as a human species is horrific and ugly and it takes people with thick skin to look at it honestly and assess it and come to an accurate understanding of what it is instead of looking at the ostensible purpose and go oh yeah sure I guess that's what it's there for that sounds good to me because I don't have to think or look any deeper into what's really going on in this world and once again I it's my contention that's why so many people had such bad reaction to the shows from the last couple of weeks because they don't want to do that honest assessment they don't want to do that critical thinking you know and they want to say I'm going too far or I've crossed the line regarding telling people they should quit their jobs if they're involved in immoral institutions like this no that's exactly the advice that everybody in our society who considers themselves a moral human being should giving to people who are doing immoral behaviors and propping up immoral institutions who are continuing to do immoral behaviors that's the exact advice that should be given the problem is most people are too cowardly to confront people like that and tell them to their face no it is you yourself who is involved in something that is immoral and you need to back off from it you need to back away from it and stop doing it stop actually taking part in it through your behavior even if that means you might have to be poor you might have to struggle more than you do now already in the short term but in the long term you'll be doing less harm to society and prosperity through universal laws of morality will eventually come to you the problem is people are too cowardly to go down that path because they don't really truly believe in their hearts that that's how it works see and that's because they haven't actually conducted the real-world experiment to see what will happen and I'll tell you anybody that's done it will tell you maybe in the short term you might have to suffer but in the long term yes the universe will reward you and you will find prosperity and you will have your life completely turn into a in a better direction it's not my belief it's not a prophecy that I'm making it's not me trying to predict what might happen it's my definitive knowledge of how the laws of nature work I'm not telling you that might happen I'm telling you it will definitively happen if you decide to walk away from something that is immoral and you continue on that path you persist on that path you don't just step away from the goal that was too hard I'm going back to what I was doing before no you have to persist on the path and add actual value to humanity do something that actually does contribute value in a volitional way in a voluntary way and then you will see the universe come to your assistance and reward but guess what most people will never do it they'll never test the validity or veracity of my words because they don't have the cat the courage to actually change their behavior they're stuck in an endless cycle a loop of wrong thinking leading to wrong behavior leading to the failure of courage to get out of that loop that's exactly where and how they're stuck the true purpose of the banking and financial system is to direct the economy in ways that best serve the rich and powerful to maintain an extreme wealth wealth gap between the rich and the poor and to finance wars of aggression and resource theft all of this plays into the hands of the state keeping people low on the totem pole of resources makes them afraid makes them always focused on money makes them live in an hour scarcity based mindset all the time so that they won't step out of that and actually take a chance and do something that is actually moral and truly productive to society but most people won't be honest with themselves about how this works they want to believe and trust in the ostensible purpose of the institutions of banking and finance again look at that first one to direct the economy in ways that best serve the rich and powerful in other words make the rich richer and the poor poorer maintain that wealth gap that's what they want because the the poorer and more destitute people are the more it becomes practically impossible for them to turn any amount of resources toward a pursuit of truth or helping others they stay in total survival or complex mode in the brain oh and always self-serving ideology me me me thinking because I have to get my nyeh you know cuz I'm in such a state of deplorable resources and that's where the ruling class wants people they don't want people in any kind of a state of prosperity or or comfort when it comes to their own finances or or just general resources that they have at their disposal they don't want that that doesn't serve their interests people are easier to control when they're in fear of not having and in fear of the little that they do have might be taken away from them and so they won't step out of line that's what these institutions are here to do keep people in fear and keep them in line and you know what folks I just want to go back to it before I even step forward you know again I listen to the alternative media and nobody's even just hammering on these fundamentals you know they're dirt out in space you know talking about like you know nonsense I mean I just hear more and more and more nonsense talking about the paranormal and ghosts and you know what the afterlife might be and the Flat Earth nonsense and you know the secret space program this and that and just like you know can't we get down to brass tacks and really look at what's really taking place that is truly affecting the lives of other people in the very real 3d world first I'm not saying never get into all of that this is all I hear I can't even turn on the main the the alternative media anymore and hear anything about like the government doesn't give a shit about you or your life the banks are doing they're not doing anything to rectify the economy or you know help people to actually get up off of their feet financially they're there to control you and enslave you they're not even talking about the enslavement of humanity anymore they're not I'd never turn on one piece of alternative media where one other human being uttered the phrase government is slavery I'm the only person on the surface of the earth that I hear doing that and people want to wonder why I'm in a better mood having done this for 12 fucking years in my life to try to spread this message of truth and make people aware and the alternative media is talking about the fucking Flat Earth no I I have no right to be bitter none whatsoever you know because a bunch of smack dances is who we have to work with on our team and guess what if you're not one of those I'm not talking about you you know all these people want to get offended by me saying this if it doesn't apply to you you should take no offense you know I'm not talking about everybody it doesn't apply to everybody it talks about the people who aren't doing a good job explaining the truth about the world to people if you are doing a good job doing that wonderful we need more people like you but if that's not you I am talking about you being a smacked ass not really talking about what's important but I'll tell you what most of the alternative media that I turn on that there are heads up their ass they're not doing any kind of a good job whatsoever in it really explaining the dynamics that are going on socially and especially psychologically and then most of all they're doing a crap job explaining what's going on spiritually because they know nothing about the occult and they think they have the dynamic figured out that's the dangerous part they think they have all the information that they need and they do not so let's look at the last couple of institutions of worldly institutions people to completely misplace their trust in in a naive capacity like little misguided children the health care or medicine industry you know the ostensible purpose of which is to nurture and maintain optimal health for the population provide medical treatments and care services for the sick and research new methods for treating and healing diseases is that really what the so-called health care industry is doing is that what the medical field is really doing in our society I have to call a huge crock of bullshit if you believe that's true and yet people believe this they go to these magicians these sorcerers and the white lab coats and you know all of their team members and they say go ahead and make your diagnosis and tell me what's wrong and tell me what I need to do to fix it and then they listen and they nod their head and they say yes sir I'll try to do that or maybe they don't even bother to do that they don't even care enough about their health but the ones who do at least want to get well then go and listen to the advice that these smacked ass clowns give them who have done no homework at all on nutrition know nothing about how the body really truly works and functions regarding the building blocks it's receiving through food their Creed isn't let thy food be thy medicine and medicine be thy food no they have the Newtonian paradigm of false science operating in their brain everything is a mechanized process in a machine because matter is prime and there's no such thing as spirit and all we have to do is look at how the mechanized function works and then we make it work the way we wanted to by surgery and and or pharmaceuticals that's all so we're gonna actually chemically make the Machine do something like a action reaction based process you know and that's gonna try that's gonna treat this patient and that's gonna get down to what's ailing them and fix it and people believe this shit see this is my this is my entire family is that sick patient laying on the bed almost almost every member of my entire family believing the utter sewage that is being dribbled out of the mouths of the doctor and nurse telling them what they need to do or the medicines quote-unquote medicine poison that it should they should say that they need to be taking or the surgeries that they need to have but never uttering one word about proper nutrition zero never once never talk about give the building give the body the building blocks that it needs to maintain optimum health you have to give it what it needs to do repair work on the body and then health will follow you never hear that one time ever because that takes you right out of that hospital bed that makes you healthy and you're no longer a patient that means you're no longer a customer because these into this institution isn't helping patients this institution is serving customers like McDonald's or Burger King serves customers with their poison okay that's all this industry is doing its selling you a product called drugs and surgery pharmaceuticals and surgery are the products to sell and you're their customer and if you ain't in the hospital bed if you're not in the doctors in the chair in the doctor's office you're not a customer you didn't just go through the drive-in or walk into the the business so that's why they got to keep you in there they don't want healthy people sick people are their customers healthy people are not what do you think people looking for the profit motive that these doctors and all the people in the healthcare industry are looking for do you think they're looking for healthy people are sick people who's gonna make a more profit just do the fucking math fucking dunces out there I'm telling you I mean they don't even think about it from that perspective because they're naive little trusting children who can't put themselves into the mind of a psychopath and that's why you know I I have to really develop the having the psychopathy presentation folks you know it's get I've been talking about it for too long it's got to be done okay it's one of the next things I want to work on maybe that'll be a series here on what on earth is happening having the psychopaths so if we don't have the psychopaths within us if we don't really understand the mindset of the psychopaths we're at the true psychopaths in society's mercy that doesn't mean be the psychopath notice that the title of my potential presentation is not being a psychopath it's having the Psychopaths that means having the qualities of the psychopath within our personality and keeping them in a box that we can open up and trot out when we need it when we need those qualities were those characteristics of behavior and what it altum Utley means is understanding the mindset of the psychopath because there is a time to turn off emotion there is a time to turn off compassion emotion and compassion should be our guiding compass for our direction in life of course that goes without saying but there are times you can't use them to come to an accurate course of action sometime they have to be shut down you have to do what needs to be done and that means having the psychopath having the capabilities of shutting those emotions down the true purpose so just to reiterate I want to talk about the ability to have the the mindset of the psychopath within our psyche so that we can recognize the Psychopaths behaviors and the way that they act because they're good actors they're good at pretending they care about you they're good at pretending that they have your best interest in mind that's what psychopaths are great at when in fact all they have is their own interest in mind and they don't give a damn about you in any way whatsoever that's why most people cannot put themselves in that mindset so they say to themselves they wouldn't do that no you wouldn't do that the psychopaths would absolutely do that and I'm telling you psychopaths are the the top place that they're at is in government I'd say second in Business and Finance business finance and banking and then I'd say third there in the medical industry because Psychopaths think they're God and they have a god complex and they love having power over other people and that's what a lot of doctors have because they're psychopathic if not outright Psychopaths allopathic doctors let me qualify that you know and I don't really care who gets offended by that I don't give a damn you have members of your family and than allopathic medicine I'm telling you that's how it works and ultimately if they have faith in these institutions they're psychopathic if not outright Psychopaths because they will refuse to acknowledge that there's not really the patient's best interest at heart it's a profit mode of operating and no that shouldn't come into play beating them then you'll have the people who are defending capitalism in business why shouldn't there be profit motive in everything because you're talking about sick people you fucking psychopath that's why that's why there's too many damn psychopaths in the in the so called freedom movement that are hardcore and caps you know you have that there their compatriot bounces in the and Comm movement that are a narco communist contradiction in terms well the anarcho-capitalists are just all about making money and profit motive and everything that's not that shouldn't be your profit motive with helping people sometimes your motive just needs to be to do what's right that's unfathomable to them you know because they don't have that true sensibility of helping alleviate other people's suffering as what should be the real motive of all people all being suffering I should say the true purpose of the healthcare and medical industry is to make extreme profit from sick people who are looking for the solution to their illnesses just think about that that's what their main motivation is make extreme profit from sick people who are looking for the solution to their illnesses so you're garnering their trust in your bullshit Rockefeller protocols of medicine which haven't done anything except make people infinitely sicker in our world and your main motive your mo is to make profit from those sick people because of the misplaced cross they've placed in you and your institution I mean I can't think of a bigger fucking piece of trash than that you know but that they're all over the place these people are all over the place and the ultimate goal of the healthcare and medical industry is to undermine the general health of society by providing false treatments in the form of pharmaceuticals surgery etc and other uneffectual ineffectual treatments which do not address the underlying causal factors of illness they treat the symptom instead of actually going to the underlying cause and treating the illness from their from that level of causation and that's deliberate because they know if they treat it from the level of causation with natural applications especially nutrition nutritional applications they won't have sick patients to make them rich anymore they know this and their trash for knowing it and pretending like they don't and going along to just make as much profit as they can through their sick psychopathic Rockefeller protocols that's the true purpose that the medical industry is fulfilling in our world today for if we're being honest with ourselves and finally the seventh of the seven-headed Hydra the seven deadly institutions of our modern world is science which I should call scientism I'm just referring to it as in general the scientific institutions the institutions of science and there are sensible purposes to pursue and learn the truth regarding the qualities and workings of nature through accurate discovery methods accurate discovery methodologies this would mean actually applying the true scientific methodology the Trivium toward the process of observation and learning and then coming to accurate conclusions and then publishing those conclusions that's not what's happening in society okay that's the extensible purpose that's what science should be doing but that isn't what the institutions of modern science are doing they're ostensibly swill also be to conduct experiments to prove or disprove theories and hypotheses about the workings of nature and human beings and then to publish the results of such learning to the public so that the public may be accurately informed regarding the findings of the scientific institutions we don't have that we have government-funded science through grant money that is fudging data and results to give to the public the results that the government wants given to the public that's largely what we have and also to prop up the other industries like the medical industry the healthcare industry the pharmaceutical industry big Agri etc that's all we have you know we don't we don't have real science taking place in our world through the true scientific methodology we have scientism dogmatic forms of science that are conducted through government grant research money within strict boundaries and limits of what's on limits for discovery and what's strictly off limits for discovery and even research and looking into the true purpose of modern science or scientism as I call it is to act as a research and development arm of government to provide new technological means of controlling the public that's the number one area that Sciences is involved with in today's world and its true purpose is to skew and misdirect the public's perception and worldview regarding what is possible in the natural world they don't want people understanding what's possible regarding free energy technology regarding what Tesla tried to do for the world they don't want people understanding the device that Stan Meyer created to run you know transportation on water that is and completely sustainable and unpolluted they don't want that they want to try to tell you that's not possible even though it's already been done and the technology suppressed and the people inventing it killed to protect the interests of big oil and that's the main thing science in the modern form is therefore scientism is there to skew and misdirect the worldview of human beings so that we don't understand what is naturally possible what is possible in nature because if people did they wouldn't stay in the totally confined forms of behavior that they do they would be striving to create a better paradigm in a better world for all of society all of human beings science doesn't have as its true goal the betterment of humanity it's also a profit motive it is to get as much government stolen tax payer grant money as it can to perpetuate their lifestyle that's it was told to me directly I worked in the science field I worked in the medical field at the University of Pennsylvania as a person involved in supporting computers in medical research laboratories at the School of Medicine of the University of Pennsylvania that's what I did for a while and I heard conversations there and heads of research laboratory research departments saying don't ever dare look for a cure we don't look for cures here we try to find treatments through potential pharmaceuticals because that's what will keep the grant money coming in and that's what will keep this department in business heard a head of a department say this to a lab researcher and people want to say science is there to actually discover truth about how nature actually works about the wheel work of nature and then publish the results to people to improve society you are a dumb naive dunce if you actually believe that's the true purpose of the institutions of science that are operating in the modern world I don't know there's no polite way of putting it folks is that if people believe and place their trust in these institutions and I'm telling you that they are it's widespread it's not diminishing it's it's growing and increasing by the day the type of trust that people place and you know what to know why they place their trust in it because these institutions pay their bills so to say I don't trust them is to say ultimately I want my money fucked with and nobody wants to do that because they're chickenshit cowards that's the reason that's the answer most people won't step away from their source of income because they're chickenshit cowards see nobody else will say that you'll not hear that on any other alternative media program you won't hear it you only hear it from mark passio on what on earth is happening that's the only place I'll tell you what I listen to tons and tons of alternative you turn to the media and I'll never hear one of the assholes on given any of that information that they think is so important never say that to anybody you want to know why they're afraid they're gonna lose their support I don't give a shit if not one person ever donates to me ever again I stand in the truth and the universe will come to my assistance even if no one individual as a human being will so so be it you get offended turn this shit off how about that you think I crossed the line I don't give a fuck I'm speaking hardcore truth that no one else will boys and girls and I'll continue to do it till the day I leave this shithole planet that's been turned into a shithole yeah the alternative media they're doing such a great job ike her i cross the line me yeah cuz i'm telling people you're getting really hitting anybody with any real hardcore truth you you don't want to tell them their bullshit cowards because they won't stop doing it immoral thing for a paycheck and start doing a moral one to make your dick your daily allotment of what you need to live now no one will say that because they're too afraid of what other people say about them and think about them you know and they're too afraid they're there are clicks on youtube will dry up so their their monetization of their channel will dry up because they're taking all their money from internet censors this is a slide that I put in my Tesla and humanity's missing paradigm shift presentation that I delivered at the Tesla Science Foundation's caught Tesla conference 2019 in New York at the New York or hotel earlier this year back in February or I think it was January and the slide posed the question why hasn't the paradigm shift that the whole New Age movement and spiritualist movement back in the 1990s was heralding that was going to happen it was coming in the year 2000 or 2012 you know we're gonna see a massive paradigm shift yeah it's gonna everybody's going to be thinking differently our institutions are gonna be different world the world as we know it will completely change life on Earth will be completely different we're moving into a new world a new age everything's going to be better we're gonna have you know technology assisting humanity instead of acting as a detriment to it you know people are gonna know spiritual truths about what's been going on in the world they're gonna see institutions completely differently oh it's gonna be such a wonderful place we're gonna make so much progress in consciousness we're practically gonna build a paradise here on this planet the paradigm shift they called it crock a shit I call it because it never happened it was some bullshit promise the people were selling people hope iam about to make money on I'm not I'm not proud I'm not making any profit from selling people on hope in case you haven't noticed people are donating to me because I add value to their lives through telling them the harsh truth that no one else will so I posed the question why hasn't the paradigm shift that the spiritualist movement of the early 1990s promised us why hasn't it already happened and here were the reasons that connect directly in with the show that I'm doing here today most people still believe in authority most people I'm sorry most people still believe quote authority and government are morally legitimate and necessary and still believe in the false left-right political paradigm they believe in the institution of government they believe in the I that the absolute bullshit notion called authority vested in human beings and they believe government is morally legitimate has a morally legitimate reason to exist and is necessary to control people and the vast majority still believe in the false left-right political paradigm which are all total Crocs of illusory bullshit most people still believe the mainstream media and its pundits are telling them anything resembling truth and trying to bring any value to their life by helping them make informed decision makings through accuracy of information most people in the world still believe that the purpose of mainstream science which I call scientism is a genuine search for truth and the betterment of humanity through the understanding of nature and the development of new technologies most people still believe that the purpose of the so-called education system is to edify and enlighten people through genuine knowledge I want to go back to mainstream media again because the social experiment I just really can't get it out of my head of how horrific the end results were then that people were actually saying that they thought the media just is somehow gets things wrong they don't always have their facts straight they're actually trying to report the truth but sometimes they just don't have all their ducks in a row and they just don't have all their facts straight and so they give inaccurate information to people believing that it was accurate at the time yeah that's what it is they're just so well-intentioned and they just at the time had some things wrong and so they reported things to the best of their ability and knowledge and then they later realized that what they were saying you know it might not have been true and oh sorry yeah that's how it works I mean could you imagine the childish mindset the childish dunce like naive overly trusting mindset just just just out there openly saying please just deceive me you know I'll just take it just just shove the hose down my throat and turn the faucet on I can't get it down to go it fast enough going back to the final slide about the missing paradigm shift that should have already happened but has nowhere near happened moat the final a bullet point on this slide most people still believe that the other institutions of religion banking medicine law law enforcement military and just about every other societal institution exist to do what they claim they exist to do or in other words they believe in those societal institutions ostensibly purpose but they do not understand their true purpose and here's the way I want to kind of wrap up the idea of talking about like the fact that people have this trust this misguided misplaced naive trust in these institutions before I get to the why okay but the fact of the matter that so many people are actually in this condition I've said before and I'll say it again those who are committed meaning have a personal commitment in their lives to the societal institutions should actually be committed to an institution meaning a mental institution meaning an institution for the mentally ill because that's what these people are they belong in a fucking straightjacket in a mental institution those who are committed to the institutions should be committed to an institution okay that's that's the accurate the actual and accurate way that the people who actually put their misguided faith and trust in these institutional bodies of humanity that's what they really are they're insane people that cannot come to an accurate understanding of how reality works around them and what they are doing through their decision making of placing their trust in these institutions is actually acting as a completely insane individual in the world and therefore doing harm to other people in the world because they're propping these institutions up with their trust and with their money get as offended as you like that's the truth so let's get into the real psychological reasons regarding why this trust is so prevalent in our society and I'm just jumping straight to it and explaining it right out the number one reason that people still have faith in all of these institutional bodies is due to unresolved psychological parental abandonment shoes that are nested deep way down in their subconscious mind and that they have never dredged up from the subconscious brought to the conscious surface and confronted head-on and dealt with and then worked with worked with that shadow material that shadow were done the shadow work to deal with that shadow material to actually resolve those psychological issues that is the actual point of fact reason that we have a society that is completely naive and trusting in all of the worldly institutions all around us that are doing nothing to serve who we say we are and what we want zero John I see folks I ask people all the time what the hell has the government has the medical industry has the media has the scientism has the educational institution ever actually really done for you what has it done to enhance or increase the quality of your life anything that is enhanced or increased that the quality of your life has been done by you through your own hard work and effort not due to any of those institutions you should take credit if you're in a position of prosperity and and knowledge and right behavior no one else did that but you these institutions didn't do that why are you even why would anybody even in a better position claim that it was because of any of these institutions see it's psychological transference on to the proxy parent which is what I'm going to talk about and most people have never studied psychology one second in their lives so they don't have any understanding about how this works they think it's random or it's like it's just monetary incentive a lot of it is monetary incentive but it goes much deeper than that from a psychological point of view and the real reason is unresolved parental abandonment issues now obviously there's two parents every single one of us regardless of how we may identify has two biological parents otherwise we wouldn't be here give me a moment I want to take some of my watermelon juice here I've been drinking watermelon juice like it's going out of style it is let me tell you something folks I'm just gonna do a complete sidestep for the main presentation here and just talk about this for one second it is the most detoxifying one of the most detoxifying things you can put in your body do you think you have on unclean food or or whatever chemicals drink a whole lot of watermelon juice but you have to juice it with the rind okay all right I talked about this when I talked about juicing don't just juice the red flesh of the watermelon if you're gonna do watermelon juicing juice the whole thing you juice the rind skin and all just clean the skin with clean reverse osmosis or spring water even or you know distilled water clean it well on the outside but you juice the whole rind skin everything okay and you drink it integrated this is actually a green juice that I'm drinking here today I know it looks bright pink reddish okay but let me tell you something this is a green juice because of juicing the skin and the rhein where all of the phytonutrients and detoxifying nutrients are at and you drink decent quantities of that I'm telling you it's gonna pull out just about all of the negative toxins that you're accruing in your body it's a diuretic it'll make you pee but it's it's a good thing okay that's flushing toxins so back to the presentation biologically folks we all have two parents okay man and woman otherwise you're not creating that child okay I know lots of people are gonna take offense just by that biological natural statement okay so we all have a father and we all have a mother otherwise we wouldn't exist on this planet okay so the first form of parental abandonment is motherly parental abandonment when in whatever form a mother is not present we're not doing our job as a mother okay we went into this in the past I'm not gonna reiterate what constitutes parental abandon okay so you can get that on former shows that I talked about that as a main topic all right what we're talking about here is why do people maintain a naive and childlike mindset and psychology when it comes to placing their trust in an unfounded capacity in the mainstream institutions of this planet and unresolved parental abandonment issues is the main reason that we that we as a society are still doing this it's why we're we have all the or just about all the problems that we have okay and this leads to dogmatic religious thought and it leads to misplaced trust in institutions that are harming us not actually helping us certainly not serving who we say we want to be or where we say we want to go in in life okay so the first form is motherly parental abandonment issues let's kick back to the slide there we go unresolved motherly abandonment issues will leave the child feeling a lack of care and nurturing and will lead the child to look for such needs to be resolved by proxy this means you're not going to look for another real mother you're going to look for a proxy mother you're going to look for an ostensible mother one that will try to fulfill the role of care and nurturing that the biological mother did not provide when the child was young so those needs are going you're the child will attempt when they become an adult even will attempt to resolve those unfulfilled needs by proxy and try to find a proxy parent in the form of a proxy mother that means not the real thing a false form of a mother that's what proxy means this leads to the quote societal institutions care for me want to provide for me and nurture me and have my best interest at heart syndrome okay the syndrome that that child is going to distort to display as a young adult and then eventually into their adult years whether they are male or a female if they have mother abandonment issues so don't just confuse this with just because it's a female child that this would apply to only females it does not okay it could easily be a male child there but we're talking about the mother not fulfilling her duties and roles as a mother to provide care and nurturing in the traditional motherly role as a parents okay this will lead the child to look for the needs to be met by proxy by a proxy parent the institution's will step in and act as the proxy parent and then the child will develop the Stockholm Syndrome of thinking societal institutions care for me they want to provide for me they want to nurture me and they want to look look out for my best interests and this is how you have largely this is the left when it comes to government and I would say largely this these are leftists in the political paradigm in general okay but you know these issues span all the institutional bodies and it's why people are still in that naive psychological state like children no matter how old they are biologically placing misplaced trust in institutional bodies that are in our society and believing they have their interests at heart when they do not now conversely we have fatherly parental abandonment issues that go on psychologically and again and this just is a an apropos image that I found that I thought you know went along with the concept of a child being ignored it could easily be a male child there okay so don't just think it's just the father ignoring a girl okay both of the examples there were female children but it could be a male or female child just I'm making that trying to make that clear so people don't misconstrue the imagery okay but we're talking about fatherly abandonment issues of any gender child okay and what happens in that instance is the unresolved fatherly abandonment issues will leave the child feeling a lack of protection direction and discipline in their lives and this will lead the child to look for needs to be resolved by proxy by a proxy father the institution's will act in that capacity as a proxy father parent okay this leads to the quote societal institutions protect me they want to keep me safe and secure and life would be chaos without them syndrome okay so it does the same thing but in the opposite aspect the the child grows up to be an adult thinking these institutions that are acting as the proxy parent because of their unresolved psychological parental abandonment issues in the daddy aspect that when unresolved they think this institution subconsciously their subconscious mind replaces the father with the institution as a proxy father and they think this institution has to be here to protect me you know to keep me safe to keep me secure and if it won't it didn't exist life would be abject chaos without it and nothing could be farther from the truth it's doing the exact opposite of those things it's making life actually less secure less safe with less rights with less freedoms it's not securing any of those things but because people haven't done the actual homework and haven't actually done upon their own psyches the psychological shadow work which the occult and occult practices can help them to learn about and then actually enact and you could call them spiritual practices but really they're talking about occulted aspects of the self those which have been deliberately hidden and not talked about not brought forward to resolve deep down embedded subconscious psychological trauma because the the all these institutions don't want that trauma resolved because they know it's the underlying causal factor of why so much trust is placed in their institution to begin with they don't want that dealt with and healed they want it to remain occulted hidden nested way down deep into subconscious mind where it can manipulate and control people and get them to dance like puppets on strings which is exactly what we have in our society this is the real reason folks this is the real causal factor of why this trust is not only so present why it's growing everyday trust in these institutions is not breaking down folks that was a promise that did not go fulfilled trust in these institutions folks I just wish you I wish you could just come and walk with me just walk take a nightly walk with me and here just listen you know the problem is a lot of people they don't do enough interaction with other human beings they sit in their house they watch their screen whatever form of screen whatever black mirror you're staring into today you know that's all but they don't go out and interact and talk to people and just try to observe the zeitgeist try to observe what's going on mentally with other human beings all around us most people don't do that this is what I try to make my work now that doesn't mean that I get into heated debates and conversations with them sometimes it's just listening I'm an eavesdropper I'll be honest with you when I go out in public I eavesdrop I listen to what I'm you could say oh that's not respecting other people's privacy they're in a public space I'll listen to what they talk about and it is the epitome of Jack asset ood okay quote me on that the average person just is just drooling nonsense all day long never saying anything of substance never ever complaining or talking about the failure of societal institutions if they have anything to say about these things it's in praise because maybe their job depends on it but you take a walk with me out societally and you just listen to what people have to say and you'll just see it's all people who just have 100% faith and trust then what's going on around them is for their betterment and and best interests that's how naive in childish they are and it's because the vast majority of people in our society are still little children whose mommies and daddies failed them did not pay enough attention to them did not care for them or nurture them did not spend enough time with them did not teach them properly did not truly raise them morally and did not protect them and direct them and discipline them we have a society of grown children with deep-seated deeply nested parental abandonment issues and that is the reason we have a society that is completely miss placing their trust in worldly institutions that absolutely are doing nothing really but destroying them and enslaving them long-term so let's move away from addressing not only the what is happening now we talked about the why it is happening but let's talk about the perception of it by the so called conscious community and I'm going to wrap up on these couple of slides and then we'll go to your calls for the duration of the show picture this individual in the middle of this circle of people that is depicted in red here in the center of the circle as somebody who is largely conscious and awake who knows about the degradation and corruption within these institutional bodies but yet hasn't woken up to the point where they're really truly accurately engaging the real proportions and numbers of what's really going on in all of society regarding the awakening of the public mind okay so they have their own little circle their own social circle that they hang out in and I just talked about this that people generally hang out in their homes okay with close personal friends or family members or just by themselves where they have little tight-knit cliques and circles on social media that they don't venture out too far from they certainly don't go on other groups or forms that are completely the antithesis of the belief or worldview that are in their little social media circles okay I do this all the time deliberately I will sometimes go to places online in in a rarer sense actually not not that rarely like pretty frequently online but in a much rarer sense in the physical world to to places where I know that people have the complete opposite worldview as far as it can go I once like attended just to hear what their worldview was and see like socialist meetings here in Philadelphia I've done it just gone observed pretend that I was interested just to hear what they're saying to each other and what their worldview is politically I've done it okay I've gone in other circles to just be around a dynamic that I know no one there understands one thing that I know about because the consciousness is so low just to hear where they're at to try to get it put a thumb on the pulse to put a finger on the pulse to get the zeitgeist not many people do that and I don't even really talk about that I do that I just do it because I'm an observer of the psychological milieu meaning what is really taking place in the average minds of a lot of people that's how you get where the numbers are the proportions of the dynamics are okay you don't get that by just thinking about it in your own mind you have to actually observe and listen to what a lot of other people are saying and then people will also make the argument you would have to travel and see that in different places and I feel like I've done that enough and I've done this in other places enough when I have traveled and it's no different anywhere you go but the people who don't do that have this microcosm that they dwell in so let's put that up full screen on the slide because this is what I'm talking about this is the microcosm okay that individual who considers themselves awake and considers that they understand the dynamics that are involved in what's taking place in our world has this little small social circle that they surround themselves with okay and they're they're like you know always around these types of people who are also like them and are awake and aware and are you know trying to understand the dynamics of what's going on and that person in the middle is like they just see just they're a circle of friends on an average daily basis and they say yay everyone around me is waking up all of the people in my circle and my social circle my social media circle they're aware awakened aware they know what's taking place they know what's going on so this is a wonderful thing and then they make the fatal error they make the absolute fatal error of ascribing what that means and what they ascribed them the meaning that they ascribe to that is so that means the whole world is waking up because this small little microcosm of the world happens to understand most of what they understand okay and so they think wow because the people that I am hanging around with on a daily basis and interacting with on social media on a daily basis happen to understand some of the things at least that I understand that that means the whole world is waking up and coming into a place of consciousness and awareness and pretty soon the whole world is gonna be changing for the better but it's a deadly inaccurate conclusion to ascribe that same level of awakening to people outside of those small tiny minuscule little social circles that they always dwell in and never really leave because this is now let's go back to the slide because I want to show that go back fullscreen I want to show this animation okay because what this really means is they're not seeing the forest for the trees they're surrounded by that circle of people and they can't see past but what lies past their little inner circle of people here's where that individual is there's there's little there little inner circle that they can't see past but beyond that through an extremely large gap in consciousness and knowledge lies the infinite hoards of humanity the infinitely ignorant hoards of humanity that go on like an infinite plane in all directions whose numbers there is no end to who number in the billions literally and they think because they have a tiny little circle of aware people surrounding them in their social network that somehow that means the world is waking up I would suggest to my viewing audience my listening audience that the people like this in the truth and freedom movement are just as naive as all the people all the ignorant hordes around them who are miss placing their trust in all of the institutional bodies of humanity they just have a different form of knowledge they just see the world through a different set of rose-colored glasses they can't see the truth which surrounds them because of their naivete and their being hooked on opium their narrow and nearsighted vision excuse them their perception from the truth and you know what that serves to do excuse their perception from what their work is to do and that's why they largely don't do it that's one of the main reasons they don't actually step on to the spiritual battlefield and do the great work because they think they're being properly informed that their little social media group is accurately portraying the dynamics of all of humanity and it most certainly is not and there's an infinite amount more work to be done and we have to have an yeah we have to take the rose Howard glasses off and look at the world for what it really is beyond the comfort of our little social circles and with that message as sobering as it may be I'll end the formal presentation for today's show so see past the inner circle of what you want to see - what is really taking place and then you'll understand what your work is to do we can just briefly go back to the slides I want to just give the the pitch for you know donations so if you found value in what I have presented here today on what on earth is happening or throughout all of the years I've been doing this please go to gifts thought what on earth is happening calm and consider making a donation gift sort of securing a gift through a personal donation I should say we have t-shirts up there again there's a over 50% off t-shirt sale all t-shirts are $12 instead of 25 for the time that the I guess last approximately 40 shirts you know until they sell out and then I'm gonna be making a reorder going back to the regular you know donation value for the t-shirts and we'll be doing some new colors and possibly an altered design for the water on earth is happening t-shirt we also have a flash drives all my presentations on flash drives are up there all my presentations are up there on DVD we have some unique coasters left some keychains buttons stickers small items like that so you can get that all at gifts tot what on earth is happening calm thank you so much to everyone who has donated that way and I think most people have been pretty happy with the items that they've received for their donation the Ark Drive this is something that people have been taking me up on in pretty decent numbers and keeping me pretty busy doing I highly suggest that more people you know look into what the ark drive is because if you don't know what it is you'll be astounded when you really understand the of what the Ark is and how much is on this thing okay it's a one terabyte hard drive filled with data filled to the brim one terabyte of data that I've downloaded over the years of research material that has really informed my worldview and understanding of what's taking place that I present here on what on earth is happening so it's uh basically an offer that you ship a one terabyte hard drive to me I fill it up and ship it back to you there's a rigid shipping instructions because I have limited time and resources to spend doing this so you know you get the resources by filling in the form on the ark page just click the ark tab or button on what on earth is happening calm the address is what on earth is happening calm slash arc AR K and finally if you want to make a straight donation to the cause of what on earth is happening you can go to what on earth is happening calm slash donate or click of course the tab or button on the site there are ten ways up there to make a donation you can make a donation through PayPal through patreon people have been subscribing and becoming a patron on patreon I thank everyone who has done that and continues to do that it's been working out pretty nicely I'm kind of glad I added it as a new donation method and there are five different crypto currencies up there there is the old fashioned way of doing it through check and money order over the snail mail address and a great way is through donating supplies from our technological supplies from our Amazon wish list I do not have anything up there currently because having put a list of technological items people have actually fulfilled that wish list and sent all the items to me and we are using them as we speak so I thank everyone who is donated to that through the wish list and all the other methods of donation you could find the donation page at what on earth is happening calm slash donate so thank you to everyone who has generously donated - what on earth is happening now and in the in the past okay so I think that does it for the formal part of the presentation here today folks and let's move on to the call-in segments of the show and go to discourse so let me get set up here and get my headphones that I need to take people's call on the discord platform okay got it all right so let me join the call-in room and let's see who's in the queue all right so we resolve some issues with taking Ivan's calls Ivan from Phoenix so I'm gonna go to him first because I missed several of his calls over the last couple of weeks so Ivan from Phoenix you are live on what on earth is happening episode number 213 welcome my friend mark and you near me I can hear you sir we finally got that bill as you resolved so it wasn't me man I'm like I know I was a small issue on discord on our end we just figured out today so thank you for your patience and you know bearing with me through that no problem no problem for a minute there the conspiracy side of me wanna take over and stay mad they don't want to talk well as always good stuff today and a lot of synchronistic stuff anytime you put on a show for some reason within that week leading up to that show or two things happen to me in life that are like will synchronicity with what you're talking about okay again today this show kind of thing yeah people thinking that they're awake when they're not this whole thing you used to what was the word you used today I wrote it down Austin scible yes the word offensive ooh and for me I know you saw my presentation at a narco and in our zona or oxy ISM and I was wondering if maybe Austin suitable it relates to that too say very much very much so it could be used you know as a descriptive quality that would certainly compliment or go right along with something being a proxy for something else and we talked discuss both of those terms on the show today not only the extensible purposes of the institution's but also the way that psychological proxies work for those suffering from parental abandonment issues we are getting a little bit of noise on the line that's that's okay I know Ivan isn't work as he told me earlier so the background noise we'll just have to deal with and do the best that we can liver shut off the machine is that but that puppet or it's just noisy and just a little bit noisy on the mic but it's okay my producer was asking me to try to clean it up but I think no we'll just deal with it it's okay so um anything else that you have yeah well you mentioned something about the get my thoughts straight here I'm not taking it personally but again sometimes when you speak stuff I was like a talking about me I'm doing to work it doesn't relate to me so I'm like no the things that I have ever talked about in the negative capacity regarding people have been related to you I I consider your doing the great work with what you've put forward you know and I've been vocal about that that the conference that you put on was one of the best organized ones I've attended you know you made your speakers feel very welcomed and treated them right and you know the way that it was hosted at the venue that you chose was done very well and I think a great and very educational time was had by everybody who attended and a good social time as well so I consider that a huge part bringing people together like that as a huge part of the great work and you're actually doing that you're putting your money where your mouth is so certainly none of those things apply to you man you're out there you know you have skin in the game let's put it that way you're doing okay great thanks appreciate that okay that wasn't exactly where I was going for you mentioned something about people not talking something specific but I had I wanted to bring up you have a caller that calls in once in a while from Italy Francesco and he has a YouTube channel free thinker ts and he's interviewed quite a few people and he does a lot of the translating into Italian you know not too many people who follow it however well Italy and I want to see Margot he seems to be a place where there there is certainly a language barrier and I don't get a lot of crossover I look at site traffic and where it's coming from country wise the english-speaking countries obviously are the highest traffic but Italy is it's not very prominent as far as how many people you know kind of hit my site and sort of our paying attention to this material and I also very rarely get any orders from Italy for for you know the donation gifts merchandise so only recently I've gotten like a couple of art drives you know they took me up on the offer from Italy so there's been very little dynamic interaction on the part of what on earth is happening and the nation of Italy which I'd like to see increase as I would really all of the countries of Europe obviously we get a lot from the UK from France from Germany etc where there's some you know more english-speaking individuals but you know language is definitely a a barrier issue there when it comes to putting forth this information and that's why I appreciate people's effort like that who are doing the work to translate the presentations into other languages so that's always a good thing right and I wanted to bring it up because I've been interviewed by him a couple of times and I posted it on my facebook I need to put it on my website actually but I posted it up shared it with Facebook and it's gotten a little bit of use 30 40 50 years or something however the point I wanted to bring up is some of the things that you brought up about people commenting or pushing this forward I've been kind of pushing it forward with interviews with him and obviously I probably need to you know put on my own work and pushing it but like you said I know the way you present it not everyone can digest it and I feel like I'm one of the few out there that kind of has the patience to deal with the ignoramuses and kind of find different ways of expressing these ideas and simplifying it and I think in I've kind of done that right and I think there's a lot of people who have those types of you know skill sets as far as dealing with people I am more like a straight forward straight shooter or city type guy that doesn't want to mince words with some people I have the ability to do that depending on their personality but you know when it comes to the abject ly ignorant you probably want to keep me and them separated but um you know if somebody's trying to understand and yet they just don't have the knowledge under their belt I'll try to guide them in the right direction as long as they acknowledge that like as they if they acknowledge like you know I I don't know this and I think I need to know it I'll give them all the information they want it's when it comes into the place of willful ignorance that I start having a problem but yeah I mean it's like it's great that people like you will step up and do that when they know they have certain skill sets that I lack I don't I'm not I can't be all things to all people you know so it's like that's what I want more of I would love to see more people that you know we'll break it down further into baby spoon you know feeding morsels for the people who have thin skin wonderful it's just that's not gonna be me you know it's like that's not in my my nature it's not in my personality like I I have to I have to talk to the big boys and big and and big girls in the class okay I have to talk to the grown-ups in the class then they can go and teach it to the the really really you know misguided young all they want and I think that's important and necessary but it's just not everybody there's gonna be roles for other people not everybody has to fulfil every role and so that's why I think what you're saying is very you know it's it's critical for people to understand you might have the ability to reach people than I would not be able to reach because of my personality you know so if you feel like you have those capabilities get involved and actually start doing it you know and don't don't wait for orders from me I'm not trying to order anybody there's no orders from headquarters there are no headquarters it's just us so just get out there and do just me yeah I've been labeled yeah there have been some people that are like oh you want to Paseos students are you one of his lackeys like okay I see where you're coming from and they don't even understand how much that creeps me out to have quote followers or lackeys or you know people looking up to me as some guru it's like I don't want them to like that around me you know that you just ask people who you know have seen any type of a sycophantic dynamic around me I generally push people like that away from me mm-hmm yeah yeah I want players in this battle you know I want people with as much skill if not more than me me I love people that I can learn from you know it's awesome when somebody comes into my life that like they have skill sets that I know nothing about they can teach me it's like wow that I want more of that you know what I mean and people aren't other people who are showing me things that it's like that's beyond my capability or understanding I'd have to really apply myself and work hard to understand how all that works it's like I want more people like that around me because I want peers in the work not followers I'm not you know the guru the leader whatever you want to call it you know I'm just a guy trying to be free like I want everybody else to be free that's all it really comes down to exactly when we're open to it being the teachers and students at the same time where the student is a teacher and the teacher the student that's when we all you know everything's in balance that's at ego right and you to learn and grow absolutely told me something like that many years ago that I was in a better spot than you were because as I was learning I was also you know attempting to do I was starting to meet up group the website a little podcast so you know and it's true and even with all that it's still stressful there are I get angry with people who that are ignorant is there the temper there are times I don't know whenever I see these police brutality stuff my first inclination I always think of samurai sword there are people I mean you know hey Mark it's not that bad only about 250 million people were killed by government last year I mean the last in the last century 1900 so hey yeah in the last century so yeah once it hits maybe bombs like it's working out a billion been you know five or four defensive in most people's minds unfortunately but Ivan you know you bring up a great point there and I want to thank you for the call you you're talking about like you know righteous anger and how you feel sometimes angry and or depressed and you know that's normal what you are experiencing there is pure normality and the way emotions actually should function in the human consciousness and physiology that means that it's a healthy normal emotional response when you see the ignorance of people and you get upset about it angry possibly even depressed we have to move in spite of that forward right I wrestle with this all the time all the time ladies and gentlemen I'm human like anybody else I get extremely depressed I get extremely angry sometimes I want to give up I make myself through the power of my will push forward you know so it's like you know we have to be in this fight together and try to prop each other up because we have limited numbers we have limited resources and we have limited energy and we don't have infinite energy to pull from you know we have to pick and choose our battles sometimes too and you have to understand when you're ready to get burned out you know and you have to just try to do what you can to support what your your psychological makeup needs your spiritual makeup requires and what your physical makeup requires you to do and that's a balancing game that's a balancing act that has to be played it's like spinning dishes on on you know spikes you know you have to you have to move back and forth between those dynamics of consciousness and you know work on different aspects of the self at at simultaneously and it can be very difficult it could be very depressing and it can be very angering and that's normal and I would say for people who are wrestling with that don't beat yourself up I try to just acknowledge it and say I know I need to improve I know I need to need to do even better but it's hard because you know were were human beings and we're not machines we're not gods or machines we're human and you know you have to acknowledge you know what you can do and try to do that to the best of your ability and try to put the the resources that you have in the most efficient way toward what the most efficient way of actually getting something done and helping is so Ivan thank you so much for being one of those people so let's move on and go to let's see I'm going to try to take Nicholas Peters call I tried him last week as well and we had a technological problem Nicholas Peter are you there yes I am all right you're coming in loud and clear this week welcome to the show perfect thank you so much for having me um yeah for your impression podcast that you had a couple weeks ago and the technology one we were talking about how to download videos off the YouTube I suppose to be excellent thank phenomenal and at the end of your nutrition one you'd mention the Breville juicer and I had actually I've been looking at juicers and I didn't know where to which one was good is there so many options out there so I did end up getting the Breville one with the Excel cold and uh yeah been juicing I've been that's a better model than I have I just made this in the Breville Juice Fountain elite but that Breville cold model that you purchased is even a better than this one yeah it's fantastic yeah I've been doing like the watermelon the cucumber celery and carrots and the carrots just by themselves are fantastic like like my skin is glowing like haven't been it's been making a big difference in my life for sure isn't just carrot juice magnificent I mean it's yeah believable I mean the the nutrient makeup of carrot juice is like almost chemically and biologically identical to human blood it's like that nourishes all of our cells and veins and capillaries and circulatory system and gets into the eyes the beta carotene nourishes the eye I mean it's it's literally a miracle of nature and you are literally taking in the energy of the Sun practically almost directly Wow yeah that's yeah I know like my hands are getting a little bit orange it's it's awesome but um yeah you had the natural cures PDF yeah on on that one and I actually downloaded it and there's a there's an app on the Android devices called kay reader and so you're able to actually just listen to it like any sort of any PDF so I'm actually able to listen to it at work I listen to the whole thing I'm relisting to it now and it's yes there's other ones that do that as well that will turn like a physical you know a PDF book an electronic PDF or ePub book into an okay into a audiobook I should say there's one called moon yeah yeah yeah just listening to the Google text speech is pretty redundant but uh it's uh it's it's good I also listen to the none dare called a conspiracy and whatever happened to justice and I'm gonna re listen to those but those were both very very interesting and I definitely appreciate those recommendations especially the the justice one because of for law on I want to learn more about that stuff through books and whatnot in terms of the founders I actually listen to I actually bought a couple of those flash drives or thumb drives a couple of months ago and I think they're excellent like I was actually pleasantly surprised I knew like one song or one song like the nation is sheep and yeah the whole thing was pretty strong I enjoyed it very much I really was very pleasantly happy with surprised and happy with the quality that we got from a demo that cost us less than two thousand dollars to record it was a friend who put me in touch with a local studio major works here near Philadelphia in Collingswood New Jersey and I thought a fantastic job was done you know some of my band members weren't quite as happy with with the result but for the money I thought it was just phenomenal studio quality for a demo this is that was just a demo release we haven't even recorded a full-length album we're sort of on hiatus there were some you know possible personnel issues that might have to be resolved so I haven't really been dealing with the founders right now it's kind of on an extended hiatus but I want to at some point get back in the studio to record a full-length album just to get these songs out because we have 13 original songs that really have to be done justice in a studio recording environment as a full-length album so I would like to eventually see that done I don't know how much further the project will go beyond that but I have to get at least one full-length album out with the founders for sure yeah they'll be great yeah just like trying to because you have some good lyrics for sure and I'd say just keep going through that and like the lyrics just put just make it even if like the music wasn't as top quality of it like the lyrics would just be great like cuz I know you had like the one song spraying us like bugs but that's not on the demo yeah sprayed like dogs right yeah yeah well I'm a whole host of songs like that were you know on you know on our deck to be recorded in a full-length album but never we never really got in this you know people can see all the list of names if they go to the lyrics page on the founders dot us our band website and the lyrics page actually has all the lyrics for even the unrecorded songs that were completed so all of our completed songs are also listed there in addition to the ones that were recorded as part of the no masters no slaves demo okay perfect um yeah in regards to the juicing I know you mentioned John Kohler at the end of the presentation and I thought that was I thought that was fantastic yeah cuz I've been I've been looking at his stuff for a while and especially his gardening is a youtube channel growingyourgreens and I heard that I think I heard you saved in one ear at the end of one of your podcasts that you have started a garden in your backyard well I mean a friend of mine just gave me a like vertical hanging bag for tomatoes and I got some tomato seedlings and I'm gonna try my hand at it I just got some organic organic potting soil so you know I'll see how that goes but I just I don't really take the time to learn enough about it and to do it I have friends who are involved in it at a much deeper level than I am and I kind of like helped them out in like a very ancillary capacity I helped them show them a method of I am okay with working with wood so I showed him a method of like building some some basic garden beds and that that's kind of the extent that I've really gotten involved in it it's not like I said if I didn't have to do this I'd probably turn my time more over to the pursuit of gardening and art because that's what I find kind of like in personally empowering in the world I think we're here to be part of doing something creative and and and nurturing and nutritious so you know for our own bodies and I find gardening and art to be those things that I have a personal interest in but like I this is what I do because this is what needs to be done right now in the spiritual war that we're in so maybe if we eventually you know make shrines in this or I can feel like I can tag out to other people who can take the risk some of the burden away from me maybe I'll make more time for that but right now I make very little time for it unfortunate yeah yeah cuz I'm John Kohler has a friend of his that had business called Boogie brew and it's all about organic biological gardening so it's basically just teeming with nature and having them do the work for you so for instance like I've been doing using all like those in kind of ingredients the natural organic ingredients I have mulch so it's like even if you water it once a week you're basically fine there's almost nothing you have to do they're just doing all the work for you and making sure that the plant is nutritious it's gonna be able to deal with the temperature changes that that happens you're gonna have more more yield and just overall much healthier plant it's all of efficiency like that were you're not overly complexify efficient and best way you know so I like that whole approach and it wouldn't surprise me that you know John Kohler is taking that type of a approach to you know growing you know plants for your own actual nutritional intake yeah and I think he's a fantastic maven like if especially since you're a fan of his I think if there was any sort of way that you could get in contact with him and try to talk with him because I know he has he's super genuine he is aware about some of the problems in the world but he's not I'd love to interview him about juicing sometimes yeah like you guys just talking about nutrition and then just other things that are impacting the world because he's definitely aware of like the legal like the whole cannabis thing and how ridiculous that is in the power structure and he's were chemtrails okay but but yeah he's got like half a million subscribers so that's a great outlet exam and then only certainly way more than my measly whatever it is 60 couple thousand you know it's you know people do take an interest in you know doing things for their own nutritional you know intake and development because health is important like you can't do anything without your health so I know that he's racked up a whole lot of interest on YouTube and he's well-deserved cuz he has a fantastic YouTube channel some of them actually yeah and um I forgot to mention it when I was talkin on your technology podcasts about how to do the videos but you were mentioning how we're so technologically illiterate and we just have consumer devices we're not doing anything to really develop anything or create anything on our own so that definitely inspired me to buy a bunch of a bunch of different parts to make my own computer with the help of my brother Oh building zone will really show you how it all works together you know that's a good exercise I actually yeah like my brother oh sorry yeah they're cutting in and out so it's like I'm kind of interrupting - no no no worries I actually built my own computer to make a hackintosh years ago finally retired that when I was able to get the machine that we're actually producing with today which is an iMac Pro but the the old hackintosh like you know retired and made made in a Windows 10 PC but I built that out of parts and it was a good experience you know it's like it it can show you really like how computing really works and like help you learn what some of the best components to get if you want to make a good efficient computer so I certainly recommend that it can be it can be taxing on someone it could be kind of complicated but if you put the research into doing it I think you know building your own is definitely very rewarding in the computing space I'd highly recommend it yeah cuz I unfortunately don't know anything about how to really build one so luckily I have a brother that's in the IT industry and so yeah he recommended the parts and he's like oh solid-state drive that's definitely the future and way faster I remember you mentioning that - yeah so I definitely got one like a one terabyte one so that'll help me with making videos on Camtasia and stuff because I've improved cuz I was I've been doing videos on YouTube but I was never I was just doing the cell phone you know just taking a camera in my face and it wasn't really visually helping anything like it was just me talking and so me learning a little bit about Camtasia and editing software's and stuff like that that's definitely been awesome it's a cool program it's definitely the way to go with building your own and using solid-state hardware for storage and you know for your operating system so you know keep at it and you'll you'll learn a lot more about you know how the whole alternative media works and and video editing etc you know lot live publishing I think you're on the right track when it comes to that it sounds like you have a mind geared toward you know being able to learn about technology so keep going with it keep going forward I think you're on the right track I appreciate that very much thank you thank you marginally um I was never able to because last week I your time on Right Livelihood again and I wanted to definitely touch on that and also give a little bit of a like proof that karma does in fact exist okay I was working at Aldi for a couple months and I was just seeing all the incredible waste like a box of cereal was opened but the bag inside was fine so they're throwing it out and I was just getting really sick and tired of seeing it so I ended up just going into the dumpster in the back of the store and just picking a bunch of stuff and everything was fine and like it was so much edible stuff that they were just wasting away and there's people's a huge problem in America is wasted food I mean we waste so much food that's unbelievable I I have people who work in the food industry telling me stories of this all the time but yes go ahead continue yeah so I was uh I was seeing that it was all this waste and so I was taking some stuff and people were seeing that I was doing it like management and I told him flat out I'm like if you think I'm doing something wrong then you go get me fired tell the store manager tell the district manager I know I'm not doing anything wrong I'm not purposely breaking anything in order for me to get it later you know so I knew that inherently I was not doing anything wrong I know that right and wrong or objective and so I ended up getting called into the office like a couple weeks later a couple months later and I was defending myself I told him I didn't steal anything I donated some of it I composted some of it I kept some of it because it was perfectly fine and I know I didn't do anything wrong and like she was telling me it was like illegal and all this stuff I'm like well right and wrong is not the same as legal and illegal you know and she's obviously wasn't getting it so they ended up firing me and I had no job lined up whatsoever I was perfectly content cuz I told the woman what's what I told her that I wouldn't want to work for her anyway I was gonna quit right after they talked to me about it because I just don't want to work for someone like that she's just good at following rules and not doing the right thing and so I was perfectly perfectly content with not having a job and not having anything lined up and that same day I asked my brother hey do you have anything at your job because I used to work with him I'm like do you guys have any openings he said yeah well talk to the secretary we'll see and so he got back to me she said she was interested and within two days I got a job and I'm making instead of like 1350 I'm making $19 and now I'm full-time and now I'm getting overtime and it's like if I was doing something wrong for all these months there's no possible way that I would be rewarded in such a drastic fashion like that sure not having anything lined up the closing of that opportunity opened up the other opportunity because of what you did to help other people exactly it's exactly what you've been saying like this it just opens up for you and I knew I knew it inherently I knew I was in the right the whole time and so I wasn't even worried and so with people with if they're not doing right livelihood just at least be honest with yourself because that's one of the best qualities I have is that I've just honest with myself like I had depression for seven years because I was so honest with myself about mistakes I had made for so long and I was always just on my ass about things I've done wrong so and people need to just stand up to these needless rules and regimentation 'z that don't do anything to help anybody you know if anything it just serves to just keep people in a mindset of scarcity and fear and then like like you said it's just wasteful it's just wasting resources that could go to helping people and that's all done because of government regulations and unnecessary laws and rules you know it and like you you attempted to explain to your former employer its legality does not equal morality you know what what's legal does not necessarily imply what is moral and this is what more people have to understand so Nicolas I think that's a really great anecdotal story that you shared with our viewing audience our listening audience I thought I want to thank you for bringing that to the table thanks so much not a problem I really appreciate you taking my call it's an honor and a pleasure speaking with you and I hope to be able to speak with you again at some point thanks so much take care and great call all right you too thank you all right see it's like this is part of the I think support aspect that I'm talking about that we all kind of like have to try to reinvigorate and bring each other up because of how stressful this whole understanding can be it's like we have to look toward the community to you know try to garner strength you know and the the callers don't show me this and always have so you know I think they're the kind of people that you know are taking action are putting themselves out there and are trying to make a change for the better in our society so you know I thank them for that all right let's let's see let me try to bring in somebody new that we haven't really heard from let's see let's go to a wall gypsy a wall gypsy you are live on what on earth is happening episode number 213 welcome hey can you hear me okay yes I can oh great hey Mark thank you very very much for taking my call I'm actually coming from a 12 hour time zone difference I've been up all night waiting till I try to give you a call tonight so thank you very much for taking me here I preach no problem if I may ask what what contrary calling from live in Taiwan Taiwan okay great I'm from New Jersey originally but I I escaped New Jersey yeah you know all about that you know I currently work here as an English teacher okay not for any government school as you were talking about earlier I'm a tutor a freelancer so I'm the boss but before I get into that I just wanted to say I used to be a member of truth freedom prosperity years ago yes I was a very active member in that group here in Philadelphia I was a passively active member because I'm not to bid on like big groups of people but like I do a little bit of work here and there but I met you passively like liberties and some and the feds and stuff like that yeah I remember I remember liberties that was once a cool place and those were the good old days back then man but anyway and I knew how to podcast back in the day but I just wasn't listening to podcasts right so I didn't I didn't listen to the show but about a year and a half ago I started listening to what on earth is happening and the synchronicity is just unbelievable two years ago I wanted vegetarian and listen to your old post cast about you know tell people to watch earthlings and stuff like that so it's just been incredible so thank you for all the great work and may I ask were you aware that that was me from truth freedom prosperity back then I guess you heard it in in some of the ads that I did for that group in the podcast before you initially aware I'm sorry you broke up were you initially aware that that was me from truth freedom prosperity or did something else that loudly lead you to listen to the podcast a friend of mine you know Corinne Jacobs oh yes yes it's a friend of mine and back in the day she messaged me back pass to his podcast and I put it off for a while and then one day I had no closings it was so yeah that's awesome but the the key point of why I'm calling tonight is on currently I've got a I've got a great deal of autonomy when it comes to the curriculum that I teach and I've been struggling a little bit to like fill the time I'm like what am I going to talk about we're not gonna teach for two hours and I'm just very inspired by your plea for people to start teaching more natural law my school they have really good teaching methods and articles and great ways to get people involved to learn English but their topics are just awful and boring so right now I'm in the process of developing classroom style natural law related lesson plans nice I think it's a varied idea yeah it's I'm pretty psyched about it I've already kind of started a little bit you can eventually translate them into Chinese because they speak Chinese here and I can read and write a little bit but speaking listening but a friend of mine might be able to help me on that path something soon and there there's a country I've never gotten any correspondence and probably that's that's that's a really really tough egg to crack I mean that's literally like you know firewalled off from the rest of the world practically yeah that's a tough one but I'm really glad to see that you know you might be putting a project like that together all the way out in Taiwan that's fantastic but Taiwan it's a bit different from China Taiwan it's a more or less open society all the liberties that America has its Communist China it's kind of funny to stay the hell away from right exactly why I wish you the best of you know all the luck in the world in that endeavor and I think it's like great that you're dead now and you have to know what you can touch and let me know how that project works out in the future well one thing I want I wanted to do while I have the chance here um I wanted to extend to anybody here in the audience to take a look at the Google Drive that I've been making I've been collecting some articles and trying to make some work here if I if I could just give them my gmail address and then anybody can send me an email and then I can just hook them right into the Google Drive anybody let's take a look at it or help me work on the classroom style not for lost stuff okay my um my gmail is um if a wall gypsy at gmail.com it's all that were them it's all capital nope no periods no breaks it's just capital a capital W capital o capital L and then lowercase gipsy gy p sy that's at gmail.com okay 300 Oracle veteran animal rights WikiLeaks occultism factory-farmed and how that's related to occultism the secrecy there so um thrones allegories for natural law I'm doing some writing about that one so we're not a lot of stuff there fantastic III definitely I'm very happy to see that more people are getting involved in the great work and doing it in their own way a wall gypsy I want to thank you so much for the call and you know keep in touch and let me know how that project with on teaching natural law to Taiwanese students that are learning English work out you know in in the future I wish you the best of luck with that and thank you for doing it well folks I don't think we're gonna have any time to go to a final caller I think less than two minutes left in the show I mean maybe I could bring in one person to just make a quick comment okay so let's say let's let somebody take the show out completely okay so let's go to Jay Jay and our con Jay an Archon take the show out for us you have less than a minute about a minutes going on mark government is slavery there you go anything else thanks for taking me my call great episode today I'm gonna try and call in again in the future I hope you can take me and I'd love to get an interview with you on my show sometime I have a website cognitive concurrence calm so I'm gonna hit you up about that but yeah great show you hit the nail on the head with every single topic as usual and yeah you know I'd love to get a question in but I probably won't so thanks for taking a head we have about like about a minute go ahead okay one question I would like to ask you is do you think it's even possible for the aggregate of world population to wake up or do you think that it will just be a select few of awakened individuals kind of the way the Christians perceive the end times crying right no I do think it is possible I don't think it's extremely likely where we're at right now but I think it is possible now the question is will human beings will it into existence by an act of their own will that's our caution that's energetic activism that's right and that's where I have my doubts because I don't really see the human will in a very positive and empowered position right now that being said it depends on what the people who are awake now do with what they have at their disposal and how much we can be of a powerful and motivating influence for others around us so with that being said I think it is a matter of what will we do with what we have come to know that will influence others and then maybe we can make that situation possible that's all the time we have for this edition of what on earth is happening folks great our calls as always thanks for watching ladies and gentlemen government is slavery we'll see here possibly next week possibly ingredients thanks for watching everyone have a great day [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #214

Topics: *Our Entire Society Is One Big Satanic Ritual, Mark’s background as a priest in the Church of Satan as Reverend Mark Rhochar, Our Satanically-structured society, Review of satanism from De-Mystifying The Occult Part II, Satanism is an ancient Occult Religion comprised of a diverse world-wide network of adherants, Satanists as highly advanced ancient psychologists, Psychological manipulation of the human race, Dark Occultists maintain their power differential through occulted knowledge, Satan as the Adversary or Opposer of Natural Law, the Ego-driven Self is the “God” of modern Satanism, Christain devil-worship is NOT what modern Satanism is, Satanists refer their ideology as “The Old Religion,” the Four Main Tenets of the Satanic ideology, Egotism, the Satanic Worldview is that Service-To-Self is life’s highest goal, Moral Relativism, Social Darwinism, Eugenics and Epi-Eugenics, Mind-Controlled Selective Breeding, True Evolution vs. Involution, Involution as the Adversarial dynamic in nature, Genius-level individuals in the world-wide Satanic Network, the Satanic rulers of the world as “The Order of Death” or “The Cult of the Black Sun,” De Facto Satanism (Satanism In Deed), Mini-Me Satanism, the “Money” of the Satanic Ruling Class is children, Earth is a Prison and a Zoo, Evolution/Syntropy as the Ordering Force within Creation, Involution/Entropy as the force of Decay and Chaos, “Sects” of Modern Satanism, Over-arching goal of Satanism is to destroy Human Freedom, Organized Crime Syndicates are directly controlled by the Dark Occult, Left-Wing and Right-Wing Politics as the two major “Sects” of Satanism, Corporatism, Socialism, Fascism Communism, and Totalitarianism all stem from Satanism, the Methods and Social Manifestations of Satanism, the Natural World vs. Artificial Constructs, the Satanic Inversion Principle, the Aspects of Reality which satanists always seek to invert, Unconscious humans referred to as “The Dead” by Satanists, the Master-Slave Society and its true structure, Human Slavery continues due to Ignorance, Apathy, Cowardice and Inaction, which is a Free-Will Choice.Our Entire Society Is One Big Satanic Ritual*

freedom mat that's what it's all about [Music] Devon freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery welcome to the show we have a great show lined up for you here today today is Sunday July 7 2000 and 19 and today's topic is that our entire society is one big satanic ritual and indeed it is and that's what we do here on what on earth is happening we expose the dark side of what is going on in our world we talk about what Satanism really is as to as to opposed to what people believe that it is what they are projecting that it is through through Hollywood and through pop culture and we talk about what the occult really is and how it operates in our world because most people have no idea about that and cannot see it so before we get to that topic today you know we're back from a small two-week hiatus my producer Mike was on vacation for a couple of weeks so we took a couple of weeks off we're back now and coming back strong with a great show for you we'll be taking calls in the third hour of the show today through discord you can get the link at water on earth is happening dot-com slash show I have a couple of quick housekeeping announcements and we can switch over to my laptop all right so I will be speaking at the an arc adelphia 2019 conference this is going to be coming up this September the the dates are September 13th through 15th and if you click on the banner on the homepage of what on earth is happening it looks like I am having a issue with my laptop so let me try to quit out of the let me try to quit out here I apologize folks I want to show you the a dark adelphia webs so let me just bring this back up okay we could switch back alright so if you click on the banner on the homepage of what on earth is happening calm for an arkadelphia that'll take you to the tickets page for the conference and if you use promo code passio pas si o then you will get five percent off the ticket and five percent will be donated to me from the guys at state of anarchy from the hosts of the Anarch adelphia 2019 conference check out this great list of speakers you know we have it's a who's who let me make this if we go fullscreen yeah because the the page is adaptive so Jeff Berwick has been added max Egan Derek Bros I mean you know you have a host of people carry welder whether is gonna be speaking Larkin Rose and Amanda ratchets luke rudkowski Gina car Bennie wills who I interviewed a couple weeks back so you know tons and tons of phenomenal speakers for this year's conference get your tickets now I'm gonna be hosting a well my main presentation at an arkadelphia 2019 is called the sacred gift of anger and I'm going to be talking about how forces that want us enslaved do not want righteous anger to be manifested in our society they want us come they want to sedate they don't want us displaying righteous indignation over the very clear rape of our inherent human rights you know so my presentation is going to be talking about how anger is a gift and a warning sign that something is completely wrong and that something needs to be set right in our society and we need to get in touch with that seeming the negative emotion and channel it and use it as a source of energy to do the right thing and to change things for the better so that's my presentation this right here if you go to the workshop page of the an arc Adelphia website i will be hosting a workshop the day after the conference on September 16th now my presentation we do have the date on that finally it's going to be taking place Saturday September 14th so I'll be speaking Saturday evening of the conference and I believe that I have a couple hours to deliver the presentation of the sacred gift of anger it's either an hour and a half hour two hour presentation I have to check with the exact for the exact time but I think I was told that I have two hours to deliver that and following the presentation the same night we will be screening the debut of my documentary which is called Mark passio and the science of natural law it's the first documentary film that I've gotten involved in making we started this about a year and a half ago act actually here in Philadelphia at the Art Institute and we came up with the script and shot some video and then the guys from state of anarchy helped me to shoot some even higher quality footage and we're putting that all together in the editing process right now and we'll be releasing that we'll be debuting it on the Saturday night which is September 14th of the Anarch Adelphia 2019 conference following my main presentation the sacred gift of anger now Monday after the conference that's when my workshop will be taking place which is called teaching natural law with Mark passio this is going to be an all-day event 10 a.m. to 5 p.m. on September 16th Monday September 16th tickets for that are also available at the Anarch Adelphia website under the workshops section so do check that out a couple of other quick announcements before we jump into the main body of material for today if you go to the gifts section of what on earth is happening and you click in let me go back to the home page here I'm running a summer special on the remaining t-shirts that we have in stock now I started this a few weeks back and let me tell you the the shirts are almost out so there's not many left it's all women's shirts that are left we sold completely out of the men's thank you to everyone for making those generous donations through donation gifts but if you go to the site we are now running an even more aggressive summer sale where we've discounted the last 10 remaining women's t-shirts we only have 10 shirts left okay i'm reprinting new shirts this week they'll be in in a few weeks probably about three weeks or less so I'm putting in a new order this week for new shirts we are redesigning the what on earth is happening shirt the last classic version of the water on earth is happening shirt is available in women's designs we have ten left and they are discounted to ten dollars each in womens we only have seven small of the what on earth is happening design and we have three mediums left that's all until we are completely sold out of t-shirts and you know hopefully those will go before I even repress them this this coming week so thank you to everyone who has donated through the donation gifts site also we have we've added six crypto currencies that we've added five we were accepting PayPal and Bitcoin as donation options but now we've added five additional crypto currencies so all of the crypto currencies that you could donate through the donations page of what on earth is happening we now except on the water on earth is happening donation gifts area so we're expanding a little bit as far as what donation methods we take in the form of crypto currencies so uh thank you to the programmer that we are working with who has done a fantastic job in helping us to implement all of that thanks so much for that and hopefully you know people take advantage of that because not only do we accept Bitcoin now but we're you know expanding our horizons in the cryptocurrency space as well all right with that being said I think we can switch over to the computer to my slide presentation and I'll just just show you some of the graphics that we've made for this this is the an arc adelphia graphic that the guys from state of anarchy made for me as a featured speaker again use promo code passio when you buy your tickets and you'll get five percent off your ticket price with five percent being donated will be matched by the state of anarchy and donated to me here's the card that they made for the workshop on September 16th by the way this is taking place right near the main speaker venue for the conference and and the workshops going to be taking place at Papi's Italian restaurant which is at 30 120 South 20th Street in Philadelphia it'll be a nice venue for the workshop on the Monday after the event tickets are $120 for the workshop an all-day event and you can get your tickets at an arkadelphia calm again the water on earth is happening donation gifts summer clearance sale 10 t-shirts left 10 women shirts left that's all we have left folks before we reprint and again we are printing a brand new water on earth is happening t-shirt design and here's a graphic that Brett made me for the acceptance of the new forms of cryptocurrency so we're now taking in addition to Bitcoin Bitcoin cash and Bitcoin SV like coin aetherium and - so the six cryptos that I accept as donations are now accepted on what on earth is happening donation gifts for any of the merchandise items that are up there so let's jump in to our presentation topic for today and again you know we'll go through the main body of presentation material for as long as it you know it may take an hour and a half it may take all three hours of the show so if there's time remaining we will go to your phone calls at the end at the end of the presentation if it runs long we'll do a whole call-in show on this topic next week but we'll see how it goes so a one other very brief thing I do want to mention to complete our housekeeping duties people did point out and bring to my attention that there was a very slight audio delay or I'm sorry a video delay an audio drift audio/video out of sync issue for the podcast for the show the live stream was coming in fine nice and in sync but the podcast was slightly out of audio-video sync we have found some software that will correct that issue I tested it and that issue will be taken care of as of today's show I don't know whether I'm gonna re upload all the previous video podcasts because that will mess up the view counts on YouTube and the other video sharing sites that we upload to so I think we'll just let that be you know growing pains of the show but from here on out that issue will be taken care of I just want to assure everyone of that so that technical glitch is now solved on our end again the new format is still a you know work-in-progress we're always trying to you know tighten things up wherever we can so thanks for the people bringing issues to our attention and we try to resolve those as quickly as possible with that being said let's jump into the slideshow so our today's show is called our entire society is one big satanic ritual that's a heavy duty title for a show but I want to qualify this and explain what I mean by this and most people don't know what Satanism is folks you know still to this day it's been one of the cruxes of my work because this is my background it's where I came from okay I made no bones about it when I was first starting what on earth is happening and you know this is the this was the issue that I looked at and debated and kind of bounced around in my own mind when I was first getting ready to go on the airwaves with just an audio version of the show that you're watching today you know when back when you know I got you know the start in just basic internet radio broadcasting I was just considering you know when I'm gonna tell people about my background in the dark occult am I gonna tell people that I was involved in Satanism through the Church of Satan and other ancillary satanic organizations am I gonna tell them what I saw behind the scenes the kind of people that were involved the kind of levels of power that they were entrenched in or am I just gonna you know try to teach the form of spirituality that I've been teaching here on what on earth is happening since the beginning and not mentioned that dark background because who knows we'll kind of you know ideas that that would put into people's heads about the kind of individual that I am and I made the decision that no I'm not gonna hide it I'm not going to try to shy away from my past that I was going to openly tell people what I had been involved with because I wanted to explain to them the transformative process in the mind and in spirituality that I went through personally as an individual as a human being and I think it was probably the best decision that I ever made not to delay in telling people that to explain to them that I had experience in the dark occult admittedly low-level experience you know I hear all these people saying that somehow I have stated that I was some sort of a high up ranking member or I I hear the term thrown around High Priest you know the words never left my mouth you cannot find any video or audio that have ever that I have ever spoken the term one time that I was a high ranking official or a high ranking member of any of the organization's I belong to nor was I ever a high priest I was appointed the title or rank of priests by itself know nothing before or after it that is the rank within the organization called the Church of Satan which was formerly Ronon headed by Anton LaVey who started it back in 1966 who was the high priest until the year of his death in 1997 okay he appointed me himself to the rank of priest in the year 1996 in that organization okay that's the only claim that I've ever made about any rank and any organization that I've ever held okay I've never said I was high up I never said I was a high priest of any organization but I wasn't I was involved in the dark occult I was involved in Satanism I was involved as the rank of priests in the satanic organization called the Church of Satan I held that rank okay and I have direct experience with this religion as a priest within it okay so all the people who want to say I'm making up things you know and again the other thing they say is they look up mark passio in the charter of the Church of Satan and it's not there I've also told people that story in an innumerable number of times you know a countless times that I did not join the Church of Satan under my legal name which is mark passio I joined the Church of Satan under an assumed name of mark rokahr which is spelled are h o CH AR row car row car is the name of a cat demon from the gnostic book called the pista Sophia or the faith wisdom from the gnostic tradition and i took the name because i'm born under the sign Leo and have always sort of identified and found as a familiar the large cat namely the lion the tiger etc ro car is a demon name from the pista Sophia that was a cat beam who was one of the rulers of the know what was known as the twelve dungeons of darkness okay yeah which was a variation or a description of hell that Jesus accounts to Mary Magdalene in one of the books within the pista Sophia or the faith wisdom of the Gnostics okay so that's where that name came from that's what I joined the Church of Satan under if they did look up that name I was appointed to the title of priest and given the title reverend mark rokar in the church of satan if anybody doesn't want to believe that or accept that I really could care less that's the actual truth of the matter okay and my legal name is Mark passio so what I always tell people before I even begin explaining real Satanism to them is if you are to look at any other world religion like Christianity Judaism Islam etc and you were to want to know about the practices and belief systems within that world religion more likely than not if you didn't know much about it you would go to one of the priests within that religion you would want to go to get information from one of the officials that sort of oversees the way that that religion is expressed to the masses of people which is the priests class of that religion so if you want to know what real Satanism is truly about you would go to a person that was appointed to act as a liaison with the rest of the public as a member of the priest class of that dark occult religion known as Satanism which I was that was my rank and the whole job that I was doing was explaining the tenets and principles of the ideology called Satanism modern Satanism it's an ancient religion it's been around for tens of thousands of years but in the modern day it has basic over arching tenants and general goals that operate in our society and what I acted as was a sort of a mouthpiece sort of a communications liaison for the ideology okay and I tried to spread it as far and wide as I possibly could because that's how asleep I was that's how just under the the spell and under the thrall of this religion that I was when I was a member of the Church of Satan so what I want to do here today is I wanted to explain I want to I'm going to recount a little bit and review a little bit about the general tenets and ideologies of true Satanism as a worldwide religion and then in the next part of it what I want to do is show people how our society is satanic ly structured and the pulp the practices and worldview and beliefs and just general ways of being in the world in our modern way of life in our modern society are structured after satanic ideologies and satanic principles and anybody can disagree as much as they want but it will never make that statement untrue our society is structured to follow after the tenets and worldview of the religion called Satanism without a doubt in some ways it follows it pretty distinctly and unwaveringly and then in other ways it follows it in what I call in in the methods of what I call mini-me Satanism which I'll explain as we go forward it's basically giving people a lower-level version of the ideology to latch on to and in doing so your indoctrinating them or initiating them at a very low level into the religion that's controlled at the very highest levels by dark occultists high level Satanists and high level Luciferians so let's jump into this topic because there's a lot to cover and what I want to do is start with a quote that explained that I think I feel perfectly expresses where our society is at especially when it comes to Satanism this could apply in countless ways to all kinds of areas of our society but I think although obviously Thomas Jefferson was just talking about this in us in a form of general knowledge on the part of the population I think it could highly apply to people who think that they understand something about Satanism and know not only do they know nothing about Satanism but they have erroneous beliefs about it that they think are true okay and they're attached to that belief system you know and that puts them at a severe disadvantage because not only don't they know what it is they have false beliefs about what it is that is holding back their understanding holding back an accurate understanding so I'm gonna I'll dedicate this presentation today to Thomas Jefferson and I'll start it with a quote from him Thomas Jefferson said he who knows nothing is closer to the truth then he whose mind is filled with falsehoods and errors and ladies and gentlemen this is what I call I've called in the past on this program negative knowledge I refer to this as the dynamic of negative knowledge and it doesn't mean having knowledge about something that is dark or negative it means that you are so in the negative zone regarding knowledge that you would have to climb out of a hole just to get back to knowing nothing because not only don't you know anything you believe things that are completely false about a topic and then accept that as true and think that you know something about it and this is where most of our society is at ladies and gentlemen in just about everything they think they know and they're not only are they completely wrong they know absolutely nothing regarding the truth so here's the zero point where you know absolutely nothing here's where you'd have a lot of knowledge okay but where people are at are way down here they have to dig out of a hole just to get back to knowing nothing too to unlearn what they think they know that are completely false beliefs and complete complete errors regarding what they think they know and that's where we're at in all of society but most of all that's where we're at in understanding the dark occult elements that are actually ruling our society so let's jump in I'm going to go through a brief review here and you can find a much more in-depth discussion on this in my presentation called demystifying the occult part 2 Satanism and the dark occult I gave this back in February of 2016 at the ethical Society of Philadelphia and in it I really broke down what the ideology of Satanism really is and its main tenets and we're gonna start with a review of some of that material but if you want the extended version of that where I go deep into my background and a lot of the symbolism of Satanism you can check out that presentation that's available in the videos section of water on Earth is happening or you can get a hard copy at the donation gifts area so Satanism is absolutely not what most people believe it is they have a belief about it but they do not have any direct experience all knowledge of it nor do most people have any correct even book knowledge or secondhand knowledge of it they just believe what they've been told and they believe what they've seen in Hollywood depictions and variations of Satanism but they don't know what Satanism really is in the real world as a worldwide religion of the elite ruling class that is really ruling over all of society this is the religion of the master class of the ruling class that's what it really is okay and it's it's the methodology and psychology which allows them to keep rulership of the planet to keep ruling over other people who are dwelling in abject ignorance so Satanism is actually an ancient occult religion it is a religion based on occult ideologies and occult knowledge Satanism is an ancient occult religion comprised of diverse interconnected networks of worldwide adherents now let me just break down that sentence for a moment okay it's an occult religion meaning it comprises what comprises it is hidden knowledge about how the human psyche and the laws of the universe function that they don't want people to know because that that power that knowledge differential maintains their power differential it is comprised of diverse a diverse network of people everybody thinks it's all just rich white men wrong incorrect it's not just all rich white men it is every single a sensible background of people all every single Austin's a sensible religious background every race every you know male and female sexes even every social strata and income it's not just the rich it's not just men you know it's young and old alike it's men and women alike it's white people black people brown people Asian people Native American you know you name the culture race ostensible religion background gender does not matter there are people involved from every single walk of life okay that's a big misconception of the people in the ruling class is that they're all just rich where they're all just white untrue absolutely untrue and it's not just ruled from one place every their members from every single country on the earth involved in this network because every country has to be controlled they have their tentacles throughout all of society and it's interconnected networks it's not one group everybody wants to go oh it's just the Freemasons it's just the Rosicrucians it's just the Jesuits it's just the zionists no wrong incorrect you don't know what you're talking about if that's how you think about this and you know people don't want to hear that they want to think their worldview is correct they want to think that they have it figured out they want to think that they figured it out one group controls it all well let me tell you something if any one group controls it all it's the high level religious organizations that are ultimately controlling the spirituality of the masses of people of billions of people so it's the religious organizations that are sensibly run organized religions the Vatican high-level rabbis in the Jewish religion high-level Imams in the Islamic religion you want to know who that real high level barque occult Satanists and Luciferians are they operate enthroned behind the scenes of ostensibly world religion that's who they are they're not just behind the banking institution they they're behind that as well and behind politics which we're going to talk a lot about but folks let me tell you something they operate through religion most and most of all and foremost because it's all religion everything that holds humanity back is religion the very word religion means to hold back to through it from forward progress and this is a religion and it is comprised of a diverse interconnected network of worldwide adherents it's not just run out of one place it's worldwide at its ideological core now listen to what I'm saying here really focus on the words I'm using I structured this and choose the words very carefully and specifically at its ideological core the heart of this religion this is the main principle or tenant by which it operates this religion Satanism postulates that knowledge of the human psyche and knowledge of the laws of the universe should be occult 'add meaning hidden from the general population and held only by a few human beings that's them that's the master class or the master race that they consider themselves it is much more accurate to perceive Satanists and dark Oh cultists in general as ancient psychologists who hold and wield hidden information in ways which exploit those who remain ignorant of it so I always give the analogy imagine if a master psychologist found out that a young man around 19 years old was having an affair with his wife with his trophy wife who wasn't interested in him anymore but one that a young buck and started having an affair with an attractive 19 year old male if the saint if the very very advanced powerful psychologist who knows everything there is to know about the mind and how it can be manipulated wanted to exact revenge on this person and try to befriend him even not even letting on that he knew about the relationship he could try to find out where he lived go you know pretend to befriend him and then what kind of a number could that psychologist do psychologically on that individual that he hates because of his involvement with his wife when that individual knows nothing about the master methods of psychology that that psychologist would wield upon him so therefore he has no protection against those mental and psychological techniques I would suggest that he could devastate that individual if he were to get into his confidence and that is what Satanism is folks it's ancient psychology wielded for the purpose of controlling the masses who know nothing about how their own psyche actually works through the power differential they gain by way of manipulating those who remain in ignorance of this critical hidden so again the knowledge differential that they have with the general population is easily convertible to a power differential in the real world see knowledge isn't power itself knowledge applied becomes power in the world and these ancient psychologists have applied that knowledge and converted it to a power differential with others they've become the powerful and other people have been at their mercy and remained largely powerless in the world because they don't know what the ruling class master psychologists know that's what Satanism is so through the power differential they've gained through this knowledge differential this small minority who are quote unquote in the no wish to remain which to rule the masses of humanity permanently and effectively become God on earth that is their ultimate goal their ultimate goal is to put the general human population into abject bondage into slavery and become God on earth their version of ruling hell because they would rather rule in Hell than serve in heaven the quote from John Milton's Paradise Lost which is in an analogy or an allegory about this ruling class dynamic so they see earth as a prison because natural law is in place and they don't want it to be they don't want to be bound by the rules of morality they want to be able to do whatever they want no matter who it hurts they wanted to find what right and wrong is instead of having right and wrong existing as inherent qualities of nature objectively no they don't want that they want relative is relativism relative right and wrong that they define that they arbitrarily decide for themselves at their whim and that their preference so that's their goal they want to be God on earth that's what this is all about that's what this whole slavery society is about a small group of people that wants to be God but see they give us that ideology which we're going to talk about it is important to understand that contrary to popular belief and this is one that I continually fight people on they don't want to hear it they want to believe they're right it doesn't matter what somebody from the inside has said they've heard it they believe it it doesn't matter how in error they are they're in negative knowledge about this and I keep trying to explain it to people and people want to call me a show for explaining how this ideology really works okay but I'm gonna give you the straight shit and tell you how it really is contrary to popular belief which is much easier for people to accept the overwhelmingly vast majority of Satanists do not quote-unquote worship an externalized deity known as Satan in the Christian tradition Satanism is not about the veneration and worship of the Christian devil ladies and gentlemen you know I don't know how many people I've said that to and that somehow disqualifies me as being a source of accurate information because they've talked to their pastor or their priest or congregation in their church and Satanism is about worshipping the devil you know and nothing will dissuade them from that and it's a kindergarten world view of how things really work in the real world it's a nursery school worldview forget kindergarten its nursery school shit okay these people if they they don't if they worship anything they worship themselves because they see themselves as God God the devil Satan everything nature they see themselves as the Creator that they'll make everything in their likeness and image that's how run away their ego is okay so forget the even concept of worship in this religion it's about putting the ego on the pedestal and the ego will become God if we're being accurate see people to always talk nonsense because they haven't been involved from a first-hand experience and so they just want to talk about what they believe it is instead of what it really is from a first-hand experience or point of view so they don't really worship Satan now I'm not saying some of them don't look at it as an actual entity or a force in nature that they sort of try to align themselves to some do but let me tell you something folks overwhelmingly that is not really part of the world view of most Satanists most Satanists see Satan as the ego the self etc that's it so the instead they see Satanism as an ideological way of being in the world and they view the ego driven self as the quote-unquote God of their religion that is absolutely the case and is absolutely Agron accurate to the extent that I understand how Satanism is structured from being a priest within its ranks so then people will always ask well if they don't worship Satan and if it's all about the ego and if it's all about the self becoming God on earth then why do they use the the trappings and symbolism of the Christian devil in the religion and why do they call it Satanism why call it Satanism why name it after the the Christian devil so I'm going to explain that in this slide the symbolism and trappings of the Christian devil or Satan in the Christian religion are used in modern Satanism and let me tell you something folks Satanism is just the name for it in the modern day since Christianity used the Christian devil in their iconography okay and in their allegories it was not called Satanism from time immemorial it was referred to as many other names most people did it was never really called the name that's why in this religion they don't really at the highest levels even refer to it as Satanism they call it the old religion because it's so old no one knows really when it originated it was really been here since humanity has been on this planet so they call it the old religion or the ancient religion that's all the high-ranking Satanists don't even call it Satanism themselves the most popular name referred to the ideology of Satanism by which the tenets are operating which we're going to talk about next the tenets of this religion or the main ideological points worldviews and and ways of thinking okay now that's called a Tennant te n ET Tennant okay we're going to go over those next but those who adhere to the tenets of this religion at the highest levels don't call it Satanism they call it the old religion the old religion is the most popular name or variant of what it is called within their own ranks they don't have a name for their cult okay they don't call it the Illuminati they don't call it you know for high-ranking Freemasonry they don't call it high-ranking Satanism or even luciferianism okay there's no name for their cults for their worldwide network of satanic ideology so this is the worldwide cult that operates with actually no name to refer to it as and truly no one's really admitted to it if you really want to want to be honest okay you're either born into it or you're not all the people who are operate who are not really actual bloodline members of this worldwide ancient cult are just tools to be used for the agenda and thrown away when they're not necessary anymore they'll throw the non truly interconnected bloodline the non bloodline members who are just uh you know rank-and-file members they'll throw them under the bus at the earliest sign of any kind of trouble okay so all the people who think oh I've made it to the big club you know flashing the Illuminati I out there at people that they think represents the Illuminati okay that's not what they call themselves it's not even accurate an accurate representation of what they are because it means illuminated and these people are nothing close to illuminated they're not spiritually illuminated at all oh they're illuminated into dark knowledge but that doesn't mean that one is truly spiritually awakened or illuminated so I hate using the term Illuminati to refer to them they don't use that term and they don't call themselves anything they don't even call themselves Satanists at higher levels lower levels they use the term Satanism but when you get up into the higher ranks and higher ranking members of these organizations it is a cult without a name okay and the ideology is just referred to as the old ways or the old religion that's it so they use these trappings and symbols of the Christian devil for two reasons two main reasons the first main reason that they used this symbology of the Christian devil is to try to make Outsiders see the real ideology of Satanism as just another quaint religious belief that is based upon traditional Christian belief systems and it's brilliant that's a brilliant thing this way you don't think of it as something separate from Christianity which is why whenever I bring up the term Satanism to people and they have absolutely no fucking idea of what it really means the first thing they say to me is oh that's just another variant of Christianity they're just taking the Christianity inverting it and worshipping the devil and calling that Satanism and I don't believe in any of that bullshit so it doesn't affect me so who cares it's meaningless I don't care that's the number one thing that I get when I say the word Satan Satanism publicly and when I try to explain to them it is not that they don't want to hear it because they've made up their mind it is what they believe it is and they're attached to that negative knowledge attached to an erroneous belief that they think is true and they have absolutely no fucking idea what they're talking about at all not even a little bit boys and girls and there's no dissuading them there's no turning them aside they know they're certain that they know and they're a bunch of jackasses who have their head up their ass and don't know what they're fucking talking about even a little bit you know and then when I try to explain that and I get nuts because they're telling me then my personal experience isn't real and isn't accurate you don't know where I've been you don't know what I've seen trust me you don't okay it's like going up to somebody who's been in a war and saying you weren't fucking there you have no idea what it was like in that battle they'd crack your jaw loose if you went up to their face and said something like that and rightfully so if they've been through an experience like that and then you're trying to tell them that they're full of shit and they haven't been through it you don't know what I know you don't know what I've seen you don't know where I've been you don't know the people I've been in rooms with you don't know the depth of evil I've witnessed and realized it it's not it doesn't even scratch the fucking surface and then people want to tell me they know more about it than I do you don't know shit but it's brilliant their strategy is actually brilliant it's genius because they have a lot of geniuses in their ranks you know who can see patterns you know I mean I don't I don't usually even like to use the word you know and people want to say oh yeah I'm a genius my IQ well the last time I asked you was tested I tested it at 147 IQ which is genius level but so what who cares you know what does that mean that means that you're good at identifying patterns and solving puzzles and you know doing intellectual things with your mind so what that's that's not a measure of holistic intelligence that's a measure of intellect it shouldn't be called an intelligence quotient it should be called an intellect quotient but let me tell you something folks these people have genius intellect genius-level intellect no doubt about it I've seen it I've witnessed it firsthand and and their strategy is actually very brilliant because they've convinced people that they're just a lower-level version they're worshipping the Christian devil they so they take the symbolism of that and they they apply it to their ancient religion and then they get people thinking oh see they're just it's just an inversion of Christianity that's all it is and they just worship the Christian devil and then people just put it down never look into it again and go oh that's just a bunch of nonsense bullshit the crazy people believe in that are that are just as crazy as people who believe in in organized Christianity and they have no idea what it really is so that's the first reason that they use these symbols and trappings the second reason is to associate the actual ideology that they apply in everyday life to the adversarial dynamic within nature they want to associate their worldview their way of being in the world their overarching ideology to the adversarial dynamic within nature which is referred to in the occult world as the force of involution we're going to talk about the two major occult forces that are at work in the universe on the show today the force of evolution and the force of involution involution is the force which counteracts evolution and wants to stagnate life and consciousness and we'll get into that in the next few slides so they want to associate their worldview and their ideology with involution the occult force that works against life because this is a big death cult as we're gonna talk about that one of the other things that they refer to it as sometimes is the order of death I have heard high-ranking Satanism referred to as the order of death okay it has been called that and of course I have referred to it and other researchers have called it the cult of the Black Sun okay so you can call it these other things but they're just labels the ideology is what's ultimately important defined by the tenants so involution is the force which opposes true evolution in consciousness the word Satan itself comes from the hebrew word shaitan meaning adversary or opposer Satanism is ultimately about being opposed or an adversary to the true order of natural law natural law is the creator's laws governing moral consequence that this adversarial force always wants to work against and counteract the laws of moral consequence in the universe so therefore they align themselves with the perfect representative force Shaitaan from the Hebrew tradition the opposer the adversary the one that counteracts true evolution and natural law or in other words the involution arey or satanic force the one who opposes God's law okay it's a perfect allegorical and symbolic representation all right so moving forward this is the core ideological position of the Satanic religion or the old religion so I call these the four main tenets of modern Satanism the first is egotism it is stated in Satanism as self-preservation is the highest law meaning whatever you must do to get ahead to put yourself in a better position than your fellow men and women do it it doesn't matter whether it's immoral it doesn't matter whether a counteracts other people's rights or that it brings them down you put yourself in a higher position in regard to your fellow men and women no matter how you have to do it because your God your king and queen above all else not on st. not on equality or equal footing under natural law and rights no you're special you're better you have to be number one you have to be cutthroat in the dog-eat-dog world that you live in so what I boil it down to is it means that service to self is life's highest goal forget service to others and especially forget service to truth that's meaningless in Satanism Satanism is all about service to self as being life's highest aspiration and anybody who thinks that is a Satanist de-facto you know these people we could call the dujour Satanists they're the ones who are actually acting it out in the world becoming members of the network hierarchy the religious institutions that will carry out these goals but guess what you can be de facto Satanist meaning a Satanist indeed in action in thought and that's what most of the world is folks this is what we have to understand about this whole thing where I'm going with this is that all of our society is a big satanic ritual because the vast overwhelmingly vast proportion of our society has been ideologically converted at a low level to the ideology of Satanism that's where we're at in the world most people operate at a satanic ideology in their mind and don't even know it they're de-facto Satanists without even knowing that they're subscribing to the Satanic religion I call them mini-me Satanists after the whole character of dr. evil making a small clone of himself in the Austin Powers the The Comedy trilogy of Austin Powers that he called mini-me which looks like him you know but it's a small variant of him well they're making people into mini-me Satanists worldwide they're giving them a lower level ideology of the old religion and getting them to subscribe to it on a societal scale so the number one thing and then all you have to do is just think about the world's world view the world view of most of the people of the world is it service to others in service to truth above all else or is it service to self above above all else just think about it from that level are most people egotist who are only concerned with living their own lives and doing whatever they can to put themselves in a better position in life all day long 24 hours a day from the minute they wake up to the minute they go to bed at night is that the majority of the the worldview of the people of this world you better damn well believe it is if you're being honest with yourself you better damn well believe that except that because that's true that's what's going on you know so out so all we have to do is look at society and be honest about what we see is most of society egotistical are they in this the satanic ideology of Eagan I'm only worrying about themselves and caring about themselves stop lying to yourself if you're saying that's not the case because it 100% absolutely is and we're talking about a good 95 to 98% of this species and I'm being generous so that's the number one tenant that Satanism as a religion teaches service to self is life's highest goal and aspiration take care of you and your own don't worry about what's happening with other people that's what's gotten us into this mess that's why we remain enslaved is because people don't care about what's going on with the rights of all people got in a conversation with somebody this week and told them that the real money of the ruling elite the Satanists and dark occultists that run the world is the trafficking of children you think people go oh they're real money is gold they don't use the fiat currency system you know they're they're real money is precious metal and their ultimate real money is gold bull shit bull shit their real money is children is small children that they enact horrific acts of torture and pedophilia upon that's the real core aspect of their religion and that's their real monetary system and people think they know what's going on in this world thing they know what how the elite operate they know how the masters of the world operate and other money is gold their money is children that's their monetary system the second tenet of modern Satanism as a ideology and again this is the conquest version of their ideology this is what has been come it has come down through the centuries and these have become the main four crystallized tenets at work in this world view in this ideology the second is moral relativism this is the concept that right and wrong are whatever human beings say they are if we're really boiling what moil moral relativism is down to its core aspect right and wrong humans get to make that up those are human constructs they're not they don't exist in nature that's not part of the laws of the universe those are constructs that man gets to make up and you know how many jackasses out there still believe that shit tons and tons of fucking jackasses right in the freedom movement believe that shit they're moral relativists they believe right and wrong come from man and they're damn certain of it and they're all too proud to tell you right and wrong or human constructs humans make that shit up we just apply that doesn't exist in nature there's no such thing as natural law and they think they're gonna be free Wow you're a sorry sack of shit if that's what you think I have to just say and honestly and openly in street language to people and guess what I'll say it right to your face you're a dumb sorry sack of shit if that's what you think if that's what you believe you know what you really are you're a Satanist you're a Satanist you're a Satanist if that's how you think in deed in thought in action a de facto Satanist who doesn't even know that they are espousing satanic ideology from the Satanic religion and guess what that's the majority of the anarchist movement who believed erroneously that they can be a moral relativist and ever be free if you think that rights come from human beings then you by definition must also believe by definition that human beings can change the definition of right and wrong whenever they see fit to at their preference or at their whim by definition that was one of my slides in one of my past presentations when I talked about moral relativism and I put a big Baphomet symbol behind it because that is the core ideology of Satanism human beings make up what right and wrong are therefore if we decide we want to change what rights are we can change them in any given time we want to turn a right into a wrong that's perfectly our right to do that we want to turn a wrong into a right we can do it whenever we feel like it because guess what we made them up right or wrong or things we made up and guess what folks is not just them it's their mini-me minions out there in the truth movement in the freedom movement in the anarchist movement and you're sorry sacks a dumbass shit and come and see me and I'll tell you that right to your face based on you thinking that man makes up rights because you're such an atheist smacked ass that you're so opposed to the idea that there is a force more powerful than you that puts law into effect in creation that you want to associate true spirituality and the true laws of the universe with bullshit religion in your little tiny pea brain mind where you can't see a higher power and a higher force as having nothing to do with world religion because that's also a bunch of sack of shit ideology just as much as moral relativism is well your mind isn't advanced enough your psychology isn't advanced enough to think outside of that two-dimensional thinking out of that dialectical thinking because you don't have the Trivium in hand you don't have true truth discovering methodology in hand and in mind your mind isn't sophisticated enough for that and maybe your intellect quotient is just in the shitter too in addition to that maybe it's just you just don't have the intellectual acumen to process that and come to an accurate understanding it doesn't matter how much you know about anything else if you don't understand that rights don't come from man and we can't change what right and wrong are because it's based on whether behavior causes harm or not you have no actual intelligence and I'm not the person who's gonna sugarcoat it and go well you know maybe you should Reva no I'm gonna tell you you're a dumb sack of shit to your face I'm tired and done with it I'm done with it like in case people can't see this from the past few episodes folks I'm at my wit's end I'm at my absolute snapping point when it comes to any Tolerance or any kind of giving leeway and making any kind of excuses for people who think like this because there are no excuses for them they're a sorry excuse but that's what moral relativism that's the second main tenet of the Satanic ideology that right and wrong or just meant man-made constructs and we could change them whenever we feel like this of course an out-of-control ego believing that they get to make up what right and wrong are inevitably leads to tenets two and three and four tenets one and two or the basis tenets three and four are the social expressions of the ideological foundations of egotism and moral relativism you put those in place and they harden and crystallize in the individual ego and you invariably lead to the societal outcomes in tenet three and tenet for which is social Darwinism and eugenics tenant number three in Satanism is social Darwinism and this this basically postulates the most dominant and cruel human beings should become the masters of humanity and rule over the masses of humanity that's what social Darwinism essentially postulates your mindset and your genetics got you there therefore you should become the master race and rule over the rest of the unwashed hordes that's called social Darwinism it's applying vicious animal behavior and taking it and extruding it through the human domain it's a smack - ideology even in the animal kingdom because Darwin was incorrect and his theory of macro biological evolution is wrong not borne out in the science not borne out in the fossil record and people still religiously cling to that as a religion when in fact it has never been proven to be the case and never will and those same people won't look at human intervention theory or as I call it human interference theory because that's too horrifying to contemplate that's what it really comes down to you want to know what it really comes down to it's not that there's no evidence to support there's tons of evidence to support it what it comes down to when it comes to that folks as a brief aside is the mindset of the people is just too weak to take it in that's all it really comes down to they're not hardened enough as true men and true women to acknowledge the horror of the real human situation because this is a fucking zoo run by a type two civilization you want to know what earth really is it's a hell a prison a zoo run by a type two civilization that is unseen that's the real horror that we're in if the truth be told if we're being honest with ourselves but you know how many men and women can tolerate that in in this actual psyche and bear to look at the plain vicious naked truth of that a piss-poor pittance a piss-poor pittance that's how many so going back to these tenets social Darwinism is that the most cruel can just rule the roost because hey they scratched and called their way to get there and animals do that and so we should emulate animals because we're just another animal that's what that theory postulates that's what what's that tenant postulates and then once you have those three in place it's a hop skip and a jump where I should say it's just a very steep descent down the chute to eugenics and I have it listed here as eugenics and epic eugenics and note people please note folks this is not epigenetics this is epic eugenics okay it's classical eugenics which means the masters should determine who is allowed to live and breed and who must die population control and reduction gene pool control eugenics is the direct means through violence through chemical means etc and epi eugenics is population control genetic control through mind control it is mind controlling the existing population to get them to call themselves and cull characteristics out of their own gene pool through mind control and mind controlled selective breeding I've done an entire presentation on it called the unholy feminine because it works through the female members of our society who largely control which male members of society will be allowed to propagate their genes and which will not so the Satanists target the females of our society because they know that's how gene propagation works in any given society through the females so that presentation is subtitled it's called the unholy feminine and the subtitle is neo feminism and the Satanic epi' eugenics agenda one of the presentations I'm actually most proud of and also it's one that let me tell you something folks you know who comments on and complements me more on that presentation than any other class of people women I have received more positive comments on that presentation from women than men who've ever mentioned it to me from women who really want to understand how the social engineers have specifically targeted them and I have been thanked and given a positive feedback in comments on that presentation by many many many more women than men have ever even ever mentioned it to me because again it's who wants to confront the horror to sit very similar to people not wanting to understand cosmic abandonment because they don't want to understand the horror contained within that truth the same thing when it comes to the mind control over women in our society if you really understand how tight it is it's a horror I mean I go to freedom oriented meetings of concerned citizen groups in this city and men will say to me why aren't there ever any women here that the two or three women that ever ever ever show up at any of these meetings are personal friends of mine that's it that's it because I promote that promote it and try to bring them out and alert them to when the meetings come up but hardly any women ever come out to any freedom oriented groups why is that women don't want to be free and the answer is largely no they don't that's the sad part of the society that with a sad fact of the matter of the society that we live in now and when men ask me I'm very very harsh and I say right to them because I say right to their face the reason there aren't most women here isn't because oh it's just they don't like the type of men that show up at these things or because they don't you know understand what what we're talking about it's because most women have been brainwashed and mind-control into not wanting freedom most not not a blanket statement when it's a blanket statement I'll say it but the majority 100% absolutely the majority have been conditioned into that state of mind control and when I say that guys they're don't want to hear it they're like that's a sexist statement no it isn't that's the truth of what's going on in social engineering in our world that you don't want to confront you don't want to understand that the think tanks who are mind control masters have set society up like that and that's why there's no women at your dam meetings that's epic eugenics you know that's controlling the gene pool by mind controlling the population into controlling the gene pool because you can't you don't have enough people to do it directly doesn't matter how much poison you put in the air the water the food the medicine etc so it's some are gonna slip through your fingers and you're not gonna get the exact results that you want because that's a crapshoot when you do it chemically - you want to do that you have to do it through mind controlled selective breeding and that's where epi eugenics comes in and you also have the option of classical eugenics which is directly wiping out populations through war and other means folks these are the four main tenets of Satanism regardless of what anyone will tell you that's the crystallized coalesced and very much compacted tenets of modern the modern satanic religion and again I want to make very clear here we are talking about this as matzo min the modern day because it wasn't called Satanism really never was really called Satanism until the modern day okay this ideology was coalesced and konk rest into the satanic ideology and called that when Anton LaVey wrote The Satanic Bible he was charged to do this he was a friend of the Bush family or many people feel that they were the serfs of Germany connected with the the Gulf's connected with the saxe-coburg-gotha 'he's the Windsors of england etc but levae was asked to put out to the public to the masses the coalesced version of the satanic ideology in the Satanic Bible and I am crystallizing these tenets and compacting them for people's understanding not only from the modern writings of Satanism from both Anton LaVey and the Church of Satan and also from Michael Aquino in the temple of set the writings he has put forward and other satanic organizations but I am compacting this and crystallizing it from my personal experience in the dark occult myself from an experiential point of view so let's move on to the next slide I'm gonna build out a chart here to show you how well actually what I want to do here is show you the two forces of nature the only two real forces of nature that are at work in the universe now of course some people have called these love and fear because that's ultimately the dynamics in consciousness that they are based upon consciousness is everything pure energy pure consciousness it's the root of everything pure vibration okay it is it is that which is being having an experience that you can't put any kind of a label on and then it takes its innumerable myriad forms when vibration is added to it and it comes into the illusion of matter through vibration through vibratory energy and many people have called these forces love and fear but in the occult circles they are referred to as evolution and involution in the scientific world old and all occultism is is hidden science folks it's not a belief system at its core level occultism is not really a religion when it's perverted and turned toward the satanic yes it's a religion because then it holds us back but what true occultism is from the positive point of view is its hidden knowledge about the laws of the universe and the human psyche and how they operate so they are Sciences the occult knowledge is comprises a science that's why when I'm doing that when I'm putting forward this new documentary I am calling it mark passio and the science of natural law so it is the very beginning is somewhat about me I have to explain a little bit about my background to people who know nothing about me and what I do so that's why the first part of it is called mark passio because it's a very very brief bio of myself at the beginning of the documentary and then we go into the science of natural law and how adherence to it or opposition to it determines our experience as an entire human society and this is what part of the satanic ritual of our entire society is getting people to not understand natural law so that they're wandering blind never really knowing what's right and what's wrong truly from a true knowledge point of view and when you don't know that you can't align your behavior to it effectively correctly and then you have a society that's just an abject chaos and going down the path of tyranny as a result of that ignorance that's called the law of freedom and it's all contained in these occult forces that are at work in our lives in the whole universe and in the whole manifest universe no matter where you go these are the two main forces these are the two ultimate forces of nature at work in all of creation evolution and involution in the scientific realm they have been referred to as Sentra P and entropy now most people have known or heard the word entropy but most people have never heard the word sintra P which is proposed as the scientific word for the opposite force of entropy now some people will say in the scientific realm that there is only entropy or there is only the the dissolution of energy and matter going into more undifferentiated forms with as time progresses forward and sintra p in the scientific realm is looked at as the exportation of entropy meaning if your room gets dirty to clean it up you have to take the debris and move it somewhere else water cleans things it moves things away it's a sin tropic force and motion and dynamic because it is a carrying agent and it takes things that are debris agents and it moves them from one place to another so it exports entropy and different forms of energy do that you could burn it and it converts it to a different form of energy you can clean it with water get it get the debris moving etc so entropy is like a default decaying condition that if you don't apply will to something it degrades and decays over time and this is why evolution is the ordering force centra p is the ordering force entropy is the dissolving force the chaotic force okay so let's look at each one of these occult forces in turn entropy or centra P represents creation or advancement it is that which is always making new things and pushing the envelope forward moving things to new and higher forms it generates more complexity and more diversity that's what the force of evolution does or centra P the ordering force more complexity more diversity it advances truth and wisdom in any given society anywhere in the universe if we are aligning ourselves to the sin tropic force or the force of evolution we are aligning ourselves to truth to natural law to wisdom it is the force which moves consciousness in the universe forward more consciousness more understanding more awareness it is the force which acts as for the advancement of good advancing goodness and morality in any given society so to align yourselves with evolution with the sin tropic force is to create and align yourself with goodness with natural law with morality evolution is the force which moves freedom forward to greater ever greater expressions higher levels of freedom to be able to do more and experience more it is the force which advances survival and life itself it is ultimately the force of order the ordering force within creation that counteracts and fights against the force that is breaking everything down into its constituent elements and degenerating things and forcing them into chaos and forcing them backwards into less evolved forms that's involution or entropy scientifically it is called entropy but occultic lee it is called involution this is the force that propagates degeneration decay stagnation not moving forward staying where you're at or moving backwards it is less complexity more simplicity less diversity more uniformity more undifferentiated whereas evolution differentiates and creates diversity in new forms involution or entropy breaks things down into further and further levels of simplicity uniformity and undifferentiated involution stagnates understanding in addition to just matter and energy it stagnates the mind the psychology it creates ignorance it forces us toward ignorance and allows us to take into our minds deception and untruth it's the force which won't allow us to look at truth it's the egoic force which won't allow us to admit that we are wrong and learn from our mistakes that's what pushes everything in consciousness backwards and creates unconsciousness so it counteracts the movement of consciousness and creates unconsciousness it puts consciousness into a ball pushes it down doesn't allow it to unfurl and expand and flower it crushes consciousness it advances evil immorality it stagnates our ability to understand natural law at work in the world it wants that the force of involution once moral decay it wants moral stagnation it wants moral relativism because that's what brings more immoral actions into the world and ultimately creates the state that we call evil and ultimately involution and entropy is the force the force driven by fear which ultimately results in human slavery which is where we're at this is the force we have succumbed to as a species by not exerting our will by not exerting true care for truth and for rights and not exerting right behavior right thought leading to right understanding and then put forward into the world as right action we're not exercising the willpower and courage to do that that's why the force of involution and entropy has taken over because it is the force which has put us into slavery through our fear our ignorance in our lack of that of right action and ultimately involution entropy results in death and ultimately extinction which is where humanity's going to head if we don't turn things around this is ultimately the force of chaos the thing which chaotically breaks down consciousness the movement forward of all forms of life and holds it back from progressing which is what the actual plan of creation really is is to move forward in consciousness forward in higher levels of expression of complexity diversity move forward in truth and understanding and wisdom and consciousness higher levels of freedom and advancement of life itself and this chaotic involution Airy force that we have succumbed to all to practically succumb to it wants death it wants chaos it one's slavery so you could look at it instead of you could look at this as on the left hand side here we have love on the right hand side we have fear evolution involution but what you can really look at it as how I like to look at it as the force of entropy or centra P is the force of evolution or centra P I should say is natural law and the force of involution or entropy is Satanism see if we're really getting down to the core of this all the force which ultimately evolves us and moves everything forward in the human domain and and really every other domain of life and consciousness is natural law is our alignment with natural law so I put the natural law card here of the Tower of the Major Arcana of the Tarot to represent this force in actuality the card that would represent evolution would be the hangman card because that is the servant of natural law so I'm saying natural law here is really the ultimate expression of evolution okay if we align ourselves to it alignment to it is the hangman card of the major arcana okay so that's actually card number ten on the deck is the hangman card number eleven of course is justice natural law the servant of natural law who willingly accepts his role as the one who is the Herald to teach it and bring it fully forward into the domain of human consciousness is the hangman on the tarot deck okay so I'm sorry it's not card ten I'm my my mistake I apologize it is card twelve okay and I always remember that it's card twelve because it is one of my birth cards my two cards in the Major Arcana of the day of the tarot deck personally you use your your birth month and your birthday it's a little aside here to this relating to Tarot which I think people will find interesting who want to look at the Tarot from a an esoteric occult point of view to know which two cards of the Major Arcana are you take your birth month and your birthday now if they are let's say if it's a day like thirty then you reduce three plus zero would be three so your birth day card would be three okay you take the month which would be either one through twelve and then you would take your your day card which would be one through 31 okay and if it's anywhere from since there are only 20 cards twenty-two cards I'm sorry in the tarot deck one is a zero which would not apply because that's the soul card or the full card you would go up through 21 so dates of the month 22 through 31 would have to be reduced so for example 22 would be reduced to four twenty three would be reduced to five and so on so if I take my birth month which is August that's eight that's the strength card or the courage card of the deck the woman holding the Lions jaws open okay that's my month my birth month card that is one of my tarot cards and then the second one which you associate with your birth is the day card my day is 12 i'm august 12 i'm born august 12th so 8 and 12 12 is the hangman card and that represents the servant of natural law how appropriate and how appropriate that my month card is the strength or courage card the force which has to be directly aligned with with your will centre to be able to do that work so the Tarot can teach you so much about yourself that it's it's it's not even funny it's almost scary how accurate it is when you really understand how to esoterically interpret it so the hangman card is the force of evolution is the servant of evolution or it could be seen as the evolution card itself but I am talking about here in the very big overarching terms here okay evolution is natural law itself the force of evolution is natural law itself and then Satanism is the involution Airy force the adversary the opposer to natural law shaitaan/satan okay so that's the force of chaos and entropy at work in the world that gets us to go against natural law or remain ignorant of it now the card that would be exactly opposite at the same level of the macrocosmic Tree of Life if we lay out the Major Arcana according to the two trees the microcosmic tree and the macrocosmic tree of the Kabbalah and we lay out the cards from 0 through 22 on those two trees the first eleven on the microcosmic tree starting with of the zero card at the dot position and then progressing forward cards 1 through 10 on the sefie wrote on the Tree of Life that gives us the the first 11 cards of the major arcana on the microcosmic Tree of Life representing the forces at work in the individual consciousness and then we take the second half of the Major Arcana cards 11 through 21 and we lay those out 11 through 20 on the sefirot of the Tree of Life the macrocosmic Tree of Life then putting the world card card number 21 or the 22nd card of the Major Arcana at the dot position representing the universe the forces at work in the universe we end up with justice card number 11 at the highest position on the macrocosmic Tree of Life I've gone through this in my presentation called demystifying the occult part 1 ok it's at the end of that where I do this tarot card breakdown I've also done it in the audio podcast version of what on earth is happening you can get that in the podcast section of water on earth is happening calm so if you lay the cards out like that you will see justice the natural law card is the highest force of creation seated at the qatar position of the macrocosmic Tree of Life the two cards directly underneath the Justice card on the macrocosmic Tree of Life at the the Hulk MA and banoffee wrote respectively would be the hangman and the death card ok so that the death card on the tarot deck the Major Arcana of the Tarot would be representative of the force of involution whereas the hangman card represents the force of evolution which is the servant of natural law the moral laws that govern all of the universe so what I'm putting into perspective here is if we understand that these are the only two occult forces that are really operating in all of nature love and fear evolution which pushes us forward or centra P versus involution which pushes us backwards or entropy we are really talking about whether we are in alignment with natural law or whether we are in opposition with natural law the true moral laws of creation so to be in alignment with natural law is to align ourselves with the force of evolution and to be in opposition with natural law is to align ourselves with Satanism the force which actually acts as the adversary or the opposer of natural law and evolution the involution arey or entropic force in nature so moving forward in this presentation on societal Satanism and how it works in our culture and I think this is going to be very powerfully important to break this down because people think that Satanism is just this crazy religion with men and black robes and teenagers going out and sacrificing animals in the woods and a big bonfire and wearing these crazy medallions and inverted crosses and listening the black metal and wearing leather and you know it this is this is a false variation of Satanism you know and people don't understand how Satanism works in the world and what it's trying to do that these people want to become God become a master race rule everybody else as God on earth make everybody else their slaves through mind control through getting people to believe that which is false like moral relativism and then act upon it so that they create chaos in their lives and in the world that's what Satanism is folks it's not worshiping anything it's fucking this world up irreparably because of wrong thinking not caring about the right things and wrong behavior and what Satan is ultimately want is to align people's minds hearts and behaviors with all the wrong things to invert everything I want to explain to people how there are sects of Satanism that work in different ways but ultimately achieve the same goal or the same end result and you have to liken this to sects of other religions to understand it and again I'm telling you 99.99% of human beings on earth do not understand this they think they do and they have no fucking idea what they're talking about and they talk out their ass because they have no experience all knowledge of it nor do they have an even secondhand knowledge told to them from somebody who's been involved nor do they even have accurate book knowledge of it they're deficient in all three methods of knowledge first-hand experience all secondhand from someone who had direct experience and book knowledge from someone who wrote about it through any of the other forms of knowledge so there's no gnosis nor is there any actual learning through book knowledge regarding these dynamics I'm trying to write that and encourage people to do more investigation and research on their own regarding these dynamics don't just take my word for it so to understand the sects or branches of modern Satanism okay this is how modern Satanism works in the world its goals and how it operates in the world it helps to compare the sex of modern Satanism to the types of denominations that are found in other religious institutions such as modern Christianity the many Christian denominations differ widely in their various beliefs and practices their culture their you know type churches their symbols their rituals etc their prayers their hymns you know all of that can differ very widely even the ways that they their belief systems some could believe in good works some can believe in salvation is a met cetera but ultimately all forms of Christianity are ultimately unified in their belief in Jesus as the savior of humanity that's the one overarching belief that makes Christianity Christian they generally follow the biblical allegory of Jesus and him as a historical figure they believed in his historicity and they attempt to align their you know ideology and worldview and and behavior to the teachings of Jesus found in the New Testament that's the general overarching ideological principles of Christianity in any in any given form in any denomination and they believe in in general Jesus as the savior of humanity and believed in his divinity okay so the early church was sort of unified it was a unified religion okay and then it split into the Western Church of Rome and the Eastern Church of Constantinople okay so in the modern world the Eastern Church became the Eastern Orthodox Church and then it's many different denominations and then the Western Church of Rome split into Roman Catholicism and Protestantism and into their different denominations Roman Catholicism really doesn't have many denominations it has remained largely the same since the initial west east-west split of the early church but Protestantism has probably split into the most denominations so they all have different ways of getting there but ultimately the goal was the same salvation through Jesus okay that's their one overarching goal of all the forms of Christianity in all the denominations in which it is practiced in the modern world similarly the quote/unquote sects of modern Satanism witches are not what they think it's so not what you think it's gonna be folks most people okay I'm not gonna get into talking about the Church of Satan verse of the temple of set versus the Satanic temple versus the order of the evil eye versus the Church of Lucifer etc so on into all the different you know variations of modern satanic ideology and groups we can get into because we can go on for months that's not what I'm going to talk about as being the main overarching sects of Satanism we are talking about what its real goals are in society and how it most efficiently and effectively goes about the achievement of those goals of that one goal really we're talking about not really really truly multiple goals but one overarching goal okay so the many different the the different sects of modern Satanism will differ as to their specific ideologies and the methods by which they will achieve their ends and their rituals etc their books okay but they all share one overarching goal to institute global human slavery and in so doing permanently destroy human freedom and true human spirituality and I'm not talking about groups that are self-styled Satanists that are saying they want human freedom okay so I'm not even talking about groups like The Satanic temple now again the Satanic temple is a Baphomet statue was in the the title card for this presentation please do not think I'm talking about any one particular group like that okay I'm not referring to that that was just used as a symbol to represent the adversarial force in nature which is the involution airy force which comes through the Satanic ideology and in all the many forms that is practiced as as the christian devil Baphomet etc it's just the symbol folks I'm not referring to any given specific group so please understand that okay because then the first thing I'll hear is oh you're just you know trying to talk shit on the Church of Satan or the temple of set or the Satanic temple I personally could care less about those groups those are like like when I talk about tiny little ways down here on the hierarchy barely involved in the hierarchy where they they're just you know especially groups like the Satanic temple which are highly self-styled and don't really align with the higher level ideologies of the tenants that I talked about you know they have their own you know little agendas that they want to put forward politically etc but we're talking about extraordinarily low level on the totem pole of worldwide societal old religion okay I'm talking about something that goes way beyond what any of these groups are even talking about okay The Satanic ideology in itself and the worldwide network that I am talking about of its adherents of hoarding knowledge taking it into their inner circle hiding it from the rest of people they don't care about these little groups and and the little people that are their rank-and-file minions that are that are propagating whatever ideology they're propagating to whoever will listen that that's the that's not they're nothing to them nothing to them okay and in many cases they just let these groups operate autonomously and there's not really much involvement I'm talking about when you really get into real world old religion Satanism okay that ultimately goes up to the highest levels of political power banking power religious power child trafficking pedophilia running the corporations of the world running the pharmaceutical cartels running the drug cartels totally controlling and running organized crime everywhere throughout the world whether it be drug cartels running out of South America and Mexico whether it be drug cartels running out of the Eastern European nations you know whether it be you know African gold and diamonds you know procuring and smuggling you can go on and on and on into all the things they have their hands in through organized crime they control every organized crime syndicate on the face of the earth and all organized-crime heads report to the dark occult you can be assured of that it all connects into the intelligence societies they're all organizing the whole surveillance state they connect in with all political and financial institutions and think tanks you know the high ranking members are really running the think tanks the Tavistock Institute of Human Relations the Royal Institute for International Affairs Chatham House Wellington House out of England the council for national policy the Council on Foreign Relations the Trilateral Commission operating out of the United States the Bilderberg Group all worldwide group that ultimately connects in with Satanism and takes their their God's name bail or bill you know in Bilderberg you know cuz the Satan was always depicted as a bull God you know depicted as a bull in the Sumerian Akkadian Canaanite traditions as Bale the Sun God so you know I went into that the whole kind of phonetic variation of BL you know Babylon Bible you know it goes on and on and on bail making bail in jail bailiffs you know Bill's the type of dollar that we use are called bills we pay bills with bills you know the dollar bill you know you could just go on and on and on with how many variants the Liberty Bell you know all named after this God does this solar deity bail you know it's Satan in the ancient world that's all it is it's the state the variant of that name Satan but you know that says this is the God in the ancient world in the Canaanite Akkadian Sumerian tradition that's where it stems out of and it had out yet other names bill was one of them obviously you know different various of phonetic pronunciation of the vowels B of the consonants B and L with interchangeable you know vowels in between I did that in at the end as a little war play pong game you know fun thing at the end of demystifying the occult part 2 but you know that's what you have to understand we're talking about this involution Airy force this adversarial force and they will have sex set up to take the population into the mindset of Satanism to achieve the end goal the end goal is slavery of the actual high level old religion not these little groups that are self stylized Satanism again the big cult they're not they're not really caring about them that much they're they're not that's not there they use them as some of them are used as psychological vetting and filtration organizations to take people with the certain characteristics and skill sets that they want up through the ranks into the higher levels of the dark occult that's all those institutions that's all those smaller level organizations are therefore putting the feelers out and identifying traits and characteristics in the general public that they want to exploit so I'm gonna build in the next slide let's let's start to move forward how the modern satanic cults the modern satanic sects actually operate in our modern society and this is the bit one of the biggest parts of how our modern our entire modern society is one big satanic ritual getting everybody to participate in achieving this cults and goal the end goal of the old religion so we're going to represent the religion itself with the Baphomet symbol which is also the background okay so this is our unified religious cult you have to look at this as this is the unified early church from the last slide the last example on the last slide that is now going to fracture into two main bodies or organizations worldwide that what this is ultimately going to do is help people to usher in the end goal not really realizing that that's what they're doing and do it through dialectical means that achieves a secondary purpose of creating adversarial dialectical adverse energy okay or in other words polarization between two seemingly competing groups but these two pillars these two groups that are seemingly competing and pinning themselves against each other are ultimately all filtering down to the same end goal that is that in in in the future set in the future to be the end goal all along it's the ultimate dialectical polarity the polarization dialectic as I have called it so let's start building out this chart and explaining how they do it the two sexes and I'm gonna get red white and blue on you folks okay that's what we're gonna do here it's it's seven seven only three days after so-called Independence Day here in this country commemorating our alleged split from England okay from the British Empire you know nothing could be further from the truth we may have achieved that very briefly but they did not really ultimately back down ideologically and culturally and we were still ruled the Sun has never really set on the British Empire America still ruled from the shadows from there and from the the royalty of Europe and ultimately the dark occult that operates out of the religious institutions from the church the Vatican Jerusalem Mecca etc all the the ostensible religious traditions so the two ultimate sects of modern Satanism is the political wings of whatever political parties we're talking about in any nation because you always have you have to have two folks that's what sets up the Royal Arch which creates the most polarizing strength and holds up the most weight because you have to have it based upon parental figures again this is the other thing people don't understand why are there only never two political parties why is there that liberal in that conservative that left-wing in that right-wing they're all connected to the same body it's all ultimately one body politic it's alternately one organization that is ultimately vying for ultimate power and control over the human population and to bring us into abject slavery they just put on two different masks that's all it ever is and ever has been and the people are still fooled they're still in political polarization they're still all getting all ratcheted up for the big fucking circus coming in 2020 when it never has mattered and never will matter because Satanists run the whole fucking goddamn show boys and girls they run the whole fucking show there ain't no difference between any of them the master of all government and all political parties is the adversarial force in nature whatever you want to refer to that as it's the thing that's holding us back and keeping us enslaved and it doesn't matter how long it's been going on for it's always been wrong it's always been morally wrong and that's why it needs to end that's why slavery needs to be stopped and ended and the only way to really ultimately do that is to help people to understand how this dynamic works and how it controls the mind to get people to do its bidding and do its dirty work for it and ultimately uh sure in themselves against their own interests the very slavery that it wants to usher in but people are too damn stupid and childish and naive to want to give up their political identification I'm on this team this is my these are my gang colors these are my cult colors I'm in the elephant I'm in the Jackass cult you are you in the smack dance elephant called are you in the smack - donkey cult because whichever one you're in you're a smacked ass dumb is a bag of fucking broken glass so Satanism fractures itself deliberately to create polarization in the ranks of humanity and it does it very effectively it's genius so what are the methodologies of these different branches or sects of Satanism see folks you got to understand you can't just tell people you know what we're Satanists and you know what we're gonna do we're gonna give you our ideologies and then you're gonna help us enslave yourselves can you imagine if this is what the rulers of the world did everybody go fuck you we're not doing that we're not that stupid well I don't know maybe Humanity is that stupid you know sometimes I just think yeah we're just that's two people are just that stupid the the bulk of humanity you know I'm not that stupid I was I was only that stupid till I learned how it really worked which is why the universe let me see behind the curtain for a while that's all it said hey you have all these aspirations and you have a lot of these wrong ideas because you haven't delved enough into true spirituality guess what let's let's jumpstart your understanding let's put you in with the real true demons behind the scenes for a little bit until you get shaken out of your dum-dum slumber you smacked ass that's what the universe said to me and boy did it hit me did it smacked me across the face with a hammer okay I've told the story many times to a point where I mean I was so what what I saw at the low level that I was involved in out evil and how bad it was at the level it went to and I know it goes a thousand time beyond that I was so depressed by what I became involved with that I was just sitting in my bedroom literally doing nothing for the better part of the year except going to Bath to the bathroom to piss and shit and to eat food that to the minimal extent that I did and not even basically leaving my bedroom and doing nothing but but sulking and and writhing in my depression and playing doom metal all day long for the better part of the year that's what they that's what they experienced the universe had to give to me to slap me out of my stupor so I could imagine what it must do to people who don't have 147 IQ you know I could only imagine how ensconced and ensnared in their own ego they are and what a hard case they work they are compared to my soft case of the ego so let's look at their methods their main methods are appeal to Authority of course because they want to set themselves up as the gods of society but they do it through different appeals to Authority see they can't just tell people we're gonna rule everybody you're gonna help us get it done because people wouldn't comply or cooperate with that they have some semblance of you know wanting something good for themselves and for society so they know people are basically split into two camps they have people who have motherly abandonment issues that's the left who want the authority in the form that they see it to be mami and to provide so what they're appealing to there is their sense of misplaced compassion for others and they want everybody taken care of that's what they're appealing to they're appealing to this right brained imbalanced notion if we have to care for everyone no matter what it means see we have to secure the common good needs right its appeal to Authority through misplaced compassion and misplaced appeal to security for the common need okay so you're focusing here on this method in getting into the minds of people what they're doing there they're exploiting the people who are in this form of brain imbalance and in this form of parental abandonment they're those people themselves are focusing too much on the common good at the expense of individual rights and you'll always hear them talk about that that the common good has to supersede individual rights because they're all concerned about government and authority being mommy or daddy I'm sorry being mommy that's gonna nurture and care for everybody and provide all the resources for everybody like Mother's Milk and that's in their mind there too right brain and balanced they don't have brain balance between the left and right brain hemisphere they're imbalanced toward the belief that the individual doesn't matter and that the common good has to supersede everything and this is what's exploited and preyed upon by the Satanist the appeal to Authority through that misplaced compassion for all of society and again these are the hallmarks of right brain dominance the right brain is due to imbalance negatively it's to to imbalance dominantly I should say and they don't have enough left brain understanding so I'm seeing that it is five o'clock we're nowhere near the end of the presentation folks so more likely than not instead of rushing for calls I'm gonna unpack this and it'll take as long as it takes and we'll do a whole call-in show next week probably because I feel this is extraordinarily important material for people to deeply comprehend and share with other people so I want to make the presentation as strong as possible so if we saw if I somehow do wrap it up and we take some calls great but more likely than not let's do a whole call-in show next week on this and I like doing those okay the method of the right-wing sect of Satanism or right-wing politics is appeal to Authority through selfishness and security of individual desires see so your preying on people's compassion their selflessness on the left-wing faction but the right-wing faction or sect realizes there are other people in society that are more selfish and care more about themselves than providing for the common good and so you're gonna pray on that dynamic you're gonna say well these people have selfish individual desires let's pray on that dynamic so these are people who focus too much on selfish concerns at the expense of the true common good which there is such a thing as that's the law of freedom aggregate freedom comes about through aggregate morality that's the common good doing good in the common sense terms of understanding conscience by understanding the actual objective difference between right and wrong behavior okay so in this case you're seeing that there are certain people who are more selfish than they are concerned for the well-being of others so you want to pray on that with the right-wing politics because you're preying on their individual desire to generate prosperity for themselves okay and become either rich or prosperous have their own rights protected okay but not worry so much about all of what's going on in all of society the right-wing factions are always more self-absorbed than South Oregon the left-wing factions very rarely ever care about individual rights because they're only ever concerned about society as a whole there's no balance there for both individual rights and the good of society that's the equilibrium point okay this is what the mathematician John Nash talked about as a game theory solution where the maximum amount of people who prosper and come out as winning is the people who focus simultaneously in a state of equilibrium on what is both good and right for themselves and good and morley right for all of society and that's a very difficult balance point to strike because most people are imbalanced toward one brain hemisphere or another and the occultists know this because they know more about the brain the physiology the psychology then almost all of the people put together one of them knows more about that than almost all of humanity put together let alone tens of thousands of them operating in concert on the same page that's why they constitute a mastermind of evil which the universe is going to grant their manifestations because they're all on the same page and we're all divided in the dialectic that they've set up for us and people still can't see it and still won't abandon it because they're too attached to it ego eclis and can't admit they've been duped the right-wing political sect is always hallmarks of left brain dominance or left brain imbalance so these are the methodologies they operate through identify the people you're trying to enslave some are more selfish some are more concerned about just the good of society and don't care about the individual it's brilliant it's genius level methodology strategy of conquering of dividing and conquering genius level and that's why the average imbecile the average person eaten poison drinking poison watching poison cannot cognize or conceive of these the level of these people's genius and the level of their methodologies at work in the world they can't even conceive of it and again I'm not tailoring this as a presentation or my show or my all of my work folks I'm not tailoring this for the average imbecile I am tailoring this for the people who have enough holistic intelligence to take it in understand what I'm saying and then help teach it to other people who are even at a lower level of intellectual acumen than they are so you know I don't take the I want to say I don't her medicine elitist idea that this information just isn't for everybody it has to ultimately be for everybody what I'm saying is my teaching method isn't for everybody not everyone will be able to receive it from mark passio I am under no delusion that everyone can that's why I'm not looking for everyone to follow me in my work I am looking for a handful of tremendously good and intelligent holistically intelligent people to become teachers and propagate this knowledge out much farther than I ever could as an individual because I realize people are not going to take this every person is not going to take this information from me it will have to be put in a myriad of different ways and methods and means to reach a much greater number of people than I will ever be able to reach as an individual that doesn't mean that I think ultimately this information is only for a few it is for all in an egalitarian sense I think it is simplistic enough at some level that everyone can really understand how it works it's just not everybody's going to be able to learn that from Mark passio admittedly so let's look at then where this goes it then derives social manifestations in different forms when the left-wing sect of Satanism puts all of its methodologies of mind-control into effect to get people on board with the left-wing agenda the manifestations become false notions of equality which is an equality under natural law at all it becomes sameness homogeneity you know lack of differentiation in society everybody having to think like they think and be on board with their agendas and be on board with their narratives it becomes this notion of democracy the rule of the people the rule of whatever we say is the law it's not the rule of natural law it's the rule of man's law that's what democracy is and a small group or a majority I should say can make it up that's all democracy is it's the opposite of an oligarchy in a sense an oligarch you're a few people make it up in a democracy the majority get to make it up even if they're wrong it's not based on any true objective standard of morality it's based on whatever the majority thinks right and wrong is and then make just Institute it and impose it on the masses oppose impose it on the minority just because they held the vote well if you held the vote we can strip everybody's rights just because we erroneously think that that's a right for us to do well we can do it in a democracy that's one of the things that leads to it's one of the places we're at right now and then eventually you have creeping socialism or what's known as Fabian social and socialism my producer is pointing out a spelling error I'm gonna fix it right now so corporatism there we go I was missing you know okay I'm gonna save on that thank you for that let me go back to my slide there I'll build this out again real quick okay so the social manifestations of the left-wing sect of Satanism we have the false notions of equality democracy and we have what's called creeping socialism or Fabian socialism this is getting to the place where the entires the entire societies needs and resources the resources of the society services are entirely controlled by government okay so it's the means of production and distribution are controlled by the state that's what all socialism really is but you get to it out of democracy this idea that the people can decide it passes through the stage called Fabian socialism or creeping socialism in the modern leftist society in the United States they are now calling that democratic socialism because it's it's the in-between phase between democracy and pure socialism which is the control of resources by the state ultimately so then we finally have real socialism real left-wing socialism and then that eventually becomes either an oligarchical party controlling the entire government or a dictator controlling it all and then you have communism which is totalitarianism it is the left-wing form of total control over a society in the handful of either a very few group of people or in the hands of one individual it's a symbolic individual of course it's really controlled by the Satanists who are the true members of the unified religious cult in the middle that's who's really controlling it and ultimately as we're going to see they're really controlled by the Ellucian arey force itself or satan as a force okay so then if we look at the social manifestations of the right-wing sect okay we have this false notions of rights where people think some people have rights that others don't based on their power and wealth and society or this idea that we can delegate rights to certain groups of people both groups left and right sects believe that then this degenerates into menarche or limited governments you know even like republican form of government the republic it's all menarche and limited government it's still the notion that slavery is legitimate it's still the notion that some people have rights that others don't have that were not truly equals under natural law that certain rights can be delegated or granted to people to do that other people don't have the right to do that's what all government is and then this will descend as a in-between step between another form of socialism called national socialism we have crony capitalism or corporatism and this was the in-between step that led to Nazi Germany we have that here we have a mixture of Fabian socialism and crony capitalism or corporatism it's not real capitalism that's what we have going on we have these two sects that are combining their their efforts their methods their social manifestations and ultimately bridging to will the one overarching goal in u.s. society in particular so in this in between stays on the right wing side you have crony quote/unquote capitalism it's not real capitalism at all or corporatism and that will eventually lead to a form of socialism called national socialism out of control nationalism combined with corporatism and eventually that is the totalitarian form of government called fascism that's what it will become long term but folks it doesn't matter whether you call it the the blue donkey or the red elephant I don't care what you they're both forms of Satanism that lead to one control I don't care what sect of the cult you want to believe in you could believe in the left-wing donkey cult the right-wing political cult but it's all stemming from the unified religious cult called Satanism and they have one goal folks and that is human slavery that's what the one goal is you know they want to give you the blue faction and the red faction to make you think Oh your team is better your brand Nichola is better your brand of cotton candy is better you can have the blue or the pink brand a cotton candy it's all fucking poison you know have this form of high fructose water or this form of high fructose water it's all poison the cult doesn't care how they get there folks do you realize that you know this is what people who still believe in politics don't get the cult does not care how they get to abject human slavery doesn't matter to them couldn't care less they could do it through the left-wing faction they could do it through the right-wing faction sorry I accidentally click back I'll have to build the slide out again so watch this let's go back to the slide yeah they don't care whether they come at it through the left or right wing faction they would prefer to get there directly by telling you where your rulers and we're taking you into slavery whether you like it or not most people wouldn't go for that direct method that's why they have to do it through an occult it methodology and make people believe we're the ones in control were the government we're the ones who are instituting all of these laws and rules no they're duping you into believing that you're that person when the cult is that group of people that are the masters behind the scenes that's all and people are just that brainwashed and that refusing to admit that they are duped and fooled see folks I built this all out deliberately in red white and blue colors you know to celebrate our independence whose we're so free you know government isn't slavery no it's the rule of the people that's what we have here yeah you know so here's all nice red white and blue collar on our slide here let's keep it there for a moment you know beautiful red white and blue colors to celebrate our independence here in the United States and throughout the rest of the world we're so free you know there's no satanic cult ruling the earth no that's all hearsay that's all conjecture that's conspiracy theory or it isn't happening at all not a bit because I don't want to believe that that's what the world is so here if it makes you feel any better I know a lot of people can't handle it they have a really thin skin when it comes to this they don't want to hear that we're enslaved they don't want to hear that the the ultimate goal of all politics is the slavery of all humanity okay well I just even go back to this full screen if it makes you feel any better okay here here's what I'll do let's put the goal in Nice red white and blue letters just like this okay does that make everybody feel proud proud to be an American and makes us feel so wonderful our slavery is red white and blue the goal that the Satanist took this to we'll wrap it up in nice pretty colors let's wave a flag around let's be proud that we're part of this system and it's just fine and dandy it's hunky-dory nothing needs to change we're free we've always been free we're all we'll always be free I mean the only thing that's really missing in this picture is the big fucking clown with big fucking clown shoes and a big fucking red white and blue wig I got to break him back out that a Satanist from the order of the evil eye sent to me when I asked them about does the high-ranking members of the hierarchy that you're still in touch with do they what do they think of the anarchist movement and the freedom movement at work in the world you know what do they think of the truth movement then trying to expose 9/11 and trying to you know explain to people that government is slavery and that you know we're really a slave Society and without a word to answer my email he sent me back one JPEG image of a clown in a big polka dot or you know I think it was a polka-dots jumpsuit with big red floppy clown shoes and a big multicolored like Ronald McDonald style wig with a party hat honking a horn like one of those boom perm perm you know those horns those clown horns turn to attention you know makes that noise honk and one of those horns yeah that's it no words nothing just an attachment no no you know reply via via text email nothing just an attachment of that jpg that was his answer and again I've said it in the past and I'll say it again folks I wish I could disagree with that Satanists response but I cannot I cannot disagree I have to concur that that is what's happening that that is exactly what should be thought by the higher-level Satanists as to any little modicum of resistance that's ever been offered again my take on it is it's a piss-poor pittance yeah let's make that a another you know mainstay term here on waters water on earth is happening get as offended as you like as to what I said about American society and world society for that matter it's a bunch of naive fucking clown doubt children that have no idea what's going on in the world behind the scenes of ostensible politics know nothing about real world Satanism know nothing about the master psychology that these dark occult this wield over them and the level of mind control that they have the public in know nothing about their methodologies know nothing about their end goals and they think that they're not duped and they think they know what's going on in society and they're a bunch of fucking know nothing naive children and ultimately they're clowns they're the real clowns you could say that the the the the masters of the world are clowns all the political do oops that uh Shirin they're a satanic agenda are clowns all you want it's good it's great make fun of them too because there are clowns too because they're getting thrown under the bus okay but let me tell you who the real clowns are for a circus ticket to be bought there have to be attendees of the circus and those are the real fucking clowns okay all the clowns could go to the circus tent and say we're gonna put on a big show the greatest show on earth and dupe everybody and lie to everybody and enslave them all but if nobody shows up there's no fucking circus well you know what has happened 99.99% of the human population has showed up to the fucking circus and they believe the show is real when it's all in their mind it's all big mind control fucking puppet show to put them into one place and that's what's listed right there at the bottom of that slide ladies and gentlemen boys and girls children of all ages that's the goal human slavery and that's where we're at because people are too stupid to see all the things I've laid out here on this slide the sex of Satanism the methods of Satanism the social manifestations of Satanism and the goal of Satanism in our society and it's all one big satanic ritual that they get people to go along with their own enslavement those folks it's all about satanic inversion the inversion principle the satanic inversion principle as I call it Satanists seek to invert everything that is good with everything that is evil they want the upside-down world as I described in last week's show with the completely misplaced trust in societal institutions three weeks ago I should say the last show that I did the quote from the philosopher that talked about everything is backwards everything is upside down all the institutions what they are ostensibly claimed they are doing and are they are there they are put in place to do the exact opposite government's destroy freedom Health Organization's destroy health religious organizations destroy spirituality and on and on it goes The Satanic principle as the adversarial a poser of the good of the natural of the moral of natural law the adversary to all that always wants to invert everything in our society to turn everything upside down and tell you that it's the opposite they want to tell you black is white right to your face and have you naive enough to believe it they invert truth with falsehood that's why people can't tell the difference between them everything is relative you know there's no objective absolute truth no it's all relative that itself is a falsehood they want to invert knowledge and belief and have people believing things and believing that they're true thinking that they know that they're true instead of actually having true objective knowledge of the nature of things through scientific discovering methods that don't require belief none of what I am saying here or what I know is a belief folks it was hard-won knowledge through truth discovering methodologies and extensive testing vetting comparing contrasting which are scientific methodologies of observation and testing which too few people know how to do they want to invert morality and immorality and tell you that which is morally right is morally wrong and that which is morally wrong is morally right and we can make it up but we could change it at any given time we want we could pull the switcheroo and switch them at our whim that's called man's law don't you know we'll decide what's right and what's wrong and we'll make laws according to it and if we say something that is truly good in nature is is morally wrong we'll lock you in a cage for doing it and if we say you must partake in something that is actually an objective point of fact reality objectively morally wrong and you won't participate in it we'll lock you in a cage for doing it cuz we'll call that wrong we'll call not partaking in it morally wrong what it's the morally right thing to do everything's backwards everything's upside down everything satanic lis inverted they want to invert good and evil itself because that's what they want you to believe that Satanism is good that following the adversarial force will lead you into a condition of good in society instead of a condition of evil and enslavement here's the thing that's that's been the main driving force of the bulk of my work and has been a cornerstone of my work that I still think hardly anybody really understands in all honesty from from just feedback that I get and just seeing just trying to put my my thumb on the pulse of what's going on in the alternative community very very few people understand one of the cruxes of my work and that's the delineation and the distinguishing between the natural world and the world of artificial constructs which i think has been one of the most pertinent and important aspects of the entirety of my work and yet I think it is horribly misunderstood by the majority of people who even do look into my work let alone people who don't but they want to invert the natural and the artificial folks they want you adhering to the artificial world of constructs and thinking that the natural world is you know a crock of shit and is unimportant to really understand what's objectively true in nature that's why when you say natural a lot of people they think they know what it means and they are totally applying completely artificial constructs to it that only exists in the human mind and in the human construct real domain to something that has absolutely nothing to do with beliefs or human invented constructs because people do not understand the delineation or the distinguishing between the natural and the artificial construct or world and they'll tell you that they do and insist that they know what it means well again I just had someone tell me try to tell me natural law is how animals operate in nature in public on the street in the in the public space me not knowing who I am not knowing the work that I've done on natural law knowing not even my name or anything to fuck about me try to tell me natural law is this whole notion of Darwin Darwin Darwinian survival of the fittest and the way animals operate in nature which I just did an entire fucking show on not too long ago called what natural law is not of course never saw at one tiny iota of any aspect of any part of my work but yet will insist they know what natural law is and I don't and that's what it is because that's what they believe I mean there is no : long enough to get the head far enough up there you know it's like up there by a billion fucking light-years you know that's where that's how far up the ass somebody who thinks like that's head is there will be no getting that out I'm not under any delusion that it could be gotten out I have no power to do that I have no power whatsoever to change someone's wrong thinking to that extent basically what you got to say to somebody like that is there's nothing you could possibly fucking learn from me don't say a word to me or expect the word back from me they're hardened in their ego and they're controlled by the satanic force and are committed to remain so forever that's called the lost and what their owners call them in the dark occult is the dead that's what they call them that's what they'll continue to call them and that's what they are they're mentally dead they're emotionally dead and they're spiritually dead and they don't care that's why they're the dead they don't really have any knowledge or apply thoughts correctly they don't really have any care or true compassion and they don't really act certainly don't act rightly in the world so their thoughts their emotions and their actions are missing and or dead and so the Satanists of the world actually refer to them to someone like that who they own and control as the dead it's one of the reasons that they believe in their religious system of beliefs in Satanism that no karmic consequence will come to them ultimately long-term because they don't believe that they are performing any actions to conscious living beings they believe that they are performing all of the actions that they are performing to inanimate matter that is ultimately in the spiritual sense non-animated it may be physically animated but it is what they refer to as a golem something that is dead that is not actually imbued with spirit that is just animated physical dead matter like a robot so some will refer to them as golems and the big verbage the big word that they really refer to people who are completely inactive in their true intellectual capacity or carrying capacity or active you know doing the right action in the world they're all completely inactive in all those capacities the main thing that they call those people is the dead and I once again folks I wish I could disagree but I cannot because that is exactly what they are they are not really truly alive physic physically being animated is not really life it's not really truly life because they're not active in any ways that a true conscious being that is spiritually activated is activated and therefore these people who do all of these heinous things to people like that say we're not doing it to living beings no karmic debt or Consequences will come to because we are only doing that to the dead or the golems and you know what folks I wish I could disagree with their assessment but I cannot I don't ascribe to that ideology I don't I don't think that that's right or moral but can i really say that i disagree with their assessment of the condition of people no i cannot disagree they are correct that's what saddens my heart to be honest that's what just it just makes me so profoundly sad that i get weak knowing that they're correct about the human condition and when they told me that this was a human condition and when they told me this is exactly where they had people i resisted and insisted that they were wrong and now almost 20 years later i have to say i was wrong the dark o cultists were correct about where they have humanity they did not lie to me they told me the exact truth on the nature of the human condition the exact truth and you know what in those twenty almost twenty years absolutely fucking nothing has changed absolutely fucking nothing has changed nothing so let's go back to the satanic inversion principle that Satanists employ in our world and look at some of the other methods that they use they want to invert health and sickness and tell you all the things that will be good for your health are things that will make you sick and all the things that will actually make you sick you should do and take into your body inverting health and sickness of course they invert freedom and slavery they want to tell you you get to freedom through politics and government which is slavery we're going to get to freedom through an implementing slavery yeah yeah that don't you know don't you know that's how it works yeah I mean again people are just dumb as bags of dog shit really they are implement implementing government slavery is gonna lead to human freedom in the real physical world yeah that's how it works that's how we're gonna get there we'll get there slowly but surely but we'll get there through government which is slavery to freedom and smacked fucking ass clowns believe these satanic liars yeah inverting order with chaos itself again they're inverting evolution and involution you know they're gonna tell you that that which is gonna hold you back is going to move you forward and that which will truly move you forward is what's gonna hold you back so don't subscribe to that you don't want to look into natural law and understand what it really is that would be suppression of moving forward that would be chaos but subscribe to satanic beliefs ideologies moral relativism eugenics etc and that's going to move human society forward it's folks the bottom line is the ultimate principle of an of inversion is the inversion of the very life and death itself because that's what this order of death this death cult is it's it's a cult that venerates and ultimately worships death and what is that card on the tarot that's the force that is the involution Airy force Satan the devil card is the slavery card which is underneath the death card and when is that austere density I got to do a whole Reeb rake down of this on the Tarot I probably should have actually put it into the presentation especially the macrocosmic tree it's very appropriate to this discussion to integrate and under an esoteric understanding of the Major Arcana of the Tarot Dec occult eclis with the knowledge that I'm laying out here regarding Satanism because if you look at on the macro cosmic tree as the Tarot that the second half of the Major Arcana gets laid out on the sefirot on the tree okay the left-hand path or the path of severity okay which is the dark pillar of Freemasonry it would be the pillar of Boaz in Freemasonry the equivalent in Kabbalah okay in the firm free Masonic tradition in Kabbalah it is called the pillar of severity or it is a Gibara severity on the on this Kabbalistic path the left-hand path you have the moon the devil and death okay and it leads to judgment at the Malkuth position the bottom of the tree which represents the lower chakra the base chakra okay but as you are offered truth which is the sun card in the in this arrangement of cards in this Kabbalistic arrangement of the tarot cards if you reject it you go to the left-hand path that's the rejection of truth of the Sun which is the moon which represents ignorance okay going backwards in knowledge then what that will lead to societally on the left-hand path of that this tarot card arrangement is the devil card which is the slavery card because the ignorance of natural law invariably leads to the law freedom applying meaning you can't align your behaviors to objective morality and therefore your society becomes enslaved what is the ruling power over that dynamic is the death card which is the involution Airy force card the force of involution that which counteracts the force of evolution mainly as an adjunct to this presentation next week I'll show you this card arrangement again okay and and talk about these dynamics as it applies to the involution Airy force or the Satanic force at work in all of our society I may have to just extend the whole presentation in two weeks folks because I still have many slides left okay and we're nowhere near done so this is ultimately the inversion of life and death itself and what Satanism once is the worship and veneration of the death force itself the involution Airy force that's why it's a death cult that's why it is actually called at its highest levels the order of death look that one up look up the order of the Black Sun the Old Religion and the order of death they're the only things that their own adherents actually ever call it they don't don't really ever refer to it any other name and these are only names given to it to just be able to conversationally refer to it as this these are not formal names again ultimately the network of Satanism that is operating and thrown behind the scenes of power in the world is a cult without a name so let's look at how our society really is a total satanic Society we're going to look at that it is a master slave Society it is a death cult Society it is a prison Society it is a money worshipping Society and it is ultimately a me-me-me mini-me Satanism society and all of this constitutes really what's really going on in our lives today is all of our culture is an endless one big satanic ritual taking place politics is the first part of it okay we've already looked at the first part of the satanic ritual that's in contain in this slide itself a master slave Society we're all taking part in the entirety of the enslavement of society that's all part of the ritual to enslave humanity that's what government all is people participating in their own enslavement as a ritual it all has its rituals you know rituals out in front of the White House we're assigning rituals no signing bills into law rituals you know holiday rituals it's all ritualistic dark magic that's all it ever has been but this is how a general master/slave society is structured is orient a very simple dynamic a very simple representative graph of a pyramidal structure where you have a small group of people that sit and thrown during trying at the top of the of the structure the rest of the society is set up hierarchically and often you will see this pyramid compartmentalized into different vertical strata where one aspect of the society such as banking doesn't know what the other aspects such as illegal drugs or or medicine is doing there's there not only stratified in layers of knowledge levels of knowledge but they're also compartmentalized into compartments of knowledge so that one hand doesn't know what the other hand is doing and that's another way of more easily controlling people not just through hierarchical strata but through compartmentalize strata so people think that this is the only form of hierarchy that exists in a master/slave society that it's the masters at the top and then underneath them you have them directly ruling over their slaves as the slave class is the bulk of the population and the masters basically run the society until the slaves what they can and cannot do this is a pure oversimplification of the actual way that the structure of a master/slave relationship master slaves society I should say actually functions it's more complicated than this so my expanding of this is this is how a real master slave society actually functions in deed in behavior you have middle managers or middle classes of masters that are also actually slaves to this set of masters over them with obviously more and more of them as you go closer and closer to the slaves at the very bottom which is the general population and most people who study this dynamic of our society will admit yes this is how it works you have the Masters at the very top the slaves at the very bottom you have middle management groups like governments and then banking institutions that incorporations that you know are structured in ways where they are both the masters over people and people underneath them but they are also serving the masters at the very top level but this leaves something out folks it leaves two very very important dynamics out that most people who do research into the way that the occult works the way that conspiratorial aspects of our society work never take into consideration and it's extremely important for both of these factors to be taken into consideration when looking at the stratification of the way our entire social dynamic structure works and here's the first one if you look at this bottom level which represents the masses of people the uneducated unwashed masses of people who have no idea what's going on at the levels above them okay they are not only just slaves but they are masters as well and that's very odd for people to hear someone say very odd thing most people will never bring up this dynamic okay but the overwhelming vast bulk majority of the average human being is not just a slave but they are also masters over other slaves so we act as police and masters over each other in many ways with policing what we ourselves think and what other people can and can't think through political correctness and politically correct speech which is just self-censorship but most people never think of this if you actually leave this structure represents human society if you leave this structure to the bottom what are people ultimately acting as horrific violence torturing masters to the entire animal kingdom that's what we are acting as masters in this massive satanic never-ending satanic ritual over the animals that we barbarically tree and barbarically butcher endlessly all day long every single day ten billion land animals alone a year conservative estimate probably many more than that over a hundred billion maybe 150 billion total animals slaughtered every year for human food needs alone so-called food needs let me tell you something folks wood inspired this entire presentation as a brief aside to toe to this slide and again like I said if we finish today we we finish if not we continue next week but as a brief aside what inspired this entire presentation is in the lead-up to Independence Day I did a little bit of biking and walking around my neighborhood sometimes I do that for exercise you know I hit the gym and sometimes I bike there you know sometimes I'll Drive there sometimes I'll walk there but you know I like to bike to get out in the Sun get some exercise or just walk out in the Sun I'm taking a walk one day and you know I go and deliver packages and sometimes I'll just take a walk through the neighborhood for you know a mile or two just for some good exercise and I'm walking through the neighborhood and I'm just over and over just smelling animal carcasses all over the place outdoor cookouts in people's homes and I'm just thinking it's like this is non-stop this is only one small tiny neighborhood in South Philadelphia imagine this Nate you know city wide then imagine it's statewide then country wide then continent-wide then world wide it's going on non-stop every second of every day it's a 100% complete torture murder and death ritual with the animal kingdom non-stop and that's this level of the pyramid that the main slaves the human slaves that are the the the basic bottom level of the pyramid controlled by all the other masters above them are masters themselves because in Satan's Kingdom in the kingdom that is ruled by Satanism by the involution airy force again I don't look at as it as a deity as an actual entity that's not how the Satanists look at it either either it's a nature force that is operating in the universe itself and is pushing the dynamics of society ass-backwards and and counteracting natural law and the true evolution of consciousness it's counteracting that force that's why it's the adversary or the opposer or the involution arey or entropic force okay it wants every level of human society to be both masters and slaves so that they are always in a master over a level below them but yet slaves to a level above them and that's exactly what our society has become because not only do the slaves at the bottom level also act as torturous barbaric masters over the animal kingdom below them which is the slave level below them but the so-called highest level masters of the dark occult organizations at the very top of this stratified pyramidal structure that we're using as a model here to represent the master slave human society they are not just masters but they themselves are slaves to a level above them and then we can go off into conjecture about what that level is and folks I'll tell you what I've told people what I think that level is and have made no bones about it and I don't give a rat fuck what people think about what I think through my research through my endless amounts of painstaking laborious research into ancient documentation about what is actually ruling humanity at a higher level and who directs gives the directives to the so-called occult rulers or masters that operate as ruler over all of our human society it goes off into a non human domain and that is a physical non human domain of a type two civilization and then from there there even enslaved and they're enslaved by non cop oriole hyper dimensional entities who are then even themselves enslaved by the involution airy force itself it goes on and on and on as above so below but you know what folks it is not the natural order of things if you believe that you have subscribed to Satanism that's the real takeaway of this if you believe that it must be like that you have subscribed to the ideology that your masters have given you at the minimi level of Satanism and that's what so many people will say oh that's just nature that's just how nature works it's always been that way it always be that way wrong you're wrong you have it exactly wrong and you have subscribed to a satanic ideology incorrect boys and girls untrue untrue it is that way in human society through free will choice get the fuck over it no people want to believe it must be that way through the natural world because they're too weak willed to change it and they're too apathetic to change it and they're too ignorant to change it don't tell me that's the way God made it you're full of fucking shit you want to believe in the God these people believe in go right ahead and say that force made it this way but don't tell me the force of creation put that slavery into effect and keeps it there permanently because you are a satanic believing full of shit for brains punk bitch if that's what you think and I'll be the one to tell you that just like that because no one else has the balls to boys and girls it'll leave my lips because it won't leave anybody else's because they don't have the balls to do it and they're not righteously angry about it enough that that's a free will choice and can be changed whenever we will it to change but we don't want to do that work now we want to run away from that work we want to run away from that great work because we want to say it's just that way and it always be that way and I don't give a fuck and I don't care well that's why it stays that way that's why the death cult rules all of us we're a society ruled by death pumping death into the air into the water into the food and the medicine everywhere let's look at the dynamics of the death cult society that's the master/slave society that people want to think it has to be that way what do you think the death cult society has to be that way we need to poison our air we have to spray all the chemicals were spraying into our air and jackasses still won't look up stratosphere injection stratosphere aerosol injection and insist that this isn't a technological plan an agenda that's taking place no these are persistent water vapor trails where's my vomiting guy you know I got to go get him let me go get him hold on let me see if I have him here do I have him let's see if I have them hold on yeah I'll just you know that here here we go now I got him we just let me to make him is full screen as I can yeah you could go back here you go that's as big as I'm gonna make him for now yeah there they are yeah oh yeah it's just whoa there's no such thing as chemtrails yeah it's a it's it's persistent water vapor trails what wikipedia told me it was just a conspiracy theory you know what you can spray yeah just kind of condensation trails yeah that they think that they form at like 8,000 9,000 feet and then another point come to the same altitude you know and there's not there's nothing behind it and then you know I up it like up in like Hornet 25,000 feet you know a Cointreau can form and it's it's it's like just dissipating be hot being right behind it you know that's a car that's a Cointreau but then contrails can form at 8,000 feet when there's no scientific evidence to support the point claim that that ice crystals are going to crystallize in form vapor trails at that altitude but yeah they're just they're just persistent contrails yeah that's all okay that's it I mean this is what jackasses these people sound like when there have been completely declassified documents on geoengineering and stratosphere aerosol injection for years and years they've openly admitted the programs but yet people stay no this isn't part of a satanic agenda this isn't part of polluting the air and inalca and completely alkalizing through the the the chemicals that are actually proven to be in these trails that are sprayed from planes are alkaline earth metals which are soft toxic to human being earth metals in the alkaline earth metal family of the periodic table which when they hit soil will alkalis it so that the the uptake of the nutrients that come through the root system of plants in food will not make the food nutrient dense so that no matter how much you eat even if it's organically grown it will not have the nutrient content it's it's a slow eugenics agenda of not having people be as as vital and healthy as they otherwise could be if we're growing our food and clean acidic soil as we should the ph of soil for good organic food should be on the acidic side of the ph scale the alkaline earth metals completely alkali soil and robbed food of nutrient density and then you have other agendas where they could actually make the air into a plot an electrified plasma so that they can send different types of signals through it which can affect human physiology and brave way patterns we're running low on time I'm just going to continue with the slides for the death cult until time runs out and then we'll pick this up next week I have more slides to go through fluoride in the water so we're poisoning our air our water our food so-called medicine okay and other aspects of our society reflect the debt death cult which I'll get into from truth about cancer calm before fluoride was added to the water supply it was actually marked as a rat poison yes Stannis fluoride and sodium fluoride are rat poisons the main ingredients of rat poison it's actually a byproduct of the aluminum manufacture industry this is the toxin mass medicated to the majority of the United States population with no verifiable verifiable benefits and without our consent and with no ability to control the dose by the way the only chemical that is given to people and children in a completely uncontrolled dose through drinking water but it's perfectly safe and it's for the health of your teeth and gums don't you know I mean this is how naive and dumb bags of shit human beings have become and they're still still fight it to the death that it's good for you still fight you to the death wherever you if you went and got the whole raw byproduct of aluminum manufacture in the form of sodium fluoride or stannis fluoride and you started and it's marked as a total toxic poison that they can't even dump in traditional ways that's all the time we have for this week folks run out of time the show is exactly three hours low for people that still don't get that one bit continued with the satanic death cult society next week I have many more slides and then we'll be taking your calls on this topic next week you've been listening to what on earth is happening and government is slavery we'll see you right here next week [Music] [Applause] [Music]

What On Earth Is Happening Show #215

Topics: *Our Entire Society Is One Big Satanic Ritual Part II, Pre-requisites, Modern society as a Death-Cult, The Order Of Death, The Cult Of The Black Sun, the term "Illuminati" as a tragically wrong misnomer, Poisoning of the human biological system through the air, water and food, Pollution from oil-base combustion engines, Stratospheric Aerosol Geoengineering (SAG) Stratospheric Aerosol Injections (SAI), Geoengineering, Operation Cloverleaf, Chemtrails vs. Contrails, Alkalization of soil destroys the ability to grow high-nutrient food, Scientific Methodology and the Trivium and Quadrivium, "Negative Knowledge," Plasmification of Earth's atmosphere, Dr. Nick Begich, Thomas Bearden, Action-At-A-Distance Weaponry, Scalar Interfereomentry, Clifford Carnicom, Fluoride in our drinking water, Fluoride Poisoning, benefits of Distilled Water and Structured Water, Reverse Osmosis, Toxins in our food, "Natural Cures" book by Kevin Trudeau, Making people sick through food and drugs so they can't think clearly or resist, Poisoning human beings through Vaccines, Modern human diseases caused by Vaccination, Autism is a spectrum of Vaccine Damage and not a disease, the Death-Cult of our modern Medical System, Dr. Russell Blaylock, War as an endless Mass Human Satanic Sacrifice Ritual, Glorification of War in video games, Freedom is inherent to Creation and is NEVER provided by soldiers, False Flag Events as Mass Human Satanic Sacrifice Rituals, False Flag events vs. Hoax Flag events, the Hegelian Dialectic, "Shadow Ring" documentary, the 9-11 False Flag Human Sacrifice Ritual, World Trade Center Building 7, 7-7 in London as a False Flag Sacrifice Ritual, the Dark Occult Mind Controllers, Social Engineering, the Mass Slaughter of Animals a Perpetual Satanic Sacrifice Ritual, the Interference Theory of Human Origins, Abortion as a Perpetual Satanic Sacrifice Ritual, Righteous Physical Rebellion is ALWAYS an option if a Revolution in Consciousness fails, Rampant Pedophilia in human society, our Prison Society, 2.3 million Americans are incarcerated in prisons, 90% of incarcerated Americans are caged for non-violent "crimes," Prohibition is Slavery, Taxation is Slavery, the Gramsci Plan of the "Long March through the Cultural Institutions," our Money-Worshiping Society, the Dark Occult's "God" named Baal/Bel/Bil/Bull (B-L variants), our Me-Me-Me Self-Centered and Self-Obsessed Society as Mini-Me Satanism*

freedom man that's what it's all about [Music] give that the group on freedom books [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark pass bill [Music] site what on earth is happening dot-com ladies and gentlemen government is slavery and here on water on earth is happening we are ending slavery one mind at a time welcome to the show today thank you for tuning in today is Sunday July 14th 2019 this is what on earth is happening episode number 215 and we have a fantastic show lined up for you here today this show will be a continuation of last week's topic which is our entire society is one big satanic ritual this will be part two of the show that we began last week and we'll be taking your calls in the third hour possibly earlier if I finish early possibly a little later if I go off on a little bit of a tirade again as I started to last week but what I want to say before I even start and get into the topic of discussion for today is anyone who may be a new listener to this show should realize that this show has prerequisites to it okay what on earth is happening isn't your average podcast where I interview guests I mean sometimes we have guests that I interview but what you should always be aware of is that this show is a tapestry of information that started with episode number one and a lot of people may not understand that or may not know about it and they try to jump in at episode 215 well episode 215 has 214 prerequisite shows so if you really want to deeply understand what I'm talking about you have to go back and you have to listen to the podcast in order from show number one at your own pace and when you do that the big picture will emerge the tapestry will emerge in your mind the aha moments will happen if you try to listen out of order you're going to be putting a huge task upon yourself to be able to really put the picture together whereas I have done that for people in a stepwise progression by organizing the information in a very specific way if you follow it in the progression that I have laid out since show number one that being said any show that you happen to look at if you look at episode number 100 that has 99 prerequisite episodes okay so you have to understand this show really isn't meant to be listened to out of order okay now this show in particular builds upon last week's show and I'm going to continue about two-thirds of the way through my slide presentation that I did not actually finish last week so I just want to make people aware of that so we can jump right into the slides for today and I'll give the event announcements in the slides okay I think that's the best way to go about it saving some time so let's go over the computer thank you and I'm going to be speaking this year at the inaugural and arkadelphia conference and arkadelphia 2019 I'm actually the keynote speaker at this year's event I'll be giving a presentation called the sacred gift of anger which is being worked up right now it looks like it's gonna be coming together really nicely I have my outline laid out for it I'll probably start building my slides fairly soon and I think people are going to be very happy and impressed with what I have to say at an arkadelphia because this is a topic that is too little talked about in our society and many people do not understand the dynamics of why the social engineering ruling class really is trying to squelch human anger they don't want that displayed they wanted always thought of as only a negative emotion that should somehow be purged and what we can actually do when we put our anger to work we have it in the right place we are having feeling that emotion for the right reasons and then we do the right thing with it through a place of righteous indignation and then channeling that anger and using it properly it is actually a sacred gift and that's what I'll be talking about at this year's and arkadelphia conference if you buy your tickets with the promo code passio there's a banner on the homepage of what on earth is happening calm that'll take you to the ticket page a check out if you use the promo code passio you'll get five percent off of your ticket and five percent of the ticket sale will be donated to me personally by the organizers of the event the guys from the state of anarchy I encourage you to check out their website and YouTube channel they're doing some great stuff so the whole conference is a who's who of speakers it's gonna just be a fantastic event September 13th through 15th here in Philadelphia for more information go to an arc adelphia dot-com or click the banner on the homepage of what on earth is happening calm also at this conference the day after the the I'm sorry also at we need to make a premier banner or maybe we might do a little promo video for the debut of my new documentary film my first ever documentary film entitled Mark passio and the science of natural law it will be screened for the first time debuted and screened for the first time at the an arc adelphia conference on the Saturday of the conference that's September 14th I will be speaking that day and after my presentation is complete we will be screening the documentary film mark passio and the science of natural law the day after the conference the Monday after it on September 16th I will be hosting an all-day workshop entitled teaching natural law with Mark passio it will be taking place September 16th from 10:00 a.m. to 5:00 p.m. with a one-hour lunch break in the middle of the program it will be happening at Poppy's Italian restaurant at 30 120 South 20th Street tickets for the workshop an all-day event are $120 to attend you can get those tickets at an arc adelphia calm in the workshop section also we are still running our summer t-shirt sale it's a clearance sale we are almost out of t-shirt merchandise I placed the replacement order this week this past week new t-shirts will be coming in the only t-shirts that are left folks are at $10 each we did an over 50% clearance sale our the what on earth is happening design this is actually the third what on earth is happening design Believe It or Not of t-shirts that I have pressed and they are $10 there are only five left they're all women's so we have only 10 I'm sorry only 5 women's t-shirts remaining in the entire store in the entire gifts area and will be repressing a new what on earth is happening design that will be a sort of a vectorized 3 color design so this is the end of this design of the shirt it will not be repressed anymore so limited edition and limited time to get your hands on this third out of the 4 what on earth is happening designs the fourth design is going to be coming off the the press in the next week or so so that being said we also are now accepting in addition to paypal six crypto currencies we were also taking Bitcoin for a while but we are instituting now five different crypto currencies my programmer has helped me to get this up off the ground he's done a fantastic job with it thank you and we now are offering six total crypto currencies at gifts so last week we had the URL incorrect in this infographic I've corrected that for this week so that's the website the correct website to go to for donation gifts so let's jump into the material I'm sorry one more quick thing anarchy and the occult part two which is the presentation that I gave it this year's an arc apoco conference in Acapulco Mexico the edited video is almost ready it will probably be complete sometime this week I will be getting that formatted for DVD and flash drive and it will be available on gifts later this week probably around the same time that the new t-shirts hit so definitely keep an eye out for that I will then release my Tesla and humanity's missing paradigm shift video for free on YouTube that's generally the formula that we do when a new presentation video goes into the gifts area we released the former one for free so the Tesla video will be released for free probably sometime coming up this week and anarchy in the occult part two will go into donation gifts and again that will be then stay there for a while until probably the next presentation video drops and then we'll release that one for free that's basically the formula we've been employing so that's all the housekeeping announcements I have for this week let's jump right back into the material so just a fantastic title card again for this week thanks to Brett for doing these this is part two of our entire society is one big satanic ritual and folks the response from last week's show has been overwhelming overwhelmingly positive people want to hear about this aspect of this information I can tell they are hungry and ready to hear the occult dynamic that is at work in our lives they know that this is going on they know it under the surface even at a subconscious level and may even many new listeners to the show you know started listening here which I don't think is the right way to go about it I really recommend going back to number one and working your way forward in order I can't say that enough but even the new listeners were blown away and had a lot of very positive comments to make I've heard a lot of positive feedback on last week's show and we're going to continue this topic for this week so I do want to reiterate this quote and again dedicate this presentation along with last week's to the memory of Thomas Jefferson who said he who knows nothing is closer to the truth than he whose mind is filled with falsehoods and errors and I can't agree more strongly this is what I have called in my work negative knowledge and we have far too much of it in human society we have a society in the human sphere whereby people not only don't know the truth about any given dynamic that is very important to know about what's taking place in our world and in human psychology and in the human you know psychological realm okay but they believe things that have been told to them and repeated to them endlessly that quite frankly and simply aren't true so in order to get back to a place where they don't know anything accurate about a given topic they have to dig their way out of that hole of negative knowledge of reinforced beliefs that are not correct and that's where we're at in our world that's why the world is so enslaved we have a society that not only doesn't know anything about how things are a really run or how they're really taking place in the human psyche or in the world of actual nature but they believe all these inaccuracies and inconsistencies about what they book think our gut is going on that's quite frankly is not true and this is the the hole that people have to dig themselves out of and I'm telling you most of them have such a huge ego a crystallized ego that is just built up from the minute they've been put out of the womb into this world and the social engineering that comprises it that that ego has just crystallized into just a hardened diamond and cannot be broken down and these people just believe they're right and that they're the ones who understand what's going on and any contradictory information not only needs to be thrown out and dismissed but it should be silenced I mean could you imagine being in that place of ego you know but this is where the majority of our world is at folks so we have to be willing to hear things that make us uncomfortable as I've said before if you get offended by what I say here get as offended as you like because I'm speaking an accurate dynamic of what is in the world from a first-hand perspective account I've been involved with dark occultism and Satanism directly in my life this is what I have to almost chuckle and laugh at it makes me angry but I have to try to take the approach that I just have to look at people like a naive child that's a that's an absolute fool who tries to say they know more about

Satanism that I do when I was a priest in this religion or they dismiss it and say it doesn't matter it does it's meaningless I don't believe that shit so wise why should I worry about it because the rulers of the world believe it they're acting upon it and their power in the world affects your life whether you wanted to or not that's the reality of the situation that's how it works it doesn't work by this new-age nonsense this New Age bullshit that if you don't pay attention to something you don't give power to it sorry folks that's called being ignorant of something and ignorance is not bliss ignorance is death okay ignorance is slavery and death so we have to become knowledgeable about how the psychopaths who are running this world about how their religious belief system work works because they believe in it and they are acting upon it and when somebody believes in something fervently the cult like fur religious fervor and then they propagate that to their followers and their followers also believe in that whether that dynamic is complete nonsense and wrong it does not matter because they are acting upon it in the world on a unified front which is what I explained last week that the political systems are just the two sexes of the cult we have to stop looking at them as religion as political parties and start looking at them as sects of the one undivided religious cult that they just they are just masks that are presented to us in the political domain so that we ourselves believe in a lesser down watered down version of their occult religious ideology and then in playing into that game we are instituting our own slavery because that is their long-term unified goal for the world for the people of this world so let's jump into the section of this presentation I'm going to just jump ahead in the slides I will post all of the slides for both parts of this two-part presentation with the podcast but I'm gonna jump to the section that really begins talking about how the society is satanic li structured as a huge ritual a huge non-stop never-ending satanic ritual that goes on every single moment of every single day in our world and as I'm gonna talk about in this section which is titled the death cult Society because that's what the cult of the Black Sun is that's what the order of death is that's what the cult without a name which people very wrongly referred to as the Illuminati which is a term I personally hate applied to this worldwide satanic cult that is really are really the de-facto masters of our world unfortunately okay I don't like calling them the Illuminati the people who are truly illuminated spiritually and who truly understand what's going on in our world and are aligning their behaviors with natural law and are doing the right things in our world not acting in concert with these psychopathic ruling clowns they're not the Illuminati the people who know the truth about what's going on and act rightly to make the world better are the Illuminati that's what we have to understand we need to take that term back we need to take it back I'm one of the Illuminati okay I'll say it openly and honestly right to people that doesn't mean I belong to their big satanic Club because I do not but they are not the illuminated ones we have to stop allowing them to use that term and get away with it because they're nothing of the kind you have to understand what the term really means in Latin you know and understand that they do not represent that term the the truly enlightened beings of the world who are trying to change the world for the positive toward truth love and freedom are the illuminated ones okay it's a misnomer that has been too long used for these psychopathic rulers so they don't really have a true name as I said last week they don't really refer to themselves they talk about themselves as the old religion the ancient religion that's all what they refer to their sick satanic belief system and ideology as the old religion that's the only thing I've really ever heard them referred to themselves as people have called them the order of death which is very accurate because they are a death cult worshipping society a death worshiping society okay a death worship cult people have referred to them as the order of the Black Sun which is very accurate because they are using light or knowledge against people they have knowledge which others don't they wield that knowledge in a dark capacity to mind-control mentally and spiritually enslave people and eventually physically enslave them so that is not the cult of the true positive Sun of true light and knowledge but that's the cult of the black Sun the dark Sun that's an accurate name to apply to them okay I have simply referred to them as the dark occult which i think is probably the most accurate name that can be given to them the dark occult mind controllers of our world that is the most accurate way that I can personally describe them although most people don't usually use that terminology I'm the one who really has popularized that term so that's what I see them as the dark occult mind controllers of our world but we can look at them most certainly as a death worship Society or what I call them as a death cult and they have structured our society around their death cult and what the death cult wants to do is set it's a several several point agenda they want to poison everything that human beings have to take in as forms of energy now what's the first thing you can't live without you can live it without this the shortest amount of time and that's breathable air ladies and gentlemen you know then you go to food you could live with live without that a little longer they're trying to poison that too then you go to water you could live without that you know for I'm sorry water would be second I'm sorry air then water you could live without that a little less then food you can live without that for a longer period of time they're poisoning that you know and then they want to poison the energetic system they want to poison the the soil that our food grows in you know they want to they want to put poison into us through alleged medication which is actually poison okay they want to put all kinds of death into our society by the continued murder and rape of the animal kingdom the continued murder and rape of small children okay that this death cult works through many different aspects of a unified agenda to endlessly create more death in our society and before we go back to the progression of slides I want to just reiterate that what inspired this presentation particularly how our entire society is a death cult is I was just walking down in my streets in my vicinity in my neighborhood here in South Philadelphia around the fourth of July not right on that date but like right around it and just taking in how many people have been doing cookouts on that previous weekend and just the amount of animal death and the amount of just cooking of animal carcasses that were being done in this just in this small neighborhood alone and just I'm just imagining how much that's going on every single day not just citywide not just statewide not just nationwide not just country what you know not just um continent-wide but all throughout the entire planet you know how many animals are just murdered continuously and it's it's a death ritual this is a satanic bloodletting death ritual which I'm going to talk about in a later slide and that's what inspired this whole presentation so let's start to look at some of the ways that this death cult operates the first is they poison our air that we breathe first of all it's poisoned with industrial pollutants chemical waste products all kinds of airborne pollutants mostly through carbon exhaust that comes from our forms of pur energy that we use in vehicles that we drive so this is hydrocarbon burn fuel that is from the type of gasoline-powered hydrocarbon vehicles that we employ and that this is being pumped into our air that we breathe I mean you you look at you go to a very rural area dust doesn't accumulate to the levels that it does in a major city you you have to dust from the fallout from the air at a much lower rate at a must much less frequent rate in a highly rural environment where you don't have cars with their you know combustion engine fuel being burnt everywhere that you then you do in a major populated region I mean I can just see it in the difference between my mother's home at the Jersey Shore when I go there to visit her and the amount of dust that ever accumulates in that place compared to something like even a small street that I live on in South Philadelphia where cars are just blowing exhaust down the street all day long the environment is just way more polluted and you have to keep up with dust way more and that's we're breathing that into our lungs every single day then on top of that their spring whatever the chemicals are in the chemtrails and this is a aerosol project that planes deliberately spray from aerosol nozzles equipped to the Jets and tankers that they are spraying it from and this is declassified this has been declassified for a number of years that it's called stratospheric aerosol injection si G is one of the terms that is used which is gas spelled backwards okay and you know this is something that is going on continually you know doesn't matter who's president they're not doing anything about this because this is a joint military project it's a joint military black ops covert intelligence project some people have referred to it as Operation cloverleaf but they used to call it a stratospheric aerosol geoengineering stratospheric aerosol geoengineering which also has the acronym of sag sa G which is gas spelled backwards they don't do that for any written you know frivolous reason they are gassing the population that's what and what this is doing I explained last week let me explain a couple of things about this first of all you want to just type that in chemtrails you're gonna get conspiracy theory related pages that are trying to debunk it because all the major search engines are trying to tow the ruler's line about what this is they're trying to tow their worldview and you know their whole agenda and their whole narrative about it you have to do deep research about this let me tell you a couple of the people who I respected in the research about this okay first of all you have to look into clifford cornichons work okay absolutely essential all right you want to look into I'm trying to think of his name I think it his last name is Henry I can't quite remember his first name but he was brought on to coast to coast am years ago I should have it in my notes but I neglected to put it in there if maybe someone can just look it up but his last name is Henry and he did a lot of work on what chemtrails and geoengineering was about and I highly recommend his work on it Jeff France has covered this for since he's basically had his website up folks I knew about chemtrails since 1996 when I really just started peeking my eyes open a little bit from under the covers okay and that's a long time that's all for you know I mean we're going on over 20 years about this that I've known about this you know 23 years I've really known about chemtrails it's amazing when you think about it I was out there with a big VHS camcorder outside my home in South Philly you know those kinds like you put the whole VHS tape in the door on the side and it was like this this freaking big you know the the whole camcorder was like this big you know and the door was as big as a VHS cassette I had one of those things back then okay I was a techie back then and that was like state-of-the-art you know I'm out there recording them these pilots spraying this shit in our atmosphere at a very low altitude you know my family members like what are you doing I'm like they're spraying us you know can't you see it that's not a contrail you know the chemtrail jet would fly by at like nine thousand ten thousand feet altitude at which contrails do not form ice crystals especially any kind of what they say are lingering or persistent contrails does not happen the atmospheric conditions do not do not make that possible at eight to ten thousand feet you need to hit the minimum floor of about 2223 I'm gonna give you a twenty to twenty three thousand feet but generally it's accepted in meteor odd meteorological science that a contrail does not form ice crystals does not form condensed ice crystals at any less than twenty five thousand feet that's the floor of where contrails form and visually you can determine but just a little bit of knowledge about how altitudes work you could determine that these planes that are spraying these endless lingering trails in like you know huge grid patterns first of all are not commercial airline patterns secondly are often flying 2x2 3x3 which no commercial pilots are even allowed to do they have to stay in very restricted airspace lanes I know a little bit about that as well because I have close personal friends who work at airports and you know speak with the air traffic controllers and understand how that works and you know these are not commercial airlines number one number two they are often a dc-10 tanker air Jets which are military aircraft unmarked as well when people look at them through high you know definition binoculars or through cameras with very advanced optical zooms they're their markings have been stripped away which is proof that they're part of covert ops and they are spraying it off in low altitudes which condensation trails do not form at these are particulate trails and again they're going to have people that are going to spit out that and tow the line of government-funded nonsense and insist they know the science better when they've taken no material science classes they've taken no thermodynamics classes they've taken no classes on physics of gases at all okay and they don't understand how this level of meteor of meteorological science works and they just want to say because I don't believe that our government would be spraying us with unknown metals from the alkaline earth metal family of the periodic table that that can't be happening because I don't want to believe that they're doing that without the public's consent and that's called being a naive child and saying that your view of reality will be determined by your belief system about what you are comfortable considering versus looking at it from a true scientific methodological perspective of making accurate observations based on real data on real data sets because you don't have those tools in hand you don't have the true scientific methodology in hand you reason from emotions instead of through true observation and true understanding of laws of nature you don't have the Trivium in hand in the scientific methodology in hand that's the problem and people want to believe that they somehow have true scientific measuring methodologies in hand when they do not that's called negative knowledge I'm gonna start with a wrong belief not only not look at what's true not only not look at the right way to come to the accurate understanding of what's true through real science but I'm gonna believe what I want based on completely inaccurate observations and measuring methods and then call that somehow science or truth when people who think like that have their head up their ass and they're in a place of negative knowledge and they're much farther away from the truth who people than people who go I don't know how that works I know nothing about it those people are much closer to the truth then an egg headed jackass who says I want to look at it this way from this worldview perspective and because I don't want to believe my government's spraying fucking poison on me that I'll believe that it is this way your there's nothing scientific about you jackass you don't know the meaning of the word science okay straight to your face I'll tell you so first of all start understanding a little bit about meteorological science start understanding a little bit about fluid mechanics okay you don't want you don't know anything about it and make you don't know anything about it there's college level university level courses you could take them right on iTunes you go on iTunes go to iTunes U you could take courses in all of this for free high-level university courses you don't want to trust that start really combining that level with other eclectic knowledge from authors writers Declassified projects Declassified white papers on the on these topics there's an endless amount of research you could do about it get the arc dr for number one there's plenty on there about it and there's enough to send you into hundreds of thousands of hours and let it let alone literally probably hundreds of years worth of research that you'll never be able to exhaust and yet there are people just say no you're off about this you don't know it's over the science is in on it you know I gave the the puking doll from Team America you know last week I got to put him in an isolated presentation so I could just bring him up at any time you know no you don't know their sign about this though they've Wikipedia told me that and Snopes told me these are just persistent contrails yeah persistent contrails right at eight to ten thousand feet where contrails don't even form you're talking about something that's an impossibility of even forming at that altitude and yet it's gonna linger up there for hours and spread out into a haze yeah smacked ass science is what that's called smacked ass pseudoscience of people who never broke open a fluid mechanics textbook in their lives okay no absolutely nothing about the laws of thermodynamics zero and yet want to say they know how it fucking works so folks the real reason they're doing this there's many reasons okay and a lot of researchers have speculated and some are more yeah more accurate than others over the real reasons for this part of the death cult this spraying one is first of all it adds more pollutants to the atmosphere we breathe every damn day and it's already sickly polluted enough enough to give a lot of people lung cancer in our society through all these artificial hydrocarbons and artificial heavy metals that shouldn't be in our air that we breathe people go oh these are natural elements yeah well you know what by no Boron's a natural element that doesn't mean you should be breathing and in a vaporous form in the concentrations that it's sprayed in the air or aluminum so what if they're on the periodic table of elements that doesn't mean you should so is plutonium doesn't mean you should be eating bowls of it okay just because something natural doesn't necessarily mean it should be taken into the human body it's in certain concentrations and forms so one there directly polluting the air two they're polluting the soil do we depend upon for nutrient-dense foods that nourish our body in all of our trillions of cells and what that does is it alkali I'm sorry yes it alkalizes the soil that we're we're growing food in on all of the farms that we grow food in food upon food cannot be grown properly in alkaline soil if the soil is on the alkaline pH just look up a little bit you don't have to be have the totality of the knowledge of science to understand these basic generalities and principles that are true about generally about human farming about farming practices not human farming of human beings that social engineering about the farming of actual you know plant-based foods that we plant in the ground in soil that should be highly nutrient dense and should be acidic for high nutrient density food to grow in farming soil it not only has to be tilled and and you know rotated but it has to be has to have an acidic pH the pH has to be toward the acidity on the acid pH scale on the acid to base pH scale that means it has to be in the six region around probably around six point eight soil has to be around six point eight acidity if I'm I think I'm approximately correct somewhere around there and what the spraying of these soft metals these alkaline earth metals art is doing when it comes down to the ground and goes into the soil it is sending the pH upward toward the alkaline scale usually it takes it to at least around a seven point two sometimes up as high as a seven point four pH what that does is that prevents the plants from properly taking nutrients up through the root system in the quantities that they need to be pulled up through it and into the plant material that we then take in through fruits and vegetables so therefore it's forcing the soil to grow a less nutrient-dense food source and that's contributing to disease obesity that general lack of well-being lack of mental energy lack of physical energy etc and they know this they know how this science and if you ask me that's the real underlying agenda it's part of poisoning the food supply and making it less dense and bringing soft metals into it it also acts as a plasma fication of the atmosphere because they are trying to put certain signals and piggyback signals into the atmosphere when they make it particulate plasma our atmosphere is not what it used to be you could harken back to the they live film by John Carpenter where the scientist who was trying to signal of the alien beings is trying to alert people about it and one of the things that he says is they are turning our atmosphere into their atmosphere and this is something that is absolutely being done they are plasma fiying the atmosphere for their purposes and that is to put out different mind-warping mind-controlling signals on into the atmosphere - that they can control what happens to mind States you are general worldview in and moods and they can control DNA they can actually have an effect upon genetic structures at a distance through the plasma fication and combining that with putting certain high frequency signals output into the environment if you want to research more about this I highly recommend the work of dr. Nick Begich he's done tremendous work on action at a distance mind control and I really recommend his work on the topic I've known many others you could look at Thomasville loans work on it as well so I'm sorry not Thomasville own Thomas Bearden I'm sorry I misspoke there I meant Thomas Bearden's work on that on action at a distance weaponry and scalar interferometry and this could this type of plasma fication of the atmosphere through this type of particulate spraying especially in the sky fear can really amplify these types of scalar waves and signals and again it's a it's a science most people know zero about nothing never heard of it never looked into it a moment in their lives don't know what sources to go to to look into it and we'll generally just form a totally uneducated opinion on it and then say that they know something when once again they know not only nothing they know less than nothing because they latch on to erroneous and fallacious belief systems about it that they're totally ensconced in moral in logical fallacies so they have a totally fallacious belief system regarding it and that puts them into the place that I call negative knowledge so you know I'm not it wasn't I'm not I don't think it wasn't William Henry but it was you know something like that Henry who has a great sight on it if my producer could look it up he could just tell me I don't really care if your voice comes over the air and Clifford karna come okay look up the work of dr. Nick Begich dr. Tom Bearden and the rabbit holes you can go down for years to study this these forms of covert science these are occulted sciences that they don't want people to know about so that being said let's move on to the next part of the death cult cuz we got a lot of these to go through again the next step is poison the water supply everyone needs water everyone needs to drink water everyone basically cleans their home and food with water everyone showers with water okay so if you can poison the pool you poison all of the beings in the pool if you poison the whole ocean you poison all the life in the ocean water has to go in every pot every person's body because it is an essential part of life and without it you die plain and simple so that's why they are putting again a waste product in the water you have the name Oh Dane Wigington is another guy my producer told me that that's not who I was referring to his last name is definitely but um wit Wigington just phenomenal work at geoengineering watch.org i believe is his site i'm telling you you know dan Wigington a Dane Wigington has done absolutely incredible work on geoengineering and people should absolutely check out his website he's a fantastic speaker as well okay so there's just a few resources on that topic alone which you could literally spend I'm telling you from now to the rest of your life researching and yet people will still insist it's a conspiracy theory it doesn't actually exist when there are so many declassified government white papers and international white papers on this whole stratospheric aerosol injection si I si G that you know you that you could just look that up and really go off on an entire study of that similarly you can go off on a study of fluoride the fluoridation of our drinking water you know and look at how this is a total agenda but no that's okay well well I'll put it in the in the notes when I when I find it but anyway this is a slide from the truth about cancer I ended the show on this last week but I'll read it again before fluoride was added to the water supply it was marketed as rat poison that's right Stannis fluoride and sodium fluoride are rat poison ingredients okay no amount of them should be in no amount of that type of poison should be in taken into the human physiology it's poison at the lowest possible levels let alone at the amount of parts per million that they're putting it into our drinking water in claiming that it's good for our teeth and gums when in fact it will cause dental fluorosis it will cause bone weakening it will cause all kinds of harmful health effects as opposed to health benefits this is the toxin mass medicated to the majority of the United States population with no verifiable benefits and without our consent and I will add with no ability to control the dosage that is administered of this poisonous toxin because no one monitors how much drinking water anybody is drinking we're encouraged to drink six to eight glasses of drinking water a day and most people will do that through the tap water instead of through purified water like reverse osmosis purified and/or distilled water distilled water is the best water to drink this is another big nonsense crock of shit mind control op that is put out there by people who want to say we're drinking distilled water or leach chemicals from your body I mean I need my vomit puppet you know I just need them now for that distilled water will you know leach chemicals from the body because I mean the people who parrot this shit just they're just dumb people they'd have not looked into the mechanics of water and why it is necessary for the body which is one of the biggest studies to do if you're gonna understand how a human being works you haven't made a study of water and understand that you need the most purified least you need the purest form of water and then of its structured it's even better if it's molecular ly structured then you're really making progress but if you by default you need pure h2o and that's distil distilled water distal ated water okay I don't care how it's distilled it could be solar distilled it could be you know distilled through heat you know a simple chemical process of distillation through heat okay distilled water is the best water to drink okay and really to do anything with because it's purified now you know you purify water enough through nature you get something very close to distilled you know it running over rocks down streams etc nature has its purification methods okay that's why we have rock filtration methods that are built like rock and sand filtration methods that are built like nature builds its its filtration methodologies okay so you know filtering water is great most filters don't get it down to a distilled level reverse osmosis pushes it through a microscopic membrane and it will it will filter it down probably as close as you're gonna get it to distilled without actually distilling it which is what I use I use reverse osmosis right in my kitchen I have a reverse osmosis system connected to the water that comes in at my sink and it goes into a felt through a RO filter membrane and then into a collection tank and then I have a separate similar very similar to this a faucet that you see here that is set up at my sink and I highly recommend everyone to do that there's no excuse why everyone should not have that if I asked my even my listening audience how many people have a reverse osmosis filtration system set up at their sink where they pull any of their drinking water and or water that they cook with and I will wash their fruits and vegetables with and I guarantee what will be less than 1% of even my listening audience and that is a horrifying statistic because if you are using tap water for any of that you're getting all of this horrible toxin in the form of fluoride sodium fluoride and other fluoride derivatives like hydro fluo silicic acid which is a cocktail of different types of fluoride and chemical toxins that no one should be putting into their body hydrofluoric acid look that one up as well okay it's a nerve toxin that's what this is that's why people are so don't have the ability to concentrate okay that's why they can't think clearly they're drinking this shit water okay they're drinking poisonous water and then people will say this isn't such a big deal though will go gulp down a whole glass of just take the rat poison right out of the rat poison container that says number-one ingredients sodium fluoride or stannis fluoride take the rat poison ingredient stir those crystals up real well baby put them in a nice glass of drinking water and gulp the fucking thing down all day long go right ahead that's what you deserve you don't want to look into this and you want to just say this is a conspiracy theory go ahead jackass put your poison in your water and a higher concentration and drink it because guess what we're given poison toxin water poisonous toxified water to children to drink small developing bodies and brains that are way way less weight and we're given this chemical toxin you know what a high part part per million ratio to children and we want to just say it's a conspiracy theory the people doing this are fucking garbage people fucking garbage they don't give a rat fuck about anybody but themselves and they don't care about their children you don't have a reverse osmosis system I don't care where you get it go get a decent one I'm not not in bed with any of these companies I make nothing I'm really recommending all the product you need for daily life because of how fucked up shit is in our daily life that rat poisons added to our drinking water and people aren't filtering in they're gulping it down glasses at a time and then they wonder why they can't think clearly and come to accurate conclusions and why they can't wield true scientific methodologies through their brain because their brains are fucked up from soft metals being fucking bombarded into them all day long and then instead of looking at why their brains are fucked up they want to cry conspiracy theory when they don't know the first thing about the science because they're not scientifically minded people they're believers you know and then people want to say I'm trying to run a call I'm trying to teach people scientific methodology and destroy all religions and all cults on the face of the whole earth but I'm a cult I'm one wielding cult methods and trying to bring people on board a cult yeah that makes perfect fucking sense doesn't it I'm telling people how they're indoctrinated by cults telling them all the methodologies the cults used to bring people into their fold telling people I want all worldwide cults destroyed and I want all the religions of the world destroyed because that's what holds back the spiritual progress and the progress in consciousness of all humanity but I'm trying to wield Colt med methods and become a cult that's the last thing I want is for anybody to believe me there's no belief required you need to look up to science yourself and understand it because your brains too fucking burnt to understand it right now that's the problem with people they have completely destroyed unscientific Minds that aren't even oriented toward a true level of understanding of our world they don't have those tools in hand or in mind at all and they want a reason from emotion and belief and think that they could somehow magically accurately come to an accurate conclusion let me tell you something folks your intuition ain't that good you know you need to sometimes apply intuition when you're first listening to someone to say well what's my feeling about where this comes from does it come from a true heart based perspective that you can feel that this person's really has an interest at a soul level at a true a level of true care trying to bring people the truth because it's the right thing to do you can apply your intuition to that but you're not going to try to apply your intuition to how high a plane is flying or what they're spraying out the back end of that plane that you need scientific tools in hand you don't just say I want to feel what I think about this from this Airy fairy perspective you know you don't want to say well I trust what's in the drinking water I just have a feel I'm gonna feel my way around that and I'll just say a prayer over the water and it'll just be fine no that's called New Age bullshit that's called airy-fairy New Age whoo-whoo is what that's called all right there's a difference between a developed intuitive aspect of the mind which is part of the sacred feminine aspect of the mind and then trying to feel your way around everything and rationalize through your emotions around everything you can't come to an accurate understanding of actual truth and measurement through that you need to wield the tools of the Trivium and quadrivium accurately in order to do that which is the true scientific methodology so moving on the next level down which we can live with for a little bit longer of a period of time rather than not having air or not having water is food so they're putting all manner of toxins in the food from artificial sweeteners which are probably the most poisonous neurotoxin and acidifying thing to put into the body again the soil of our food needs to be alkali acidic okay if you alkalis it you destroy the ability to grow nutrient-dense food because nutrient dense food can only be grown in acidic soil you look that up you will see that I'm giving you accurate information regarding that when food is toxic and or not nutrient dense and doesn't have the right nutrient makeup it will acidify internally it will become what is known as an acid forming food and that doesn't mean that you put a pH strip into the food and you determine whether it's at an alkaline pH or an acidic pH whether it's a base or an asset you don't do that a food can be an acid and yet be alkaline forming in the body when it's processed by the body this is what many people don't know about foods we put in you drink pasteurized homogenized milk it's a high level alkaline a high level base it tests high on the basic scale okay much higher than a neutral of what where water is at around a seven okay all right so you test it it's gonna be in the acidic and the base scale on the alkaline scale but what happens when you put that into your body it's acid forming it's acid forming in the body although it's a base outside the body if you juice fresh orange juice with with the pith you remove the the rind just you know scrape the rind off lightly right below the rind and you keep all the white pith and you do that with like ten oranges and you put them through a juicer like a centrifugal blade juicer it will make a creamy almost off whitish orange creamy juice that is real orange juice with the pith integrated into the juice and you tested that with a pH strip it's gonna test highly toward the acidic level of the spectrum but when you drink that glass of orange juice down that is alkaline forming in the body it's the exact opposite of a glass of homogenized you know pasteurized dairy factory farm milk okay which that level of you know a processing and high level of processed dairy content is going to acidify the body when it's put into it continuously whereas fresh fruit juicing with even an acidic form of a fruit like oranges fresh oranges organic oranges is going to alkalize the body when you put that in there and disease will not form in an alkaline environment you know people have cured cancers just by doing continuous orange juicing or eating fresh oranges all day especially when you eat the pith with it or integrate the pith into the juice that being said the death cult the satanic death cult that is really the rulers of the world are constantly finding new methods of injecting poison into the food and there's a do you could just go on and on and on you know genetically modified food genetically modified wheat that has gliadin in it you know this hybridized form of wheat gliadin is a perfect gut poison and immune system poison that destroys the positive gut flora in the intestinal tract and it also attacks the immune system and the digestive system which is one of the first parts of the immune system this form of modified wheat is in almost everything modified corn you know genetically modified corn artificial sugar you know there's this is the other thing folks there's a big war on all forms of sugar oh you're gonna juice all of that and drink it and that's gonna be you know that's gonna be a high level of sugar well not all forms of sugar are the same natural simple carbohydrates found in fruits are necessary for human health and brain operation and development and people will insist no that's not the case no wrong all forms of sugar are not equal and people will go eliminate all sugar in all carbs eating these this fad low-carb diet and keto diet highly dangerous diets you know you do that for a health reason that you've worked yourself into that's one thing and you do it for a short amount of time until you've started recovery you would not want to make that your main way of eating or you're gonna be in poor health long term and this is what a lot of people don't understand they want to praise it and say I'm gonna make this a lifestyle it's it's it's really an ignorant way of looking at all food in general all of nutrition in general which I've done whole shows on in the recent past all forms of sugar aren't equal folks natural sugars in vegetables and fruits especially and in vegetables are not detrimental to human health refined white sugar which is what they use in all of these products all these baking products you know all these you know toxic sugary foods you want to eliminate that from your diet that they put in cereals and children cereal this is poison that white refined sugar is is a toxic poison look up the work of doc dr. Russell Blaylock I mean this this guy put up some of the most fantastic stuff regarding nerve toxins that are in the foods and again I always highly recommend the work of Kevin Trudeau who is still sitting rotting in a jail cell right now unfortunately you know because regardless of what business practices he may or may not have engaged in let me tell you something folks this guy did damage to the big Agra and big you know poison toxic food industry he did damage to it because this guy put the whole overarching world view of what's going on with food and nutrition out there in a big way and I learned more about what's really going on with our food supply from Kevin Trudeau than anybody else and natural cures they don't want you to know about is the Bible of that okay so if you haven't read it cover-to-cover don't think that you know what you're talking about when it comes to food because you don't I tell anybody that has not read natural cures from cover to cover that they are sadly and sorely deficient in their knowledge of what's taking place with our food supply and specifically who and how they're getting the toxins at the levels they are putting them into our food supply in our food chain you don't know you think you do but you don't unless you've read that book cover to cover because it is the definitive source on the topic and I'll give my heartfelt recommendation and commendation on that tome of wisdom from Trudeau so you can like him or not like him that doesn't matter just like you can like or not like me I don't give a shit okay you don't like my personality tough titty I don't really care not my problem that's yours I'm doing nothing but what I am charged to do by creation itself and that is to speak the uncomfortable truth that most people don't want to hear about themselves and about the world they are living in and I'll do that till the day I leave this domain okay so we're garlis of whether my personal way of delivering it gels with you or my personality blends nicely with how you think a personality should be I could not care any less that's not what the great work is about I have my personality I like it I have my delivery system I like it I don't intend to change and I'm not gonna if anything I'm gonna get harsher and harsher because that's how I said as I grow older folks I have way and way more less tolerance for bullshit my bullshit meter is it pegs out very quickly with people anymore I don't want to be around bullshitters I don't want to be around lightweight people who have thin skin not interested in them I don't want them in my circle of acquaintances if anything I'll say a word or two to them in public and then I don't want to know you after that it's your work after that I'll hit you with the truth you're either ready for it or not and oh well I've done my charge and then it's up to you and then it's your karma with what you do after it you didn't receive it from me that's not my problem that's your fucking problem okay and all the people who say you'd have a bigger audience if you gave it to them with people a nice little sugarcoating fuck that that'll never be me not interested the what the wideness of my audience has never been my goal ever since day one and if you listen to my podcast I've never intimated that that's been my goal ever I've always talked about horizontal integration versus vertical integration in the terms of knowledge and learning which again most people don't know what that term those terms even mean from a social influencing perspective social engineers know what those terms mean vertical a horizontal integration means you're one person trying to act as the central server and eating the information to as many people as you could possibly reach I have never been trying to do that since day one what on earth is happening has never been attempted to be a centralized platform never and if you don't understand that go back to the podcast that I did I didn't think it was around 200 when I talked about how to get around censorship through different technological means in an age of censorship so how to get hidden or occulted information in the age of censorship and that's using distributed network models through BitTorrent which cannot be shut down they'd have to shut down the entire internet to shut down that protocol okay learning how to use that to do n runs around modern-day technological sensors to get information that that you want that they don't want you to have the models the two models that I explained were the centralized client-server model and the decentralized distributed network model that's used in BitTorrent the central model means me as the server of the information is going to try to serve that truth out serve that knowledge out to everybody as I'm the definitive central source and then I try to get it out to everybody a gala terian Lee I have never been trying to do that I'm gonna say it again I have never been trying to do that and let me say it a third time for the fucking hard headed out there I have never been trying to do that model of truth distribution I have never been a naive fuck enough to think every person in the world can possibly receive this information from me I am NOT that egotistical and I am NOT that naive do you understand yet do I have to say in a thousand more fucking times my model for what on earth is happening for my work my aspect of the great work has been is now and will always be reaching the people who are already prepared to go all the way to the truth because they've already done a certain level of self work and progression in consciousness who will then go on to become teachers who have different characteristics personality traits and delivery methodologies that are not like mine that will reach more people I am NOT trying to build a worldwide collection of followers I am trying to build a hard-core small inner circle group of teachers with thick skin and high-level knowledge and that is all I have ever been attempting to do I want this said and understood for all time on this show and the reason I get so pumped up and angry about it is because I've said it about 50 times already and yet I still have asshole jackasses that want to insist they know what I'm doing more than what I've said I'm doing when I've never implicated that I'm trying to do what they think I'm trying to do ever that's why I didn't raged about it because you're trying to tell me what I've been trying to do here since day one and you don't know a fucking goddamn thing about it not even a little tiny bit about it zero is what you know you know less than zero about what I've been trying to do less than zero so let me come myself down from that outburst and go back into my slides and folks let me tell you something if you were the one receiving the nonsense bullshit comments and speech did I get about some of this stuff you'd be way more angry than I am you'd be ready to kill somebody I hold my anger in deep check actually compared to what I feel inside sometimes when you're reading people who don't know you from Adam they don't know the first fucking thing about Who I am or what I do on a daily basis and they want to go in some public forum and say you know me you know what I do you know what I'm trying to you don't know a fucking thing about me boy not a thing I'm sick of that shit okay and this is my catharsis for it I'm not going to spend the the bulk of my time that I do research and build slides and deliver information but I'm gonna I'll speak on it once and for all time and get it out cuz I'm not gonna keep it in and get cancer cuz I don't let it out you know I held that shit too long folks let me tell you something the early days of what on earth is happening are over there are over forever because I tried to be myth play mr. nice guy and it was largely a persona and I were just openly admit it I tried to do that thing where I'm not gonna let my full personality out because I don't want people to get scared you know guess what we and in the time where's even enough time to even be at that level of politeness and niceness for people I'm not interested I'm not here to even talk to the people who don't know anything anymore to get them on board you want a good get on board you send them back to podcast one where I was mr. nice guy okay that ain't never coming back in water on earth is happening I'm done with that I'm done with that character I'm done with that persona or mask that I put on to just get people to listen up to a point well we're at we're at podcast 215 it's 10 it's 12 years laters you know it's at least 10 years later from the formal podcast it's 12 years later from when I started doing this I'm done with that guy I'm done with that persona that's not really who mark passio ever was to be quite frank and honest with you I've always been who I am right now talking on the airwaves right now I tuned that all the way back all the way back so that I can get the message out and people would hear it and give it a chance even though I put a little bit of that in you know now I'm just letting loose you know I'm not on any network anymore okay I do this straight out of my own you know means through through my website and my social media on my dime you know that's it so I have no restrictions on me now all I'm going to say whatever I want whenever I want but that mr. nice guy from what on earth is happening podcast number one is never coming back to the to the airwaves that was a different time in place boys and girls and that's long gone we don't have that kind of time anymore we're at the final hour we're at the final minutes and seconds of the final hour so this is part of the death cult Society folks they want to make people as sick as possible because sick people don't think right sick people can't act in the world they don't have the will to act sick people are in and out of hospitals all day they're spending their money on their drug system their toxic drug system they're toxic so-called medical system which is that part of the death cult a big integral part of the death cult at that and sick people will listen to nonsense sick people will listen to people who they think or have their interests in mind are going to tell them what they need to do to be better to get better to get well when in fact they're psychopaths feeding them more poison they're part of the satanic network doctors Big Pharma you know how many of these people are actual practicing Satanists you know how many more of them are de-facto mini-me Satanists who don't give a rat's ass about anybody but themselves and the profit they make on the poison they but let me tell you something folks there's a good percentage of doctors and people in big Agra and Big Pharma that are heavyweight dark Oh cultists from a perspective of being actually in the know in the cult at a much higher level than I ever was and you don't think those psychopaths are out there pushing drugs and medicine in the healthcare system knowing that all they're gonna lead to is sicker people dependent on them making them richer and richer and more and more powerful they know it like they know the back of their hand like they know their own name and you're naive enough to think they care about you and they want to help you only a naive child thinks this way in the modern world huge part of the death cult poisoning people through food now let's get into the pharmacological aspect of it poisoning people through so-called medicine through so-called vaccines you know all of these things that we want to say are somehow diseases that have come into the human domain over the last couple hundred years these aren't just genetic disorders these aren't just some kind of neurological cases that just came on in human society these are all different forms of vaccination damage all the neurological disorders organ disease disorders autism is just a word for a spectrum of vaccine damage that's all it is it's an invented word it's not a disease you look up autism it is a spectrum of illnesses brought on by vaccination damage they just used the term autism to euphemized it and not say this is what somebody came down with once they got hit with the vaccines that the the medical industry is the death cult of the medical industry is poisoning people with asthma leukemia seizures epilepsy oh that's big one the people don't understand how many seizure conditions come on from vaccine damage I believe personally I have two forms of I have three forms of vaccine damage straight up being honest with you about health issues that affect me still that I don't really know whether there's reversing it because it has altered one at a deep genetic level and turned on codes that perhaps with enough work and healing you might be able to reverse and turn back off but it would be very very very difficult and I don't know if it can be done with just nutritional techniques alone and that is allergies and that's probably the least damaging of the ones that I that I feel I have been affected by and that's on this chart but also migraine headaches and I don't suffer with painful migraine headaches I mean knock would folks I mean thank God because I'd be in a debilitated condition I see family members who suffer with the painful ones and they are often incapacitated for days at a time migraines are another form of vaccine damage I suffer from painless migraines and most people don't even know that there is such a thing but if you look up painless migraines with aura a you are a like an aura field around the body it's the same it's where it was spelled the same it say aura that actually is generated by the brain which is happens often before a migraine hits there's actually three kinds of migraines people don't know this I know I didn't when I started getting the aura migraines I thought I was having a stroke or something or starting to go blind I would panicked you know I kept my wits about me long enough when it first happened to me because I didn't know about what an aura migraine was I looked it up and you know finally calm down like I'm like okay that's what's going on here I'm having an aura migraine you know I just have to sit tight for like 20 minutes to a half an hour and it'll be gone and that's what I did and uh you know often it's the scintillating vision that you see and you can't shake it you can't get it out of your your field of view and it will often cover a part of your field of view and expand out sometimes all the way up to the peripheral aspect of your field of view it would be a scintillating almost computer-like pattern in your field of view it's very disturbing actually when I forget when I first had it for the very first time years ago I was went into practical panic mode I'm like what the hell is happening what is this but I you know learned about it and it's a painless migraine and what happens is sometimes these precipitate the painful migraines so there's really three kinds of migraine there's there's an or a migraine with no pain at all so it's aura and no pain then there's one with no aura and just pain those are like the worst because you don't know when they're coming right you don't get an aura to warn you because the aura always comes first then the pain will hit like you know 15 minutes later so people can take some type of a you know like a you know Tylenol or Advil or something like that that might help with the the pain response of the headache and then it doesn't hit them as the pain doesn't hit them as hard okay or you could do other natural methods where you know it'll mitigate the pain of the of the painful part of the migraine that's the second kind that's the worst kind to have then there's one where you have both you have the aura and then the pain hits 15 minutes or so later 20 minutes later and at least that gives you a you know a warning most of my family members who suffer from migraines get the worst kind which is pain without an aura warning I have the opposite where I have an aura but then no pain strikes later which is the most fortunate one to have because it doesn't involve the pain in either ones that involve it so you know when I get them and I get them like maybe once or twice a year thankfully they're not often I just have to kind of stop what I'm doing back let the hora pass because especially if you're doing anything that involves having to have accurate visual eyesight or acuity like driving or working at a computer you just can't do it and that's basically you know what I do on a daily basis I'm either you know work and sitting at the computer and going and driving getting supplies or you know driving down to the to the gym you know if if if it hits when I'm doing one of those things I just have to either pull the car over wait it out or just you know come off the computer stop what I'm doing and just wait it out until the hora is gone the last one I had I was actually sitting having lunch with my producer one day on a day when we weren't doing the show and it struck and I had to just sit there and like just wait while we're luckily I wasn't doing anything else that was uh you know demanding of you know very close attention and I was just you know eating a lunch but you know through most of the lunch I'm seeing this scintillating aura spread out through my visual field so I think that's brought on by vaccination damage the types of migraines that people get I don't think that's I think that's something that has effect the the vaccine has affected the brain physiology and I think that the one that's also on here is diabetes and diabetes is you know something that is brought on that would be under autoimmune diseases okay diabetes is an autoimmune disease that affects the immune system of the body and particularly the pancreas and this autoimmune disease I feel is brought on by vaccine damage I think that's what a lot of why a lot of diabetes strikes people later in life because these are often time activated genetic codes that's why they want people with all of these vaccines stuck in them at an early age they realize they don't get these in at an early age people are gonna be living longer be healthier not have all of these different immune system destroying you know diseases through these vaccines all of these things are brought on by vaccine damage I mean learning disabilities a big one you know ADHD all of that attention deficit disorder you know this isn't something that that has just always been like this these are a spectrum of disorders that have happened over the last hundred years in our society and continue to grow at an alarming outrageous accelerated pace and then people want to say no they're perfectly safe non-toxic and affected when you look at any one of the ingredients you would not pour a glass of it or even put take a teaspoon of the ingredients and drop it into some water and you know slam it down you wouldn't do it but then you want to say what being injected subcutaneously is somehow healthy or good for you I mean this is what I don't get it's like saying no hold on a second let me get this industrial grinder grind up some glass down into a fine powder it's poured into some water so it looks like a suspension or a solution and just gulp it down Wow great why not why not have some microscopic shards of glass and your intestinal tract right you wouldn't do any amount of that you wouldn't take any amount of a bit of a ground-up powdered glass and put it in a glass of water any more than you take a fine aluminum powder put it into some melt it down put it into solution and then drink it down in water you wouldn't do it any amount of it but you'll get eight you'll inject it into a baby you know you wouldn't take you wouldn't break open a thermometer okay draw up some mercury into a syringe okay have the have the needle syringe right there and go let me hit your let me hit your distilled water with a little bit of this mercury and then I want you to drink it down I'm only gonna put a little in there it's only gonna be you know a couple of 10,000 or so parts per million somebody would look at you like you are an outrageous lunatic out of your goddamn mind out of your rabid-ass mind okay that's what they would look at you like yet let me stick this baby with ten needles that has this stuff in it at these concentrations I mean people don't think at all because guess what the priest in the white lab coat costume told you it's fine to do and he's the priest he's in the priest class the priest class wouldn't lie to us they want us well they want us healthy yeah they don't care that health would mean that they'd lose their McMansion out in Bumblefuck Ville they and they would lose their three Lexus's and their four-car family garage my god they'd only have one Lexus in the garage you know how would they live how in God's name would they live I don't I just don't know they wouldn't be able to take the Bentley out for a sunday spin you know when they're not at the hospital they're just on call and people we don't think that these are psychopathic lunatics that if it meant them losing their profits and people becoming well and just not needing their services ISM as much they go poison those motherfuckers we need them in and out of our hospitals like a revolving door that's how they think in their mind that's how they talk in their own circles you'll think they do you're out of yours you're out of your goddamn mind you're a naive child if that's how you think about what's going on in the world and let me tell you something folks people who just brainlessly mindlessly believe that vaccines are somehow safe and affected you have so much learning and so much picking a part of real science to do when it comes to this you have to look at the ingredients of modern vaccines and the types of adjuvants that they add to these things and soft metals that are put into these admixtures these chemical cocktails of poison and you think that that's vex Nation Science I'm telling you man people were just they're so ignorant it's painful and then they'll say the people who are really concerned about this and have seen the pattern repeatedly than when around a vaccination is given to their children that somehow all these disorders and diseases came on like a freight train that they don't know what they're talking about they've gone through the direct experience of it I've said it before I'll say it again and I'm gonna be harsher and harsher about it you know what should happen to the people who don't understand that this is what's happening you're a fucking child should get these diseases I'll say it right to your face your fucking child should be disease like this in this form from hitting them with these toxins then you'll see and then you'll care then some had then all of a sudden you'll care about it and you know what some people won't even fucking care then because they'll just say no it wasn't that it was some other random thing then they believe in randomness everything just random it's a crapshoot just because I hit my kid with sixteen you know vaccines with all kinds of soft metals in them and other toxins and adjuvant no it just just around the same time they came down that with these heart horrific afflictions but it's just coincidence it's just randomness could have happened when I didn't didn't give him one thing there was this kind of a neurotoxin or brain toxin that passed the brain the blood-brain barrier I mean you want to listen to somebody who really knows their stuff about it more so than I do look I'm not a neurosurgeon or a neuroscientist but let me tell you something folks neuroscience has been one of the underpinnings and the foundational research areas of my work that I do because you have to understand that you have to understand all those aspects of the brain at a at least a sophisticated enough level to know what these social engineers are doing to the brain which then affects the psychology the mind and of course affects the body and the rest of the central nervous system so I know quite a bit about it but I'm not pretending to know something like the level of knowledge that Oh surgeon like dr. Russell Blaylock understands about all of this and let me tell you something he's not the only one look do research into dr. Shari Tenpenny whose work is outstanding whoo I got a chance to meet personally at a dark apoco 2019 and she was just great to talk with she actually sat next to me at the Ron Paul dinner at my table and it was just a pleasure getting a chance to speak with her personally and you want to talk about a woman who knows her stuff you know you just look into her material and that's another fountain of information okay Russell Blaylock I cannot recommend highly enough and these people know they they go into it at a very deep level medically and scientifically and they know their shit you know I'll personally look at their research because they're looking at it from an objective point of view you know they were doctors they could easily be making money from all this stuff but they want to do what's right and tell the truth above that nothing wrong with making money at what you're doing if you're trying to put it out there and do you know really do right by people and really truly help them you know once it starts getting into this thing to toe the line and to toe the narrative these people are speaking out and that takes balls to do that you know so I celebrate their courage and all those who are like them and in the industry or speaking out one of the biggest aspects of the death cult is war militarism you know imperialism this is human sacrifice that's what it is it's modern human sacrifice rituals that's what modern warfare is you got and then you put it into video games you not only have it happening in the real very real world people killing sacrificing to each other on the altar of sacrifice called a theater of war but then you put it into video games for the young children who are addicted to these 3d video games you know and you have them glorifying the whole war combat death cult ritual scenario because that's all it is instead of marching young men up to you know the top of a you know great pyramid built to their satanic gods like reached Tula poached lay in ancient Mexico the Sun God who what demanded the hearts of you know tens of thousands of sacrificial victims on his altar instead of having hearts cut out with obsidian blades by the priests class in front of everybody you know so they can actually see wow these are our masters we're their sacrificial victims there's just directly sacrificing us to their gods well now they don't do it in they don't do it on big pyramids well with a big altar at the top for everybody to see that's not how it's done anymore folks that's ancient satanic ritual bloodletting sacrifice modern satanic ritual bloodletting sacrifice is warfare hidden theatres of war out in the middle of nowhere and in the developing countries out into third world countries weird you know there's a sparse population and there's not a big infrastructure at least not as big as that the first world nations there are you know some first world infrastructure there but not at the level of other nations you know and you send off the young totally brainwashed total no nothing fucks that these little boys are because that's what you all are your little know nothing punk bitches not a one of you is a real man not a one of you has any real courage want to know why because for real courage you need real knowledge and real care and you haven't developed those things you've said put a gun in my hand tell me who to go shoot as long as I don't have to think I'll take the order from my master and that ain't a man that's a sick little fucking boy is what that is boy that's exactly what that is and people want to glorify these fucking punks and say we thank you for your service fuck you you don't protect me you don't create my freedom the God of all creation gave me my freedom boy I've been endowed with my freedom by creation itself and that ain't you Punk my freedom is inherent to my consciousness and the only thing that protects it is my adherence to and loyalty to natural law it has zero to do with you and your brainwashed behavior order follower of your Satanist master trying to tell me you know where my freedom comes from and you're actively working it protect it fuck you how about that how about we just say it out in the open just like that to the people who think that's what they're doing to the military you don't like it turn it off don't listen dig your own grave keep sacrificing yourself on the satanic altar I'm beyond the point trying to convince you that you're wrong go think you're right asshole you don't know what you're talking about and you're a dumb little fucking boy you know I want to blow smoke up somebody's ass I'm gonna come on the air and say this shit to them let me tell you something folks I could totally water everything down talking sweet nothings in people's ears tell them all the nonsense fucking spirituality that new-age bullshitters want to tell them and I can make hundreds of thousands of dollars a month instead of a few hundred if that okay but I wouldn't be doing my job telling people the truth you know cuz that's what they want to hear they don't want to hear what what I just said about the military is the exact truth no they want me to blow spiritual smoke up their ass like the new-age bullshitters do you no but they'll have 10 million followers you know making hundreds of thousands a month because people want to support what they want to hear not the hardcore truth that's uncomfortable to listen to and hear but you know what as long as people want to pay attention a little sweet nothing bullshit whisper in their ear the world is not going to change for the better folks until people start listening to the hardcore unadulterated painful truth about the way that the world really is and the way the human mind really is as fucked as it is nothing will change for the better nothing at all you want to believe that that's how it works you go right ahead believe in your nonsense spirituality I'll be here telling you the real deal I'll take a hit on all my followers I don't need followers I don't want followers I want people who understand what is true and real and that which exists in the realm of nature instead of the sick twisted constructs of the human mind that knows nothing about reality and I'll keep telling people those truths even if it dwindles down to no one listening I'd built being a minority of one who knows how what's really taking place and that's just fine that's just fine because that's what I'm here to do I don't serve human beings I never have served human beings I serve creation itself by explaining the real dynamics that are taking place here on earth and that is what the great work is all about so these people right here in this image members of the Deaf cult at a totally low level of being they're slaves of being their house slaves the police are right in there with them being militarized brainwashed turned against the people following whatever immoral orders they're given on a daily basis they are members of this religiously diseased cult called statism which is ultimately to Hegelian dialectic 'el sect's of the real one world cult of the ancient religion of Satanism the old religion and these people want to say they serve the force of freedom you couldn't fucking spell it boy you couldn't spell the word freedom let alone know what it means let alone truly serve it don't try to tell me about what real freedom is you don't know the first fucking thing about it punk part of the death cult one of the biggest parts of the death cult that keeps their masters in place because what these people do is they go from country to country anybody that doesn't want to play ball with the globalist agenda they invade take over all their resources kill as many people as possible to get their people to comply with the big overarching death cult that runs the world and that's all they ever have been that's all they're doing now that's all they ever have done you are the servants of your satanic masters you are house slaves whether you understand that or not whether you agree or not that's what you are and no amount of disagreeing with it will ever make it untrue that's the eternal truth the actual objective way that it is in nature and reality and no getting offended or crying about it is never going to make it not the way that it really is that's the way it really is objectively I'm not going to sugarcoat and say well you can have your opinion and I'll have mine you have a dumb fuck brainwashed socially engineered satanic worldview opinion about what you are and what you're doing and I have the truth about it and I am speaking the truth about it because I have the balls to speak the truth about it without sugarcoating it for jerk-offs and that's how this show is gonna go because we're out of time folks out of time then you have people in the black ops in the intelligence societies in the military in the police forces in the political you know arena who orchestrate and conduct and then cover up what is known as false flag operations I was in one of the probably what is the most definitive documentary on what false flags are and what how they have been used historically to precipitate political agendas that the population would not ordinarily go along with if not given a traumatic set of circumstances that they feel necessitates that political agenda which is the Hegelian dialectic inaction problem reaction solution as David Icke refers to it creating a very traumatic problem so that you get an outcry from the public do something about this and then you come forward with your predetermined and pre-planned solution and try to implement it which you know the public wouldn't have gone with unless they were severely traumatized in a mass ritual event a mass death ritual event which is the false flag event again false flag doesn't mean it was a hoax or no one died you could call that a hoax flag okay which is called no problem reaction solution it means the thing you said happened didn't actually happen that's how I like to delineate other researchers have their stance and they like to delineate in a different way I like to distinguish by calling a false flag an event that actually happened okay and yet and people died okay then they use that for their political agenda and I call it a no problem reaction solution event I call a hoax flag which means the whole thing was a hoax it didn't really happen and/or they portrayed it as it happened but no people really died and they used crisis actors and then they try to push forward their political agenda so that's the second form of the overarching thing called a false flag ritual event a mass killing ritual and you could put killing in quotes because sometimes it's a real killing sometimes it's not it's a staged killing and the documentary that I was in is called shadow ring it was made by the people at free mind films I believe Chris Emery was the executive producer and they did a fantastic job on it I just found out this week that I actually am in I'm in the IMDB database I didn't even know this I looked up my name on on DuckDuckGo and one of the links that came back was an IMDB listing for Mark Pasi I'm like where'd all that come from so I looked at it and it was for shadow ring so I thought that was pretty interesting that I made IMDB for the documentary shadow ring in which I appeared so people should check that out because there's a lot of great researchers in it that you could go into research in their work and in doing so it will open up an entire other deep rabbit hole of research that you can go down regarding false historically conducted false flag operations so this meme says there is only one reason to believe the government's official 9/11 story because you blindly trust our government and you have done absolutely no research for yourself and that's the only reason negative knowledge accepting that which isn't true that was just told to you because that's easier that's an intellectually lazy path to go down I just believe it because the government told me so and they wouldn't lie because they have my interests at heart and they wouldn't wouldn't want to tell me an untruth about what happened or they're not covering anything up total naive child believes that point of view and that puts you in the negative knowledge not only don't you know I don't not climb not claiming to know everything about it folks there's lots of things we don't know about what took place that day but I'll tell you what there's things that we know that didn't happen and those are the things that the government is saying of how it happened that I can definitively prove physically with physical laws the physical laws of nature that are just born out by scientific methodology through the scientific method that I can prove according to scientific methodology could not have happened according to the the explanation of the official 9/11 narrative given to us by Big Daddy government I can prove it definitively and have right here on past episodes of this show you know that's why I praised some of the physicists and engineers who have come forward that have the balls to come forward and say no they could have happened like this you know and then a lot of the other people they know they know that it couldn't have happened the way look I pulled out to prove it to myself like the year after it happened like not even a year like six months after it happened I went into my old college level I'm sorry not college level high school level I went into my high school level physics textbooks junior level physics 101 textbook I pulled out the physics textbook with the initial Newtonian equations that they give high school level students to learn the equations of basic Newtonian mechanics okay the the formula to solve a simple quadratic equation like a first level quadratic equation okay plugged in the numbers of the official weights and measures of the buildings of 9/11 and earned on the side of the official story in every capacity you know I didn't like take into account all these things that a real engineer would take into a can I did it in a very sloppily done way but all in the favor of the official story never taking into account the the sophistication and the particular z' of how a real engineer would work these equations and put all the secondary aspects and figures into the equation to try to do it from a real-world mechanical perspective instead of a modeling perspective I use just a simple modeling perspective with the physics equations and the simple weights and measures publicly available of the World Trade Center towers and did not account for all the other factors and variables that a real engineer a professional engineer would account for giving every one of those factors to the official story it was still a total scientific impossibility for the building to come down in the way that it came down and happen at the speed at which it did all three buildings Tower 1 tower 2 and tower 7 which still to this day most people don't know that a third building allegedly collapsed on 9/11 it no it came down but it wasn't a collapse building 7 World Trade Center tower 7 most people still not looked at that video where it collapses directly into its own footprint and had not been struck allegedly struck by an airplane you know you have people still to this day they're showing that footage in there like their jaws on the ground because they are like why didn't the media ever tell us that three buildings came down instead of two some of my listeners still don't know about building 7 it's crazy you know I saw it on the first day where they put it on the the first initial reports and then never again after the very first day because a mandate came down to every news network and said don't ever show that footage ever again and if you do your family's gonna end up dead under suspicious circumstances and you want to see it happen err that footage ever again that's how it was that's came down inside the news networks folks to the highest level officials in all the major news networks intelligence operatives visited them said you ever show the collapse of building 7 ever again on your network we're coming for your family then that was it that's the end that was the end of it forever but you bet your ass that is exactly what happened behind closed doors highest level Intel operatives came in visited today paid him a visit at the networks and said try showing it one more ever one more time ever and see what happens watch what happens you don't think that goes down just like that it goes down just like that that's how it works because this death cult is in charge because we've let them take that power through our ignorance and they'll keep pulling these false flags and hoax flags they'll keep pulling them over and over people still keep buying them and the same method will continue to be effective over and over and over again because the public just doesn't learn the public doesn't learn you know last week was the anniversary of 7-7 and I'm sorry I didn't get to this slide on 7-7 you know it took until the next week but you know this was another false flag event orchestrated by social engineers and intelligence operatives that are all part of the big cultic you are not in the one-world satanic network of mind controllers and social engineers and this is a big part of their bloodletting rituals the bombs that went off in the transportation systems in London England on 77 when drills had all been all conducted to postulate the exact same environment you know they always do that they always run drills that simulate the same thing so that when it goes live people don't know the difference between the droven live up that's what they did on 7-7 that's what they did on 9/11 the occult geometry involved 92 being the failure of will in the occult the failure in consciousness the failure of care let me tell you something for and then you know you see the gematria of seven seven which is the sorcerers number in the dark occult that's why it reduces the 14 you know which is the 14th level of the pyramid which is being God on earth the 14th level of the all-seeing eye and pyramid they wanna usurp the place of God the occult sorcerers or 77 they want to take the place of that 14th level of that all-seeing eye at the top of the pyramid above the pyramid which is level fourteen thirteen courses of the pyramid and then the fourteenth level is the eye of God the eye of creation the eye of truth they want to be that they want to become that which is what we talked about that's what all of Satanism is wanting to become God so you look at that gematria 92 destruction of will destruction of consciousness destruction of true care that's their agenda that's what puts people into slavery and 7777 the number of the sorcerer himself ok so a thing I want to tell people about you know I didn't know if I was gonna have time to get into it and I know we're running late again but you know it'll take as long as it takes because this is important I want to recommend the television series strange angel to people it's a very well done period piece on the life of Jack Parsons and how he got involved in the occult philosophy known as the leymah which they unfortunately incorrectly pronounced often on the show they say it as a fait Lima and it's the leymah if you're pronouncing it correctly from the original Greek and um how he headed a family mclarge called the agape org agape Lodge in Pasadena California where he began JPL or Jet Propulsion Laboratory had the acronym Jack Parsons laboratory became deeply involved in this form of occultism met Aleister Crowley was assigned to head the agape Lodge in California and this show tells the story of it but what I find very well done about it is they are really injecting the thalamic philosophy deeply into the show from a level of understanding that it truly is they're not portraying it simply as dark occultism or although they hint that it has elements of that which it very well could depending on what Lodge people have gotten involved with so you know it has all of those elements within it and people should be discerning and you know look at the actual philosophy from a deep level and make a delineation or a distinguishment between the real underlying philosophy and human level of how people have turned and twisted it because they're not the same thing as I've always emphasized but I would highly recommend this show because it really interjects the real philosophy of Thelema to my knowledge it's the only show that is ever on television that has ever put Crowley Aleister Crowley into a character on the show at whether you want to agree that it's accurate or not as a different story historically and talks about his intelligence ties to the British intelligence during his uh foray into the United States during World War Two but it's so well done as a period piece you know how it is portrays the 1940s I think you know how it portrays the way society was back then from a social point of view from the point of view of the buildings and the streets and you know the objects it's quite well done from that perspective from my point of view and on this last week's episode they actually brought the philosophy the occult philosophy of the book known as Lieber which is a small document into the storyline which I thought was really great as I have taught I've talked about it on an interview that I did with Bob from Cincinnati on his podcast called a cult Empire where we did a show on thelema and Crowley's life and I talked about Lee barrows in that show and it's highly powerful and it shows you how much people are not ready for the truth of that you know type of occult information and that's all I'll say about it for now but you know I think that if it's separated from specific human practices that have unfortunately become associated with it the philosophy itself can align with natural law at a deep level if it is properly understood from that occult esoteric level and that's the only level I ever encourage people to look at the Leymah from and it's the only level I ever have encouraged people to look at Philemon so that being said I think people should check out strange angel not that many people even know about the show very well done television series they're in the second season now let's move on so you step out of you know the regular human domain and you see that our whole society is also a death cult when it comes to animals and in many ways this is the biggest way that we are a death cult Society we kill more consciousnesses we exterminate more consciousnesses than we do in any other aspect of life by the slaughter the endless perpetual daily slaughter of animals taking the amount of lives that we do so called for our sustenance for our food that is not required and necessary in any way so I see a million times over and over there's gonna be people who will vehement ly disagree then we somehow need animal flesh in our diet it never has been the case it isn't the case now it never will be the case for anyone once again a normal healthy functioning human being physiologically does not need any animal products in their diet when you have developed an addiction to eating a certain way two things happen you cannot you the sicknesses that will get brought on might require you to stay with a certain form of a diet because changing it will change the physiological aspects too abruptly you would have to transition off slowly and to if you have eaten that way your entire life regardless of whether you have health problems you can actually precipitate them by radically and suddenly changing your diet too quickly but that does not mean that you need animal products it means that because of the level of brainwashing in our society regarding this and the level of habit-forming behavior that people have engaged in regarding the eating of animals and animal products that people cannot just go and transition to veganism quickly again I look look at my transition to veganism it took 12 years 12 years I transitioned slowly to a vegan diet and that's why I did it correctly and healthfully folks do I look weak to you because let me tell you something folks I have so much energy I don't know what to do with it most days I need I need things that take the edge down on a daily basis not ramp it up okay I'm the most ideal weight that I've ever been I'm the most energetic that I've ever been I could kick my 20 year old self ass down the blow up and down the block if I wanted to okay I weighed myself yesterday I weighed 190 point 0 pounds my ideal weight for my height and body type I am at the weight that I weighed when I was a sophomore in high school how many people could say the same thing when they start getting a little bit older okay and say that they're that healthy eating that right feeling that level of energy all the time you know he don't get me wrong I get to press them down and don't want to do things and like want to just you know sulk for a while because of how bad things are in the world that's not what I mean when I'm talking about film talking about physical energy to do things okay you know I get on that truck that stair climber for a half an hour solid before I start my workout every time how many people my age are doing that you know or doing martial arts you know most people will say I don't have the energy I had when I was young I'm wait I'm way heavier than when I was young I don't feel this I don't feel the same way I feel way worse well guess what that's because you're doing the wrong things with your diet and that's part of the death cult they want people moving toward more unhealthy ways of being as they get older so that they're in and out of hospitals that's the effect it has on human beings let alone what it's doing to the animal kingdom all your we're eating all that energy that's a theory energy everything here is energy folks at a basic fundamental level everything that we see experience take into ourselves put out into the world as a form of energy and they want it poisoned and black-hearted and death these are the Death Eaters of the the Harry Potter Wizarding World that's the dark occult that's all this is is a big that was all that whole those allegorical movies were that's the death cult you know serving the The Satanic Overlord Master Voldemort who wants more and more death and more and more slavery that's the government the dictator the totalitarian who wants everybody else serving him as God on earth and that's what they're doing through this animal slaughter endlessly again this is what inspired the show this is what inspired that not the whole world on earth is happening series but the last two shows podcast to 14 and to 15 were inspired by me just making the mental recognition walking down the street on a daily basis how many animals are just endless slaughtered by the human society on a daily basis it's one never-ending death ritual and eating of death ritual we're not eating life we're not taking in life into our energy we're taking in death into our energetic system our Thira kenner G and this is the problem folks most people aren't spiritually advanced enough to understand this level of consciousness and morality now I don't want to beat up on them you know I mean I want to take them into the fold of knowledge many are too much in ego and and their ego would have to be broken down more by internal work that they do upon themselves you know but many are also misguided by inaccurate information when it comes to health and nutrition which is why revisited this topic a few podcasts ago they don't have a balanced perspective or an accurate perspective about what truly nourishes the human body mind and soul and those are positive life-affirming forms of energy not energy that is dictated and given to us by the death cult whether it be mental food or physical food the way that we got to this level of eating animals was because of the death cult causing the Cataclysm that it caused I'd look I feel through all my research folks you know what can you say I can 100% prove it from a total you know scientific methodology no but we have fragmentary pieces of the puzzle that we can put together in a logically organized way the earth was not always the way it was now it is now folks we were in a practical Garden of Eden when the earth was at a zero degree rotational axis with rapport with respect to our plane of orbit around the Sun in the ancient distant ancient past that means it would have been eternal spring and food could have been grown everywhere all around the earth at any time in any season there were no seasons to speak of it was perpetual spring / perpetual fall with perpetual perfect amount of rain faul where things weren't too cold to grow or too hot to grow and that's how planets that sustain our form of life are intended to be by nature itself but that doesn't mean through acts of free will that we can't offset that balance in nature and create a different situation that nature did not intend for the 23.5 axial tilt at which our planet rotates with respect to our plane of orbit around our star which creates the precession of the equinoxes is not something that is natural in my understanding and worldview through the taking in of the amount of data I have taken in regarding what has happened here in our ancient past people are free to believe that not believe it accept it not believe it not accept it entertain it don't entertain it it's again that's your work to do I'm gonna tell you what I've discovered through my endless amounts of research and work that is obsessive you know one day I'm going to walk in the other room I'm going to go pull all the bags of data that I've ever hoarded from my years of research that makes me almost pass out when I look at it realizing I've gone through almost every bit of it it's obsessive I'm almost like a robot in some respect it's crazy it almost frightens me how much data I've downloaded and gone through because I became obsessed about it because of who I was involved with in these cult in this cult in this worldwide hierarchical satanic cult because I became personally involved I became obsessed an obsessive researcher regarding it let me tell you something folks their interference with our species this other species that I feel is a type 2 but I'll say a 1.5 on the Kardashev scale minimum a level 2 civilization on the Kardashev scale of civilizations maximum somewhere between that 1.5 the two level transitioning to the level but I'm telling you once you get to that that the the feats that can be performed technologically by an entire civilization like that are beyond magic to our level of understanding when it comes to physics and science beyond magic beyond almost godly which is why they often referred to them as gods and again to clarify a little further when I say I don't believe in I believe in the interference theory of human origins that means I don't accept the Darwinian notion of macro biological evolutionary theory nor do I accept creationism from a religious perspective so people should realize I see both of those as Hegelian dialectics to try to push people off the path of truth which lies somewhere completely different than just the pure scientific notion or the pure religious notion I don't consider it either one of those as being true and I've gone through many podcasts on this topic which is why I say again you have to go back and you have to listen to the podcasts in order in their entirety without skipping any information without skipping around and while looking at all the ancillary data that I give you with each podcast if you're gonna develop an accurate worldview and an accurate understanding if you yourself have not done that do not claim that you know my work because you absolutely fucking do not know it you don't know what I'm saying you think you know but you have not taken in the totality of the data that I've output or the research material that I've encouraged people to look into to understand my work don't claim that you understand it if you have not done that work yourself in your own time certainly don't claim it to me that you understand that all what I'm saying which is why I'm telling you if you haven't done that this is not the podcast to start listening to zero zero one is the podcast to start listening to and when you're done that one and all the material that goes along with it progressed to podcast 0:02 don't skip around exhaust the material in the podcast then progress to the next one when you are ready that is how to maximize the learning for what on earth is happening if you are not doing that you are not only not maximizing the learning process you are believing things that you know nothing about regarding what I'm actually saying so unless you've actually done that you don't know my work don't claim to know it to other people and certainly don't claim to know it to me alright so that being said I think from the myriad of data that I have taken in regarding the events of the ancient past on our world that this type to civilization created the Cataclysm that set the planet at a different axial tilt and put us into a period where into a situation where there are now seasons of life and death on the earth in the northern hemisphere which is where the bulk of the population migrated because that's where the bulk of the landmass is we could no longer grow food year-round and any place on the earth we now have to grow it in temperate zones in the northern hemisphere which is where the bulk of food production has now must be centralized in addition to that we can't live anywhere on the planet people try to live in extreme zones but really they migrate to temperate zones and because they can't grow food everywhere they began killing animals to supplement the diet during the season of death which is the time when the Sun is below the equator in the southern hemisphere half of the year but that was given to us this way of being in the world this way of life was given to us just like they gave us our government structures just like they gave us our religious structures and institutions just like they gave us the monetary structures and institutions and folks when I talked about the origins of these institutions and structures it was the only time that I was ever censored in the entire time I've ever been doing the work that I've been doing here at what on earth is happening it was the only time that I was ever hit with a personal computer distributed denial-of-service attack from other compromised computer systems directed against my own IP address as I'm trying to broadcast my voice for my show on the past podcast when I talked about the origins of money religion and government that's it that's the only time what on earth is happening was ever attempted to be censored or slowed down because they care about people knowing where those real origins were and how our society got to where it is today by taking these institutional bodies from the beings that really created humanity but people don't want to talk about that now Sitchin didn't know what he was talking about von Daniken didn't know what he was talking about they were agents they you know that all the the voluminous research they put together in addition tons and tons of other researchers there just a tip of the iceberg then when you start looking at other people's work like la Marzulli or Brien Foerster you know or any of myriad of people that I put forth in cosmic abandonment that you can go on from endless lifetimes researching just their work alone Lloyd Pye you know but no people won't look into that they just form an opinion and what have you looked into regarding that I ask people that always say no that couldn't be that way they've looked into balls squat exactly calculated that's the exact amount they've looked into I calculated that whether the slide rule in an abacus that's how much they've looked into that exact amount okay then they want to say their opinion is as good as endless countless hours of research meticulously one research they gave us our way of performing endless sacrifice rituals with animals folks all you got to do all you got to do is open up the Bible and look about the rituals performed with the sacrifice of animals that were given to us not by the god of creation but by the gods of the ancient world they put into effect after the Cataclysm the death cult society regarding animals and people you don't want to can entertainment you don't want to entertain that notion don't look into it remain ignorant shut the show off tell it say on the show I don't know what I'm talking about although I've researched a hundred thousand more time more amount regarding that material then you'll ever in multiple lifetimes you know fuck this notion of saying I know how little I know I know how much I know I can still be honest and say I don't know it all but guess what folks I know the bulk of what is important to know about what's going on on this planet that's keeping humanity and slavery and I'm not gonna be humble and and and you know so soft-spoken about knowing it because that knowledge was hard-won by sacrificing endless amounts of my personal time of my life to accrue and then I see other people that don't lift the finger and not spent one second of time on it who wanted then proliferate they're okay they're ill informed opinion you're ill informed and unread opinion and then you're gonna tell me you know as much as me and I should be humble and say ah how little I know fuck you know and that's not ego talking folks I'm speaking truth about what is has nothing to do with me put an ego out as an individual what takes ego what takes balls and endless amounts of ego to do what takes hubris it's not ball as a sense of courage it's gigantic levels of hubris of unwarranted pride and complete disrespect and ignorance to come forward and say that in your LLL read and ill-informed state that you know as much as research you who have done so so much that it's it's more than you've ever looked into any all the dynamics of what's going on put together and more than you would in multiple lifetimes in this one lifetime that's how much I've studied this one aspect when it comes to the interference theory of human origins it has become almost an obsession and let me tell you something folks they gave us our animal slaughtering practices whether you want to accept it or not that's what happened and just like you know other stories where people go oh I just do this because this is how people did it before in the past David Icke talking about the old story his old anecdote where his uh you know his sister cuts the corners off of the the roasts before putting them in the oven when she has a very large baking pan what do you cut the corners off for you're wasting you know so-called food okay we're talking about a meat roast but it's the principle we're talking about hey it could be a Tofurky roast whatever okay cut in the corners off and throwing him oh and then the garbage can why'd you do that I don't know that's how my mother did it they go to her mother you know their mom why'd you cut the corners off the roast I have no idea that's how my mother showed me to do it I never wanted to do it that way I just thought she knew better and that's how she told me to do it and I just kept following that way to do it then they go to the grandmother why you cut the corners off the roast every time you made a pot roast well I had a very very small pan and never fit I would I would roll out the roast you know that set it up put it in the pan was too big for the pan I had to cut the corners off so for doing it for a real world practical reason didn't communicate that down to the next generation just said we lopped these off doesn't matter how big the baking pan is it could fit two roasts in it and you're gonna cut the corners off they were gonna cut the corners off see that's how most people do things they don't look at is this necessary tell most meat-eaters look at it they're not gonna look at it is it necessary all they're looking at it as is this the way we've always done it just like I said in an in a venue to someone were in a state of slavery and they retort with yes but it always has been that way how does that how does that constitute an argument how does that constitute even a retort to the statement slavery is the human condition and then you go but it's always been the human condition well what the fuck is anybody supposed to do with that statement what does that even mean because what it means to me as you're okay with slavery that's all it means it means you're so immoral that you find nothing wrong with the continuance of slavery if it's just always been like that so therefore who give this shit if it continues and it's always like that you know that just makes it fine because it's always been like that that doesn't make it fine just because it's always been like that for you and just because it's always been like that for the culture that you live in still means that you're taking something that doesn't belong to you to take which is what all forms of transgression against natural law are foundationally built upon is this your rightful property so if you want to make the claim as another beings life your rightful property you can believe it is all you want but it'll never make it true that's not your property to take or to participate in taking so there's no you know I can only go so far in repetition with that but most people are gonna roll with what they know with what they've been taught I told you who gave the practice to humanity that is not something that just you know organically appeared in our society over long long periods of time it is not okay that is something that was given to us as a practice and an institution as part of the whole death cult satanic society that we now have in the ancient past by the bings that built this satanic death cult society and that we as human beings perpetuate in the modern world which I call Satanism folks this is a very disturbing image I usually don't put things that are too disturbing and folks this is one of the least disturbing images I could find regarding abortion well you want to talk about one of the sickest twisted most vile death cult aspects of our society it is the issue of abortion highly polarizing because government is brought into it I think government should be annihilated but I also think the practice of abortion is immoral so I don't want government involved in it cuz I want government destroyed the issue of government and the issue of abortion are two different things there are two forms of immorality that I want wiped off the face of the earth from a place of consciousness not from a place of having to control it or even do it physically because the best place to do it from where it won't come back as the disease that it is is doing it in consciousness this is why while I recognize physical revolutions may have to occur to give people and extend a chance at getting it right and have been has been done I love the American Revolution the best way of doing it is through understanding the truth and putting that into practice in our lives that's why I like the movie the modern film Mary Magdalene the message of the allegorical figure of Jesus is put forward as we have to do this in consciousness doing it just through war ain't going to get it done you know I'll take the notion that if it has to be done through that any means necessary you know if we have to go through the revolution to give people one more turn at the big wheel Kharma revolution is a valid option physical rebel rebellion righteous physical rebellion is a valid option and can never be taken off the table with this psychopath satanic society I don't prefer it be done that way I prefer it be done through higher levels of awareness and consciousness and accurate spiritual understanding and that would involve the understanding that we shouldn't be engaging in the practice of cutting formed babies out of mothers wombs folks you want to get sick to your stomach and go into a murderous rage type in the term abortion in google images and go through them i sat there like I'm telling you it was very very hard it was very very very hard to do to even find this image as something that I will put in my presentation that isn't too gory because you want to see what they do to these unborn infants it's it's it's it will make it will make you sick to your stomach and this is what where people are embracing in our society and celebrating this is how far into the death cult satanic aspect of our society we have come I look I was gonna show the video I I can't even watch it I got video just surfaced from I can't remember what group exposed it but they showed abortion doctors making aborted fetuses dance on the fucking pan table that they throw them in after they're taken out of the mother's womb [Music] like somebody should post partum abort them if you take my meeting and make their carcasses dance that's what should be done to those so-called fuckin doctors I don't even want to start it I don't want to start I don't even want to start talking about what I would do to people like that let me tell you something you better pray this slavery society never collapses that's all I'm saying this is a death ritual this is the the rituals given to us that we keep running with from a total death cult and a death worshiping and a death eating Society they devour this energy at an etheric level and let me tell you something folks this altar of sacrifice is never ending just like war just like the altar of sacrifice of animals the altar of sacrifice of babies is endless every single day every single day hundreds of thousands worldwide and that's what it looks like and guess what folks I'm telling you folks it looks much worse that's a tame picture but it's of a late-stage one and you're gonna tell me that's not a life you know I don't really care what women get offended by that and don't want to listen to me I just told you I don't want government involved in any aspect of any of our lives but you think that that's moral and okay there's something really fucking wrong with you and they don't want to show you what it really looks like go on Google Images go on DuckDuckGo image as you type in the word abortion you look scroll and scroll and scroll and scroll and it gets worse and worse as you scroll you can't really fathom and really deeply feel what you're looking at when you go through images like that folks I'll put a link I'm gonna put a link in the podcast to the word abortion searched on the images page of Google Images and on DuckDuckGo both I challenge people to scroll through them and not feel sick not feel emotionally undone because if you can you're a fucking psychopath I'm sitting there the the thoughts I'm thinking you just you don't even want to be thinking realizing how far we are in this death cult and the people celebrate and embrace this it's sickness it's spiritual sickness and then if the murder of the unborn and that being celebrated isn't enough we have rampant pedophilia everywhere you know then we traumatize and torture and we're initiate into the death cult Society our actual born young from the time that they're babies all the way up through early adulthood and beyond and this is the unspoken elephant in the room in our society it's another reason I have to do a presentation on pizza gate and call it that that's the name it was given through social networks through you know social media networks that popularized it and then they sent a mind-controlled ass to go and shoot up a pizza restaurant to try to make it look like you know extremist lunatics we're only the ones looking into it the whole fake news narrative came out of pizza gate the whole Russian collusion narrative came out of pizza gay people don't know this they don't understand what came out of the Podesta email scandal and the pizza gate scandal they don't understand the timeline they don't understand why the media seized upon it as quote-unquote fake news because it blew up during the Trump presidential campaign they don't understand the level of involvement of both the Democratic and Republican parties regarding this they don't know what was in the contents of the emails that came forth and they believed the bullshit real fake news narrative that comes out of the mainstream media about it being fake news and a conspiracy theory instead of actual email communication that was hacked and and taken from government's own email servers in our government you know and came forward through WikiLeaks which has never put out false information regarding their hacks and leaks and I have borne out every time to be accurate the amount of data is gonna take years the data dump from WikiLeaks to even process to even understand what we're seeing coming out of that and let me tell you something the Podesta emails are one of the biggest things in that which are all downloadable they're all out there you don't need to take anybody's word for it you need to go research it for yourself I've been talking about this for over ten years read the Franklin cover up by John de Kamp to understand this aspect of the death cult society the trafficking of children how it's done through drug cartels monetary cartels even religion does it organize religion organized crime mafia syndicates Middle Eastern Islamic syndicates trafficking like this it goes through religion it goes through organized crime it goes through intelligence agencies hugely it goes through boys and girls boarding schools that are involved to supply pedophilia it goes through org businesses that have chains set up near trucking stations and truck stops throughout the whole country and train stations because they're easy to traffic through it goes through it connects deep in with airlines and airline agencies to traffic these children and get them below radar of people who are looking for traffic people and this is what people don't even want to talk about an actual leftist brainwashed you know cult members on the left want to say the whole thing in pedophilia is not a problem it's a conspiracy theory and we should even accept it as a a sexual orientation instead of a crime its but it's not only a crime it's beyond a crime it's a cult religious practice of the coat that is ruling the world so that's what I wanted to talk about regarding the death cult aspects then our society is structured satanic ly like a prison first of all in the United States we have the highest ratio of people in prison in our society per capita than any other nation in the world we now have incarcerated in our prison system 2.3 million people in the United States alone 2 million 300,000 individuals out of about 325 million and guess what out of those 2.3 million people currently in in prisons all across the United States which is part of this satanic society is the key people traumatized and caged and threaten them with that if they do anything outside the purview of the masters and they're morally relativistic so-called laws out of the 2.3 million guess how many people are nonviolent so-called offenders meaning they have not actually violated the rights of any other individual they have only done things that contradict the moral relativism in the laws of the the ruling class who make those laws and the satanic network who ultimately rules that ruling class 90% out of the 2.3 million incarcerated in the United States alone are incarcerated largely on illegal drug offenses so-called illegal drugs over the selling and or manufacture and/or taking of what other people deem are subs that should not be inserted into the human body should not be consumed by human beings which first the ball was slavery in and of itself saying what someone can and cannot put into their body is a claim of ownership on the body itself and therefore a claim of ownership of the body and therefore slavery all prohibition is slavery stop talking about it as just something the government does that you think they don't have a right to do it the the rhetoric is not strong enough prohibition is slavery taxation is not just theft it's a euphemism saying that it's theft is a euphemism claiming that you own any percentage of the labor of another is a claim upon the body and mind of another which is what they perform that labor with therefore you are saying that you own another in whole or in part which is called slavery stop you foam izing taxation is slavery government is slavery we have to stop using euphemistic language it's slavery it's not just taxation it's not just theft it's not just prohibition it's slavery all of it no matter what government Institute's it where or when it's slavery and let me tell you something folks this is totally reflected in the numbers of people that are caged for putting a substance into their own body or voluntarily transacting with something who's putting a substance voluntarily into their own body these people aren't the drug pushers the 90% of the 2.3 million people incarcerated over so-called illegal drug offenses the drug pushers are the pharmaceutical industries that say come to our pharmacy and get free flu shots and vaccines they're pushing their drugs with all the commercials ask your doctor about this and it just has these side effects including death turning blue whatever the fuck all the side effects are endless list the side effects that they read at six million miles an hour but then go ask your doctor about it they're the ones pushing it nobody's saying go ask your doctor about the health benefits of cannabis on just about every disease autoimmune disease the cancer on the face of the earth no but that's pushing that's drug pushing you know nobody comes up to me and goes here just have all this cannabis I want to push it out yet yeah right yeah yeah we've all been there right we all see how that works yeah it's like the highest prices that it's ever been especially for anything that's potent that you could actually do an extraction upon and get you know powerful medicine from and then they want to say that's outlawed and they'll throw you in a cage you know for they're morally relativistic bullshit so-called laws saying they're God and they'll determine what's in your body they're your master they own your body they own your consciousness will tell you what you can and can't put into it and you still have house slaves saying that's perfectly fine we should outlaw drugs and keep them outlawed can't see how it's slavery you are making the claim you are God you are the master of others and putting something in your body I'll claim that I can regulate what can be put in your body and therefore I own your body and want to throw people in a cage for it and we have the highest level of a prison society out of any other country on Earth because this satanic society has infiltrated mentally perhaps more deeply than any other country on the earth simultaneously I've said it and I'll say it again and I'll keep saying it because it's still true the American society still has the highest consciousness out of any society on the earth simultaneously in this country we are still the best and only hope for the world and guess what our European brothers and sisters listen get his offended as you like by that statement boys and girls because let me tell you something you're dropping the ball way worse than us with the set bullshit censorship you're letting go in your country look at what just happened to Tommy Robert Robinson I may not I don't need to be a fan to say he has the right to speak and to expose what is going on you can say you're on his political side not but guess what the right to speak and conduct journalism is universal and it is absolute you know he's not threatening anybody he's not using fighting words he's reporting on something that the establishment is uncomfortable in him reporting on and they're putting him in jail because of it and not only is it's a disgrace it's something you guys should be an open fucking rebellion about you should be an open rebellion about it and people are sitting on their ass ass watching the BBC see all the bullshit that comes to your countries out there come here like 5 to 10 years later because you don't get what you don't get little boys and girls is that your the testing grounds for the Satanic society you're where they throw the shit at the wall to see what sticks and unfortunately you guys let it stick because you're disarmed they got a lot harder of a time making the shit stick here they still do a pretty good job of it but guess what they got a lot harder over time getting it to stick here because they know this populations heavily fucking armed boys and girls and you better believe that when the time comes those fangs are coming out and all the military and police you think you're going to win that battle you're the dumbest bags of shit walking the earth you don't know what's here you don't know what's here you have no idea what's here so you're you're just banking on you can get the dumb fucking public to agree with your stance and somehow take your side you in any way lose that and any kind of a large level you have no idea what's here fire power wise I just I told you before you'd have to drop you'd have to saturation hydrogen bomb America that's the only way you're taking the whole planet cuz you'll never disarm this place ever ever ever I you know you people out in Europe listen you better know that like you know your own fuckin name your agenda your bullshit agenda out of Brussels and they never come in here and take in our weapons will coat this planet in bloodshed before we let it happen here you better know fucking know it boys and girls fucking know it Trust trust ok the second part of our prison society is how much we treat our school children in classroom in a classroom environment like they're in a prison move at the sound of the Bell be quiet don't talk to each other eat when you're told to eat sit when you're told to eat stand when you're told to stand it's a big ritual this is a satanic Lea structured mind controlled brainwashing ritual part of the Graham she plan out of the totalitarian Frankfurt School of Bavaria Germany to usher in total communism and total totalitarianism to all the countries on the earth to make it a one world communist dictatorship as is outlined by none dare call it conspiracy by Gary Allen which you have to read this is a long-term plan called the long march through the cultural institutions look up the long march through the institution's understand the Graham Chien plan Antonio Gramsci social engineer member of the think-tank out of the Frankfurt School very deeply in connected in with the Fabian socialist society and the Tavistock Institute of Human Relations and the Royal Institute for International Affairs at Chatham House and Wellington house in England you think this whole cultural mind control this whole social engineering program hasn't been here for not only decades but hundreds of years with this slow paradigm March slow societal cultural March hundreds of years it's been going on for but people are like the Frog boiling in the pot of water slowly they can't see the long-term change in pattern look I I briefly spoke about it I'm not going to make this an issue cuz I don't really think there's a lot to it there is some something to it as far as certain intellectual acumen aspects but I I told people what I was tested at as far as it on into a day what they call an intelligence quotient an IQ in an IQ test what I call an intellect quotient and my IQ was tested at 147 which is way beyond the average bell curve IQ and considered in the genius category of what they considered the IQ quotient and the intelligence quotient and that was largely because of the pattern recognition that I displayed in the test it wasn't so much the verbal and mathematical skills although those were high it was that what put it off the scale was my ability to extrapolate patterns based on how past patterns you know show show a progression and then extrapolate the pattern that I knocked out of the water on the test most people can't see that that's what they scored the lowest on in these types of tests I pride myself on being able to see interconnections and patterns in what's taking place in our society this is one of them the long march through the cultural institution through the education system and they have patterned the entire school society very very wisely and smartly from their point of you and how they're trying to conduct you know their slow game over long periods of time to bring us into totalitarian slavery from their perspective it's genius David I calls it to totalitarian tiptoe it makes it very difficult when you go from point A to point B to do it through a slow stepwise progression a little at a time so people can't see the larger plan of where you're headed where you're taking them we also have a money worshipping Society and this is part of their God this is part of the worship of their God they know everything is energy and flow that's why they call it currency that's why they named it after their God after the Satanic one-world cult which the God was always the phonetic variation in any ancient culture that you study it or look at it was the consonants B and L B and L so you can put any phonetic variant of vowel sounds in between the B and the L and you will have one of the names of the gods that they worshipped in the ancient world Bell was one of them worshipped in the Akkadian Society Carthaginian society etc bill in the older sumerian you know society and or you had Bell which was another ancient older name that goes into the Levant area you know the Carthaginians etc but one of the basic agreed-upon terms was it was B and L and this is why it's found all over the language that's why they call the center of focus that they want you to worship their false God that is not the God of creation but is the god of the perpetuation of the slavery system they call your focus of worship the bill the one dollar bill the dollar bill of whatever the nomination it happens to be they put the symbol of the God of creation the all-seeing eye symbolically representing the truth representing knowledge representing goodness representing the the pouring of the the conveyance of the knowledge of natural law into our physical domain on the back of the one dollar bill as an energy talisman you pay bills which is the center focus on our emotions and all of our worry with these bills see it's all a little ritual it's all a little word gag and game that they love to play to just get you focused on what they want you focused on but never seeing the big pattern of slavery and they have their psycho fence and they're you know acolytes worshiping at their altars this is the altar of the satanic elite right here this is one of their altar this is one of their ritual chambers the New York Stock Exchange one of the places they get everybody focused on their God the bill and into a frenzy about it it's a huge satanic ritual chamber to focus energy and then send that focus of care into their proxy God out into everybody else in society through their whole centers of money worship in banking institutions in stock markets in just focusing on all of that to pay bills to get the money in whatever immoral form of work and wrong livelihood people do it to get their bills their energy their form of sick satanic energy flow and if they're not doing it covertly like this folks they're all too happy to be very overt about it and just show you who the God is that you're worshiping you know because there it is they'll put it right out in front of you on Wall Street there's the golden bull the golden bull there's that BL again there God bail bill bail the bull how is Satan depicted Satan is always depicted as a cloven-hoofed God with bull horns and hooves in the traditional classical Christian representation of the Christian devil called Satan so it's it's a it's a symbolic gag overlap pun they love putting it out there to you here's what it is but you can't see it it's a ritualistic mocking they love to perform a cult mockery so folks we have ten minutes left in the show well I'm not gonna take calls this week I'm gonna forego it finish the slides next week we're gonna do a whole call-in show on this topic because that's how important it's been it took two weeks to go through the slides and for me to say exactly what I wanted to say regarding all of this that's how I'm gonna progress with the the podcasts from this point forward with these shows I want to say all the elements that I want to talk about with these topics and expand on them and make them like full-length presentations in and of themselves so if we have to do full call-in shows on the topic I will not necessarily truncate a show as far as actual slide material and next week I'm gonna put off what I wanted to talk about next week which was the Tarot that's gonna be the next topic the Tarot as a understanding of the progression of consciousness not only in our own selves in our own lives the microcosm but a progression of consciousness worldwide on a societal scale throughout our whole our whole culture here on earth okay and I'm gonna do that through a breakdown of the the major arcana tarot cards combined with the Kabbalistic world tree the Tree of Life which I'll get into it the last slides here but you know I really want to take my time with this stuff and really hammer it into people and then I think having a whole call-in show clarifies the topic as well we're gonna do a call-in show next week just dedicated to the topic of our entire society is structured after one big satanic ritual that's what the call-in show will be for next week okay because I want to hear your take on what I've talked about over the last two weeks and I want questions to this dynamic that's what I really want in the coins what I want are questions that force me to clarify what I've talked about on the past two weeks that you may not fully grasp or you want a further clarification or expounding upon ideally that's what I want on the call-in show for next week okay so they're using their little occult mockery and symbolic mockery okay our god is bill we're gonna put our God the bull right in front of the place where all of the money worship goes on at the New York Stock Exchange which is a big ritual chamber where we focus all that energy on our God see they believe whether you believe it or not your belief is not required they believe that that's what focus is energy and entrains people into a way of thought by doing it with this symbolic and pun aspect it's a huge part of their ritual it's a huge part of their belief system and guess what you don't need to believe in it that's how energy focus works that's how the master mind works a bunch of people come together who believe the same thing and then act the same way and they get results it works like that whether we accept it or not and our belief is not required for that they're willing to act upon it through their free will and they do and that's why they're kicking RS because we're not engaged collectively and on the same page and acting upon the opposite dynamic with our free will to make the world the way we want they have that knowledge they have that care and they have that will and we don't oh I'm sorry when two slides instead of one the perpetual mimimi society this is where I'm going to basically wrap up and I'll just hint at next week's show okay this is what it really is all about folks they give us a lower-level version of their system of their occult beliefs and ideologies okay that's what this all comes down to ladies and gentlemen they want us in a mini-me Satanism mindset I've explained this over and over the more they can get society to believe in a mimimi worldview where I'm the only one who matters I'm the king of creation everything I do every day is just to serve me and get more be more comfortable have more money be up a higher level of the totem pole in society and guess what other people's suffering none of my business I don't care they don't understand what's going on who cares that they can they're there constantly their rights are violated who cares as long as I'm okay that's all I care about that Satanism that's the definition of Satanism that's what I call mini-me Satanism the big cult leaders are giving you a watered-down scale of their ideology you're latching on to it agreeing with it putting it into practice in life and you're a de facto Satanist as a result you don't even need to know the word Satanism you don't need to know the first thing about what the ideology of Satanism that I spent the whole first half of last week's show explaining what the ideology is and if you haven't seen it you need to go back and watch that because it's a prerequisite for understanding the Society of me me me and mini-me Satanism when you look at those satanic tenets you'll understand yes our society is totally satanic ly structured at an ideological level and until we turn that dynamic around and we get out of that case of the ego that entrenched calcified case of egotism and ego worship nothing will is capable of ever changing in society and the cult that the world knows that they know that that's how that natural law dynamic works so I think that's where I'm gonna end the this week's general slide discussion but I want to keep that up there please because what I want to do is just hint at next week's show and let you know two weeks from now

I should say not next weeks next week's gonna be the call-in show on the topic of our entire society is one big satanic ritual in two weeks I'm gonna cover aspects of the Tarot that I really wanted to talk about last week but didn't have time and didn't embed in the slideshow okay so I'm gonna reiterate the the topic that I've covered in past shows podcasts and all an actual workshops on the microcosmic Tree of Life which is the the progression in our world of the incarnation of the soul okay so this is the souls journey and often time in Tarot they call it the fool's journey then we're going to cover some aspects of the macrocosmic Tree of Life or the universe these are the universal forces which are at work in our society particularly I want to cover the macrocosmic Tree of Life because I want people to understand the left and the right hand path at a deeper level from these traditions of taro and Kabbalah so we're going to get into a cult philosophy ok we're going to get into a cult symbolism we're going to break down symbolic elements of the Tarot and Kabbalah and I'm gonna help you to understand what these traditions are really teaching us from a fundamental level particularly the outcomes that are possible in human society that's gonna be the key part ladies and gentlemen that's all the time we have for this edition of what on earth is happening you've been watching podcast number 215 I want to thank everybody for tuning in I want to just say if you have found value in what we do here on what it is happening go to gifts on my website what on earth is happening calm go to the gifts section you can find hard copies of all my presentations their t-shirts we're gonna have new t-shirts up real soon okay get the art drive the art drive is critical knowledge critical information that everybody needs to get hit the art tab on water nerf is happening or donate at the donate tab you can make a donation in ten eleven different ways now on what on earth is happening calm slash donate ladies and gentlemen thank you for listening and remember government is slavery we'll see you right here on water earth is happening next week [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #216

Topics: *Our Entire Society Is One Big Satanic Ritual Call-In Show, What On Earth Is Happening is a tapestry of information that builds upon previously released episodes, "Negative Knowledge," the Church of Satan's F.A.Q. on Fundamental Satanic Beliefs, People who insist they know what Satanism is when they actually have a completely incorrect understanding of it, Teaching Natural Law in your own style, Mandatory Vaccinations, Being prepared for a potential hot Civil War, Doing the psychological Shadow Work, Blue Avians and other "Savior" bullshit stories, the Breakaway Civilization, Our society is ruled by a Technocratic Occultocracy, the Androgenization of our entire society, Social Engineering, Epi-Eugenics, the Whitehall Church of Satan and its literature, the "Externalization of the Hierarchy," the TV series "True Blood" as an allegory for our Dark Occult Rulers, Circumcision as a Satanic Trauma Ritual, Learning how to create digital content, Self-Defense against Tyranny, Pedophilia in modern culture, Movie allegories, Mind-Controlled Dissociation by being taught to watch life like a movie screen, the dangers of the Transhumanism agenda*

freedom man that's what it's all about [Music] you've got to groove on freedom book space [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome the show everyone thank you for tuning in today is Sunday July 21st 2019 this is what on earth is happening episode number 216 and today's show is an entire call-in show all three hours your calls and the main topic for discussion is the topic that we covered over the last two shows here on water on earth is happening which is our entire society is one big satanic ritual of course you can watch the show live at what on earth is happening calm / show.we multicast on youtube on youtube live on facebook live on vimeo live and right at what on earth is happening dot-com / show you can click on the calling link at the show page on what on earth is happening and that will take you to our discord server our discord call-in server and we take our calls through discord we'll go over the rules for calls when I start to go to callers I have a couple of quick housekeeping announcements for this show today let's actually cut over to the slide presentation I will be speaking at an arkadelphia 2019 this is the inaugural an arkadelphia conference hosted by the people at the state of anarchy the conference will be taking place September 13th through 15th I will be speaking on Saturday September 14th and my presentation my main presentation for the conference is entitled the sacred gift of anger you could order your tickets at the banner at the homepage of what on earth is happening or you can go directly to an arkadelphia calm there is a 5% off discount code with the promo code passio if you enter passio at checkout you will get five percent off of your ticket sale and five percent of the ticket sale will be donated directly to water on earth is happening also at an arkadelphia 2019 will be the debut of my first full-length documentary film called mark passio and the science of natural law now I want to let everyone know in the interest of full disclosure more likely than not unless we really you know make huge strides it looks like we're only gonna probably have a rough cut of the documentary ready for an arkadelphia if that changes we will have the final cut ready but I probably won't be able to have you know DVDs and flash drives available for sale hopefully we can turn that around and you know kick it up into higher gear and have a final edit ready but I just want to just prepare people that we may just screen a rough cut for the the conference so we're working as hard as we can to get that prepared in its final form but just in the interests of you know total disclosure and honesty when it comes to advertising I just want to let people know we may just be screening a rough cut at the conference that being said on the day after the conference on Monday September 16th I will be delivering an all-day seminar entitled teaching natural law with Mark passio this will be Monday September 16th all-day event 10 a.m. to 5 p.m. with a one-hour lunch break in between this is hosted at Papi's Italian restaurant 31:20 South Street South 20th Street I'm sorry and tickets for the old day workshop following the Anarch Adelphia conference are $120 you can get your tickets at an arkadelphia calm for both the conference and the workshop we did a summer t-shirt sale and the shirts are completely sold out so we have no t-shirts in inventory at the what on earth is happening dot-com gifts area at the donation gifts area so thank you to everyone who took us up on the offer of t-shirt sales we are completely sold out of shirts new shirts have been pressed and the order is coming in this week so I will probably have those on the store sometime later this week in addition to that the anarchy and the occult part 2 presentation that I gave at an arc apoco 2019 in Acapulco Mexico back in February has been edited and is complete the video is now in my hands and we are going to basically be pressing that in the form of flash drives and DVDs those will be available in the water on earth is happening gifts donation gifts area also later this week with a new t-shirt designs so definitely check out the gifts area later this week and we will have some new items up there plenty of new items actually also the Tesla and humanity's missing paradigm shift presentation that I gave at the Tesla conference back in January will be available for free on YouTube later this week so a lot of new developments happening here at what on earth is happening so stay in tune with the website and I'll check out all this new material I think um after the following week's show which is going to be on some of the aspects of the Major Arcana of the Tarot I've been wanting to deliver that Tesla and humanity's missing paradigm shift presentation in an extended form so I think in a couple of weeks I'm gonna take the whole show and really unpack that presentation that I only had a few minutes really to deliver at the Tesla conference because of how many speakers they they have at a conference like that I'm gonna really unpack that here on what on earth is happening in a couple of weeks so I'll be doing an extend format version of Tesla and humanity's missing paradigm shift I think that's all the event announcements that I have this is the show for today the artwork it's the call-in show for the topic we've been talking about we've been discussing over the last two weeks I did six hours on this topic that our entire society is just one big satanic ritual and I want to just preface the calls with one brief thing a couple of things actually the first is of course I didn't cover every aspect of how our society is a huge satanic ritual there is so much more to it I just barely scratched the surface I'm sure people today when calling in are gonna bring up topics that absolutely fit into this discussion but yet we're left out of my formal presentation over the last couple of weeks so I'll be looking forward to that if anyone has any questions that they want to ask regarding clarification of these topics that's also completely on you know on the table and there's no taboo topics talk about you know anything you like ask any questions that you like in general we're talking about the last two episodes and you know I just want to reiterate I'm gonna do this a few times over the next few shows for any new listeners or new viewers to the show you have to realize that water on earth is happening is a tapestry of information no one show stands alone on its own you cannot really deeply understand each show that I do here on what on earth is happening unless you have listened to the previous shows in order at your own pace and take them in in their entirety and also look at the ancillary material links documents videos etc images that I post with each episode it's a study course that's what what on earth is happening is it's not just a normal podcast you have to stop thinking about what on earth is happening if you're a new viewer or even if you're an experienced viewer who have heard many shows you cannot look at this show as just an ordinary any other podcast it's not it's a teaching course okay like any other college course you wouldn't start taking advanced calculus unless you took algebra and precalculus because those are prerequisite classes okay and you wouldn't take those unless you had basic mathematics okay so every episode preceding this one from number one through number 215 are prerequisites to this episode so I just want to reiterate that I'm going to keep reiterating that over the next several broadcasts because I think a lot of people still don't understand that no one episode of what on earth is happening stands on its own they are meant to be taken in as a tapestry of information and each episode that I do well no matter what number it is every numbered episode before that is a prerequisite to understanding what I talked about in the most recent episode so please understand that okay I hear people saying you left this and this out of that episode because I don't rearrange this you know go back from number one listen and order at your own pace and the tapestry will emerge in your mind and you'll get it it'll all click you'll have several aha moments and you'll be like oh that's what he's talking about in later episodes the worst thing anybody could do is go to the latest episode and just start listening from there bad idea bad idea okay so I just want to make that very abundantly clear for new viewers okay who don't understand that aspect of this broadcast okay this isn't Joe Rogan's podcast where you can listen to anyone isolated and as he just has his guests on and that's it and that that episode stands on its own that's not what on earth is happening and that'll never be water on earth is happening so please understand that for from now and for all time okay so that being said I want to show people something that was kind of brought to my attention through some people posting about it on social media in relationship to the two last episodes that I did so I'm just gonna step out of my presentation for a moment I'm gonna go over to my web browser oh and uh real real quick let's switch back to the to the computer but real quick I want to let people know first of all the an arc adelphia banner for tickets is right on the home page of what on earth is happening but if you go to the news section right here or if you scroll down on the home page of what on earth is happening and you go to the latest news section on the left I have posted my latest interview with Carmen chironji of the state of anarchy okay and we talked about a little bit about what my presentation at an arc adelphia was going to be about the sacred gift of anger the other topics covered were New Age bullshit and how I've exposed that and talked about false New Age spirituality teachings and offered corrections to the types of subtle deceptions that are offered in the New Age movement and we talked a lot about true spirituality and true spiritual teachings from a streetwise spirituality perspective in this interview so that's the latest interview that I did and that's up in the news section of what on earth is happening calm I just wanted to mention that and get that out there for people now the thing I was getting ready to get into is that some people posted some very appropriate material on some social media comments that I happen to take note of regarding the last couple of shows on Satanism and a lot of people have no clue again I I started the whole broadcasts over the last two shows on Satanism with a quote from Thomas Jefferson saying a person is closer to the truth who knows absolutely nothing then a person who believes that they know but really they have an erroneous belief system about something okay they are way farther away from the truth someone who thinks they have the correct answer and believes it yet they don't have the information that they really need to understand a person who's totally ignorant knows absolutely nothing about a topic and doesn't think that they know something about a topic is way closer to the truth than someone in what I call negative knowledge meaning that they have a false belief about what they think something is all about and believe that they have the correct answer and believe that they have the truth regarding it and let me tell you something folks this is almost 100 percent of people when it comes to the topic of Satanism they have their head lodged way up their asshole about what they think about Satanism and they have absolutely no fucking idea about it whatsoever at all zero zilch nada okay and they don't want to hear it they want to believe their belief is correct and that's it and nothing can dissuade them from that fact so some people corroborated exactly what I've been saying about real Satanism I'm not talking about Hollywood Satanism in any of these broadcast folks I'm talking about the power structure that runs the earth I'm talking about the the grip the iron grip that this planet and its people are firmly seated in okay those masters of the world they're not devil worshipers in the sense that Hollywood wants you to believe Satanism is so that you're totally off the path of what you think this psychopaths who run this whole planet are all about you know nothing of their mindset if you think that's what Satanism is and you got jackass fake-ass Christians trying to tell me I don't know what Satanism is and these ignorant fucks do you don't know one fucking thing about what you're talking about when it comes to Satanism and I'll tell you so just like that to your ignorant ass face all right I'm sick of being told I don't know what I'm talking about when this was my personal fucking life experience I'm tired of that shit you're not gonna tell me what I've experienced in life you don't you haven't been where I've been you haven't been in the rooms I've been in you you haven't been around the people I've been around you don't know what the fuck I know you could think you do all you want it doesn't make it true boys and girls so don't tell me what my life experience has been your heads up your ass and you're full of shit I'm fired up over folks because up more and more people try to do this to try to get under my skin you know and they're not gonna like what happens they try to do it in person with me don't go up to a man and tell him he hasn't had the life that he's lived it's a bad idea you'll do it on the internet cuz you're a little chicken shit coward keyboard commando hiding behind a fucking screen try doing that to somebody's face and see what happens you know I'm not playing games with this anymore folks I'm done with people you know call me I say call me a liar and tell me my personal life experience didn't happen no not to my face you're not doing it all right know that so sorry about just the direct confrontation about this but I'm fed up with it okay and I need to get it off my chest and say something about it the nerve like that the straight up balls the people have it's like me telling you let me tell in a Parisian you've never been to Paris you don't know what the fuck that city's about now you know and I've been there like once or somebody who's never been there saying something like that you know very presumptuous and high-level hubris that people have about this stuff so getting back to what I was going to talk about I want to let people see right from the horse's mouth I'm gonna go to the Church of Satan's official website right now in real time let's switch back to the computer I brought up the Church of Satan Church this is WWE Church of Satan calm okay this is the official website of the Church of Satan this is an organization that I was a priest within again the other thing you hear I hear people saying all the time is that I've ever claimed to be a high priest of any aspect of Satanism you will not find me ever in any footage in any audio ever using the term I was a high priest I was never a high priest of anything I was appointed to the rank of priest the simple rank of priest within the Church of Satan that is one of their ranks in their ranking system in their hierarchical system in the Church of Satan that is what my rank was when I was a member as Reverend Mark rokahr which is my assumed name that I took in the dark occult in Satanism which I've gone over in my presentation called occult mockery of police and military personnel and I've also gone over extensively in my presentation called demystifying the occult part to Satanism and the dark occult but people want to talk out their ass and not look at the data that's what they do they form an incorrect opinion based on their beliefs don't look at the actual data and then claim to be right and then say that there's somehow researchers and they know what's going on when they can't even think properly because they have a burnt fucking brain right on the Church of Satan's homepage okay you can click I'm gonna show you where to click you go right here to frequently asked questions this button right here FAQ which stands for frequently asked questions click that button this will take you to a page called Church of Satan frequently asked questions if you scroll down on that page it will give you a list of FAQ topics okay there's something called internet presence press and student fundamental beliefs is number three and they go on and on with other topics up through 21 topics okay I want to call people's attention to link number three on the Church of Satan's frequently asked questions list if you click that link fundamental beliefs it will take you to the FAQ on fundamental beliefs of the Church of Satan the first question asked is why do Satanists worship the devil and the answer from the Church of Satan is verbatim quote we don't Satanists are atheists we see the universe as being indifferent to us and so all morals and values are subjective human constructions this is the 1st and 4th 1st and 2nd tenets of Satanism their God and morals are subjective moral relativism now listen let's keep going our position is to be self-centered I'm gonna highlight this our position is to be self-centered with ourselves being the most important person or the god of our subjective universe so we are sometimes said to worship ourselves our current high priest Peter Gilmore calls this step moving from being an atheist to being an atheist Satan to us is a symbol of pride liberty and individualism and it serves as an external metaphorical projection of our highest personal potential we do not believe in Satan as a being or person what more proof does any asshole need because see what its coming from folks is people who don't want to know the truth it's coming from people who want to say my religion has it right fuck you I don't want to hear your research I don't want to hear your knowledge I want to hear what my pastor down on the church corner says about it and listen to his jackass opinion on it when he's an uninformed dupe that knows less than nothing because he has an ill-informed unread uneducated opinion and belief about it instead of actual knowledge about it you don't know what you're talking about Stumm because that's what you are religious believing scumbag is it an ad hominem attack you're damn right it is because an ad hominem attack can say the truth about a person it has nothing to do with what I'm saying we're going the truth about what real Satanism in the world the real Satanic ideology that runs the world is all about cuz that's it right there this is it right there that's it right on the screen okay look right there on on the screen that's what real Satanism is boys and girls and they're all too happy to tell you publicly right on their own site in their own frequently asked questions section corroborating exactly what I've been trying to explain to you about what Satanism is for the last 12 fucking years because these people aren't even covert about it and let me tell you something this is the ideology behind the whole political slavery system this is the ideology behind the whole slavery banking system this is the ideology behind all the other satanic aspects of our society that I talked about for damn six hours over the last two weeks so don't take my word for it here right from the horse's mouth itself okay I just wanted to say that and left I thought I want to thank the people for posting that bringing it to my attention in certain social media posts for you know putting that out there for others to say here it is exactly what he's saying is exactly the way that it is and you can go on and on just read their literature just read their books go read Lovaza writings go read the Satanic Bible the satanic rituals The Devil's notebook all the other works from LaVey the book the Church of Satan by I don't know whether that was Gilmore or it might've been a key no I'm not really certain go read that the ruby tablet upset from Michael Aquino go read you know all the other works from the temple of sent and Michael Aquino you know it'll corroborate exactly what I'm saying you know you don't have to believe anything I'm saying it's all out there publicly but what you have out there are bullshitter fake-ass Christians that just believe their bible thump bible thumping version of reality that's all they care about and what they're doing is a disservice to humanity by trying to tell people this is about going in the forest and black robes and sacrificing some dogs and work being the devil worship and devil yeah that's what it's about you're a smack jackass who doesn't know what you're talking about Punk I know exactly what I'm talking about because I was involved in it and you were in and you weren't you just think you know and you don't know ass I'm just coming out and saying it just like it is in plain street language because I'm fed the fuck up if you can't tell so let's go to your calls on this topic and I want here's what I want from people if you're willing to go in this direction again people can take into whatever direction that they want what I want to see on this call-in show is I want to see I want to hear questions to clarify what I talked about on the last two weeks and what I just said it here earlier I would love your questions to anything that you want me to further elaborate on or clarify and I want to hear aspects of the Satanic society that I missed that I didn't get to or I left out of the presentation because as I said I guarantee there are lots of those and people can bring those up on this show so let's very briefly go over the rules for the calling show cuz this is something I want to reiterate from time to time on certain shows as well okay so the call in room is in a chat room when you go on discord you're not gonna have cross talk you're not gonna be able to text others that's off-hours we we implemented that as long as it's done respectfully and people have been being pretty good about that I thank you for that okay and you could you could post you could talk you know you could chat off hours during the show I don't want that distraction okay so the callin room is in a chat room member discussions take place when the show isn't live okay it's highly recommended to use the discord desktop app I don't care how good people think you know phone apps are right there not as good as a computer I've said this before I'm not a big fan of mobile platforms I particularly hate iOS think it's a jail literally it's literally a prison in the mobile computing space I don't use iOS I use either Windows you know on a tablet or I use Android on on phones and you know other tablet devices because it's at least somewhat customizable not as restrictive as iOS I don't really think it's a good idea to call in through any mobile platform personally I think you should use a computer with a USB headset or a good microphone a good clear mic and you will get the best quality and the best experience that's my take on that okay you know you are click into the calling room to enable voice calling okay during the call there's no video you're not gonna have your face anywhere you know on on the show ok just our cameras live here in the studio or life okay so it's just your voice right don't listen to the show on the live stream during a call-in show listen in discord the live stream is gonna be delayed right then you gonna be listening to me like 20 30 seconds behind and when I call on you you're gonna miss me calling on you I'm gonna go to someone else so when you're when you're a caller if you're just watching the show that's great watch on you know what on earth is happening calm slash show or YouTube live on my my youtube channel okay don't do that if you're a caller listen to the show in the discord app okay I keep my mic live during the show all right so please mute any device that emits any sound in your room you shouldn't be not be having your audio come through speakers in the room your room should be perfectly silent to anyone who walks in the room you should be listening through earbud headphones or a headset like I'm wearing okay please don't call into the show if you have your audio coming through speakers that is are audible in the room it's going to create a feedback loop there's going to be echo and/or feedback which is I'm gonna cut your call off okay so to use headphones or earbuds okay if you're not using those and it creates an echo

I'll cut the call I'll determine what calls I want to take him in what order I take them okay so it's like this isn't necessarily a one after another you know order it's like I'm gonna say if I want to go to this person next I'm going there next I know that's not totally egalitarian but it's how it is okay and there's no call screening so you know nobody's gonna pick up and say you know hey what do you want to talk about I'm gonna pick up and say you're live on the air that's it so be ready with your question or comment okay have your microphone unmuted on your end have your mic unmuted I will server unmute you when I go to your call and say you're live on the air I think that covers all the rules we've done this a couple of times and when we have call-in shows I usually like to reiterate it and go over it so let's go right to your calls this is episode number 216 we're gonna go live to Ron Ron you are live on what on earth is happening episode 216 our entire society is one big satanic ritual welcome to the show thanks man it's good to be how you doing today I'm all right I'm fired up as I have been for the last many weeks because we're degenerating rapidly into this yeah it's kind of crazy the last couple of weeks I've been listening like normally but yeah you've been pretty amped up and in fact my wife and I just watched a documentary yesterday called heal and it was just a big warning for me to to chill because the cortisol racing through our veins 24/7 is not healthy so I'm gonna try to stay somewhat mellow cuz I could get amped up and heartbeat and just dance with you and blow some stuff up or something yeah I hear you so I got a couple quick anecdote I was gonna share with you and you know stop me and riff with me anything you want of course but like I saw I'm a professional coach I'm a writer my job is help people live the the best version of their life I wrote a book called uncompromised awesome cool I teach coaches all over the world and man oh man you have nailed it with fake you know fake-ass Christianity and the New Age bullshit hundred percent I mean this is i live in new in Massachusetts and this is what I do for a living dude I live behind enemy lines it's crazy I believe it especially up there I mean it is they got people people there are gotten people here in Gaul adelphia are gotten in going but I'm telling you it's even worse up in New York yeah but New York is insane I mean the whole abortion thing insane now this thing with the vaccinations let me to get to the vaccination vaccination thing in a second I'll start with a little bit of good news because you know you often talk about being a teacher of teachers and I want you to know just to feel a little encouraged that you know I've been teaching this you know some version of natural law and kind of patchwork for years because I knew I'm not the center point of the universe right and you know there's got to be a system I went through a phase of being a hardcore Christian and you know it that just that that that way of understand the universe didn't quite work out it's not quite it it's got to be and I'll tell you what I had somebody mention you and I checked you out and dude I watched natural law back-to-back awesome intense work I've been enrolled and started to included in my coaching work in my teaching and I was asked to teach at the International coach Federation which is the international governing body of coaches at one of the workshops in Colorado and I I missed them up I left them all pretty much speechless at the end which you know because I walked him i trapped him with their own ideology which was and it feel just bear with me 30 seconds I'll run you through it and I'll stop talking but I asked him look do you believe in karma which they all do karma law of cause and effect law of compensation which basically means everybody that you if you put good out in the world you're gonna get a good back if you put crap out there you're gonna get crap back of course every coach is like hell yeah and I knew I had them so I said so good you live in a moral universe right and they're like yeah right absolutely okay yeah and I said fine can you initiate force against someone know what if it's for good like old lady down the street and you know where I'm going old lady down the street you know she's she's indigent she just has to get to Chicago and I hold a gun to this guy just to get a hundred bucks to get her in a Greyhound can I do that be like no you can't well what if I vote for somebody to do it what if I vote for somebody who's in a nice suit somebody to point a gun at somebody else to take their money they're like no way can you do that and I'm like laughing my ass off but then in the next breath they'll say that they'd go out and vote but I do that what you bet you bet but I said how in the world then I mean this took this was over the course I'm doing it fast cuz this audience and of course you know what I'm doing yeah yeah I do this over an hour so I tightened the noose little by little a little and I said guys you vote as soon as you vote you're saying I vote for this band of individuals I didn't want to you know build it up too much but these group of people to say I accept your form of violence for what I want you to do and if they go ahead and shoot people or gun them down or microwave them or ear blast them with sound cannons I think that's fine to get their money to give to a kid so we can school him in Alabama and I said how is that moral based on what you've all said and they nobody had a word to say nobody could say anything right because it's cognitive dissonance they're holding contradictory notions about reality in the mind simultaneously and if you really run that through the analytical processor of the brain it doesn't compute and it creates an error and right people have to see that about themselves that they are lying to themselves about our condition being slavery and that they can somehow delegate rights that no one else has because their violence to anybody else and once you see that you understand that the only moral position in all of life is a position of anarchy of true anarchy meaning that there are no rulers there's no ruling class government becomes inherently morally illegitimate and if we're being honest with ourselves that's the truth the problem is the majority of the human population is not only not honest with themselves they have drank the kool-aid and wholesales subscribed to the satanic cult that runs the world which is the powers that lie beyond and behind government behind the ostensible realms of power and they go into the occulted realms of power they can't see that this whole process of keeping people in this type of inversion of moral inversion and in this psychological cognitive dissonance is part of a huge satanic ritual to turn society's morality on to a head and get us unconsciously creating chaos collectively well and in the personal growth world - and you think about coaches well my job is to help you get clear about who you are what you want where you're going and to end to make it happen and so though though most coaches would say well we don't solve problems like hell yeah people come to us because they want X they can't quite get there themselves they need a little bit of help to bounce some things off of somebody has some good questions and so I say to them look what is a problem a problem is I don't know what to do or I know what to do but I don't have the moral courage to do it and so and I said to them at the end I said look the already's being quiet here and that's because you don't know what to do with this information we've just I've just walked you through I said that's okay but you said you can't go back and now and pretend you didn't hear it or you don't forget that you're kind of trapped that's right and it's great that you're planting seeds like that because as you just said that truth cannot be unheard you've spoken it into creation and that's what helps bring people further along even if a few of them eventually get it down the line that happened as a result of you planning those seeds in their mind right right so good work man because you've made a huge impact on me and now I'm able to take it to a community that would be completely too deaf to remotely come anywhere close to it and they have impact on hundreds of thousands of people these coaches around the world so well thank you very much and I want to thank you for what you're doing regarding that because you're helping people be exposed to this in that sort of indirect way where they may not come and listen to my work but they're getting it you know through you and you're bringing them along in the end of way that you can do it and that's what the great work is to do and it can be done this way not everybody has to take it from Marc passio I've said that an innumerable amount of times most people will not be ready to take it from the the transformer that I am like that's like putting you know a 10,000 bolt line right into somebody some people have to step it down and give it to people in a way that they can absorb it more readily and I appreciate that you're doing it like that and I wish more people were whoever he's got to do it and you know you've said this in so many other venues that you've spoken at where look do it your way and if you're a garbage man then talk to the people on the other end of the truck if you're a fireman you know you got hours to sit and shoot the breeze with guys and you're not or not helpless talk to people at their level you know I wanted to you know make people aware I'm not trying to talk down to the least common denominator level I'm trying to reach the other potential teachers like yourself who are already there and or maybe even most of the way there but they need that just little extra you know you know motivation and just helping them to get fired up to get out there and do that work so you know I like hearing stuff like this that you know people are doing it in their own way with their own aesthetic applied and at their own pace because that's again what the great work is all about you know one has to do it like I do it you know I'm I like the way I do it I'm comfortable in my skin this is my personality in real life you know which I've shown over time progressively more some people may not like it I don't care I'm comfortable with who I am I'm honest with myself about Who I am and where I am spiritually in life you know I'm okay with you know the anger that I perceive and see and express and you know that's what my talk at a tad arkadelphia is going to be about this year and many people don't have to do it that way you're free to do it in an entirely different way you know and so that's what being individuals are all about you know it's all about some people will do it an entirely different way the key factor is that you're actually taking action and out there doing something so thanks for taking that action and developing the courage to do so you're welcome brother I was going to show you the other thing about the vaccines do we have another minute sure go right ahead okay okay cool so you know you were like you know like I said earlier man you were you were knocking out of the park in the last couple of weeks but last week you were just all over and the vaccines thing and the abortion thing and it just it's absolutely heinous and you know I'm still I've still got a lot of affinity for the potential in Christianity because you've got people who believe that there is a God there is a truth there is something that can be done and we can be done and we if we follow truth they're just so asleep it's in sane and people are saying well God is going to judge us dude when we are celebrate busting up children's bodies inside the mother that's God's judgment it's already here so wake up everybody the other side of this is if you once they get out and we don't have the pedophilia shit going down all over the place we're gonna do some full of thimerosal and aluminum and formaldehyde which are carcinogens and neurotoxins well New York State in case somebody knows is just the latest state that's passed a law that you of course you've got mandatory compulsory education for anyone under 18 in New York as well as many other states now in order to go to public school private school or parochial school you must be vaccinated my children have never been vaccinated and the bill I'm gonna get the date the days a little bit wrong but basically you have 30 days to comply we between means you got 30 days for in case of my children to get vaccinations which means like 30 doses because there's oftentimes more than one dose in each vaccine followed by immediately a second series of doses and there's no choice I mean it's like you're either doing this or you're homeschooling or the choice of course if you follow it out is people will come to your house and say where are your children and then if you say get lost men with guns will come for the good of your children of course to make sure they're vaccinated if you resist someone's gonna die someone's gonna dive in a cage for the good of your children it's why I'm saying it's almost time for open armed rebellion against this tyranny you know I mean that's it it's almost time for that you know and it's gonna come time for that there's gonna come a time because these people aren't gonna back down they're not gonna back down and it's gonna have to go that way at some point unfortunately I don't want to see it go that way that's not my desire because war is beyond hell and I'm telling you it's gonna end up it's gonna end up going hot war in America unfortunately because people aren't listening to the warnings they're not then they they're just not moral people that's why a revolution is always kicked off when you have an immoral population that is willing to allow violence to go on unrestrained like it is you are going to invariably end up at bloodshed invariably invariably and that's where we're headed folks I mean people better get psychologically and physically prepared for I keep telling people if you don't have if you're not first of all spiritually ready that that's a big problem if you're not psychologically ready for what war is going to be you're gonna be caught you're gonna be like not able to mentally function when it happens and you have to be physically ready if you don't have arms and ammunition ready to go you're crazy at this point you are an insane human being I've been telling this people this for years if you do not have the ability to defend yourself with a battle-ready military-grade weaponry you are mentally unstable as far as I am concerned because you're not looking at the state of reality as it really stands and then accurately preparing for what may very well be the eventualities and to me that means that someone doesn't really care about themselves they have some form of self-loathing where they don't engage the self defense principle that's why the the whole thing of the right to keep and bear arms is so important to me and in this work and there are many people that still can't understand it and still will not prepare you know especially people from Europe that's a big thing over there they that has been removed from them that like a lab animal literally the social engineers have gone in and extracted at a DNA level at an epoch eugenics level epigenetically removed the desire for self defense and that's a scary thing that these social engineers and Satanists have been able to do and you know there's a place to be a horrifying horrifying and they'll still fight me on it and say I don't have it right I'm wrong and that should never be done there's no place for any kind of physical rebellion you are out of your rabid-ass mind if you actually think that you think that's spirituality there that's nothing spiritual of the sort if you're willing to let tyrants run roughshod on all of humanity without physically stopping them right nothing spiritual in that it's an abdication of our of our well natural manhood for guys like us and vote for women do the same thing to let their bodies be treated like like just dumpsters it takes to put stuff in and leave it take it out yank it out like it's nothing so I can do it grab one last thought 12 seconds I'll let you go right ahead I just want to say that and this course is any of us who have gone down this road and you know you you're a big fan of none dare call conspiracy you read that you're you listen to your stuff you you you get to really know what's going on in the world it could be completely overwhelming and this is a spiritual condition and I I just want to encourage everybody and you know to preaching to myself to is if you got to turn the fountain off a little bit or turn it down a little bit to get a little breather so we're not just running at full throttle all the time you don't want to drop dead at this and all this is is an indication that we just have got to keep growing spiritually so that we can deal with the truth head-on and not be afraid and that's a great point that you make there Ron because that's something I need to remind myself on sometimes I am way more spiritually armored than 99% of human beings out there I have extremely thick skin and armor when it comes to just being being affected by things it doesn't mean I'm not affected or I don't have a full emotional response range what it is is I'm super armored when it comes to that because of what I know the knowledge and experience of what I've been through in this life has protected shielded and armored me in certain fashions that I have to be aware other people don't have they don't have that type of shielding that is in place around me I'm not saying that to toot my own horn or like say I'm better than anybody it just happens to be the case and a lot of people like something that would just not affect me at all or that I would be able to deal with and integrate just melts them down you know and it's something that I should be aware of because like I said I do I am stronger than other people in many regards in those aspects well you told you said you went through a year of just pounding out death metal and confronting yourself again and again and again if people haven't done that they didn't do their death-metal year and looking at themselves then there's they're busy going out for ice cream tonight and sitting in the pool and hanging out and right and anything that messes with that is just devastating let alone the full load I'll tell you what you just brought to my attention by even saying that you know I just I want to throw a shout out because I've been watching some of his work and it's it's really great stuff like South ACCA's Boza from Black Earth Productions has been putting out some good work about the shadow work that we have to do to strengthen ourselves spiritually you know he just interviewed Jordan Maxwell the stuff that Jordan was talking about was just fantastic and uh you know I spoke with Seth kis about a week ago and like went through some of his more recent stuff that he wanted to turn me on to and it's like I think that's what this is the kind of stuff that we need right now is showing people how to work through this material and be confrontations most people don't want to go there and don't want to look at that stuff I've been doing that type of stuff for so long that it's like it's like nothing to me you know it's like going into the gym and doing your normal workout that you could just knock out in like you know half an hour you know it's like it's and then other people you know they do five minutes of it and they're like curled up in a fetal position weeping their eyes out you know so it's like I shouldn't take that for granted be and realize there's a whole spectrum of where people are at regarding that and many of them it's just like you know you're lobbing a you know a 30 pound medicine ball at them and it's like they're gonna get knocked over today they don't have the strength or the will to deal with it because they haven't done that much work on themselves you know it's a stepwise progression so you know thank you for that reminder to me as well and you know I think people should definitely check out more material that delves into the occult shadow work because it's very profound and important I think Michael deSario and does a lot of good work on that as well you know and I think people should look into people who are really doing stuff like that I think max Egan does great stuff regarding that talking about the things we have to confront in ourselves that we may not like you know so there's many good teachers out there that are talking about this type of work and you know we have to realize it is a spectrum in people and we have to try to take some of the people who haven't you know shielded themselves as well and built up that spiritual armor and help them along to go further down the past so they're gonna be ready for what's coming because what's coming it's looking extraordinarily deep and dark because we're not really turning it around at the pace that we need to be so you people like you doing the great work may help to turn it around so I appreciate that and I want to encourage you to keep going thanks brother very much and yeah you keep up your good work I know you will and look forward to connecting another time thank you Ron great call thanks so much for all your insight today thank you see that's what what on earth is happening is all about all right let's see who else is holding here plenty of plenty of people holding let me look at the let's see hold on give me one second all right let's go - lets go - Nick Nick you're live on what on earth is happening episode 216 welcome to the show hello mark yes great to be able to talk to you I just want to do a quick sound check to make sure that I'm coming in at good quality you're coming through loud and clear you sound perfect okay fantastic mark I just wanted to talk actually just hear your opinion on something you said a number of weeks ago this was when you came back from that anarchie conference in Mexico yes mentioned about the avians and your dislike for them so before I get into it I was hoping they'd just give you some background so you can understand where I'm coming from okay okay I'm on the boat with you when it comes to the blue avians as this is just something completely as I put it it's just a modern-day fastened eyes fan is not sorry it's a fantasy but it okay yeah yeah it's just something made up like what we see in a high production Hollywood movie it seems like actually I just want to ask real quick is it alright if I just throw out some names that are attached to this blue avians yeah sure go right ahead okay um I have listened to a lot when it comes to the blue aliens mainly from David Wilcock and Corey Goode dole shirt seemed to be the two pushers of this narrative and mind you I I do respect David Wilcock to a fair bit just because he totes a lot about you know ascension the higher being higher self where you know it's like last caller was mentioning about Karma I could respect him about that but when it comes to Corey Goode he's various as a suspicious person he seems to have claim to gone through this secret space program and then somehow miraculously went back in time to be a younger self if I understand it correctly which i think it's just a name but I tend to agree with that general take regarding those individuals I've checked out a lot of I've checked out a lot of work of David Wilcock and he has some good material I think there's a little bit too much open-mindedness to listen to some of the potential experiences that he talks to and kind of takes their information at face value instead of really vetting it enough that's my critique of him but you know the whole thing with any savior element of someone coming to do the work for us coming to rescue us from ourselves or from our own ignorance I really have to leave at the door you know I have to say that's a PSYOP in and of itself anybody telling you that anybody is going to you know improve our own spiritual understanding and get us out of the situation that we have worked ourselves into here on this planet is selling a false bill of goods unfortunately because they know that that's what a lot of people want to hear part of it is um they there many of them are opportunists and sense that if you put a lot of really super positive good feeling like that makes people like you know energized in a positive way and you know happy and and and positive emotional response that people then want to contribute and donate resources to you when you say the hard truth to somebody that to really understand what they're saying you got to look deep long and hard into very uncomfortable places in life most people go screw this guy screw this woman I'm not interested in doing that I want to feel good I want to be entertained I don't want to be told that things are really dark and and are going in a worse direction by the second you know they want to that feel good you know the truth is not here to make us feel good the truth is here to make us be free that is the purpose of discovering the truth not to feel good discovering the truth should make people feel horrified in the modern world where we are at not feel good anybody telling you that the discovery of the truth about the human condition should make you feel good is an absolute out of their mind lunatic but but that belongs in a loony bin okay the truth should make you uncomfortable and it should make you almost depressed unless you you build that you have to build up that spiritual armor against falling into that deep dark depression and again I have to work on that I'm on the verge of that myself I'm a human like anybody else believe me I'm very flawed I have things I got to work on on my personality and I'm telling you I fall into the same things that other people fall into and one of them is I get extremely depressed about the state of things especially where I live most people don't live in cities like this or that listen to the show I guarantee most of my listeners are more rural areas where they met maybe have a little bit more affluent have time to spend on this to listen to it don't have a total you know are living in a total inner-city environment like what I see around here a living here in the middle of Philadelphia and I'm telling you you so you come into urban centers and see how far gone it is how far gone the mindset of people is it's depressing that makes me depressed I'm not immune to that I have to work through that you know so it's the this whole dynamic of you know people in this disclosure movement and ascension movement telling people all these things that they want to hear you know how much more in donations and say you know sales of their merchandise they bring in because people love to have smoke blown up their ass they love to be made all gushy feely happy you know and that's the role that these people that are opportunists like this often play and let me tell you something they're raking it in they're raking it in and it's not really pardon not really part of the great work what are they really talking about ending human slavery and talking about morality and natural law where are they mark even when I was doing some research into this blue alien this secret space programs and everything else these two gentlemen talk about is that when when I look into it it all seems to stem from the late 1800s Early 1900s there's something that I was actually hoping that you could probably speak more depth in about because you are always on key with the occult with secret societies someone and so forth but something again something that you even stressed yourself is that us listeners we have to go back and review your material just go ahead and hit me with that material and if I'm familiar with it I'll elaborate on it and tell you what I think so what it is it's about breakaway societies and this mainly comes from again the late 1800s early hundreds it one thing I've really hit on is I don't know if you know about it but it's the Sonora Aero Club this is from the United States but when I looked into it they were financed by Prussian industrials just realists from back in Europe I believe it's a bit of a tongue twister as well but nimza and YMCA that it's a shorthand name for their national sorry I should I that's a really good now can like that yeah anyways they were Russian industrialist in the late 1800s Early 1900s and of course as we seen as time progressed it what happened in Germany it turned into the National Socialists yes the Nazis is better to say and of course you know all we hear these people tout about is you know UFO secrets the flying saucers that the Nazis created I went to Antarctica all this really you know fantastical stuff but even again when I was doing more more research into it I did see that a lot of this connection comes back to where Sumerian legends and the Indian legends about the you know the edicts and the ninth planet Nibiru right Oh Swan and so forth I mean like as I was doing my research more and more more it looks like it just goes back to where this group the Sonora era Club nimza and these Prussian industrialists where you know at that time a million dollars was a lot of money so these guys from nimza and the snore era Club they spent all their money trying to create free energies and these you know the Manas as they like to call them the flying machines so when I see this and I think back to where you would always talk about secret societies but what about the breakaway societies what about the groups of people that had millions and billions of dollars that have snuck away from Maine Society have gone say to Argentina we all know now that there's a good chance that Hillard did escape and go to Argentina to live out the rest of his life so yeah there's so much there's so many avenues to explore on this I'll give you my general take Nick and I want to thank you for bringing that topic up because it's a very interesting one and it's a very deep one it's a deep rabbit hole to go down that does take an enormous amount of research to cover so regarding the secret society that you're referring to I have heard of it but I do not know a lot of details about it um there are many many occult orders and secret societies that had to do with the creation of Nazi Germany and the subsequent technological research that they went down and the subsequent path of the reimagine Sandri discovery of occult secrets that came out of the ancient world that the Nazis pursued I am going to be covering a lot of this in my presentation that I've been talking about for over a year which is going to be worked up after the an orc adelphia conference and probably delivered in Philadelphia next year sometime which is the occult origins of Nazism and communism and I'm gonna have to be doing a lot of research in these fields to put together for this presentation but um the individuals that you want to look up are the some of the occultists that led to the creation of the Nazi regime like guido von lists Lebon lists and rudolf glower and Lance Laban fells you know and how they twisted and perverted some of the Theosophical philosophy that came before them to come up with their theories on like a Theo zoology and you know the whole race Arianism and Aereo sofy theory so you know that's the first thing the second thing is you have to understand that the SS was actually a secret society within the Nazi Party the NSDAP the National Socialist German Workers Party and inside the SS was another secret society headed by Himmler okay that was referred to as d schwarze son or the black son now within the black son you had a technocrat named Hans Kammler Hans Kammler was the chief technical technologist of the Third Reich and people don't even know about this guy okay he definitely escaped war crimes tribunals disappeared into the the thin into the mist probably ended up in Argentina the amount of wealth that the Nazis took from Europe absolutely came back into other countries and ended up in you know military budgets the military industrial complex operations and intelligence societies within other nations and slowly spread their ideology slowly spread I mean you know you could essentially call the East Coast the Nazi Coast and the West Coast the commie coast you know that's basically how it operates in the United States people don't understand how these religions that's what they are and it's ultimately one religion see people maybe may have listened to Nick's call here and say what does this have to do with Satanism the answer is absolutely everything you know you might have thought I was gonna say absolutely nothing wrong it has absolutely everything to do with Satanism because that's what we're talking about here it's a breakaway civilization within humanity that stems out of the ancient world and the rediscovery of technologies that came from the ancient world and again this goes back into what I refer to as the interference theory of human origins not the intervention theory that's what a lot of ancient alien hypothesis refer to it it's a intervention theory that makes it sound like you're trying to get somebody off of drug bad drugs you know that are messing up their lives we're gonna have an intervention it's for your own good you know that's not what this was folks this is direct interference and the natural progression of the evolution of a species that's what happened here on this planet that's why we're so messed up that's the only thing that can really explain why Humanity is as messed up as it is this isn't just a slow fall out of ancient knowledge that humans had and held so close one what you know at some point in the ancient past it's not just a slow devolving like that that many people insist that it is this is something that it's absolutely operating in a nonhuman realm in the realm of non-human intelligence you know but we have to be discerning about it and understand the difference between the real aspects of that versus conjecture and speculation and things that people want to just make a lot of money off of I'm not here telling you oh we need to look into non-human intelligence because some aliens are sitting out in orbit and ready to come here and save us from ourselves you know only people who want to believe in whoever save your complex and want to believe that like we don't have to do this work for ourselves want to believe that stuff and you know that it makes them all gushy inside and go oh wow this is in hand somebody else has this they got this you know I'm here telling you that all of the work has to be done by us and all this knowledge has to be taken in for us in order to do the work I still hear people say mark isn't there shortcuts to this isn't there a roundabout way of getting there you expect me to read all that you've read you expect me to listen all that you've listened to you expect me to watch all that you've watched yes yes I do expect that if you're going to become enlightened enlightenment happens through knowledge enlightenment isn't just a you know airy-fairy magical flowery spiritual process in the ethers you know that's not what enlightenment means folks enlightenment happens through knowledge through knowledge of self and knowledge of our world we live in most people aren't ready to handle the truth about either one of those dynamics they don't want to hear the truth about themselves and they certainly don't want to hear the horror of what our world has become or how it got that way and like I said I've only ever been censored or attempted to be censored on what on earth is happening poorly at that by talking about where institutional origins came from where the origins of institutional bodies that have grown to be the institution's that they are today came from in the ancient world that's the only time anybody ever hit me with a computer attack okay and when I said look they're trying to block me and knock me off the air you know they're trying to MIT and make the show disjointed so people won't listen to what I'm saying and what it's doing is exactly what I did earlier with posting this stuff on the Church of Satan by showing you that it exactly corroborates what I've said because I know what I'm talking about I have researched so much of it again I'm you know I'm a let a call or talk and I may get up and go get all my disk bags in the other room today and show you how much I've studied and taken in they all write on air here today I think I'm gonna do it okay so you know this is the point people don't understand how much research and data this takes to take in you have to be a hermit and almost be obsessed rabidly obsessed with taking in knowledge about our world and the occult and that's that's the problem yeah I'll have my producer do it go go get take every one of those black bags in here all of them I'll show you what I've amassed over the years and you try to even wrap your mind around and get an idea of we're going to stack them up on this table right here and I'm gonna show you okay instead of doing it another week we're gonna do it right now okay so going back to our Knicks call the breakaway civilization is real and you know what it's called the dark Oh cultists of the world because we are living folks we're not living in a matriarchy or patriarchy we're not living in an oligarchy okay we're not living in any kind of a political hierarchy we are living in a technocratic okk autocracy a technocratic okk autocracy we are ruled by techno sorcerers let me just say that again so it sinks in we are ruled by techno sorcerers here's some this is only some okay turn the camera toward this yeah there we go there's only some I'm gonna start showing you okay let's let's pull these apart right now before we even get continue with callers okay here stack them up stack them up every one of these is full these are bags of disks here get our switch to the other camera the forward camera okay here's bags of disks okay all of these documentary films every one of them 200 over 200 and some odd films in each bag okay and these are just single disks okay on and on and on that's one bag okay here grab another one every one of them okay that one's only half full cuz I'm still filling it here's one that's full here's some audio these are all mp3 files on DVDs and blu-ray discs backed up think about how many mp3 files have to be you have to gather to fill up one blu-ray disc or even a full DVD it's considerable okay on and on it goes over and over okay all mp3 files the whole fucking bag okay and then it goes on and on on and on okay that's how much data I've amassed that's how much of a hermit I lived as for for a decade of my life doing nothing but absorbing absorbing absorbing absorbing absorbing and that's like only a tiny portion of it because I have more backed up on hard drives it's like way over like 25 30 terabytes of data you know and that's what it will take to really become enlightened you know and then people want to say they have started to know that same amount that I've taken in and it's not a this isn't a pissing contest folks I'm just being honest with you I'm just telling you what I did with my life it's all it's almost sick it's almost superhuman that's how much I cared about it though and there's a reason because I got involved I got involved to a point where I said I need to fully understand what I just became involved with in the form of Satanism and dark occultism and to understand the little peak that I got behind the carters of power to the Psychopaths really running this planet and yes indeed they are a breakaway civilization and they are technocratic sorcerers they are a technocratic occult aa cracy we are ruled by techno occult sorcerers you can believe that or not but nothing will make it untrue you know and this is the problem folks the people don't have that grasp of reality because they haven't looked deeply enough into all the data that they need to look into it's out there folks it isn't really covered up it isn't truly occulted people are just dissuaded from looking into it and they stop in the pursuit of that knowledge when they think they figured it out and they figured their ballbag out that's what they figured out you figured out nothing because you haven't gone far enough in knowledge again you know drink deeply or taste not the perience spring you know people think they go into a little bit of research listen to a few podcasts and they have it all figured out most of them don't know their ass from their elbow so Nick thank you for bringing that up I hope that gives you my general take on it I know you know I didn't go very in-depth on that but the breakaway civilization aspect of what some of the researchers that you referred to talking about is accurate regarding their savior aspects of it I wouldn't place too much faith in that I would take it with a heavy dosage of salt and you know I would not really I don't really think it holds much water as far as I'm concerned okay to use some you know typical phrases but it's it's done because many people won popularity instead of telling harsh uncomfortable truths I've never been looking for popularity I'm looking for people who understand the causal factors of what's happening here that has put human beings into the state of slavery which we are in and who have the thick skin and the will to move forward in knowledge and become teachers of natural law and because I understand that is the only way to get out of this state of slavery is to help increase moral behavior which will increase freedom and decrease immoral behavior which will decrease tyranny and slavery if we we haven't understood that from this point in what on earth is happening yet something seriously wrong okay so Nick thank you for that call very interesting let's go to our next caller let's hear from essence of an account essence of an Archon II you are live on what on earth is happening 216 welcome hey thanks for taking my call mark without a doubt alright I got a couple questions and then a ritual that I've noticed that I don't think you touched upon in the past couple weeks so the first one was the other day you mentioned looking into the Whitehall churches Satan material about the I guess you could say dark alchemical wedding yep I was looking in I couldn't really find anything you have any titles or authors yes it's it's harder to find um I cannot think of them right off the top of my head I would have to go into the Ark or some of my archives I have some of their original paper documents that are not even like like actual bound hardbound books or even like paper back bound books they're like binder bound you know like I have stuff like that that came their organization back in the 1990s and into the early 2000s and they're very very very rare you know so um but I can tell you one of the things that they always talked about and put out a lot of you know written material on and that was androgynous aasaiya tea and this is an aspect of the st. Anna fication of our culture that I did not really get into so I want to right off the bat thank you for bringing up the Whitehall Church of Satan and that's out of Whitehall Pennsylvania and and reminding me that this is an aspect that I really didn't get into you know we can connect this all with the unholy feminine presentation I mentioned it last week the satanic epi eugenics agenda okay this is part of the whole Satan ofin of our society is masculine women and feminizing men and again this is no sexist statement here this is talking about what they are doing to human being is how they are manipulating human beings at a hormonal level at the physical level and how they are then epigenetically manipulating human beings at the epigenetic epi' eugenics or what we're if we're really being honest with ourselves or we should call this epidemics this is satanic disk genex because what they are doing is they are setting the sexes against each other they are destroying human sexuality which is extremely important for cohesive bonds between men and women in our society and that's absolutely in the shitter in today's world and they are and drogyn izing both sexes by diminishing a sex drive by taking women and putting more of a masculine aspect and quality into their genetics and personality chemically and they are feminizing men in the same way because they know the more they can break down social cohesion between men and women the more they have society on lock the more they can control people's behavior they can control their mindset and their behavior they know this they've studied this for thousands of years they know exactly what they're doing they talked about it very openly talked about it openly in their documents I don't know maybe um if my producer wants to go downstairs and my small you know shelf library that I have down in my living room ask try to find it or ask Leah to find the books from the Whitehall Church of Satan there's a couple of them down there there one of them is orange it's bound it's a it's a black bound orange book and then there's a red one if you can find them bring them up I mean you know we'll do this on the fly folks you know a it's a live show anything can happen today let's let's just do some you know off-the-cuff you know spontaneous shit today okay so um you know let's see if he can find him and he's gonna come back up I don't know if they're even here but we'll see because a lot of my books are still back at Barb's house cuz when barb and I were together I basically kept my library there because I don't have the space to keep all the books here and I don't want to put him in boxes so they're on shelves at Barb's house and she's you know keeping them in trust for me which is fine she does a good job doing that but I don't have most of my library present right here right now where I live but I think I might have those books here because I think I may have recently lent them to a good friend and he I think he just gave them back to me so I think they're here but I'm not positive so we'll see but I don't know what that's what that's what people have to do you got a hunt down material like this and guess what they're making it harder to do my friend that censorships making it harder to do that's why I sites like conspiracy central you know concen or yeah I've got a few things off there since you people got to know how to use BitTorrent you know you got to do an end run around these technocrats you know because they're they're changing the algorithms they're making searches harder to come by to find material that if it's not in there whole narrative they don't want you searching and finding it you got to get off this the traditional search engines like Google and Yahoo and all that you got to get alternative search engines you know use DuckDuckGo or or you know at least something that doesn't track you like start page or some you there's not many really great ones you know but there's some out there that are at least alternatives to the type of tracking and censorship that Google is doing and you know some people still use Google but you know they're really making a headway to try to pull this material like you look on YouTube certain searches they will give you know related videos anymore related oh yeah they pull the related searches and you get one video on it and then you got to do a new search to get another and if you don't know the name where the researcher specifically or the title specifically they're not gonna make it available in the related searches that's how their that's how they're modifying these algorithms and that's how they're censoring this data so you know get on sites like concen org conc en org conspiracy central org I mean it's uh you know it's and learn how to use BitTorrent you know learn how to use BitTorrent folks it's it's the one thing they really can't censor that's the same technology that you know Bitcoin is based on you know that's why it's called Bitcoin it's based on the BitTorrent techni underlying technology and uh you know people have to learn about it and start utilizing it they can't really censor that it's practically unsensible so that's one way to go but yeah you can continue I think my producer still down there looking for them if he finds them all I'll put them on the air ok yeah I did find that satanic witch and that seemed like I was gonna talk about that sort of thing that I was gonna finish up the chemical wedding at Christian Rosen crude some in I'm doing that one right that's good alchemical tome so and that's higher-level occultism that yeah it seems pretty good yeah that's light occultism for sure that's also material people should delve into don't just look at the dark side of this folks you know there's an opposite side of all of this the occult is not just satanic and evil and bad we have to keep that in mind you know there's a flip side to this where there's powerful true spiritual teachings contained in light occult works now you know and they've been perverted in turn you know to this dark aspect that's all this satanic element can do it can't create it doesn't create all it does is take something that's already been created that is there for human benefit and it twists it it distorts it it perverts it and it inverts it you know that's their only dynamic that they can do they can't really create anything of their own that stands for all time and and and you know really goes off into the future and creates a legacy all they can do is twist and pervert what's already there toward their ends and Eames that's it and their agendas yeah that those aren't it no that no no so look underneath the end table where the light that the lamp is at I think they might be under there underneath the end table they are binders they have a black plastic binding that looks like when if you go to Staples and you buying something they have that and their short look they're like this tall they're not big big books like that they're short okay so if you can find them bring them up okay so continue anything else you want to yeah yeah things when you were when they approached you to join the Church of Satan after they initiated you as a priest did they give you any kind of priest school or training or did they just assume that you're new enough to fill their agenda they had very extensive psychological profiling in their joining process I've been through this in the presentation called demystifying the occult part to Satanism and the dark occult where they actually make you write sa long answers to questions that are deep probing psychological questions about your background and your mentality and your psychological makeup and your personality characteristics and preferences and in doing that they really have a whole psychological profile on you as an individual in addition to that I put out a lot of writings through fanzines yeah and that there were little small works that people would put out through the music community that you'd get in like corner stores or you know record stores back in the day they were called fanzines just look them up you'll see scans of them in pictures of them and I wrote for a lot of fanzines that dealt with the occult and death metal and black metal and things like that and I wrote articles on Satanism in a lot of these and my work was my work as an author in some of these was noted and noticed by Anton LaVey that's how he sort of I guess vetted me that I knew what I was talking about regarding the Satanic ideology and he wanted me to head a grotto in the Philadelphia area that's what they call their covens and he put out on the table through personal correspondence with me the offer to head a grotto in Philadelphia which I subsequently declined so we can't find those I'll have to go look for them myself and maybe either you know scan them and post them you know or see if I can find them but they're difficult they're difficult to find they may not be scanned digitally online the work from the Whitehall Church of Satan you'll probably only find some mentions of that organization because they don't have a big internet presence to the best of my knowledge yeah I was having a hard time even finding reference to the right right you might be able to find let's see let's uh let me do it live with you right in real time here let's cut over to my web browser and I'll try to search the person's name who ran it was Jay Solomon but he reversed the letters of his name and he went by I'm sorry Yash no malice so why AJ which is Jay backwards and no malice which was Solomon backwards and let's just search for a PDF on that so yep so here's one satanic rites and ceremonies by yeah this is the book that I own right here and this is what we were looking for it's called satanic rites and ceremonies by Reverend yoj no malice it was up on eBay someone was selling a copy and it's not there so you know so let's see if this links to a PDF no that links to eBay see someone was selling this we make this bigger so I could show you the graphic here I don't know if you can you're on discord so you may not be able to see that but that's one of the books that we're talking about and it was from left hand books left hand path ebooks.com I'm not familiar with that and they're all the links are taking you to an eBay site which was obviously an item that people were selling but yeah this is it you know his shop in a tiny basement in Allentown Allentown is just outside of Whitehall so you know that's he had a little shop there I went to it many many times there he is right there that's that was the head of the Whitehall Church of Satan J Solomon alright so you know there is some some stuff out there it can be hard to find you have to know what to search for you ever know the actual terms to put in so you know obviously this was a copy of that you're seeing what I was talking about it was a short red book what with a red reddish orange cover with a black binding in plastic this is the type of just underground material that they put out about you know their take on Satanism and it's slightly different than the Church of Satan's take because this is a you know it's a different faction or sect and they really pushed and drogyny heavily in this particular group and it's probably came down from higher-ups you know because this is what the globalists are trying to do this is what the social engineers of our society have worked for for decades now and you just won't know I you know I say this all the time I walk out my door and see this I don't know what other people say when they go out and they're you know I think most people live in like more isolated rural communities where they don't have a lot of neighbors they have a lot of space they have garages that they drive their cars back to at night you know I come back from a grueling day doing something doing works on place I try to park my car I got to drive around my neighborhood for like 35 40 minutes to find a damn parking spot that's how compact everything is here in Philadelphia and we live on top of each other it's like caged animals living on top of each other you can't park your car I walk six seven blocks to get back to my house when I parked my car someplace that's how you know at a premium just pop regular parking spot every day is in this neighborhood that's how you know dense the population has become in Philadelphia you know yeah I lived in a city for a few months many years ago and I don't think I'd like to do it again it's it's really shit it's real really shit especially here I mean you know I want to try I say I have a love-hate relationship with Philadelphia but honestly it's mostly a hate relationship you know it's it's really degraded I would give anything for it to go back the way it used to be back in the 80s and even early 90s because it was a much better city to live in and now it's a communist town it's the Communists have taken this place communism outright communism okay it's entrenched in the in the whole government of the city it's entrenched in the whole culture of the city it's people with their heads jammed so far up their assholes that are never gonna get them out you know it's bad it's really really bad worse than whatever people are thinking who aren't from here it's worse than what you think okay I'm not even doing it justice okay and you know this is part of what drove it go switch back to the computer you know like organizations like this this is the kind of stuff that drove it you know these people know what they're doing they're social engineers folks they know what they're doing these people are working maybe not exactly this organization I'm talking about Satanism in general they're working with social engineers intelligent societies think tanks they are pushing society toward their ends toward their agendas toward their goals without people knowing there are people who are involved it'll say no that's not what's happening and they themselves don't know they're being used as useful fucking fools and dupes the that are acting on instructions that it can have come down from on high from from a high level dark occult sorcerers and technocrats and social engineers and think tanks that they've never heard of this isn't something that it just goes like I'm gonna tell you to do it then you're gonna do it you're gonna pass on the order it doesn't work like that folks this is mental and psychological and spiritual manipulation of the highest order this is mind controlled dynamics mind controlled dialectics social engineering subtle mental influence mental influence through media that's put out that smells like a virus yeah I'm sorry go ahead oh yeah that's the best way to do it because people aren't gonna realize it unless they're aware which most people aren't covert control was always going to be much more effective than overt control over control what are you gonna do you're gonna say listen I'm the master of the world and I want to rule everybody and I want to make them my slaves I'm gonna subjugate them as my slaves you're gonna get on board with that agenda and help me do it what do you think kid we're gonna go yeah sure let's go let's have enslave everyone including me as your dumb dupe that's not how it works ladies and gentlemen that's not what Satan is and that's not how Satanism works you know the idea of the greatest trick the devil ever pulled was to make people believe he didn't exist these people want to remain hidden occult 'add in the shadows they don't want you understanding their agenda they don't want to go understanding their methodologies their goals the ways that they work they want to do subtle occult it influence in society and they're very effective at it they know what they're doing because they are ancient psychological masters at work that have the knowledge of all of the ancient mystery traditions in hand and they know that the dumb bag of shit public knows nothing knows less than nothing believes that they know what any of this stuff is believes that they know what's going on has an erroneous belief about it and his ego attached to that erroneous belief negative knowledge and they know that that's exactly where they got people and they got him by the balls they got this society by the balls and look again I am NOT trying to tell people that essence of anarchy our caller and and viewers to discourage you and make you depressed I have to say the way that it is I lie to my viewing audience and tell you this is all turning around Trump's got this the blue avians got this you know the or the Arcturians are on their way I can't lie to you about it I can't say everybody's getting it they get what real anarchy is they get what real Satanism is they know that the problem is moral relativism and believing rights come from human beings we don't get it most people don't get it in the documentary we're putting together we're gonna show you how people are dumb bags of shit on the street total bags of dumb dog shit for a brain uh-huh I'm sorry I have to say it that way to my viewing audience I have to I would feel like I am doing people a tremendous spiritual disservice not to just come out and say it that way I feel like I did do a tremendous spiritual disservice for many years by should by in my opinion sugarcoating it other people still can't even handle my sugar-coated version of my delivery which I gave for many years leading up to this current format which I can't do it anymore I can't as I've gotten older I've gotten less tolerant to ignorance and I think we all should be at that level of no tolerance for ignorant because ignorance is evil and we shouldn't have tolerance for evil and I'm done letting people who are ignorant pablum spouting nonsense just drooling nonsense out of their mouths every time they open their mouth go unchallenged I'm not doing it anymore I'm going to say in plain street language what I think of people who are that ignorant because they're killing the rest of us they are that see they're ignorant is our enslavement that's what our our viewing audience must realize you Ehlers brother and sister on this planet that that's your average dumb human being they're ignorant is your enslavement and my enslavement and if we allow that ignorance to just go unchallenged and say I don't give a shit what they think or or believe and you don't answer and confront and say you are incorrect that is wrong it is immutably true that that is incorrect and you have a false belief about that that is not how it works and I am NOT going to let you go eclis just spout that out to other people in my presence unchallenged see people don't want to be confrontational what they do is they go I don't want to start an issue I'm just gonna let that go I'm not gonna say anything and that's what we do over and over again in society because we don't have the courage to say to another human being you don't know what you're talking about and you're wrong because we know that could potentially lead to confrontation physically possibly not just verbally but it might get physical wellin really that's the best part or the best time to do the great work it seems like because in your head people that have never even heard of this sort of thing before as opposed to people that are seeking it out that's right that's right I'm not backing down I don't care if someone wants to try to take a shot at me go do your best good luck good luck because guess what you'll be answered with a 45 ACP you know after I'm if I'm have to after I'm done using my hands okay like I'm not taking your bullshit unchallenged physically I'm not gonna take it verbally either I'm gonna say what I know you know and and I don't care what people think so this is the problem is we let people get away with ignorance without answering it with knowledge with truth and then truth becomes watered down and diminished over the years over the decades over the centuries and we end up where we're at now in a total slavery situation that's probably going to require a physical rebellion to even possibly have a chance to solve it more likely than not which is going to have to come America because the rest of the damn world has been D bald you know they've been defanged and D bald by having their rights taken away from him the form of self-defense of arms you know so it's gonna fall in our lap and we're gonna have to do it for other people you want to look folks you want to look to a savior they're the only possible savior of humanity right now is America as sad as that sounds because guess what when it if it goes hot and becomes physical we're gonna be the only ones that can get the job done nobody else is coming to help us you know not one other person's coming to help not one other nations gonna come to help you know so all the shit other nations want to say about America this is still the most conscious nation in the world and it's still the most armed okay and that's a sad sad truth to have to speak to have to verbalize are allowed you know when you see we're the consciousness of other places is that because they don't even understand the self-defense principle okay and they're still totally ensconced in socialism and outright communism throughout the rest of the world if there's going to be any savior of humanity it's gonna be the people of America rising up and the rest of the world's like sitting on their fucking hands waiting for that to happen you know then this is what I'm trying to foment you know straight up I want to do with to consciousness folks but guess what if it can't get done through consciousness let it be done by any means necessary so well in the fervor month my last point if I'm a true say kind of ritual that I'd noticed really relates into all that stuff you just said I mean in the media you see so many satanic rituals from the news to sports you know the divide and conquer but the one of the biggest ones it seems like lately is the reality TV and you hear people a lot say and all reality TV is not based in reality but that doesn't even seem like the point of reality TV they're trying to use this as a satanic ritual to summon the reality that the I guess de loominatee if you want to call of that are trying to turn the world into just world full of idiots that are only concerned with hedonism and if you look at them one of the first reality TV shows was cops she's supposed to watch these cops just trample all over everyone's right for things like putting substances in their own body and not even hurt anybody in there you're supposed to cheer oh yeah tackle that guy tase him so reality TV that seems to make it big without a doubt I mean that's something I didn't get to I I really appreciate you bringing that up as a point you know I could have talked a lot about the overt satanic rituals that take place in sporting events that they trot out in front of people or at music award shows or Hollywood award shows they do rituals right they're out in the open that are somewhat subtle that you have to read into a little bit but there are rituals nonetheless can you cut back over to the computer real quick I want to just let essence of Anarchy know I did find it's a site called the hermetic library blog you can check that out there's another book here from the Whitehall Church of Satan that's called the Magic Circle it's successful organization and leadership by yashna Melos and this is about how to organize the Satanic grotto as he sees it so they put out field manuals on this stuff you know it's all out there folks they're all too happy they're recruiting people like this it's oh they're all too happy to tell you how they work you know cuz they're there they want there's two fields of thought there's two schools of thought when it comes to how the Satanists and darker cultists and high-level Luciferians dark Luciferians really want to operate in the world and the the television series allegory that that paralleled this these two schools of thought was true blood as hokey and like you know be TV series as it was I highly recommend people to watch the series True Blood okay which was about vampires because it is talking about the Satanic hierarchy in the world you have to replace vampire with the modern ruling satanic ruling class okay and the discussion and subsequent war that breaks out between the vampire factions is between those who want to stay covert and rule humanity and feed upon humanity from the shadows goes to war what who they called the mainstreaming vampires the mainstreamers as they call them that wanted what is called in the occult world the externalization of the hierarchy of Satanism in the world of of the rulership of human beings they want that taken out of the shadows and they want it they want the agenda minute manipulated and brought forward at such a pace that they can openly say we are your kings we are your masters like they did in the ancient world they wanted to go back to neo feudalism they wanted to go back to a feudal society where the king is the unquestioned ruler and everybody knows that's the king he is the dictator who rules over all of us like they've done in North Korea that's the building block that's the template okay that's the template for the rest of the world is North Korea where a god-king rules their society and dictates every element of life in you if you disobey you die their henchmen just kill you okay if you do with it that what the god-king doesn't want you to do and just look at that just study that studying North Korea just look at the kind of Sikh religious shit that is their government that's what they want to bring here that's the New World Order folks that's the dark New World Order believe it know it and the Satanists who really are trying to bring that forward the dark occultist they want what Alice Bailey and the Theosophical order referred to as the external ization of the hierarchy read about that term okay and that's what they're doing this is a process that started you know over a century ago and they're moving I would say a couple of centuries ago and they're now moving at a breakneck pace and people are still asleep at the switch and can't see it unfortunately this material is out there okay um I will try at something look I'm getting ready at some point to start really digitizing some stuff that I know isn't out there and believe me there's a lot that I know is not digitized that needs to be digitized rare stuff okay I mean rare stuff on how intelligence works real rare stuff on how the occult works rare stuff on how organized crime is connected in with this like there's a lot of books in the pipeline that I want to scan I want to digitize I bought a document scanner actually it was a you know donation - what on earth is happening you know and I just want to say thank you to everyone who is technologically donated through the Amazon wish list that's like one of the best ways anybody can make a donation okay thank you to everybody who's donated to this effort in whatever way that you have but particularly the technological donations help a lot okay and somebody got a document scanner for us and it's a fast Epson document scanner it's badass okay and you know this can scan a whole book in like a few minutes you know and then I can run it through a optical character character recognition software make it an ePub or or a high-quality PDF you know so I really want to do it with stuff like this I have to go through my library and pull some stuff for digitization that I know has not been digitized so essence of anarchy thank you so much for the call and tapping folks I'll check into those resources you got it and I just got my in Arkadelphia tickets so I'll see you there I'd love to meet you there in person and listen if you do find any of these resources that you're talking about online upload them to conspiracy central you just seed that torrent for a little while get it out there you know that's one of the best ways you can share rare information like this and it is quite rare so great call thank you all right dr. lett if you got it all right let's go to Shaun McCann Shaun you're live on what on earth is happening welcome my friend hi there mark I wanted to bring up something that definitely belongs in this list that you've done in the last two episodes go right on I'd like to say circumcision there's a there's a big one that I missed thank you yeah thank you it it isn't is an ancient trauma-based mind control ritual designed to harm the child and to literally manufacture a slave like highly aggressive order follower without it are that's exactly what it is folks this is is a satanic dramatization of the young as soon as they come into the world that's exactly what it is right and it it it the the bond between mother and child gets broken because the the mother neglects her duty to protect the child and gives him away to the dark cultists you got it just just like the ancient you know the sacrifice to Moloch the parents would willingly give their children to be sacrificed to the Carthaginian High Priest Satanists of that culture and they'd put them in the the huge burners you know and now yeah that's that's what the whole concept of what was that movie that came out about the what's his name Nicholas Cage I think was in it I'll think of it was a recent was it that Mandy there's two versions of it there's a modern version they put him in oh yeah yeah bad bad lieutenant no no no it's like a stage with a new bad lieutenant it might not be caged I think it might be I'm not really sure but basically they it's a same kind of a satanic Society and he ends up being ritually sacrificed Oh wicker man wicker man there's two versions Oh that's about that's a Miss Isabel exactly like they I mean it was he willingly gave himself you know I mean he volunteered to be their sacrifice right right and if you if you look into the psychological effects of circumcision like the actual nuts and bolts of it it uh I mean it causes intimacy issues that's right it and it it spikes cortisol it it causes here it actually it's an attack on the synapse point between man and woman the actual point of contact between the male and the feminine is at men at exactly it's attacked and they I mean that's where creation is that's the combination of man and female and that that is basically severed I think how it like how deep can you get with that they know what they are doing at all levels this is what I try trying to explain to people for decades they know what they are doing they know everything there is to know about us they know how we work physically they know how we work emotionally they know how we work mentally and they know how to diminish all of those aspects of the individual you know and they're doing it they don't talk about it these people are talkers they're not visualizers and talkers and be like oh we're gonna get to doing that they lay out a plan they work together as one as one mind they call it a mastermind all getting on the same page what are we doing are we all on the same page that there's the freedom movement the anarchy movement this is it does it constitute a mastermind or is it all over the fucking place and a Miller scattered in a million different directions and anything but unified you know what yours aren't like that they're very unified and all one Accord in what they are doing in their agenda they might have some skirmishes here and there when it gets into really big levels of power let me tell you something at the society at the societal level that interfaces with the rest of the slaves these people are all on the same page and they know exactly what they're doing right yeah and they they they infect our minds so that we can't even all right not even the family can be on the same page you know what I mean the woman might want to save her child from that abuse and the father says oh I want it done because I want look like me and it's as if the father has been he doesn't want to look at the trauma that he endured and as like a risk as a protection for his own sanity he's gonna give his son the same torture so that he doesn't have to look at the fact that he was tortured himself diabolical just think about how many ways we're offering up our own children to the this whole satanic medical system because of the beliefs that are entrenched in our culture through circumcision through vaccination you know then through the eye the diet the children are are given in fed that totally destroys their brain you know lack they eat they tell mothers not to breastfeed and they try to give them Similac instead boy yeah it's disgusting well that's a fantastic point that I very much had an oversight to leave out there I really should have put that in the formal presentation but I want to thank you for bringing it up and I just want to say that you seem very well researched in this topic maybe I should do a presentation a formal presentation on it and deliver that either you know through YouTube if you ever need help with like you know presentation software you know just tips on it I'll just show you some basics of that and you could pick up a learn run with it you know what I mean oh my god I would love that if people are at that level of I mean that's why I need to put a seminar together about this we need a technological seminar okay you know there are people who know way more about like you know web technologies and programming than I ever will okay but I know the basics enough to get things out there and you got to know your basics of presentation software of graphics programs you know ROI effects manipulation audio editing video editing and then when you know those basics right you could put all that together you can get a nice polished presentation out there with good quality information because you know your stuff it's not a matter ID not knowing your stuff it's a matter of you've got to get some technological background under your your belt and then you might be able to put this stuff out there yourself so that's why we got to do a how to become the new media by learning basic technologies seminar you know and get other people here you know I'll be I mean if I could be there in person I don't know but uh but I mean if are you gonna put it online or are you gonna I might do it like a webinar session I've read I've kicked around the idea of just doing it for donations for free here in my home today bring it bring in a few people over every week that can at least travel here can you know once a week and doing like you know four or five hour you know you know teaching session and interactive teaching session right here in my home that'd be great I have to work something up because I the need for it is so great and yet the implementation of it in our society is negligible like we really need to move further toward understanding how to use the tools that are out there for us to use and very little people are using them what they're doing is they're continuing to argue on Facebook which is not going to change people's minds and it's not a forum for accurate deep learning going it refused to yeah going to there were these things in the past folks I believe it or not I know you may not believe that this is true but you know what in the not-too-distant past there was these things called websites individuals made these things they made their own places on the Internet where they published their content for people's consideration that's like called exercising your First Amendment right of freedom of speech which is a natural right that's supposed to be protected by the First Amendment okay guaranteed not to be infringed upon even though it is in our modern world but believe it or not you had these things called websites out there that were little nodes or little personal home sites for people on the net where they could put their own material not owned by big some big mega corporate conglomerate called Facebook or Google or Apple right if they disagree with one thing you say goodbye to your post you know that's not your place you think your Facebook pages your pace place on online on the Internet you don't have people don't have a presence online you have to have a place where a rolling rolodex of sort or a blog of your content that you have created is available for all time I'm building my hook my library took my YouTube channel down my podcast would still be up because it's my own site and every actual podcast and the XML feed that I publish weekly is on my own website so even if every single thing not the videos would have to be updated but every podcast would still be up they'd have to come after the actual domain which it's gonna be a much harder job than just saying no we don't like what you did on YouTube were we're bad because they don't own the domain you own the domain right right so you know this is what I just encourage people to do you have to learn how to get a domain to get web hosting to put your own site on it we need way more independent voices in that regard and people making good high-quality presentations with good material like this and I'm telling you man I can tell you would you'd do it you would do it well you just got to step in and rub it into that realm okay I will I plan on it I'm working on my my you know I have a number of podcasts under my belt that I've done with others who awesome you know I'm scheduled next year in May to be at the seed for nice event here in Ohio I'm a knitter the potential of possibly being a part of that if Brandon wants that that's something that we have to discuss and see you know what's gonna happen regarding that because I've seen that that has been announced and I really think that the work that that those gentlemen at at skatopia have done is very impressive so I agree you know if they perhaps want me to be a part of that I may you know take them up on that offer we looked around the idea a little bit maybe we'll make happen well I'd love for you to join me there that's great I plan on giving a talk about Lolita and Eyes Wide Shut and how it's about trauma-based mind control and monarch program fantastic that's another thing I have to expound upon that I haven't really gotten to yet is pizza gate you know I need to just go really deep into that stuff because I could explain it from a perspective that a lot of people don't have and having not been involved directly with these Psychopaths you know and uh right that that's what people have to understand like you know this whole thing with Epstein you know this is not unexpected to me I'm sitting back on it's about time you know really I've been waiting for this for like over a decade or more you know I've been talking about this for over a decade you know yeah like this is people are going oh this is so so shocking I'm like I hear this stuff and go yeah and like it goes way beyond this this is scratching this is scratching the tiniest of the surface of the surface of what really goes on you know it was like there at one of their mid-range puppets being thrown under the bus you have no idea how high this goes you know this goes up to the highest Carter's of government and beyond this goes on religious sector you know and it people have to understand this is what the occult is and this is what how they this is their monetary system their monetary system is the trafficking of small children slavery yeah direct slavery it's disgusting and Kubrick knew about it he tried to show us in a you know esoteric way that's ring and I want to I want to reveal that and I've got a whole lot of information I've been really digging in tough the movie Eyes Wide Shut is that book is a book in and of itself yes you know yes he was everything alchemical filmmaker you know right this guy did alchemy with his film production it's amazing you know I agree yeah I know you know Widener's work on it jy debate on fantastic work regarding the films of Stanley Kubrick I highly suggest people check all that work out I agree yeah Jay Wagner has some of the these are like pretty tough to swallow but once you see the film and you know what I mean you listen to where he's like the points that he's talking about it makes plausible sense you know a lot of it like the moon landing things that uh Kubrick's Odyssey the film that he did um it's pretty in-depth and I recommend people listen to it as well absolutely I agree and I recommend those films as well well some I'm actually on my work break and I really appreciate you taking my call and I thank you Mark it's not a doubt concern always good to hear from you thank you so much for the call also fantastic points that Sean brought up especially in regards to male circumcision in our society and that's a huge oversight on my part that I really should have covered in the main presentation topic so thanks for bringing up that you know oversight on my part Sean all right let's see who else do we have here let's go - lets go - Aries Aries you are live on what on earth is happening episode number 216 the call-in show on our entire society being one big satanic ritual welcome to the show hey Mark can you hear me yes I can coming in loud and clear okay thank you it's Andrew from Germany calling in great so first of all thank you for your work I have to say you're the only YouTube you I know in the whole youtubing word that does this kind of work on natural law and they all called this of course some people libertarians doing the work but not as profound as as you and I'm really grateful and really thank you for that first that means a lot to me thank you okay um first I want to have sorry I wanna ask a question regarding natural law sure go right ahead because when I teach people or talk to people about natural law and morality in karma sometimes I ask myself how do people get punished you know from the universe or God like people doing bad things like raping killing all sorts of wrong doings so in your opinion do they get the the consequentials or the consequences of their behavior in this life or how does it really work and do you see that in your personal surroundings or some other people my answer to that is it's more complex than if you do something wrong an anvil falls from the sky like in a cartoon okay it's a very complex dynamic that pervades throughout all of society so because some people will experience the negative result of immoral behavior in the physical lifetime that they live some will not okay some if they are allowed to continuously get away with it because of corruption and ignorance in society as happens with government and police and military the negative consequences will go to all of the rest of society that allows the immoral behavior to continue people don't understand that this dynamic of karma is in effect and that's how it really works see they say why does why do bad people get away with bad behavior if a cop does something really bad and then they cut their fellow police officers cover it up what's happening to them that's going to generate their consequence and and and enact negative karma upon them it doesn't necessarily happen to the individual that conducts it in this lifetime sometimes the negative effect spreads out to all of society in the aggregate because we have put this institutional process and hierarchy and whole institution in effect and allowed it to continue to get away with its corruption and violence without stopping it see this is what people don't want to hear how karma works they want to think Karma's just Oh an individual did something wrong and the individual immediately has the bad consequences and it manifests is very fast in their own lives in the physical world and that's not how it works folks the dynamic is way more complex than that okay and that the easy answer for somebody to swallow would be that's just how it works it doesn't work like that okay we have put the system of slavery in place collectively and we collectively reap the negative consequence of that system that we allow to stay in place through our fear and inaction no one wants to hear that no one wants to hear that that's how karma works that that's how natural law works natural law is always operating in the aggregate we have to see karma as an aggregate response in the human condition infinitely more so than just an individual response see people are hung up on the individual response of natural law in our lives right that's the part they want to hear because why that's what they've been told that it will how it works they've been told that through Hollywood they've been told that through depictions of how karma works and they've been told that through false spiritual teachings about how it works they don't want to hear the complexities of it and they don't want to hear the aggregate nature of it meaning how does it work on a collective scale the cop who kicks a woman in the back of the head and gives her brain damage doesn't necessarily automatically lose his job lose all of his friends get divorced from his wife loses money loses house and live destitute for the rest of his life it's not how it works he might keep doing that and and his members of his thin blue line cult might keep covering up his crimes as a psychopath and he might get away with it and die not never having those consequences but where are they going you know where they're going all throughout everybody else in society creating a whole world of slavery that's how that karma manifests why because the vast bulk of the majority of human beings on this planet think that the whole system that that individual is involved with is just perfectly fine dandy and moral and should be allowed to continue without stopping it perfectly fine so what's gonna happen is the whole universe looks at the aggregate morality not just an individual behavior oh yeah you do individual bad behaviors more likely than not it's gonna catch up with you even in this lifetime it can happen like that but it doesn't have to happen like that the more shield that an institution is from karma being visited upon it in the physical world through the behavior of people which is what government does which is what the occultists do which is what the police and military do the harder it is for individual karmic consequence to be visited directly upon the individuals doing it what happens is because we don't overcome our fear and physically stop it physically stop those behaviors from being done by force karma gets diffused and natural law consequences get visited in the aggregate collectively on all the people of the society who are allowing that behavior to institutionally continue does that clarify the point of how natural law really functions in the aggregate in a wider sense in our society yes yeah so you're saying that your or we are all co-creating the reality we are co-creating the karmak consequential results that all of humanity receives collectively through our individual immoral or moral decision-making and then our subsequent behavioral act actualizations of our behavior based on our decision-making and if our decision-making comes from a place of cowardice and fear and we don't stop evil people from doing bad things to other people in the world that they have no right to do even if it is the government the military the police the karmic consequence all of society through things called tyranny and slavery which is exactly what has occurred no belief required it's not a magical process we collectively reap the fruits of the behaviors that we collectively so that is how natural law works we get hung up on this Hollywood eyes the definition of Karma and this like boo this like false fake-ass Buddhist variant of karma of just being individual things that happen to people very quickly after we do a behavior it doesn't work like that it's infinitely more complex infinitely more diffused and working over the aggregate of humanity far more than over the individual the individual is still going to receive consequence whether in this lifetime or whatever domain or you know um a parallel dimension that our consciousness you know travels to upon physical death or other form of consciousness that it transmutes and becomes upon the the relinquishes the physical body the physical vehicle but we are not going to escape those consequences even at an individual level one way or another but nonetheless in the human domain as a species on this collective species level that karma gets diffused and the consequences get manifested for all people because we are all allowing that evil to continue largely unchallenged because of our fear and cowardice so I hope that answers and clarifies that question yes thank you you're welcome anything else while I have you on the line just in a quick opinion on on Europe from your side because I heard you you're planning on making a presentation about the origin of Nazism and communism yes and if you follow the current politics in Germany and Europe it's going exactly this way it used to be 80 years ago so it makes America look like we're run by angels I mean it that's how it's you guys aren't a whole lot horrible because yeah and I I feel for you guys you know it's like you know people go why do you live where you're at you know because unfortunately it may be a lot better than other where other places around sadly and I thought like I said that hurts my heart to say that but I'm telling you like the people in Europe have to stand up like on a unified front and confront this and deal with it seriously I mean you guys may literally have to rush it you know the proverbial swords at some point like yeah almost unarmed just in massive numbers like that's what it may take over there here we're gonna be in a better position because we have battle arms you know you guys have been stripped of all that largely I mean not all of you but the vast majority here the average gun owner in America owns eight weapons eight of some type of projectile weaponry in the form of some type of gun the average number of legal legal weapons in Germany for example is about 10 million so if you have 80 minutes of happiness there's well over 400 to 450 million here and that's probably a very understated estimate because there's that's what they know about you know it goes way beyond that that'll never change as a matter of fact more and more pouring in everyday and thank God for it thank the creator of the universe for you want to talk to say that's violence no it isn't now conducting self-defense against tyranny and preparing for that has nothing to do with violence that's called being truly enlightened as to what may be needed up be done with tyrants you know the old phrase 6i6 Semper Tyrannis you know always this way with tyrants they don't back down until they're put down unfortunately what I want to say is for the population to awaken like the sleeping lion that it really is and to say no we're not going to deal with it and we're going to stop you from doing what you're doing and we're gonna awaken in consciousness and do this the right way instead of having to do it through the physical route that's how I prefer to see it you know I'm not pushing for war people go you're trying to push for war no I'm not I'm trying to explain to you how hellish war is and that it should be averted when it can be averted but there are times in places where you've exhausted all other options and then it has to go hot and physical unfortunately that's very unfortunate we should never let it get to that point but we're letting it get there I'm telling you and when it happens Europe's gonna be in a bad place you guys are gonna be in a really really bad situation yes it's gonna be bad here in America but I'll tell you what we're not gonna we're not gonna fall upon the knives the way you guys are gonna have to yeah you can definitely see like I'm currently reading a book called the United States of Europe and it's telling how the Nazis were already planning during the early 1930s how the European Union looks like and it it is exactly this way that's right they were running those whole strategic plans and objectives out of Evil's burg were - wart son that inner core occult Society of the inner core of the SS of the Nazi Party was run out of you know Heinrich Himmler you know at Viva berg was planning the entire New World Order as the Germans even called it you know they were planning that vivos Berg was going to be the capital of the world the center of the whole new Nazi regime you know I mean that this is what's really going on except now it's largely being run out of Brussels and and London you know it's and really it's all coming out of room you know you don't think that the Vatican is all connected to this you're totally asleep you know you know they see themselves as you know the keepers of the whole planet the Vicar of Christ those who own the planet and all of its people this is all coming out of the old religion you know the old religion just morphed into the new religion people aren't buying the old religious bullshit morph it into a new piece of religious bullshit cult and call it government and get everybody bowing down to it worshipping it and given their children over to it that's what this whole society is one big satanic ancient old world religion ritual and people are none the wiser to it because they have no idea what real Satanism is you know some are wise enough some are listening there some are listening attentively but it's a paltry number it's we got it we got a the people who do understand are not doing their jobs for the amount of years I've been doing this there should be when you went when you say my friend Andrew I'm sorry was your name again yes okay when you say to me that I'm one of the people on YouTube doing this at the highest level I get a a sinking sick feeling in my stomach when I hear I I appreciate it I I just like I accept it as a compliment and I I very much respect you for saying that to me but the fact that that is the case makes my heart sick okay because there should be I should be a small player in this right I should not be the number one person doing this type of work I should be one in a million people worldwide doing this work by this point and my work should be considered like oh that's that's low that's candy-ass tough compared to like how really people should take this as far as the research the presentation the production quality this is rinky-dink shit as far as I'm concerned we're operate on a shoestring budget with volunteers because we'd only can't even make the amount of donations to pay people that's what people think of this that's how much they value it that's how much it's valued worldwide you know I only in the last year was able to make like one third of the salary yearly that I made when I had a quote regular job that's thinking about living on that type of budget a third try to cut your your paycheck in a third and live on that and then still do this this is what I've sacrificed to do this shit you know there should be a million people at the level of knowledge that I am doing the great work like this and far beyond and for you to say I'm the person that you consider doing it the best I so appreciate the comment my friend but it's that's a horrifying thought to me so that's what I'm trying to encourage people you got to get involved you got to learn the technology you know if you don't understand how basic communications technology works in the modern world you can't do this and get it out there for people you're not gonna just talk to the people on your street corner and change the world you've got to put your voice out there publicly with no apologies and with no fear use your own name you'll need to make up a pseudonym Maine tell these people I'm not afraid of you this is my name I'm gonna speak I'm gonna speak truth you're not gonna stop me you're not you're not gonna stop me until you put me in the ground and you're still not gonna stop me then I'm coming back here until the mission is accomplished no matter how many aeons it takes that's how crazy of a motherfucker you're dealing with people say oh I want this to be my last lifetime I'm I'll stay here forever until all are of mind control that's the vowel makin to this cause and I may hate that situation but guess what that's how much will fills me and drives me I may have more willpower than every other human being on this planet put together because you're not going to defeat that drive in that will to accomplish the one great work of ending slavery on this planet and eventually everywhere because it's wrong and it shouldn't be allowed to continue and that's the only reason to continue to try to destroy slavery so Andrew thank you so much for the call I really wish you guys the best in trying to turn your own situation around there in Germany thank you and all the best my friend thank you ci folks uh I don't dislike Europeans this is a misnomer about me and my work I've been very critical of them harshly critical but it's like it's like a tough love aspect you know you have beautiful elements of your culture and beautiful land and great people in many cases but I'm telling you you've let this evil infection spread even further than America has you know and there's certain you know semi populous people that are trying to like turn it around and turn it back toward power to the people and you know getting away from this authoritarianism but its paltry it's all too few you know there's some out there but I mean your app is way more advanced in this virus of authoritarianism and socialism than America is even America as bad as it is is not as ensconced in it as Europe is and so you guys have a lot of work to do and unfortunately you guys let them take your self-defense rights away most of the countries in Europe did a long time ago not Switzerland you know they still they still have a nice per capita you know population of arms bearers there but other than that most places are in deep shit so let's see who else do we have let's go - lets go - Ivan from Phoenix Ivan your live on what on earth is happening welcome my friend hey can you hear me I'm at work so no worries io I know you always have good insights to bring so I'm willing to deal with a little bit of background noise welcome oh wow I couldn't hear anything sorry I said I'm willing to deal with the background noise cuz I know you bring insight to the table we can hear you so go right ahead okay cool well you know me with the movies and all that so it's I was listening to your last two weeks of Satanism ritual one of the first things that came to mind for me was how as a lifelong movie goer subconsciously and probably unwittingly participated in many energetic kind of satanic rituals you know in a bitter brilliant one comes to mind the one that comes to mind is like these Fifty Shades series yep because for some reason well I know why the reason but you know it's this feeling of being in an auditorium with 150 to 300 people he's seen sexual energies and stuff occurring on the screen and even though people aren't quote-unquote participating in doing factions those energies are all around us that's right we're in an auditorium yep yes that permanent and distorted aspect of that sexual energy reaching them and having an effect on their mindset in physiology without a doubt movies are a powerful medium of being able to put certain ideas in people's subconscious mind this is what we were talking about in the former call with Sean with Stanley Kubrick you know he was an outcome an alchemist when it came to making movie allegories and the very reverse can be true they can be part of Satanism and a very distorted mindset and be a part of a a ritualized element in our society definitely a great point that I also left out of my main presentation yeah especially what apples me once in a while and these in the theatres is when we have younger parents like 20 year olds that still bring their two three year old kids to see a movie that has some kind of sexual content and it's like Hello there's an energetic form of pedophilia going on when sexual energies are around and there are teenagers or young you know right uh you know young kids in there and I'm always you know baffled by this like boom there it is yeah you know unconsciously participating in these pedophilic energetic satanic kind of rituals and many of them may not be mentally ready for you know even witnessing depictions of that that's why exercising caution exposing their children to certain dynamics and then there are others that they have to you know really truly do have to expose them to certain negative things so that they know that they're out there or prepared to deal with them Ivan did we lose you no it's just that once in a while I don't hear you I don't hear you I don't pick up on what you're saying no worries so you know I'm basically agreeing with your point and saying yes this is part of something that parents have to be aware of and be prepared to you know protect their children against if necessary yeah and then going on to another level of this satanic kind of thing with the movies a week or two ago I went to Jaina espírito Santo and here our boy friend Noah they came down here to Phoenix and we went and saw that new film midsummer and okay that's pretty and pretty I haven't haven't heard it but I haven't heard about it what's the premise it's about a well it's the mid but it's a summer solstice and it's a ritual that's done over like an Sweden or somewhere over there and based on true things but you know hey the movie makes takes it to the extreme you know that's not what really happens wink wink you know but yeah it's very intense and what I picked up from this movie was we comprehend nature life you know the site who's and you know the human body and the fragility you know you know actions that might be done you know and things like that and as a movie goer it fascinates me how people can see Jason Michael Myers right thirteen you know all these horror movies slasher clap and cheer like oh man that was an awesome yeah he's all the way his head blew up man that was cool however when they see a movie like this like mitts Omar and it's supposed to be like a realistic ritual thing going on or like sacrifice thing and the person's head kind of hits a rock and is all bloody on there like oh my god oh oh they get it's like that cognitive dissonance where it's like wait a minute but that's what would happen to to a body you know the use of force against a natural object like a rock but people can't comprehend that I think that's part of a satanic thing too of the ego life is what they say is like no human body that doesn't happen life is right he is beautiful we live we die in our sleeps and in our sleep and and that's it and this is you know so that again it's that you know life is the way we say it is showing it's not harder not really it's part of this satanic inversion principle that I talked about over the last couple of weeks you know they want to give us depictions of things that are not how things work false definitions so it clouds human understanding and creates confusion and that's the inversion principle turning truth on its head turning reality on its head that's part of the whole satanic ritual that is our society so yeah that's absolutely being done with the types of fantasies ations that are in movies it's great when it's allegorical and teaching a lesson and you understand and your you know your you know suspending your disbelief you know for a particular reason but then it can go too far when it becomes this type of distortion of reality that you're talking about that gets stuck in people's minds and then they start actually believing it works that you know one of the ways that I think society is a satanic ritual ivan is just how much were embedded in screens in looking at things on screens because what does that do it puts people in a passive mode and then it also gets them to like look at like life in the real world in a passive way like we're viewing it somehow on a screen you know instead of actively participating in it so like this is like a very powerful way that they distort our perceptions and you know twist reality and turn it into a ritual of sorts so you know absolutely a great point in bringing up regarding how not yet another aspect of how our society is this one big ritual you conducted by these satanic social engineers correct and then even on the small screen you're probably familiar with the TV show American Gods full time the first season there was an excellent albeit extremely negative kind of scene where we had the God of media played by Gillian Anderson on a TV screen and she says the line to the star of the show that the new alter are the screen while we were TV screens movie screens laptops tablets that was all that humor alter and that was Kubrick what he was showing in 2001 a Space Odyssey the monolith yeah that's right the screen itself you know and then the kicker Ford in that episode is the next line that the god of media says where she says time and attention better than Lambs amazing now what was this I want to check this out because I have an American God American Gods okay I have to check it out you know and that's all unlike something like Netflix or that's on Showtime sure start the show that stars I think it starts okay I'll grab it from something like Cody or popcorn time you know there's other oh yeah and check out like allegorical content in shows like you know I've recommended strange angel you know I just I really think the direction they're going in strange angel is just it's it's spot-on regard like a cult teachings regarding Thelema and I never thought I'd see the day like that's a tiny little indicator of a potential occult resurgence happening in our society I can't recommend strange angel enough personally you know you don't you mention it and I started watching I did the first episode yeah I was surprised to see the second thousand bo goes way deeper into the philosophy and the second sense destroys the first season the first time very good yeah I'm sorry go ahead I was gonna say that we're kind of both surprised and not surprised at how much is being divulged and put out there but it's kind of self-explanatory and um down to such an extent that they can make all the TV shows movies videos music stating declaring and prophesizing all the evils that are being done that's right and nobody's gonna do shit about it they'll just be sit there eat their popcorn but you're entertained by it that's why I think a lot of this is coming to light it's now I have a great revelation that's right that is exactly how these people think that is their confidence level and I wish I could tell you it was unwarranted it is not they know that that's where they have people they know it they're they're running actuarial supercomputer Studies on all of this they know where the collective mindset of humanity is that they know where they got us they know they got us you know and until people start turning it around and looking at this nothing is going to change you people got to stop looking at this as some hokum or a quaint you know religion of some kind and understand this is the philosophy this is the ideology of the Masters of the world is what we are talking about and they utilize it to high effectiveness what I wanted to just say real quick is for people that want to look into some of the stuff Ivan's talking about an allegorical content of movies and television you know use BitTorrent use Cody Cody is excellent if you know how to install certain add-ons you know you get like the exodus add-on or something like that and you could you know watch shows you would ordinarily have to buy subscriptions for for free you know you checkout popcorn time make sure you get a legitimate copy of it there's a lot of knockoffs that might have malware in them you just get it from the official site and you know you you could check out strange angel and watch it and you know they even offer like magnet links where you can download the episodes in something like popcorn time you know yeah I wanted to bring up to you mark just as a safety precaution for the people that might just run out and go back to that episode where you instruct them on how to use those bit torrents right yeah it's a site like that conspiracy sensual yeah that I doubt that the software on there the programming and stuff is tracked however stuff places where you might find conventional regular mainstream TV shows and movies like you know I know they're yeah it's still around kickass torrents major or piratebay or some other places highly recommend people researching VPNs yes privacy networks because if you do check these TV shows out and movies and download them and do it you know quite a bit I tend to track that and your internet service provider will contact you and say hey I know this copyright infringement so just to cover you know your stuff and those gems are great because it protects your internet you know browsing and stuff like that but it also hides your IP address so you know they don't need to know what you're looking at at the very minimum learn how to install a BitTorrent block list that goes that is updated on a daily or weekly basis and at least block known IP addresses that are trying to track people's IP addresses but a VPN would definitely be a more permanent and slash secure solution to you know browsing things that we know people really don't want us are looking into and and downloading to preserve you know you see what I've amassed I really don't give a shit what they want he's looking into or not I'm doing it you know again you're gonna have to put me in the ground to stop me so you know you you see the that when I go to do when I do something I go to the extreme and do it all the way you know that's just that's how my personality is so but Ivan is making some good points there about how to just generally you know exercise some self-defense and protecting yourself and people that might want to cause you know copyright infringement problems for you possibly so Ivan thank you so much for that and thanks for you know talking about the allegorical aspect in movies and television when it comes to these types of rituals so always great to hear from you and uh you know thanks for bringing those aspects to the table in this discussion my friend all the time good talking to you Marc take care you got it ok let's uh let's go to Gavin Gavin you're live on what on earth is happening welcome Gavin Burroughs are you there it looks like you're still muted at your end oh hey Mark there you can hear me yes I can loud and clear welcome it's great to finally be speaking with you I've been looking at your work for the past like I think three and a half years I came across tea when I was about 16 or 17 in high school and it completely flipped my entire worldview on it step and I'm for that yet honestly speechless with it all because you know I have like family and in the military and trying to explain certain things to him it he just got very defensive but um I want to try and stay on the topic it sure though recently I was watching um Elon Musk's neuro-link reason Tatian I've heard and I want to I want to get your thoughts on that yeah okay that is technology in the body I'm not for I'm sorry you know I believe that the human body is is a temple and should remain inviolable you know and I don't I don't believe in interfacing directly with technology in the physiology like okay look you need a hip replacement that different okay for trauma like that there's going to be medical technology that you know we may need to repair certain damaged aspects of us you start getting into direct human brain links with computers that's where kids I'm out you know how about we're going to exercise our brains and really use them to their full potential before we try to start linking him directly into computers through threads yeah yeah that's the he's not talking about fiber optic he actually used the term threads neural threads I mean this smacks the stuff like more gelatinous you know this is bio weaponry you know and it's a I'm a technologist I think that people need to learn technology and subdued technology to make it their master to make it their servant I'm sorry it technology should never become the master of people and that's where we're headed in this society we're headed again I I said earlier in the show the ruling class the real occultists that are behind the scenes of power are technocratic occult ah cracy they are technocratic Sorcerer's that comprise an occult och recei a ruling class of occultists in our society that's who we are ultimately ruled by they want this type of bio weaponry and bio integration of technology into the human physiology why because they're not looking at using this as actual human enhancement technology they're using it as using a control over people to using it to control them that's what they're doing with it they want this interface embedded in the human brain so when somebody's not thinking the way they want them to think they can influence that technology to make you think how they want you to think and therefore behave how they want you to behave that's the date yeah exactly yeah so seems like this is gonna be the sorry excuse me no this is gonna be like the peak the peak of the EPI dis genex program I mean if they implement and implement something into your brain in it and they're gonna have like a you know a Bluetooth device attached to your ear so it connects I mean first of all just thinking about the constant you know electromagnetic frequencies that are going to be think through your brain and everything right which can also cause you know a lot of a lot of neurological issues but just the fact that they can control the data that's going through and passing through that right through I don't know I guess some kind of server is just it's almost mind-boggling that people could actually chant for this that's right David mentioned in that press conference that there's this danger of it sort of being hacked and you know being able to put certain information through it you know a little bit I said that they even mentioned in that press conference that they held that you know it could potentially be hacked and people could possibly put information unwanted that the person would not want through into the human brain it's like they even recognize that

that potentiality could be available and they were talking about having to make it secure so you know this is the whole agenda of the social engineers at the highest level of the dark occult they want to take things in the transhumanist direction and actually interface humanity with technology because they see themselves as the technocratic sorcerers that are ultimately going to be in the long-term control of that technology and that is the method they long term want to control people through exactly um also just how do you feel about Elon Musk in general because in the beginning it did seem as though he did want to try and you know better humanity kind of like with Steve Jobs where you know he seemed like he had great intentions and wanted to help people and humanity in general but it almost seems as though he kind of got hijacked somewhere along the lines and you know was being in shadows it's somewhat complicated he's somewhat of an enigma in some ways and I don't have a final you know take on him but I don't really trust the you know direction he wants certain things taken there is that aspect where you know he does want to like kind of change the way we we do certain things technologically for the better but then there's that other aspect where there's this transhumanist aspect and then there's this possibility that people like that just get co-opted and corrupted and get made offers and you know offers of wealth and you know offers of power and you know they're human and flawed and they don't have this kind of knowledge they haven't been involved in deep layers of the occult world and you know studied it to this extent you know like like what I try to put forward here on what on earth is happening so there's a certain lack of knowledge and information regarding who's really running the world and they may see it from their limited perspective level and they go like well partner with this person or I'll go with this agenda or program and they become useful dupes in that aspect and I'm not saying that's definitively the case with musk but you know I would be very slow to trust any aspect of really what's coming out of him and what he's doing I don't I would not just jump on board with it not saying he's definitively one of these uh you know globalist evil individuals but it's easy to get ramped up in that it's easy to get tied up in that look at what Apple became you know what you think like Steve Wozniak is some evil globalist I mean this guy was a tinkerer in his garage with early technology you know he had pure intentions you know Jobs took it you know totally turned it into a business and was all about the money aspect of it and you know they called him the spin doctor cuz he could sell anything make people think is the greatest thing in the world when in fact you know it's you know not as really innovative or or groundbreaking as it as he's claiming things to be and you know then Apple went and when Jobs got cancer like I talked about this in past shows and did like a whole psychological workup on the guy you know he went off he lost his mind you know he went into a very dark place could not deal with the potential of his own death and started really becoming a bad control freak and what Tim Cook has done with the company he's just he initially wasn't even his own man he was just following like the the the letter of the law of Steve Jobs from the grave trying to just do this things the same way he was doing it and now he's just become even more of a control freak than jobs even ever was because you know he got in bed with the higher level you know technocrats out in Silicon Valley and just started trying to interject his own agenda into everything and he's part he's definitely in with these high-level Global's I I think the same could be true of Musk but I'm reserving my judgment on that to say that it's definitively the case with someone like Cooke I mean that's the stuff that is coming out of Apple is pure evil pure evil you know and the same with Google and the same with YouTube and the same with Facebook Facebook is pure evil I'm saying that right on their platform pure evil at the highest levels the kind of data collection they're doing in the kind of censorship they're involved in satanic evil ok Apple Google and Facebook you know I think Twitter's almost right up there with them I'm not necessarily gonna put them in the same category as that unholy true Trinity but you know they're almost right at that level and you know I'll reserve judgment on musk and Tesla for now and say be wary let's put it that way but with this neural interface that's that's not good news that's bad news that can only at the level of spiritual development humanity is that that can only be a disaster that can only be a long-term disaster where human beings should not be messing with things like that in the in the human neural physiology at all that's my take on transhumanism yeah and and and or arguing with people over minutiae what is it okay so uh your question didn't come out over the air there so just repeat that we're Oh we're having some audio we're having some audio problems via discord it looks like the caller's audio is not coming through I can hear them in my headset but I don't think it's coming out clearly over the over the stream I'm gonna very briefly disconnect from discord and then log back in and see if that clears up the issue so I am I'm sorry what your Gavin burrows I'll bring you right back on after I make this disconnect and reconnect I apologize for this folks it'll be brief so just give me one moment to reconnect Gavan are you still with us is he is he back on I can hear you fine but it looks like you're still not coming through over our stream unfortunately we may have to make a a physical disconnect and reconnect say something again all right so let's let's disconnect that and reconnect it if possible okay you don't have to do that I can still hear you in in my headset but we are having problems in the streaming software with bringing audio from discord into the live stream say something one more time so I apologize for that folks let me just respond to Gavin's question and our producer will attempt to get the technological problem cleared up you know he's saying how many different problems are out there this is a unimaginably immense field of data we're just about any area of human endeavor is so degraded and so in a place of confusion hardship just complete backwards nasai I was listening to on black earth productions Jordan Maxwell's interview that he recently did with Seth cos boza and Jordan said something that really stuck with me he just said where he sees the world that is that the entire world is in the hands of the dark force the satanic force and it's just I've echoed the exact sentiment I can't agree more and how many different aspects there are to this problem in every area of life no you could delve into any one aspect of life human institutions I think the connection might have just been remained with what you did there because it reset on my computer go ahead and say something again yeah worse you cause um it looks like we're we're we're not bringing in people through dis strange reason maybe the server is having problems the discord server itself is having problems so that may be the case so but uh you know continuing with what I was saying like you could pull on any one of those threads folks any thread regarding any human institution any human aspect in our society and you could get to the core problem you could get to the core underlying issue that's going on which is morality which is aligning our behavior to morality and you know what people do they are they're working overtime to ignore all the aspects of the problem what they do is they go out they try to ignore it they work they try to have fun try to live a lifestyle of just you know a total pleasure you know pleasure pursuit and they never look at the world in any philosophical way because it's just a big game and joke to them and if they did he pulled on one aspect one thread the whole tapestry would eventually unravel and reveal itself they would be able to see the big picture because they get to the causal factors but they don't do that you know they look at tiny little minutiae you know instead of doing that what are people doing and then putting out the working of the world they're arguing about minutiae on Facebook or Twitter you know construct the work in a way that makes sense put it out there for others don't let your energy get taken down and misdirected and redirected by getting involved in just endless discussions and and fights verbal arguments on social media that go nowhere that's one of the reasons these networks were set up they want people arguing amongst themselves on their platform that they can shut down at any time instead of people putting high quality material out on a myriad of websites so Gavin is exactly correct okay the the amount of problems that are out there alone should influence people to look into any one aspect of it and from any end point you come in at you know all those roads go together they all come together in one big hub from any aspect that somebody approaches it from they should hit the bull's eye on and they should hit the center of it so think about how hard almost every member of our society has to work to ignore it you got to get ensconce Tinh minutiae and see just the the leaf on the tree instead of pulling back and seeing the forest you know or you have to it totally work to ignore it all and say all I'm gonna care about is myself and what I get out of this life I'm gonna live for creature comfort you know a whole attitude of you know pleasure pursuit and nothing else a hedonistic lifestyle that's what we have almost everywhere again especially in major cities that I mean major cities are ancient Babylon that's why they are the capital of The Hunger Games movie literally that's the kind of self-absorbed jackasses that you have in just about every major city just self-absorbed people totally an ego totally in hedonistic pleasure pursuit never looking at any one of these types of problems so let's just try it one more time Gavin are you there maybe we can hear you now yeah if you want to ask me another question I'll respond to it I'll repeat it and respond to it you're still not coming through on the air I think the discord server has has crapped out on us unfortunate okay we're trying to pick a side I mean all right wait we just got you back go ahead papa great we just got you back at the story quick aside I mean you the term you coined I think the week last week of the week before will is that this everyone is just a mini me Satanist I mean that's all I see and you know in the conversations I have the people's attitudes their demeanor their behavior you know life is what I've referred to as define serves people yeah de-facto Satanism see de facto means it's from the latin de day or d in english it means of or by okay and then facto facto means deed it comes from the latin fetch array which means to do your action to act okay so de facto literally means in or by way of action in your actions in your deeds de facto Satanist a Satanist in deed in your DS that's the word indeed comes from de facto yes indeed that's the case it means in your action so people don't have to proclaim that they are a member of this worldwide cult it doesn't matter whether someone says that they're living a satanic lifestyle or are a Satanist people can be a Satanist and not ever know that they're a Satanist I'm very glad you brought this aspect up Gavin because it's something that many people still don't understand it's powerfully important for people to understand okay people can be a Satanist and never know it and live their whole entire lives in the mindset of the ideology of Satanism never knowing what it's what that ideology is called and never knowing that they themselves are actually in that mindset and are therefore a member of that cult that worldwide call that that spouts and puts out that ideology for other people to absorb and live by ladies and gentlemen that's all the time we have for the edition of what on earth is happening I want to thank all of the great callers who brought up all phenomenal points in this great call-in show on the topic of our entire society is one big satanic ritual ladies and gentlemen you've been watching what on earth is happening government is slavery thanks so much do go on to the what on earth is happening website and if you found value in this presentation feel free to make a donation at the donate page we'll see you right here next week ladies and gentlemen thanks for giving [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #217

Topics: *The Tarot's Major Arcana As A Revelation Of Personal And Societal Progress, Tarot as the Book of Life, Occulted Knowledge, the two categories of Occult Knowledge, Hidden Knowledge of the Human Psyche and the Laws of Nature, the Religions of Government and Scientism, the Major and Minor Arcana of the Tarot, a future WOEIH Tarot Deck, Tarot misused as only "fortune-telling" by charlatans, the Covert Language of Symbols, Suits of the Minor Arcana, Coins as Resources/Earth, Cups as Emotions/Water, Swords as Intellect/Air, Wands as Action/Will/Fire, the Tarot as part of the Goddess Tradition, the name "Tarot" derived from Terra/Tara/Truth, Symbolism of the the Wheel of Fortune, the Tetragrammaton, Symbolism of the Crosses of St. George and St. Andrew, symbolism of Archangels, False equivalency of Influence and Determinism, the Rejection of Free Will as a causal factor of Human Slavery, the meaning of the letters in the word Tarot, Kabbalah as an Occult Science, Kabbalah literally means "To Receive," Kaballah as a method of preparing oneself to receive Truth and Natural Law, the inseparable connection between Tarot and Kabbalah, the Kabbalistic Tree of Life, the Sephirot as "emanations" connected by 22 Paths, the Correspondence between the Vedic system of Chakras Tree of Life, the Pillars of Severity, Mercy and Mildness on the tree of Life, the Masculine and Feminine aspects of the Tree of Life, numbers of the Sephirot, Esoteric breakdown of the meanings of the Sephirot, the Kundalini Energy and its ascent up the Tree of Life, the "Lightning-Struck Tree, the Kabbalistic arrangement of the cards of the Major Arcana upon the two Trees of Life (Microcosmic and Macrocosmic), the 911 Ritual to destroy the "Ladder to God," the Esoteric meaning of each of the Major Arcana Tarot cards in correlation to the Sephirot, how Mark would rename the Major Arcana cards to reflect their true meanings*

freedom man that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome to the show everyone glad that you're tuning in today is Sunday July 28th 2019 this is episode 217 of what on earth is happening this show is live every Sunday from 3 p.m. to 6 p.m. Eastern Time that's 12 noon to 3 p.m. Pacific time we have a great show lined up for you here today we're going to be getting into some deep occult working here I'm going to be discussing the Major Arcana of the Tarot as a revelation and an indicator of both personal progress in consciousness and spirituality and societal progress in consciousness and spirituality the Tarot can actually be used as a gauge an indicator of sorts in this respect and a lot of people don't even know or understand that the Tarot is a tool for just such a thing so this is going to be the main topic of discussion today some of it will be review some of it will be somewhat new as always what on earth is happening is a tapestry ladies and gentlemen this is something I've been repeating on the past several shows and will continue to repeat no one episode stands on its own this show has to be viewed listen to and viewed in relation to all other previous shows so episode number 217 has 216 prerequisite episodes so if you're a new listener if you're a new viewer you don't want to just start here you want to go back to number one of the podcast series and watch them listen to them and watch them in order at your own pace in that way the greatest tapestry of connections will emerge in your understanding and you will not be confused with newest material that depends on older material so just keep that in mind what on earth is happening is and always has been a tapestry of information that is meant to be taken in as a whole the newer episodes stand upon and are built upon older episodes everyone who is listening should be aware of that that being said I have a couple of housekeeping announcements to get into before we jump into the main body of material for today so let's go over to the laptop ok I will be speaking at the inaugural and arkadelphia conference and arkadelphia 2019 will be taking place September 13th 14th and 15th 2019 right here in Philadelphia if you buy your tickets at an arc adelphia calm with promo code passio you will get 5% off of your ticket sale your ticket price and 5% of the ticket will be donated directly to what on earth is happening so you can get more information about this great conference and all the tremendous speakers that are gonna be taking part in it at an arkadelphia calm I will also be giving a workshop at an arkadelphia the day following the conference this will be taking place Monday September 16th from 10:00 a.m. to 5:00 p.m. it's an all-day workshop my main lecture at the conference will be taking place on Saturday September 14th I'll be the final speaker on Saturday evening and my talk is entitled the sacred gift of anger the sacred gift of anger will be my main presentation my workshop on Monday will be called teaching natural law with mark passio it will be an all-day workshop on how to bring the message of natural law to other people and going over a lot of the skill sets that are going to be required to do that if you wish to actually become a teacher of the material that I've been talking about here on what on earth is happening since day one so September 16th 10 a.m. to 5 p.m. at Poppy's Italian restaurant at 31 2020 a--the Street in Philadelphia the tickets for the workshop are 120 dollars and they could be purchased at an arc adelphia dot-com in the workshop section we will also be screening a rough draft of my premiere documentary the the first ever documentary that what on earth is happening has ever put out this will also be taking place Saturday September 14th right after my main presentation of the sacred gift of anger will be screening my premiere documentary entitled mark passio and the science of natural law and this will be a rough cut I don't believe that we'll have the finished final cut that's going to go out to the public but the attendees of an arkadelphia 2019 will be able to watch a premiere of the rough draft of mark passio and the science of natural law documentary so that's an arkadelphia 2019 now I did tell people that the t-shirts the new t-shirts would be in this week that did not occur there was a shortage of a certain color and I had to go with a slightly different variation of one of the colors of the t-shirts that I was going to print for this next batch of what on earth is happening t-shirts in the donation gifts area of the website that held up the order a little bit it is definitely going to be ready at the beginning of this week I've been told by the company that's pressing the shirts so all the new shirts will be ready to go at some point this week and they'll be at gifts dot what on earth is happening calm the donation gifts area of my website also anarchy and the occult part 2 will be available on the water on earth is happening donation gifts area as well later this week I was trying to get it up by the end of this week but what happened was I took a couple of days a vacation for myself after the last episode and I went down to the Jersey Shore to visit with family with a few friends and I got to unwind a little bit that's why the podcasts didn't go up until Wednesday in the afternoon so um you know I just took a little bit to relax and unwind and I'm just you know get some Sun and hit the ocean at the Jersey Shore so that is why I didn't get a chance to really work on the artwork for the cover of anarchy and the occult and the disc and the flash drive so I'll be doing that early this week going back to my normal work schedule and I will be getting that in the donation gifts area as well in the form of a flash drive and a DVD later this week coming up so just keep an eye out for those for those items I think that's all the housekeeping announcements that I have for this week so we can jump back over to the computer and let's jump into our topic material for today again today's show is episode 217 and it is entitled the teros Major Arcana a revelation of personal and societal progress and we are talking about personal and societal progress in consciousness in spirituality in our manifestation of either slavery or freedom depending on which direction we are going in consciousness and in spirituality and true spirituality so this is going to be the main topic of discussion and I just want to say that this will take as long as it takes we may or may not get to calls it could take you know an hour and a half to two hours to go through this it could take two whole shows go through this topic and the material that's contained in it so there's no time limit set on this we will cover it until I feel it's been covered to my satisfaction and then we will take your calls on this topic so you can call in through discord as always I don't know if I will be getting two calls today maybe maybe not we'll see how the main you know material goes for today so let's jump in to this topic and this is a huge topic the Major Arcana of the Tarot I call this the self and the universe revealed in symbol this is what we have to understand that the Tarot really is especially the Major Arcana of the Tarot not to you know place even less emphasis on the Minor Arcana but um that gets into the finer gradations of information regarding consciousness and self the Major Arcana hits us with the very heavyweight material that we really definitively really need to understand to understand what's going on within us and in the world around us and the Tarot is greatly misunderstood it's a it's a science and it's an art that is so powerful when properly decoded and understood for the powerful symbolism that it contains that I can't understate it enough that people do not use the Tarot properly do not read it properly do not decode it properly and do not understand the symbolism contained therein the way that it was really intended to be understood and this is typical of the modern world where knowledge is fallen where you know people do not go into the same depth that they did in the past regarding knowledge they take it lightly and they don't really deeply understand what it's conveying and I'm this series here is an effort to try to correct that because a lot of people think the Tarot is like something to use for fortune-telling and divination and while the Tarot could be used for that purpose it is infinitely more than that as we will see in today's episode today's episode is somewhat of a review I'll be reviewing a lot of material that I've covered in presentations in the past and some of it is new regarding how we really should be seeing the Tarot major arcana in particular as a revelatory tool this is I've used the term revelation and the self in the universe revealed because that's what this is this is a cult 'add knowledge that has to be decoded in order to reveal what it's really saying deeply underneath that a hidden level and that takes work to decode it that takes time you know I didn't understand this when I just started looking at Tarot symbolism look like buying a couple of decks down at the local occult shop you know on south street here in south philadelphia i picked up the first tarot decks that I ever read probably when I was and yet you know early teen years like 13 years old 14 years old maybe and I had no idea what I was really looking at and this is most people's experience of the Tarot when they first encounter it they see these odd and strange images depicted on cards and they you know think it like loosely relates to some imagery of the regular playing card deck that has come down to us in the modern world which is actually you know derived from the Tarot and people don't really know what they're looking at they don't know how to read this book this is a book the Tarot is a book it's been referred to as the book of truth it's been referred to as the book of the universe it's been referred to as the book of natural law the book of the goddess many other things so we have to understand that the Tarot is speaking a language to us that we have to decode in order to understand what it's really saying you know it's not just 78 cards and a minute playing deck okay that's a gross understand misunderstanding of it this is an entire book of life is what it really is there's nothing that is of any major importance or significance in the universe that's not contained in the Tarot that's how much information is within it Trulli and their people will you know they find that hard to believe and say oh no it can't be so but when you really start to dive into it a deep level and do cult the secrets contained in the Tarot you'll realize that I am exactly telling you the truth about what it contains so let's jump in and take a look at what this is all about the Tarot is a book of occult knowledge it contains deeply occulted knowledge so when people look we've talked about the occult ad infinitum here on what on earth is happening and there's so people I still get emails of people who say you shouldn't be dabbling in that stuff that's evil that's bad that's not meant for us and this shows me that people just have zero idea of what occultism really is they don't know what the occult is they don't know what it means they don't know how powerful the information of the world of the occult and it the knowledge that it contains is and they don't understand why we need to know it most importantly and that's what I hope to really bring to people with this Tarot series ok ocultism is a body of science that's where we get the word to know from knowledge comes from the Latin verb ski array it's where the word science comes from ski area is spelled SC i er e it's a verb and the verb translated in English the

Latin verb ski ra means to know or to understand that is where the word science comes from so right off the bat I'm telling people that occultism in the genuine sense of the term is not a belief system or a religion and people will insist that it is they'll insist this with their dying breath that occultism is some quaint religion it has absolutely nothing to do with religion or belief ladies and gentlemen occultism comprises a science about how we work and about how the world around us works and that is not a belief system we can come to know that we can come to know how we work and how the universe works through observation and study and testing and experimenting and hypothesizing and then testing our you know projected hypotheses and then getting actual results in the world and comparing them against our models and then refining them that's called the scientific methodology there is no belief required in any of this you know I've said before religion which is a false belief system of any kind that prevents our progress and consciousness is the one and only problem in the world no matter what forum religion comes to us in whether it comes to us in the form of the cultural religions or whether it comes to us in the form of the belief in authority the belief in the legitimacy of government the belief in the monetary system etc you can go on and on with modern religions science can become a religion if there's too much faith in it and not enough knowledge actively applied when we just believe what scientists tell us and we don't do the work ourselves to verify the information that they're bringing forward and putting on the table then it can become the religion called scientism you know the modern medical system can be a religion you know people believe in that with religious fervor and of course government politics is a religion too one of the biggest religions in the world the belief in authority and government so occultism is a body of science not belief not religion that's first and foremost to clear up and Matero is contained within this body of knowledge called occultism it's one of what people have called the four major occult sciences and that is Kabbalah which we're going to be talking about Tarot numerology and astrology okay these are occult Sciences when properly decoded so it's a body occultism itself as a body of science which is not widely known to the general population that means that it's esoteric in four it's not exoteric exoteric means that the general population gets it it's for them they understand it you know the average everyday man and woman look into it and kind of understand it that's exoteric esoteric means it's reserved for people who study it very deeply for the initiate who's gonna go much deeper on this path into this occulted knowledge so occultism you could call and at the esoteric Sciences they're reserved for the people who are gonna go way deep into the inner core of these traditions to go much further in their understanding and expand their worldview and occultism consists of hidden knowledge about the workings of the human psyche and the laws of nature in other words both when we're talking about the laws of nature here we're talking about the same laws the physical laws that govern matter okay the govern physical matter so this would be like physics electromagnetism etc you know all the laws of thermodynamics you know all the laws of you know dynamics in physics okay the Newtonian laws etc and then down into even quantum mechanics we're talking about things that govern the the seen matter in our reality in in the electromagnetic spectrum that we are we existing in the 3d sense but occultism is also the study of the unseen laws of nature so these are the hidden spiritual laws that govern the consequence of our free will based behavioral choices so when we choose to behave us a certain way natural law goes into effect that is unseen in the physical domain and it gives us the consequence of the behaviors that we choose but those come through into and are manifested in the physical domain so you could even say that the unseen laws have physical consequences and physical Reaper repercussions in the very real scene physical domain so these are all physical laws at some level of existence so now occultism has two major bodies of knowledge and these are encapsulated and symbolized in the Tarot's Major Arcana okay so you have the Minor Arcana right now that's that's the suit decks the suit ah cards of the Tarot okay so you have cups wands swords and coins okay and they've been called various slightly different variations of those names and these come down to us in the playing deck you know as diamonds clubs hearts and spades okay it's it's it's just a different variation of them in the modern playing deck that's called the Minor Arcana but I'm going to depict the first part of the Major Arcana as the inner this inner world or microcosmic world when we when I show you the layout of the first eleven cards of the Major Arcana of the Tarot on what is known as the microcosmic Tree of Life of the Kabbalah okay then we're going to lay out the second eleven cards of the Major Arcana of the Tarot cards 11 through 21 in the layout known as the macrocosmic Tree of Life of the Kabbalah so we're going to get into Kabbalah a little bit in this episode because I'm going to explain to people how Tarot and Cabala are inseparable they cannot be studied in isolation to study one is actually to study the other and if you try to break apart those studies you're gonna end up with an incomplete picture and an incomplete understanding not only of the some symbology but of the correspondences contained in the tarot deck okay so first before I even get to Kabbalah understand that taro and baaah are inseparable occult sciences and have to be studied together in conjunction with each other if they're going to be properly understood as they are intended the for the knowledge that they are actually intended to convey so the first body of occult knowledge is the knowledge of self it is the knowledge of how the human psyche actually works and operates so this is what the Darko cultists of our world have the sorcerers the mind controllers the social engineers whatever name you want to refer to them as okay but you could call them the dark occult as I do if you're going to use this horrible correspondent term the Illuminati please call them the dark Illuminati just don't use the term illuminated ones because it's just a horrible reference because Illuminati in Latin means those who are enlightened and the dark sorcerers of our world the social engineer mind controllers of our world are not enlightened beings okay you want to use the term Illuminati refer to myself and other people with the knowledge that I possess as the Illuminati please don't call the violent mind controlling masters of our planet the Illuminati if you're going to say that they have knowledge and talk about the term and loominatee in that respect call them the darkly illuminated ones okay put dark in front of it like I put dark occult in front of the occult to make people understand there's two sides of this coin you know all and see another thing is a lot of religious people you don't get this boys and girls little boys and little girls who are only ever reaching the Queen's Chamber not going all the way to the King's

Chamber of the Great Pyramid inside the mind and inside the human heart okay you know that the whole pyramid is a reference for occulted knowledge depict the ascending passage way the the Queen's Chamber and the King's Chamber it's all about the process leading to enlightenment and you you know it's not to mean that the Sacred Feminine is any less important than the sacred masculine okay it's just terms that were given to the chambers inside the Great Pyramid as an allegory you stop at the Queen's Chamber you stop it just that that middle chamber you're not getting to the top you're not getting to that King's Chamber that leads out to the Stars okay where the shafts actually lead out into space and present a much further deeper understanding of our reality if you stop at the Queen's Chamber you have stopped that religious belief but you have not gone to occult knowledge and this is what too many religious people do so there's a religious people who listen to this broadcast and I'm trying to explain to them since day one you've stopped short and you've set up your tent halfway up the mountain top and you're not reaching the mountaintop okay religion is holding you back from the summit it's holding you back from the top most understanding apex of understanding of how it all works and a lot of religious people want to say oh we know that the people who are running the show on this planet the people who are really the social engineers of this reality are Satanists their satanic their dark occultists a lot of the religious people get that but then they want to say oh my religion is untainted you know it hasn't been affected by these social engineers it hasn't been infiltrated everyone else's has except mine you're full of yourself is what it really boils down to and they want to say don't look into that occult stuff that's for them no this is what they have hidden from us to make sure that we will never be at their level of knowledge and understanding of both ourselves and the deep inner workings of our mind and the world around us and how nature really works and how the natural laws really work to bring us the manifestation of our behavior they don't want us knowing anything about that these darker cultists they have this knowledge what are they doing with it they're wielding it against us as a weapon because if you know everything there is to know about how someone's mind works and you know everything there is to know about how the laws of nature work and your prey knows nothing of those forces and factors at work in their reality imagine how much they are at your mercy so to all the religious folk out there who are telling people don't look into this you know what you're telling people to do you're telling people don't have the knowledge that your masters wield over you to manipulate you you don't need that that's what you sound like that's the baby that you sound like that's the child the infant child you sound like and it's not coming from a place of good innocence it's coming from a place of total naivete total naivete and someone who came out of this world who's trying to give you their playbook of what they understand you still don't want to listen to it from them because you think you know better and you don't know any better you're in a place of negative knowledge not only don't you know what the occult is you have a false belief of what you think it is and your belief is completely wrong it's completely erroneous and by refusing to study this information you are ensuring that your masters maintain a power advantage over you because you remain in ignorance and they remain in a position of tremendous knowledge and that knowledge differential is always going to be able to be converted to a power differential over you and over all the other people who remain ignorant of what I've been attempting to show people here since day one on what on earth is happening so the Minor Arcana is the microcosmic world the knowledge of the microcosmic world were the inner world of the self it is knowledge of the human psyche and how it operates this has been traditionally depicted as the first card of the Major Arcana or the zero card known as the fool this card was originally the soul of the Tarot now when I eventually get to making a tarot deck look I've been talking about writing a book I've been talking about making a documentary I've been talking about many presentations you got to understand how slow the work progresses here because I have to you know do a lot of things during the week that I'm not freed up to do because while I have a minimum staff a lot of things are still left in my hands and I can't just create the content that I want to create unfortunately I'm trying to work to fill positions and get the help that I need so I can really just create new content but you know one of the goals is to make a tarot deck I want to make a what on earth is happening tarot deck okay and some different artists have volunteered to help contribute to that effort but in all honesty I think I'm going to take my assistant Leah's recommendation and or I'm sorry not recommendation but offer to have her do the art I've seen some of her art it's very good and I think she has the skill set to design a tarot deck so I'm probably going to take her up on the offer to just sit and work with me on making at least the 22 cards of the Major Arcana and maybe make just some basic suit cards with you know the numbers of the deck for the Minor Arcana if she wants to go all the way out and do the seven all 78 as different cards like are done in you know the rider-waite deck and other decks like that if we have you know a very extended amount of time to do that and that will is there maybe we'll do all 78 some cards you see just do stylized numbered interpretations of the suit cards but we'll definitely at least do all 22 cards of the Major Arcana so I think I'm gonna take her up on her offer and at some point maybe in the next hopefully year or two get to work on making a what on earth is happening tarot deck which will probably take a couple of years to complete at least but that's a project that's definitely in the works and you know I'm thinking a lot about what I would do and I would of course call this card the soul you know what I my idea of a tarot deck for for what I would want to put out would be to call the cards what they are forget this you know allegorical interpretation that makes people read all deep into it now I'm not saying that's not valuable right to do that work helps you to use your mind to decode but but maybe if we had a deck that really called the cards what they are then people can really see the correspondences readily okay so this would be like do cultic the Tarot for the everyday man and woman that's the idea of my deck the the water on earth is happening decked eventually we will have we will make it okay you know so that's the Minor Arcana and just think about it that's exactly what it's telling you it's knowledge of our soul it's knowledge of what we need to be working upon upon building we are here to be builders of ourselves builders of our souls okay that's the Minor Arcana or the inner world of knowledge knowledge about who we really are and we're going to be breaking that down in the microcosmic Tree of Life later today now the Major Arcana holds the opposite knowledge or it holds a different form of occult knowledge I should say and this is the macrocosmic knowledge knowledge of the macrocosmic world knowledge of how matter works of how heavenly bodies move okay about how all the laws of physics work you know the laws that underlie that electromagnetism gravity etc so this is knowledge of the natural world but it's also knowledge of natural law okay it's not just knowledge of the physical world it's knowledge of the greater laws of creation in the form of the moral spiritual laws the laws of karma the laws of cause and effect when it comes to behavior okay so those that behavioral science is contained in the Major Arcana of the arrow as well in the second half of it mostly okay so occult knowledge comprises all of the laws of nature its study is to study all of the laws of nature both the scene laws that govern the physical domain and the unseen laws that govern the spiritual domain and these are ultimately really one in the same there was really no separation between the physical and spiritual we have to see them as unified we have to see them as one holistic body too many people separate those things and that's what leads to the dichotomies that are found in religion and religious belief systems okay so let's move on to the next slide in the modern world Tarot hasn't inherited a terrible reputation as being used primarily and almost exclusively for fortune-telling and this is the problem of charlatans who don't really know what the Tarot truly is but have you know going into this tradition of masking it as a fortune-telling tool a divin Ettore tool divination is about you know predicting the future with you know throwing or casting some type of a lot down on a table or on the ground and in the form of many different things bones ruins cards etc okay and what we have to understand is that the Tarot is infinitely more than trying to conduct divination and do fortune-telling so the Tarot you tradition uses rich multifaceted symbolism portrayed upon a deck of 78 cards to convey truths regarding the aspects of our own being and the laws of the cosmos as we just saw in the previous slide the tarot deck consists of two components the Major Arcana and the Minor Arcana the Major Arcana consists of 22 cards 11 of which deal with aspects of the human psyche that's cards zero through ten in the major arcana the first eleven cards and then eleven of which deal with aspects of natural law the greater laws of the cosmos that is cards 11 through 21 the Minor Arcana consists of 56 cards divided into four suits wands cups swords and coins each consisting of 14 cards in each suit so in within each suit you have ace through 10 numbered cards or 1 through 10 and then you have four court cards for each suit and those are you have a knight Queen King and usually a page okay so let's continue with this slide sadly however in modern times the Tarot is looked upon by many as being nothing more than a prop in the repertoire of fortune tellers while the system of cards could be used as an intuitive divin Ettore aid this is considered by serious students of Tarot to be an ancillary usage of the deck at best meaning it's a secondary usage and it is not what the deck is primarily supposed to be used for the deck is supposed to be used to probe into a deeper understanding of occult wisdom not to just be used for fortune-telling okay while it can be used for that that's one of the aspects you can use it for that's not its main aspect that's an ancillary usage okay the Tarot was traditionally seen in its pure esoteric form as a means of conveying deep truths through covert means through covert symbolism rich covert symbolism or occult symbolism without needing to write down or even speak the message aloud no words needed on paper to print on books the message is contained in the symbols themselves in the pictorial elements of the cards if a picture speaks a thousand words and it does a tarot deck when deeply understood speaks countless millions okay this is a book as I've said so it's not just a deck of cards it's an understanding of everything that is very important for us to understand there's really nothing that's not contained in the knowledge of the Tarot that's why it's been referred to as the book of life so let's briefly look at the four car suits of the Minor Arcana of the Tarot these are the suit cards that comprise the Minor Arcana and we won't be breaking these suits down in detail today at some point I will do an expose and go very in-depth on all of the Minor Arcana of the Tarot that might be a coming water earth is happening presentation I show you know on the show here and I may might do a couple maybe I'll take one show to do each suit and break down every single card within the Minor Arcana over a period of four shows we'll do a show on coins one on swords one on cups and one on wands I think that would be a great breakdown for for future what on earth is happening episodes to really go in depth of the Minor Arcana which is something I'm not done on what on earth is happening as of yet maybe I'll do even the ancillary usage once we cover the main usage of the Tarot once we cover the main Deep occult importance of it which is the most important thing to understand maybe I'll do a whole show where I do some tarot readings do some divinatory work with the deck I think that would be very interesting to do right here on what on earth is happening so what you have to understand about the four decks of the Minor Arcana the four suits of the Minor Arcana I should say is they represent different qualities of the self as well so the coins suit are the Material Plane or earth so this would correlate to the four elements these these suits correlate to the four elements of earth air water and fire that is often that are often discussed in the occult tradition of alchemy but what do they really mean what do the elements of earth air water and fire really mean you know they themselves are symbolic allegories so Earth has always been traditionally used to represent the Material Plane resources inherent qualities things that we utilize in the physical world that are needed that we have to put into play to use to accomplish what we want to do to accomplish the great work of ending human slavery resources are needed and are important and they should not be shunned okay it's when we place too much important on importance on resources that we then get greed and materialism you know but we need resources to do the work you know we have to use our physical bodies to do the work so the earth element is not just inferior it's the lowest of the four in terms of how much they really ascend into a higher vibratory form you know starting at earth and ending up at fire okay and we'll look at that when we look at these suits but we have to understand that all of them are necessary and need to be put together and none should be seen as inferior or superior so that's coins okay some decks call it Pentacles and some decks refer to this as disks so you will hear it called claims Pentacles and disks in the writer series of tarot decks and the various different interpretations and variations of the writer deck like the rider-waite the universal weight which is what we'll be mostly using today which is my favorite of the rider variations I like many decks what we could talk about you know different decks at some point like the Thoth deck the universal weights the Egyptian deck there's a Masonic deck there are variations of the Golden Dawn deck the magical Golden Dawn etc you know Crowley's Thoth deck so you know we can go into maybe a breakdown of different decks at some point I could show you the decks that I actually physically own I think that would be a nice thing to do on a future show so you know the deck I'll be using in the visual representations of the cards today are the universal weight deck okay now I'll post that deck with this episode I'll post all 78 cards depictions of them in JPEG form with the episode in the related document section of the podcast so going back to the breakdown of these different suits we see that swords then is the air aspect of the four elements and this is the intellect or the mental plane represented by swords most decks simply refer to this as swords Ivan really seen too many different variations on other names again the coins a deck would would correlate to diamonds on the traditional playing card deck the swords deck would correlate to her spades okay so this is the usage of our mind and our intellect it is our ability to perceive and break things down and analyze hence you have the swords which are a cutting quality we often refer to it he has a cutting intellect he has a cutting mind okay so this is why swords were chosen for this as a blade cuts the mind cuts and breaks things down and separates and analyzes okay so that's the swords suit of the deck then we have cups which represents our emotional qualities and in the alchemical tradition this was symbolized as the element of water the flow that is within us okay the emotional plane okay always depicted as the sacred feminine aspect of the cup okay or the chalice and we're using the ace of each one of these decks to depict the Minor Arcana suits okay so here you see the Dove and the communion wafer okay symbols of the Sacred Feminine the holy spirit in the you know Christian tradition and the chalice okay holding the water which is then converted into wine in that tradition a lot of Christian symbolism here in the universal weight deck but this is the Holy Grail okay the emotional aspect has to be developed so that it gives birth to right action which is what Wands represents so you know it's been called Chuck cups some will refer to it as chalices there's you know decks to call this different things this cups correlates to the heart hearts aspect of the regular playing deck the suit of the regular playing deck and of course that's emotions heart okay you could very clearly see the correlations in the regular playing deck okay so wands represents action okay represented by wands or clubs okay clubs in the traditional playing deck this is the plane of will okay and when you look into Kabbalah you'll see all of these worlds the four worlds of the Kabbalah are this aspect of the Tarot each one representing one of the suits okay one of the alchemical elements we've broken that down before I'm not going to getting it beginning into the worlds of the Kabbalah today but we will be looking at the Tree of Life extensively okay so this is called different things you know wands clubs etc in different decks but we'll be referring to it as Wands here so those are the Minor Arcana of the Tarot the four suits of the Minor Arcana the word Tarot itself comes from the goddess tradition in the ancient world it actually comes from the name Terra Terra a woman's name in the modern world was the oldest name of the original in the original goddess tradition which came out of the Far East and the Indus Valley tradition so the goddess is named after our planet because our planets name has traditionally been called Terra okay in in the ancient Latin it was referred to as Terra Terra means earth okay so the soil the earth the planet itself mother nature Terra Terra again you're going to see if you really study etymological roots of things and you study ancient word origins you're you're gonna largely see that the vowels that separate the consonants don't matter its TR okay just like as we talked about the dark God or the black son in the dark occult is BL Bell Bell bill bull okay it the the vowel sound is largely interchangeable well it's the same here when it comes to the earth and the goddess okay it's TR okay so you'll see different variations of it as you study the goddess tradition you'll see that as this tradition moved from east to west through the Indus Valley into the middle what we now call the Middle East and then into the Levant area and then eventually through all of Europe it was originally Terra then it became in in Egypt well in actually in the Indus Valley tau earth and then in Egypt and you had other variations it's how Ruth okay and then we get the name Ruth from that ok and we also get the name the word truth from that when you say quickly - Ruth - Ruth it's again another variant of the TR and in this case TRT we're just taking the first letter and then transposing it to the end and that's really what we have in the word Tarot t a ro t the vowels are can largely be lost or interchangeable okay it is a name for the goddess - root okay one of the names in ancient Egyptian so what does this actually really you know how is it really symbolized the name how ta ro t why is this first of all it's actually in the tarot deck in most decks the Wheel of Fortune will actually have the four letters that comprise the word Tarot T ar and oh okay and then you come back to the T full circle okay and almost invariably this is in the card known as the wheel of fortune or ten which as we will see represents the bottom of the microcosmic tree of life or the mal couth position of the microcosmic Tree of Life in Kabbalah and if we just look at the symbolism on this card briefly actually barb was asking me about this card when I met up with her earlier this week to break down some of the symbolism and it's very interesting that this would be my topic for the show this week and this card plays a major importance in it so I'll just briefly break down some of the symbolism on this card the Wheel of Fortune is the card that is really telling us why it is so important to study the Tarot okay this is what the this card represents us staying where we're at largely okay personally mostly alright it what it correlates to the world staying where it's at because if the individual members of a society stay where they're at in consciousness in base low consciousness the whole society will stay in slavery and judgment which we will see so what we have to understand here is that it has the ancient name in Hebrew of God on the card that's called the Tetragrammaton or the four-letter name for God in ancient hebrew yo'd --have of hey and this would be read from obviously right to left counterclockwise around the tarot deck okay so you have the Yoda in the upper right and then you're going to go to the upper left for the first Hey and then to the bottom left for the valve I'll actually outline this with my mouse if I can bring it onto the screen here oh I'm sorry I forwarded it accidentally you see if I can make the mouse appear I'm having a I think my mouse may have um there Erik there it is okay all right sorry about that so this is the Yoda character on the wheel okay and then this is the first hey and then this is valve and this is hey so if we transliterate these into English this would be a y in English this would be H this would be V and this would be another H so YHVH gives us the name Yahweh if we transliterate it okay and that is the ancient name of God in the Hebrew tradition okay so that's incorporated into here you'll see Christian symbolism come forth in the Tarot you'll see Hebrew symbolism you might even see some Islamic symbolism you'll definitely see Egyptian symbolism all over the tarot deck because the Tarot ultimately comes out of the Egyptian world the ancient Egyptian world and predates it okay so the Tarot name is then given in the clockwise direction t AR and o now these are both placed at the areas of the wheel of the season that represent the breakdown of the season into the four seasons the solstices and the equinoxes so you you would have the four seasons broken down by the regular cross and then you would have the fixed signs of the zodiac representing both the great cross of the galaxy and representing the midpoints of each season okay so you have the lesser cross where the TA are and o are at and you have the great cross okay at the the midpoints of the seasons which we talked about as were the Sabbats the major for Sabbats are okay so this is called in the Christian tradition the cross of st. George and the cross of st. Andrew okay and you have the symbolism of the four Gospels okay and the four fixed signs of the zodiac in the corners these are the Archangels in the Christian tradition as well okay so the Archangels are Michael or if we're pronouncing at the ancient way Mick Mick Kyle right then Rafael Gabriel and Uriel those are the four angels of the corners hey but these represent the midpoints of the seasons and the great galactic cross the great solar system and galactic cross that actually positions gives us the positioning for our star in the in our galaxy okay so in the Christian tradition this is the gospel authors of Matthew Mark Luke and John we can look at this as the quadrivium okay and then we could also look at it as the lion the man the bull and the eagle okay so you know many different variations so just briefly the the lion of course is Leo down here this would represent Leo the the fixed fire sign so this gives us also the four Minor Arcana decks and their elemental associations out of alchemy earth air water and fire so the fire sign is Leo the the lion right so the lion the man is the angel the man okay the aquarius sign that's actually an air sign okay so that would be odd the air sign and so the line would represent wands or fire or action that's Leo okay here we have the man slash angel okay this would be Aquarius on the Zodiac zodiac or wheel okay because that's what we're really talking about here that's why the Tarot is a wheel we're talking about the zodiacal wheel here it's not just the Wheel of Fortune in our lives it's the Great Wheel the great cycle of the great year as well okay and the precession of the equinoxes all of its contain there the greater and the lesser okay so the this is Aquarius which is an air sign and would be the intellect okay then the bull this is Taurus okay so this is the earth sign and that is that's earth that's the resources okay that is the the suit of coins or Pentacles and then the Eagle that represents Scorpio this is a water sign and that would be the emotional aspects and this would be cups on the tarot deck and of course again they are the four angels the Archangels Michael Gabriel Raphael and Uriel these are the four gospel authors Matthew Mark Luke and John and we can you know get into the breakdown of exactly what they are but you know I don't want to get that deeply into it I'm just explaining the basic symbology of the card of course you have the Sphinx who represents the guardian of the Gateway to knowledge into greater understanding of ourself and the world in which we live this Fink's has always represented the guardianship of that knowledge in both Egypt and anywhere else that Sphinx symbolism has been used and then we have a jackal holding the wheel of fortune up and then it's also cradled on the other side by a serpent and these are forces that are at work in our lives that can either hold us back from an understanding or you know the Sphinx who is at the top of it if we want to go toward a greater understanding that's it's freewill choice and that's why it's called the Wheel of Fortune because if we choose wisely we'll have good fortune if we choose unwisely regarding our behavior and our knowledge we're gonna have bad fortune but it's not really fortune you know we could call this the wheel of natural law as well you know it's not random chance it's freewill choice and you know what folks I'm seeing a huge huge pushback against freewill in the modern world you want to know what the darkest for I'm going to tell you right now with the darkest forces at work in the world are you want to think it's the dark occult in the mind controllers no way first of all folks I just want to reiterate here do you ever hear me really deeply attacking the dark occultus very very rarely if at all because I'm telling you they're not really the ones who are holding us back we are the ones who are holding us back these people are just influencers you know we can get all into astrology maybe one day it's my weakest occult science I know a minor bit about it never really made it a gigantic study in my life and there's a reason for that I'm not pooh-poohing it and saying there's nothing to it okay here's what I am saying influences are not determining factors let me say that again influences are not determining factors that's one of the most important things that's one of the most important revelations are going to cure ever in one earth is happening right there make a note of it I need to make a slide with that on it influences are not determining factors what does this mean this means that energies can be influential factors right forces at work in the world can be influential factors social engineers can be influential factors mind controllers those who want to manipulate our minds are certainly influential factors that's what these dark occultists are that's what these dark forces at work are there like tides right we talked about this you want to take a boat out into the ocean and it's high tide and rough waves are coming in can you still get it out there yes you can but it will take a greater act of will and that's where we're at we're at the shore with a boat and we want to get out past the breakers and it's very rough and it's high tide and that tide is coming in strong if we want to do it now and we need to do it now we have to employ a tremendous effort of but can it be done yes it can it is not an impossibility and that is not a deterministic factor it's not a determined set in stone thing the same is true of astrological forces do the body's the large macrocosmic bodies of the heavens have an influence absolutely they do how could something that are that large and powerful and have that much of an actual effect in space-time not have an effect on consciousness consciousness it's all connected this is one living body the solar system is one living body and the other stars are one living body of the galaxy which was called Newt or knew eat in the ancient Egyptian tradition the galaxy itself from which all the suns the the the sons and daughters of the of the galaxy the stars come from the black void the void of infinite night are the macro bodies of the heavenly spheres are these influential factors of course they are do they determine things absolutely not absolutely not you want to get into the game where you think astrology determines things you don't understand it in my limited understanding well I may not have all the mechanics of it down pat up here because I haven't made that deep of a study of astrology in a sense that if someone thinks it determines everything you know it far less than I do I know it out of infinitely greater level because I'm trying to explain to people these are not deterministic forces and the Tarot is not here in the wheel of fortune' card on this slide bring the slide back up please is not showing you deterministic factors on the wheel of fortune' card it is showing you potential influences one is calling you forth and the greater knowledge and the others are trying to keep you where you're at what is the real determining force free will and let me go back to what I was saying about that folks you want to know what the greatest negative influence in the world is one of the darkest influences in the entire world our regular human beings who themselves have become convinced that there's no such thing as free will and that everything is determined everything is deterministic or there were somehow robot mechanisms operating in a purely physical level that when input comes into it we're determined to act a certain way nothing could be further from the truth and that is a complete bullshit lie free will can trump everything that's why these cards are called the trump cards they are showing you the forces that can trump anything except natural law that's the only thing that cannot be trumped okay the universal force that is guiding everything is natural law you're not going to escape that that's inescapable that's why it's called law it's the only thing that's really truly law everything else is going to be pushed forward by an act of will or the absence of that will as we're going to see okay so I just want to briefly touch on what the word tarot has come in the Tarot tradition this is part of the Sacred Feminine goddess tradition and in the modern world it has come forward through the Latin language to have a sort of a encoded meaning through the letters themselves if we rearrange the letters in basic ways that that they could be read in sequence with each other on the wheel okay we can come up with six Latin word and they are as follows the word rota ro ta in Latin if you start with the are here and you go around clockwise ro ta okay and that means wheel in Latin and then the word taro ta are oh we're just eliminating that last you know ta ro we would start at T at the top and go clockwise we're just eliminating the last repetitive letter okay and that is the taro itself okay it's a phonetic equivalent ta ro the last T is silent then a ro t I wrote I wrote is first person singular for the Latin verb arare which means to cultivate or to grow o ra t comes from the Latin vote verb or RA it is also first person I'm sorry third person singular both of them are third-person singular verb for the Latin verb or RA which means to plead or to ask to do something to plead or to ask to do something okay then the word Torah tio ra the phonetic equivalent equivalent of the Hebrew word Torah transliterated into English as tio ra H which means law in Hebrew and then at or which is a phonetic equivalent if we add the rough breathing off Hathor okay we're adding a rough breath equivalency okay so this is a phonetic equivalent of the Egyptian goddess of love Hathor again the Tarot comes from the Egyptian tradition and the goddess tradition so if we put them all together what we are what we actually get as sort of a decoding of the word tarot is the wheel of Tarot cultivates it pleads the law of hathor some people have said this as the wheel of tarot brings order because to cultivate or to grow can also mean to bring order to the world so it pleads or it asks us to learn the law of hathor the law of the goddess the law of nature okay the word nature mother nature net tear means God in Egyptian and TR again dropping the vowel sounds nectar okay it was actually not pronounced netter that's the english equivalency phonetically it was actually pronounced nature the tea is as chuck sound hard like TCH nature that's how it was actually pronounced in ancient egypt nature so think about it it's so close to nature adjust the vowel sounds change that's all again you'll see that in a as a continuous theme as you go through you know ancient language and and names the the consonants remain the vowels are interchangeable because many you know phonetic languages and and alphabets back then didn't really have vows like Hebrew okay coptic egyptian etc they're just consonants for the most part so that's the literal translation the wheel of tarot cultivates it pleads the law of hathor or as i like to say it the wheel of tarot brings order by asking us to learn natural law that is exactly what the word taro means and that is exactly what the tarot deck does that's what it teaches if it's properly understood so let's jump into its sister science occult eclis that if you don't understand you don't understand Tarot again they have to be studied invariably inseparably you start to try to separate these two occult Sciences you're turning them on their head and one is not gonna make sense without the other so let's look into what Kabbalah really is and I've done whole shows on Kabbalah but I'm just gonna very briefly review and hold on I'm sorry sorry about that there we go so Kabbalah they're written in Hebrew means reception Kabbalah now the word reception in Hebrew Kabbalah actually comes from the verb to receive okay that's what it means to receive but if you really want to get down to the proper esoteric connotation of the word it means proper reception it really means to prepare oneself in the correct way so as to be able to receive truth that's what Kabbalah really means in in its way down deep esoteric translation if you want to properly translate the word Kabbalah it means proper reception through proper preparation that's really what Kabbalah means esoterically okay so you're preparing your own mind to be able to receive the truth so how does Kabbalah do that how does this occult tradition actually do that this has been called the roots of the Western mystery traditions of occultism because it comes out of very old Hebraic tradition from the Levant area and then back out into the you know into ancient Egypt okay so it does this through a system of correspondences some people have described Kabbalah of as having so many core responses twists and turns symbolically you know in creating correlational thinking that they say it bends the mind almost it bends the rational mind almost into a pretzel okay there's so many twists turns variations and different correlations and correspondences that eventually the left brain says I can't deal with this it's too much that's what it's actually designed to do it's designed to put us in that receptive open heart based intelligence if we go deep enough into it super left brain people go and look at Kabbalah and go oh this is so many ancient quaint religious tradition with all these names for this different stuff that you have to learn who who wants to deal with that it's all nonsense anyway that's what the overly left brain in a left brain prison people among us will do those who are in that left brain prison but those will go deeper into it who have the will to traverse this occult tradition it will eventually say to the left brain will say I can't take this anymore and it will get step out of the way and that's when the real learning can begin because what that does is it prepares the way through preparing the heart and we start to step into heart based intelligence and then the tradition starts to really speak to us okay so let's continue what this explanation of what Kabbalah is Kabbalah is an ancient system of Hebraic esoteric teachings communicated to its initiates through symbols and correspondences the most well-known and significant aspect of Kabbalistic symbolism is the tree of life this is called the Kabbalistic tree of life it's also referred to as the sefirot ik tree of life formed by ten Sephirot or emanations so these spheres on the Tree of Life are known as cephiro --tz-- that's the plural singular is Saphira and it may mean emanations sefirot means emanations okay something that is being emitted from or growing out of okay so they are connected by 22 paths the straight line bars on the Tree of Life that create its branches or its paths and of course the 22 paths actually represent the Tarot major arcana so the major arcana can actually be lay upon the branches of the tree of life but a lot of times people don't understand that the emanations itself or the cephiro t' also represents the major arcana of the Tree of Life so you have 22 paths but if you duplicate the tree and you count the dot sphere you also have 22 Spears you don't have 22 cephiro t' you have 20 separate if you admit if you double this and you take one tree to be the microcosmic tree one tree to be the macrocosmic tree you will have 20 sethy roat's which is cards 1 through 20 and you will have two cards in the major arcana that set the last two of the 22 of the major arcana that would represent the dot sphere respectively one on the microcosmic tree representing the soul or the fool card one on the macrocosmic tree representing the universe or the world card saw in some decks it's referred to as the Aeon okay so the sefirot correspond to various aspects of human mental and emotional characteristics an 11 an eleventh sphere named dot is not considered as one of the sefirot but rather as the place from which the entire tree or emanates corresponding to the realm of hidden or halted knowledge dot means knowledge so the dot position is on both trees that we're going to look at the microcosmic and macrocosmic trees of life is knowledge respectively of the Minor Arcana or the world of inner knowledge or the knowledge of self and the major arcana or the so called outer world the macrocosmic world the knowledge of the universe and its universal laws so already we're seeing deep correspondences between Kabbalah and Tarot 22 spheres okay we take card zero and card twenty-one separate them from the twenty two cards of the Major Arcana the cards numbered one through twenty represent if we duplicate the tree okay Kabbalah always talks about the two trees not just one okay the Book of Revelations talks about two trees not just one okay there's the microcosmic and the macrocosmic the Minor Arcana the Major Arcana hey you break the Major Arcana down 22 cards two in the knowledge occult knowledge position okay and then the other twenty on the spheres known as the sefie wrote on the sefirot ik Tree of Life you see the correspondences of the both the Kabbalistic tradition and the Tarot tradition in the ancient Indus Valley tradition known as the Vedas which is which also means knowledge you're gonna see this over and over again if you start studying the occult it doesn't mean belief it doesn't mean religion it doesn't mean accept this as because we say it is it means this is a science that you can study and come to understand and it's all about you it's all about us our in the universe how we work how the laws of nature work all things that could come to be known knowledge the Vedas one of the most ancient forms of occult knowledge from the Indus Valley traditions deriving out of the ancient goddess tradition as well means knowledge the word Vedas means collection of knowledge right in the word okay and what from part of the system of correspondences to come from the Vedic tradition is known as the symbol of wheels or chakras again you're gonna see correspondence to the aspect of the wheel again which the Tarot has been called a wheel okay it's a system of wheels just like the chakra is a system of energetic or vortex wheels within the body corresponding to glandular activity at different places where glands produce energy in our body and electromagnetic forces are generated within the body actual whole electromagnetic fields are produced and actually known through science the three biggest electromagnetic fields in the entire body are number one the heart number two the brain and number three the intestinal system the digestive system which is the root of the immune system in the Vedic tradition they teach of seven major chakras and then other traditions and variants you know we'll go into other more subtle chakras that extend even above and below the body but within it we are talking about the seven major chakras starting at the root chakra and progressing up to the top of the head which is called the crown chakra so you have the root the sacrum the solar plexus the heart the throat the third eye and the crown in the Vedic tradition these are known as the mooladhara chakra the swadisthana chakra the montipora chakra the on aha - chakra the vishuddha chakra the on yes chakra and the sahasrara chakra so if we look at the tree of life and I've color-coded my variation here of the tree to correspond with the Vedic chakra system we can see that it has seven levels just like there are seven chakras in the Vedic system of chakras this tree in the Kabbalistic tradition has been called both the Tree of Life and the ladder to God that's another name for it it's been called the ladder to God in the Kabbalistic tradition because it has rungs that we climb to get from the root or base chakra all the way up to which represents staying in base consciousness in low vibratory consciousness we climb the Shockers as a rung system of a ladder you know one upon the other to build the energy known as Kundalini which then can take us all the way to what has been referred to as godlike consciousness or enlightened consciousness at the crown chakra at the top so the root chakra would correspond to Malkuth or Kingdom I'm going to go through the Hebrew names of the sefirot on the Kabbalistic Tree of Life this is going to be very important when we lay the cards down upon these spheres so that you understand what they correspond to the root chakra is base consciousness but it's also anchoring in the physical world it's also about the physical resources and characteristics that we have at our disposal which are necessary to perform the great work it isn't like throwout malke ruth throw out the kingdom throw out the root chakra that's an anchoring point it's needed because the work is to be done here on the earth not in some etheric realm you know of imagination only you know too many so-called spiritualists and spiritual teachers don't understand that you know and they don't get into that this is boots on the ground spirituality what you learn and you know spiritual teaching has to be taken back upon the earth and you need to put your feet right on the ground anchored firmly and do the work here you know that's real world spirituality streetwise spirituality as I like to call it so Malkuth our kingdom is the first level out of these seven levels and it represents base consciousness material consciousness but also just it's that sort of that you know earth elements okay it's anchoring to the earth it means that we do the work here in the here and now and we have to be present in the here and now so that anchoring is important and it's not to be discounted or shunned it's not a bad thing if we only stay there then it turns into greed materialism staying in low vibratory consciousness etc then it becomes a bad thing but it's necessary to do the work to have that anchoring present so yes sewed meaning foundation is the next level up that's the next rung up on the ladder to God okay on the Tree of Life this corresponds in the Vedic tradition with the sacrum chakra so this would be the the genital chakra it would be at the area of the genitals okay and this is called the desire center the desire chakra now again it can be that you'll notice that the levels are both unitary and dual we're going to talk a lot about that so this is a unitary chakra because it's desire in any form okay that could be low base desires you know which we all struggle with and some people let take over themselves okay but you know they could be dealt with and expressed you know or they could be suppressed and then they could you know rule us and then it could be desire for something higher you know yes sowed foundation desire however you want to refer to it it could be desire to improve oneself it could be desired to obtain greater knowledge about how we work and how our reality works so this is coming out of pure base consciousness or material plain identification and saying I want to know more I want to go further in my understanding I want to know more about how I work I want to know more about the self and I want to know more about how the laws of nature work I want to learn more about the universe and the forces that are within it so that's that second rung okay and we're gonna go up to the third rung okay and I'll talk about the vertical pathways in a moment the pillars the left-hand path the right-hand path and the middle path or the center path also known as the pillar of severity the pillar of Mercy and the pillar of mildness as I have labeled them here in the Kabbalistic tradition and we'll talk about what they mean and their correspondences but let's look at this third rung or third chakra the solar plexus chakra now here you'll see it's the third rung of the Tree of Life and it's dual there's a left side and a right side to it there's a masculine and feminine the feminine aspect okay would be hoed or Majesty on the left hand side of the tree of life or the pillar of severity these are the inward qualities the feminine aspects of the Tree of Life are on the left-hand side the masculine aspects are on the right hand side in this system of correspondences so code or Majesty represents courage internal will because courage is something you don't really see in the external world that's something that has to be developed in wordly you can't take a picture of courage you could take a picture of with someone acting with courage but courage is a force that we have within ourselves it's an aspect of our consciousness and our personality that must be developed within it's an inward quality hence its own the feminine the base of the feminine pillar okay and you know this is the will center the solar plexus our guts look at where it's positioned you know the chakra is at the guts okay the solar plexus the Sun okay one aspect of the Sun the real Sun is the heart as we're going to see the center of it all what holder Majesty is courage on the Tree of Life okay and it's it shares the same rung level the same rung on the ladder to God as net saw or endurance and this is willpower okay so again we have the solar plexus or willpower Center which is twofold it has a feminine aspect which is internal which is courage on the left hand path of the Tree of Life and then we have the willpower Center net saw or endurance in Hebrew on the right hand or masculine side the will to act in the world again in this system of correspondences in Kabbalah you cannot look at the feminine pillar or the pillar of severity as negative that's not what worked we're not talking about negative versus positive we're talking about feminine versus masculine or internal versus external factors the pillar of Mercy is the masculine pillar okay the pillar of severity the feminine pillar and the one which we bridge the masculine and feminine and combine them into one holistic unity is the pillar of mildness or the center path so going up one rung to the heart chakra the anahata chakra in the Vedic system on the Tree of Life the correspondence is the Sephirah known as Tiferet Tiferet is beauty or the heart okay unified because it's all about care this is a unity chakra that's the most important of all of the them on the tree of life because it is the center of everything this is the generative principle so it's the heart care for truth care to know care to actually determine the difference between right and wrong behavior care to act with right instead of transgress against natural law and act in wrongdoing so that's the heart chakra that's the real Sun of the whole tree you know we could look at the solar system correspondences and the astrological correspondence isn't if arete would correspond in that system of correspondences to the Sun because it's the center of the whole solar system of the self moving upward to the throat chakra again I hope the color-coding helps to clarify where we're at you know this is that blue chakra the tif arete or heart chakra was Green okay moving up to the throat chakra in the Vedic tradition in the Kabbalistic system this corresponds with the the dual rung on the tree of life of Gabara which is strength and has said which is compassion this has also been translated Gibara can also be translated as severity because it's the center of the pillar of severity and has said compassion or mercy it can be translated as mercy in Hebrew okay so what these really represent in the Kabbalistic tradition Gibara or strength represents internal willpower to change okay so this is doing work upon ourselves okay you will powers even the wrong word to look at it its internal influence our internal dialogue that we have with ourselves that encouraged us to change for the better so we're having severity with our self we're having strength to change internally its internal influence to change ourselves that voice that says see it's the voice right it's the throat chakra it's the voice that says to ourself we need to be better we should improve I want to do better I want to improve myself see that's why it's severity its severity upon the self great and then has said is the external or masculine quality again always on the left-hand path you're going to see in this system of correspondences the internal characteristics the feminine aspect when we go internal to the self and then on the right-hand path we're going to see how do we interact with the world so you saw net saw or endurance was willpower will to act in the world so has said compassion or mercy is how are we influencing others around us because we see that they also must change for the better that we are all not where we need to be but we have to get ourselves together first you know we have to use that internal dialogue improve ourselves then help or influence others to change with the power of our voice we can't do it for them ourselves but we can through our voice the throat chakra helped to influence them to change that's a huge part of the great work think about how perfect this system of Correspondence already is if you understand and we haven't even started laying the tarot cards down to see the symbolism used to represent these aspects of Kabbalah okay I'm just explaining what they mean Kaaba in Kabbalistic terms when you study Kabbalah isolated weights you see how perfect the correspondences are for those who may not have seen this you know for those who have it'll be a review and that's fine you'll learn it at an even deeper level when you review it but for those who haven't seen it when you see the system of correspondences is like the first time I ever saw this it melted my brain Belted my mind down because I just could not believe that they perfectly depicted this in the Tarot tradition so you know we're talking about influencing the self and influencing others with the power of the voice whether it be external dialogue or actually speaking to others you know with our actual voice hence the throat chakra that blue rung of the ladder now dots we pass that the the realm of the abyss or hidden knowledge okay as we go up to the sixth rung of the tree okay so that would be the indigo level so we're at blue now we're in a deep blue almost to a purple you know or a violet so we're at what would be called indigo so we have red orange yellow green blue indigo and violet or purple okay so the indigo level is also dual it's been ah and Houk MA but before I do that let me just briefly talk about dot dot as a Hebrew word means knowledge so we are entering the realm of the Trivium now the Trivium is depicted right underneath of the crown chakra the three I'm just gonna point it out with my mouse here the three spheres that represent the Trivium here r dot V na and Hoke MA what is the Trivium knowledge understanding and wisdom what do they form they form a triumphant or a triangle inverted which represents the Grail connected to at its base the heart chakra care for truth I mean imagine this how perfect that is you know and it can be filled with knowledge dot we have to pass through knowledge to get to understanding and wisdom and it's hidden it's not a physical part of the tree it is considered the place of life from which the tree grows knowledge it's not one of the cephiro that is not a Saphira dot to consider it one of the sefirot is considered blasphemic in the ancient Hebraic tradition of Kabbalah this is why they called the ritual event 9/11 you know it's warned about in the Zohar to never refer to as any more or any less safe he wrote as 10 not 9 not 11 so this is a big you know blasphemic you know destruction of the Tree of Life destruction of knowledge putting us into fear which destroys our ability to understand and then to act correctly which is wisdom that's what 9/11 was all about the destruction of the three pillars the three towers buildings one and two and building seven the middle pillar what's that one two and seven equal ten the destruction of the ten Sephirot on the Tree of Life we've been through that system of symbolic correspondences regarding 9/11 which was a huge satanic ritual to destroy the ladder to God and close it all down and keep us in Mal couth in the kingdom run by the Satanists not the kingdom of God but the kingdom of slavery so we have the Trivium as the tool set that leads us to the crown chakra and see I'm going to show you how the energy flows through the Tree of Life the Kundalini energy and when we get to that we have to understand you know with some people that opens erratically what some people had opened slowly and it was a process okay and the process could take years for that to open and then when it opens it's a slow steady fountain and it's not this huge explosion that happened happens all at once and can be very disturbing and traumatic you know well and often will represent some sort of a blockage okay when energy bursts forth usually something blocked it Pryor okay what we want to build toward here is a slow expanding of that Kundalini energy and a slow progression of our understanding because we have the will to keep going and keep going and we work upon ourselves a little at a time until we get to a position of strength and eventually that Kundalini energy builds as a slow steady consistent force that's the goal that's what the correct opening up and reception means that we eventually evolve - okay so the Trivium is up here and it starts with knowledge dot that's and this is all about knowledge of the self and that's not in the physical domain it grow that the soul is in the realm of the hidden spiritual true spiritual knowledge and the whole tree grows from that we are in the world where the ten emanations are thus fe wrote we are having an experience a spiritual experience of the soul in the physical domain and the sefirot are the expressions of that experience or the emanations of that experience yeah so we then go up to the sixth rung of the ladder represented in the ego indigo color here which represents the third eye chakra and that's all about the mind right understanding and wisdom okay these are mental qualities okay so the base of the tree of life that would be coins of the Minor Arcana that would be earth right we went up to the will center right that's ones or fire right the compassion we're working you know the heart chakra and working upon ourselves and others that's all part of cups or that's the water aspect okay and then we have knowledge that's the air what we have to we have to come to know what's going on and then we need to do something with it okay so bina is the internal characteristic of that that's understanding and I would call it just that I wouldn't change the word at all or use a different word to explain it that's the when we take knowledge into ourselves it means we've come to understand what it means knowledge itself is just the building blocks that's the grammar so this would be the logic or understanding aspect of the Trivium then and that's why it's on the feminine or left-hand pillar the right-hand or masculine pillar is what we do with what we have come to know and that's what wisdom actually is wisdom isn't just knowledge itself it's knowledge actively applied in the world for the right reasons putting it into knowledge correctly that's what wisdom really is it's doing the right thing with what we have come to know and to understand that's why it's on the masculine pillar wisdom is action Wood and it sits at the top of the masculine pillar of action so on the left-hand path or the feminine side the pillar of severity as it's called in Kabbalah you have the courage to act influencing the self and how we work upon the self and the understanding so you could really say that we have to have understanding and courage and then they come together in a synthesis okay to improve ourselves and then you have to do something with that in the world so you have to have the will to act in the world you have to help others okay and you have to do the right thing so it's willpower net saw compassion for others to help others to do the work and to tell them what they need to know to speak the truth into the world that's has said compassion mercy okay and then of course wisdom doing the right thing with what we have come to know and to understand that's the active or masculine pillar that puts it all out into the world I hope people can just appreciate just from that the phenomenal system of Correspondence that is part of this deeply esoteric rich system of symbolism and correlation that's to be found in the occult traditions most people have never seen that in their lives never understand that in their lives or what it means and it's sad it's sad that we're discouraged from looking at that let me tell you something folks some kabbalists who teach Kabbalah are not teaching this they're charlatans and they're not teaching the real tradition just like freemasons in many cases are charlatans and they are not teaching the true free Masonic tradition just like many Rosicrucians are charlatans in the modern world and they are not teaching the true Rosicrucian knowledge just like many so-called tarot practitioners aren't teaching Tarot not even a little bit they're charlatans they're not giving you the real knowledge they're teaching you what they want you to believe that it is and then other people just go and believe all they said that's what it is they're the experts and they have no idea what they're talking about actually they do have an idea they do know this and they're telling you that it's something else to get you to believe that it's something else just like Satanists will tell you Satanism is something else and give you the Hollywood variant of it so you never come to understand the real thing they're giving you the proxy so you never study the real giving you the artificial or the ancillary so you never get to the real esoteric understanding of it they're reserving that for themselves so that they can use this knowledge as a weapon against you and all the rest of the ignorant masses of humanity and again I'm going to reiterate it the people who really take my work seriously and who are serious students of it I'm not referring to you guys but the religionists out there who look at this is passing ancillary information to your religious bullshit beliefs and you go right back to the Queen's Chamber of going to church every Sunday and thinking you're a good Christian okay and say you know you know I just wanted to hear what he had to say about the Satanists who run the world and then you want to poopoo this and say there's nothing of any significance or value to be found in it you don't know what the fuck you're talking about at all not even a tiny little bit and by pooh-poohing it and by telling other people they don't need to know about it you're doing a you're keeping other if you're helping to keep people in slavery just flat out that's what you're doing and encouraging just belief in some external savior you are part of the problem you are working with the dark forces you're working with the Satanists whether you know it or not because that's exactly where they want all of the world and its people in abject ignorance never understanding what they know never understanding how the psyche works never understanding how the laws of nature work so that they can keep fucking ruling you and me unfortunately and you want to say oh no my religion is just completely right and there's nothing to the occult how about saying nothing at all if you're gonna spout pure ignorant garbage out of your mouth okay don't try to put down real knowledge and someone who's trying to convey it for the betterment of humanity so we can get the fuck out of slavery okay I'm personally tired of hearing it spout it somewhere else don't write it to me I'm not interested in hearing your bullshit okay I just want to say that on the open in plain language is very easy for people to understand because I'm tired of religionists and I don't want to hear your fucking nonsense anymore quite frankly I don't even want to hear it I know what I'm talking about and you don't let let's have that straight up budding egos okay straight up let's buddy go like Brahma bulls I know what I'm talking about you fucking don't and I don't want to hear your bullshit anymore don't bring it to me go spout at somewhere fucking else all right because you know what a lot what a lot of people don't see folks is the shit I deal with to do this shit to bring this knowledge to people right and they think oh oh you should just know it should never get it bother you're doing anything to make you upset well that's called not being human that's called being a robot especially when you hear from people there's no absolutely nothing yeah keep it on me during this rant for a minute cuz I'm gonna fix a slide real quick okay well I talked about this picture people who know absolutely nothing what they're talking about you know that they have absolutely no clue what they are referring to the second they open their ignorant mouths and you're an expert on something that is studied at the vast majority of your of the time of your life and some know-nothing imbecile starts wanting to spout nonsense to you as if they know what you're talking about when you can tell in the first 10 seconds that they begin to speak that they have looked at no part of it can you imagine this just imagine imagine if you're a computer expert imagine if you're a programmer right and let's say you program in JavaScript okay and you know you've written the book on JavaScript there is nothing you cannot program in it you are the highest level expert in the JavaScript programming language that basically exists on the earth and you walk into a bar and you sit down and some fucking imbecile next to you goes what the hell is JavaScript but in the next breath he says to you let me tell you all about what I think it is and he starts spouting 100% complete inaccuracies about what it really is and then telling you he knows more about it than you do that's what I deal with almost every fucking day almost every day think about how sick of that you would get if you made something your life study and then jerk-offs who have never looked into it because you'll ask them the simplest question about it or this saying what have you ever read on the topic do you argue familiar with this work read familiar this work are you familiar with this work no no no no no no no I know nothing about it I've studied nothing about but I'm gonna tell you everything there is to know about it and I'm gonna tell you you're wrong could you imagine the height of hubris that someone has to be existing in to believe that they have knowledge that they don't and again that's what I call negative knowledge you're nowhere even in the realm of knowledge you're in a belief system of what you think you know and guess what ladies and gentlemen invariably I'm gonna come out harder and harder core every week to really just lay the absolute smackdown upon the people who are giving me this shit dynamic and invariably you know who they are they're people who have bought into modern world religions the cultural religions and almost invariably they're fake-ass Christians you get some some Jewish people who are in that mindset very few Islamists really even write to me to be honest with you and generally they haven't really studied this tradition if they come from that background usually unfortunately but I get a lot of fake-ass Christians and don't know anything about their own tradition quite frankly that I could school them on the Christian tradition infinitely more than they're aware of okay and they want to tell me about the occult and what it is and they're fucking Know Nothings so the gloves are off and I'm just gonna say it in plain Street language you don't know what you're talking about and I don't want to hear your shit anymore I'm tired don't write to me go write to somebody else will waste their time when I get garbage like that it goes in a block list and you could write to me infinitely think your message is getting through I will never say it that's what happens I open up a rule I paste your email address in I hit save and that's the end of you you can you can write to any of my emails as it goes in a block list and I never see it I don't ever even see it in the inbox it gets deleted upon receipt as soon as it's received it's immediately deleted not put in the trash for me to even look at in the trashcan if I want to go look at false positives it's instantaneously deleted once I realize you're that much of a jackass that's what I do cuz I don't have time for that so don't even make me have to do that study it for yourself instead of having a belief about it this is what too many people do they develop a belief based on what's written about a topic instead of actually studying the thing itself that's like going well you know uh pink lady apples I've read about them so I know everything there is to know about how they taste well until you've experienced it yourself no you don't you haven't gone into that experience stop reading about from someone else what it's all about and actually experience it okay so let's go back to the slides I want to show people the movement first of all I want to show people the numbering system of the Kabbalistic tree because that's very important and I want to show people the movement I didn't take care of the last chakra I'm sorry we go to the seventh and top chakra on the Vedic system of chakras which is the top of the tree of life which is cat air or the crown okay cat air means crown and that's what it's also called in the Vedic system of chakras and this is godlike consciousness but you know it doesn't mean you know everything that there is to know about creation in the universe it just means that you are in human form embodying higher consciousness you've gone from beast consciousness to enlightened consciousness that's all it's not to be looked at as your God walking incarnate on the earth like don't twist it into something that it doesn't mean too many people take this you know idea of the crown chakra or cat Tara on the tree of life to mean like man has bee god no it does not mean that that would be Satanism okay it means we are embodying the higher laws of creation here upon the earth we are putting the plan of God if you will into effect in the physical world we are doing the will of creation as I would say that's how I would word it okay we are aligning ourselves to natural law and living it in its fullness okay that would be what Katara really means and how it is represented in the world so let's look at the numbering system of chakra Sephiroth which is very important to understand the progression of energy that this represents because this is really the human spinal column as well from the base to the top of the head the center of the body okay so this is the numbering system on the Kabbalistic Tree of Life which is going to become very important when we lay the tarot cards down on these emanations or sefie roads okay so cat tear or a crown is one Hoke MA or wisdom is to be na or understanding is three we pass through dot to has said which is sphere number four compassion then to gabber ah five that strength Tiferet beauty the heart chakra is six right in the middle and you'll see we're making like a lightning bolt pattern starting at the top then to the right it's a dual chakra so we go to the left then we're gonna go back to the right it's another dual chakra so we go to the left to number five then we're gonna go again toward the right so we have to pass through tiffer at which is six then again toward the right okay so here's I'll bring my mouse back up on the screen if I can there we go so we're making a lightning bolt pattern one two three four five six Tiferet net saw seven endurance code majesty eight continuing with that lightning bolt pattern nine yes sowed foundation and then at the base the bottom Malkuth or kingdom number 10 okay the energy that rises from the base of the spine and wraps all the way around the spinal column in a in a spiral progression has been called in the Vedic tradition and also in the the Kabbalistic tradition the Kundalini energy as a matter of fact they call it I think it's called the Veda Kundalini or Devi Kundalini Devi Kundalini it's referred to in the Vedic system okay Devi Kundalini is this energy it's this this flow upward of the energy up the ladder of God the spinal column to the to the brain and then at the top of the head okay so here's how it progresses I'm gonna play this quick animation to show you the progression of the Kundalini energy from the base of the spine to the top of the head it starts at mile couth or Kingdom the base chakra and we're gonna go up in that lightning bolt pattern from 10 up through nine eight seven six five four three two all the way up to the top of the top of the Tree of Life cat tear or the crown chakra in the Vedic tradition this is why the sefirot ik Tree of Life in the Kabbalistic tradition has also been referred to as the thunderstruck tree okay or the lightning-struck tree it's a lightning pattern lightning hitting the tree okay you'll see this in there's a movie entrance to some movie studio that has lightning hitting a tree that's the producer of that studio telling you he's a Kabbalists covertly anytime you're going to see the lightning struck tree that's a symbol of the Kabbalistic occult tradition because that's what it what we're talking about we're talking about that Kundalini energy rising from the base chakra to the crown chakra okay so keep this progression in mind when we go to show how Kabbalah and the Tree of Life corresponds to the Major Arcana of the Tarot deck so this is the microcosmic Tree of Life with the first eleven tarot cards of the Major Arcana put upon laid down upon the sefie wrote on the Kabbalistic tree okay so there's two trees we're gonna do this twice the macrocosmic except the microcosmic and the macrocosmic this one here is the microcosmic tree so let's look at the system of Correspondence okay all we've done is taken card zero which is the fool okay or the soul more properly understood the soul card okay we are putting that at the dots position so we're removing it from the numbered cards of one through ten then we're just taking cards one through ten and we're putting them down at the same numbered areas I should have kept the numbers on this slide as a matter of fact cut away for a second back to me and I'll just talk while I do this real quick okay I'm just gonna put these numbers on this side of the tree very quickly just give me a moment and I think we'll have a better understanding of the correspondences here as a matter of fact I'm going to also duplicate them on to the other side so we very clearly have I think this is gonna be a much better let's see what this slide looks like now switch back to it please so just making some changes right on the fly to just show you this system of Correspondence is a little bit better okay so you just take the major arcana you put the zero card at the dot position and then you're gonna lay down the other cards just in the order that we looked at of the numbering system of the sefirot one through ten okay now look at what you have okay so we're gonna step through this okay to show you the correspondences alright so let's move this to the other side and again we're gonna do this twice we're gonna do this both with the microcosmic Tree of Life and the macrocosmic Tree of Life all right we'll do the microcosmic first so let's look at the progression as we move through the path of the soul some people have called this the path of the fool but more properly understood it's the path of the soul okay in the physical domain so here we go so this is the fool card alright or the soul card and it's at the dot position we lay that at the dot position what you really have to do to study this is lay it out yourself don't just look at my slides get a tarot deck you know a decent one and lay the cards out in this progression on a table like you know clear off you know your living room table or your kitchen table and just lay the cards actually in the Kabbalistic tree in this order all right so this the soul card as I'm calling it at the dot position circled there on the microcosmic Tree of Life this is the soul this is the journey of the Spirit in the world okay so it's called the fool because anyone would have to be a damn fool to come and incarnate on the earth okay I love how David Icke often words it you know he says we were all lined up in the in the before life you know before we all incarnated here on the earth and um you know in this pure realm of spirit we're all lined up in a line together shoulder to shoulder and suddenly a big voice comes down and says volunteers for Earth please and everyone else in the line took a step backwards except me you know that's how much of a fool you have to be to come to this prison you know to try to help the absolute lunatics of this lunatic asylum okay but this is what we do those of us who are here to teach so again it's the zero card it can't be numbered it's infinite there's no beginning and no end that's the soul okay it's not of this world it's the cosmic egg from which everything is born the cosmic void the no thing okay the nothing this is the Sun the solar card as well there is a Sun card on the major arcana as well but this could also represent the great Sun you know the soul the idea in Thelema that every man and woman is a star we're also seeing this that we come from star matter okay and we're traveling light we're light travelers that's the idea of the soul we're not taking anything with us folks were basically leaving with what we came with which is nothing you know and nature should be in our hand and at our side represented by the animal kingdom we should be fellow travelers with them on a journey of soul progress these are the nature forces that go that travel along with us and it's a leap of faith into the world represented by the full stepping off the cliff so powerful symbolism in the deck already you know clearly showing us that this is the soul or the spirit and it's about its progression in the world so how does this progression happen it goes backwards through the sefie wrote from 10 all the way up through one because it's a journey that starts in ignorance the wheel of fortune which we've already talked about as base consciousness where is it at on the MAL couth position of the Tree of Life severe number 10 okay think about it and it's card number 10 they're telling you the position on the Tree of Life you got to put it in the tenth position the bottom sefie wrote mal coot and it means if you stay in ignorance you remain in base consciousness in life and you don't make any soul progression you know when you're going back and doing it again you know people think it's one and done nothing could be further from the truth it'll be a great recycling though you'll go you'll stay on the wheel the wheel of karma and the wheel of incarnation of reincarnation okay that's what that jackal force represents that's the wheel of incarnation of reincarnation and you will go round and round and round until you get the lessons that are to be learned here this is a school it's a school from which like you can be left back and have to do the course again the Clutton you know the level again but you you will not be kicked out you can't be kicked out you know all you could do is have to go back and repeat the lesson that's the wheel of karma the wheel of fortune it's it's just so self-evident once you really start looking at it no one's thought hardly and I shouldn't use the word no one that's a bad blanket statement hardly anyone studies the Tarot this way you know people have a very rudimentary understanding of it at best and a completely inaccurate understanding of it at worst so this is the Wheel of Fortune card staying in base consciousness staying in ignorance in which case our lives are gonna be a crapshoot it's gonna be a spin of a roulette wheel you know it's a chance that we're taking it's not guided through proper reception of knowledge which is what Kabbalah is there to teach us to do to guide our lives through knowledge through it through understanding through wisdom which are knowable and it's repeatable this is a science of how we can receive certain consequences in our lives and not be at the mercy of forces that we don't understand so as the soul progresses through its journey on the Kabbalistic Tree of Life we start to elevate up the rungs of the Tree of Life and we get to that yes ode or foundation position out of that mal couth or Kingdom position earth identified material identified awareness we're up at yes ode so this would represent the journey to out of hacia into yet Syrah on the Kabbalistic Tree of Life and then the two worlds above would be Bria and OTT salute we've talked about that before in break downs of Kabbalah and it's worlds on what on earth is happening this is the Hermit card number nine place at the ninth cephiro position Sapphira position on the Tree of Life and it's the Hermit because it's desire to know this is what the Hermit represents symbolically the Hermit goes off in search of knowledge he wants to know the truth so it's in the sacrum chakra or the position of the genital chakra in the chakra system but what does that mean we already looked at that correspondence it means desire and it means desire to no desire to learn and desire to improve oneself when do you come off the floor of consciousness when you've developed a desire to improve it's the same as anything when does a drug addict start to be healed when he has the desire to want to be better and not be an addict anymore when there's an ignorant person start to heal themselves or their ignorance when they have the desire to know the truth when they develop that desire so this is the first position that you have to get to to start coming up off the very base the floor of the house as they call it in Freemasonry out of base consciousness in the journey toward higher level consciousness self mastery and knowledge of God knowledge of how the universe works and that is symbolically represented represented in the Tarot tradition by the Hermit card let's move up a rung so now we're at the solar plexus chakra depicted here in the yellow color it's a dual chakra remember we said it represented courage and willpower and literally the the the position code means strength and net saw means splendor or victory or endurance so look at what where we're at what does this card represent the woman and the lion courage pudding holding open the jaws of a lion representing courage this is the courage card strength this is one of my two birth cards eight my two cards are eight and twelve strength or courage and the hangman or evolution or the servant of natural law I mean I could have been born in a more appropriate day because those two cards are the epitome some of the symbolizing of my life so this position card number eight at the hold position is courage again internal dynamic of consciousness on the feminine pillar of the Tree of Life the left-hand pillar the left-hand pillar in this aspect or in this interpretation of the microcosmic Tree of Life does not mean negative it means internal or feminine aspect ok the unseen because it's within whereas the right-hand path is the seen or acted upon in the world aspect okay so we move forward to card number seven and that's the chariot so what does this represent driving force or willpower this is the net saw card this is willpower endurance okay victory they call it in in some aspects of interpretation of Kabbalah the the the man in the chariot driving force you know with both sacred feminine and masculine sphinxes you know driving the chariot forward this is action in the world this is the will to act the will to do something okay this is the conquering you know courage is the conquering of fear or acting in spite of fear this is the conquering of inaction all right so this is the conquering of our laziness the driving force or willpower to actually do something in the real world again it's the active masculine aspect of the solar plexus or of you know so this is why it's on the right side of the Tree of Life the active or masculine pillar the pillar of Mercy we move up to card number six at the sixth position the sixth Saphira on the Tree of Life and that's the lovers what was this in the chakra system of the it was the heart chakra right this is beauty or Tiferet the heart chakra of the Tree of Life and it's the lovers true care bringing the sacred masculine and feminine forward the unitary chakra of care care for truth care to do the right thing care to know oneself and to know the forces at work in the world and there's the depiction bringing together Adam and Eve bring me and you know you have the two trees right there the Sacred Feminine and sacred masculine guided by higher-level forces of natural law the angelic forces ultimately you know moving people toward the Sun the light natural law God and it's it's what binds it all and ties it all together without that the whole tree falls apart the lovers true care the generative principle the correspondences are unbelievable if we know what to look for and if we know how to decode but if you don't know how to decode this is a language that's meaningless you know it's like someone speaking Russian and you don't never study the word of it you know you have to know how to decode the symbolism through the system of correspondences and where these traditions come from it's not just random folks it's very detailed and very specific very deliberate and it's teaching us something about ourselves you know I wanted to do this because the evolution card and the involution card came up in this series on Satanism which we just finished the last few shows and I wanted to show people that these top level forces are just right under natural law which is the king of all creation you know and that's where this idea of the paths in the Tree of Life and as a correspondence to the Tarot came up and so I wanted to review this material and present some new aspects of it as well so that's the unitary heart chakra the lovers TIFF arete position on the Tree of Life as we move upward to the throat chakra in the Vedic tradition we get to the rung on the tree of life known as severity Gabara and what this is is internal work that we must do upon ourselves so it's the Hierophant or the Pope the idea of religion governing the spiritual world or the inner world so we shouldn't look at this as a religious leader this is this is the influence that we must wield upon our spiritual lives upon ourselves to improve ourselves internally hence it's on the feminine pillar and it's that path of severity the inner work the shadow work that we must do which is an internal aspect of ourselves hence it's on the feminine pillar or the pillar of severity we must be severe upon ourselves so that we can work upon ourselves to come up to a level of understanding and right action and we have to have mercy upon others compassion toward others because we realize how many people are in a completely degraded state and then we have to have good influence upon them through what we teach in the world and what we speak to them how we want to influence them and it doesn't mean sometimes you have to have tough love too it doesn't just mean just be totally compassionate with your voice it means sometimes you have to say hey you're really fucking up and your fucking other people up you know tough love is part of that dynamic which we're going to get to in a moment represented by the emperor but the Hierophant or the Pope is he's the quote religious leader in the sense that this is the internal influence or force that we have to wield upon our spiritual lives to work upon ourselves okay and we just talked about that in the Kabbalistic tradition and this is exactly the correspondence that comes over through the Tarot in the form of the heirophant or the Pope corresponding to that you have the Emperor or the king that is the Pope's you know compatriot on this rung of the Tree of Life so what does this represent this is the head of government right so you have the head of religion and now you have the head of government but we're not talking about them as external factors we're talking about the internal worlds of religion and government we're talking about the monarchies that are internal monarchies you know remember I went in shows where I talked about natural law and talked about what kind of governments are legitimate and an illegitimate and all worldly government is illegitimate and worldly spiritual control is illegitimate but I also said I'm a fan of monarchy and anarchy in those episodes and people are thinking like what the hell is this guy talking about they're the exact opposite monarchy is one ruler over everything and anarchy is no rulers over anything or anyone and yet I believe in both of those systems and government as a matter of fact I know they're the only legitimate systems of government but you have to have monarchy internally and you have to have Anarchy externally and if you don't do the work to recognize your sovereignty which is the shadow work that is going to help you to understand how to become an internal monarch so that only you are ruling your inner world then you're never going to build external anarchy because that spiritual work has to come first so that we can really be sovereign in the physical world that shadow work internally has to be done so going back to this slide the Emperor or King yes that's the head of the external worldly government which is illegitimate but in this case it's a correspondent representation to the influence we have to wield over others see it's not ruling others but as it is influencing others in the world through our behavior the way we live and through our speech through our voice again this is the throat chakra it's the most powerful way of doing that of influencing others is through the way we actually act by example helping other people to become better influencing them to become better by how we act in the world that's what the best quote ruler or King does you know even in a system where people believe that external Authority is legitimate we know that it is not but it's the correspondence here that we're talking about the wise king or wise ruler sets the example okay we're talking about being a wise ruler of self by setting a good example for others in the world and then teaching them wisely with our voice you know so this is the active pillar it's what we do to influence others in the world through our behavior in our voice look at the correspondents how perfect it is it's it's unwielding it's invariable its exact the exactitude of symbolic correspondence you know for though once again for those that this is a review I hope you appreciate the review and how I'm going in-depth here but for those who haven't seen this I hope it's really taking blowing the top of your head off and it should because most people will never show you this when it comes to the Tarot because they don't know it themselves or they don't want you to know it so then we pass through the realm of dot the soul hidden knowledge of the self that's the first step of the Trivium so the path takes you through the occult world now you're getting up to the higher levels of knowledge when you take in the world of the occult of the self and now you have an understanding of how you work this is the Empress okay so this would be like the Queen okay and this is internal understanding the top level of the pillar of severity or the feminine pillar so once we take in the knowledge then we come to understand what it means this is knowledge inwardly applied through logic to become understanding our understanding of how our psyche actually works hence it's at the top of that mental plane the third eye chakra the indigo level of the tree of life and the chakra system and again you know it's arrived that by care care to know the truth you know you have to get there by way of the heart depicted by that's what she seated on that's our foundation the Empress or the Queen and you'll see pomegranates repeated a lot which is what is on her robe Kabbalah has been called the garden of pomegranates you know if that's the original fruit of Eden in in the ancient you know Kabbalistic allegory not the apple because the pomegranate it's a lot of work you have to do to get to the fruit you know and the seeds only contain a little bit of juice and you have to get a lot of the menu to get the nutrition and to chew it out to to to that juice out that it where the nutrition of it lies you know you look at a pomegranate how much that's in case those seeds are encased there so a garden of pomegranates is like you have this gift of all this this nutrient these nutrients but there's going to be work involved to get to it that's why it's been Kabbalah has been called that you have to do a lot of work to get through the system of correspondences to get all the way down to you know that the meat or the juice that you're going to receive as a reward for going through all that work so moving to the next aspect of this chakra level or wrong level on the Tree of Life you get to the high priestess so this is you know getting to really highest levels of the occult and highest levels of initiation and what we're really talking about here is spreading the knowledge through behavior through what we do with what we have come to know see this is a the the Empress was in the bin' opposition which means understanding but the high priestess is in the Hoke MA position and what does that mean wisdom so this is the active card it's a it's a feminine symbol on the card but what the high priestess is really is is the wisdom card okay we could call this the right action in the world card see I think really show people what I would call all these cards maybe I'll step through these one one more time and tell you what I would call them in my deck okay but the high priestess and either you see the pomegranates behind her again the the sefirot depicted as pomegranates you know that showing you that a lot of works gonna have to be done to get at the heart of the matter and to get to that knowledge and then rightly apply it okay so this is wisdom and again you see the whole tree of life behind her you know she's the she's the you know bringer of that you know this came out of her tradition the goddess tradition she holds the law the Torah because she's Tara the original name of the goddess the moon goddess gives birth to the Sun you know the whole idea of you know the Christian allegorical tradition she has the crescent moon there you know the the Taurus sign again there's that TR again Taurus you know the symbol of Taurus rests upon her head she's Terra you know she holds the Torah the correspondences are endless you know and then you have the pillar of Bo Hwa's the feminine pillar on the left and the pillar of jackeen or yakeen the masculine pillar on the right also referred to as the pillar of beauty and the pillar of strength so respectively so that's wisdom or what we do with what we know when we are doing the right thing with what we have come to know and to understand and then we move back up to the magician card and this is self mastery okay he is a conduit between the higher world and the earth because he has one arm in the heavens and one arm pointing toward the earth he's illuminated he's truly illuminated with the infinity symbol as the halo above his head okay he's bathed in the red robe which represents the rubato stage of alchemy or the development of the Philosopher's Stone okay crowned with roses that's a very symbolic of the the souls journey through the world especially in the Rosicrucian tradition he is whole he has become one okay and he's the Magus or the magician he has the forces of nature arrayed at his table he's holding the scepter of power representing the masculine and feminine forces that he has United and he has the worldly forces at his table earth air water and fire depicted by coins swords cups and wands respectively this is the self mastery card or man with a godly knowledge and attitude in the world doing the great work so let me just step back briefly I'm gonna go back to the beginning of this section and go through this one more time and just say what I would call these cards okay this in my deck is going to be called the soul card to make it very obvious that the path of the soul through the Tarot is the fool's journey that's the the spirits undertaking in the world through incarnated in the world so that's the soul card okay the Wheel of Fortune card is the ignorance card okay this is just staying an ignorance of self I would probably call this card ignorant of self would be probably my best name for it and probably what I'll call it in my deck the Hermit card I will call this desire for truth that's what the Hermit represents desire to know the self probably in in the microcosmic tree the tree of self it would probably be more accurate to call it desire to know self okay or simply desire for truth this is the courage card the strength card in my deck is going to be called courage without a doubt the chariot card in my deck is going to be called willpower willpower the lovers card is going to be called care or the generative principle but I'm simply going to probably call it true care or just care the heirophant card is going to be called self discipline or self improvement okay self discipline or self improvement or maybe just working upon the self I'm sorry let me just step through my hit back accidentally yeah I'll I'll call this self work maybe okay it could be called shadow work maybe but self-improvement I kind of like I kind of just like the simplicity of that self work or self improvement so this is influencing others or setting an example okay or living an example you know that's the best way of influencing others but in general you have work upon the self and influencing others work upon others this would be simply called understanding in my deck and this will be called wisdom in my deck this will be called self mastery in my deck the magician will be self mastery so those are the names that I would apply to the first eleven cards of the Major Arcana that we have shown here on the microcosmic Tree of Life so let's step forward and look at the macrocosmic Tree of Life next and I'm going to do the same thing I'm going to build out the eleven cards of the macrocosmic Tree of Life and folks if we get through we get through it there is less than a half an hour left if we don't we'll continue next week and regardless of what happens we'll wrap this topic up next week and take your calls for the duration of the show and I think it'd be a very interesting call-in show to just do a whole call-in show on the Major Arcana of the Tarot because I know people will have a lot of questions and they probably have a lot of correspondences to bring to the table regarding this extremely rich symbolism so next week wrap up of this and call-in show for the duration of the show so let's start with the dot position again as we did on the microcosmic Tree of Life this is the universe card or the world card I will simply probably call this the universe in my deck as it is called in many decks again some call it the world some call it the Aeon as it is called in Crowley's Thoth deck but I will call this the universe okay and this is what we're talking about here here you have the same things that we saw in the wheel of fortune' card the Archangels it's a it's a reflection of the zero card of the soul okay because it's the big zero card the huge universe the macrocosm that reflects the microcosm of the zero that we saw in the soul card so the wreath that shows the you know High Point and low point you know namely the you know solstices the high point of light low point of light etc you know depicted by the ribbons the infinity signs at the top and bottom of the wreath you know that forms a huge zero that wreath because this is the huge cosmic egg of the cosmos itself and Mother Nature that rules it with both wands of the microcosm and macrocosm in her hands you know because she's wielding both of those wands you know we can wield the scepter of power of the self but only nature commands both scepters which is the the command of the microcosm and macrocosmic worlds so this is nature nature spirit God whatever you want to call it depicted here in the feminine aspect surrounded by the principalities of the arc angelic forces Michael mikail gabriel raphael uriel matthew mark luke and john the lion the man the bull the eagle leo aquarius Taurus Scorpio the fixed signs of the zodiac Oh wheel it's all there you know showing you that we are going to be getting into talking about Universal forces now okay so that's at the dot or occult knowledge position what are we getting into learning now occult knowledge of natural world forces of universal forces not just the forces of the self or the aspects of the self so let's move forward sorry about that and we come to the Malkuth position where the base chakra okay this is the judgment card what happens when we stay in ignorance okay so what we have to understand here is that this whole tree is a correspondence to the first tree that we saw so what was the wheel of fortune at the Mel coot position it represented individual ignorance meaning you're not making any progression of your soul at an individual level well what is this card showing us at the macro cosmic level or at a societal level at it at a level of a whole species of beings calling themselves human beings if we we are being called by these higher level forces of creation represented by the angel blowing the trumpet wielding the cross of Saint George in this image okay representing being called out of our ignorance the graves the graves represent the ignorance of the soul keeping the soul encased or entombed in darkness and we are being called up out of that level of spiritual deadness through the waters of renewal baptism we're not talking about you know that in a religious sense folks in the Christian sense of the exoteric religion we're talking about being baptized into the waters of knowledge of self and universal law and we're being called out of that ignorance by this force what's above that force right if you look above it on the side the left-hand side it's the Sun that's the truth itself you know that's the truth of the Creator and who's assuring it toward us is the Christ consciousness the child of innocence you know holding that red flag again representing that rubato element of alchemy the purification of the Philosopher's Stone okay so the judgment card is saying if we stay in ignorance this is the result judgment and I would not change the word okay I'll call this judgment okay this is societal judgment this is world judgment this is the judgment of a whole planet in depicted in this card when we stay in individuated ignorance our entire society stays in a place of judgment okay so this is the result that we get when we reject the truth there is a card that represents the embracing of truth leading up to a higher level and then there is a card that leads to the rejection of truth leading to a lower level of consciousness okay so this is the end result we're a society ends up if we reject truth in judgment Universal judgment we're talking about the judgment of natural law not of a you know anthropomorphized the deity we're talking about the judgment that we're already in as a result of rejecting the Sun you know not the idea of Jesus as God's Son but the idea of knowledge that could be converted to become Christ consciousness as the biblical allegorical figure of Jesus requests us to do to receive freedom to know the truth and the truth will set us free all of these allegories are contained within the Tarot of course they are so this is the Sun this is the light of God the light of the Creator true knowledge truth that we can either accept or reject and that is the savior of the world ladies and gentlemen you could put this into the Christian allegory all day long all you want but even in that allegory Jesus is telling you he's the truth and the light you know the Sun is the truth and the light you know and it's always been symbolically depicted as our actual star of the Sun which gives life to all the beings of this planet and the whole solar system the whole life in the solar system would not continue without the actual star our Sun Sol it's called the soul just think about it you know it's amazing this child is the Christ consciousness riding the white horse which can be life or death you know depending on whether we accept or reject truth or not again the red flag the symbol of alchemical Rubidoux the creation of the philosopher's stone the refinement of the stone brilliant symbolism just you know pun intended brilliant and again I'm sorry let's just I won't go back but just take it back to the double ten or twenty is the ten card and then ten and nine the 19 card is the nine position so all you have to do is lop off the first ten in this whole series to get the arrangement because the 21 card is the world okay and 21 is 777 complete completion in the human domain the number 777 okay so absolutely spectacular correspondences there so let's go up to the moon now we are at the base of the feminine pillar or the pillar of severity now in this aspect on this tree the macrocosmic tree the left-hand path is negative and the right-hand path is positive so this is actually the negative Pole and the positive pole of duality we can look at these as not just you know you they can still be viewed as masculine and feminine but the allegory doesn't hold as well as positive and negative with the right hand path being the positive outcome and the left hand path being the negative outcome okay and you'll see what I mean as we go through this so the moon card is the rejection of truth card that's what I would call it and I would call the Sun card not not to step back I would call it truth that will be the card called truth in my deck simply this card the moon will be called rejection of truth and that is most certainly where the people of the earth are at this is what we chose we chose the left-hand path folks sad to say horrified to say but this is where we're at as a society so you have the dog the wolf you know the the the lobster you know representing forces that are do not have the kind of free will that we have because their freewill choice is in a place of Darkness represented by the rejection of truth the moon going into the animalistic where there is not as much freewill choice to be had and the animal kingdom is largely at the disposal of higher level natural forces far more than we are at we are actually in a position of being able to through our behavioral choices control what happened as a result in our experience to a large extent and so these lower level forces are depictions of ignorance symbolically in this card it's depictions of having made the wrong choice and gone down the wrong path that's going to lead to a much differ much more difficult path in life now as we go to the next position on the Tree of Life this is the base of the masculine pillar or the active pillar or in this case the positive pillar the star represents the acceptance of truth and the beginning of alchemical work on a societal level so this is coming into harmony with the natural forces not rejecting them so this I would call acceptance of truth in my deck and it means that we are taking the light in through the the lesser lights of the heavens the Stars which we are comprised of that star matter and so we are opening up to the flow of proper reception ok hence it has this feminine symbolism on it of having one foot in the waters of spirituality and having one foot in the upon the ground of the earth again this is part of boots-on-the-ground spirituality as I call it streetwise spirituality it's doing the work the spiritual work represented by the alchemical waters on the ground bringing that water on to the ground of the earth ok but you in order to do that you have to accept the truth first because that's what that water is if you're gonna gather it up in those in those pails you know you want to just really look at it in those in those jugs it's coming up into the jug of her right hand and she's pouring it out into the jug of her left hand she's not pouring the one she's gathering it from that one it's coming up from the universal force the universal waters in to her jug in the right hand where her foot is that in the water and then she's pouring it out onto the earth with her left hand okay so absolutely again incredible correspondent symbolism here regarding what we need to do to accept truth and then spread truth in the world okay and all that's an act of will right we were just on the rung that represented the will you know the star itself is on that that um sacrum chakra again that knowledge sacrum sacred generative we have to arrive through it through will and care will power and care to take it in so you could look at that this force is that the heart true care to take in the truth it's like the chalice upside down taking the truth into it okay we could either take the truth in or we could reject it it's an act of will and care and again what this card here represents is the heart chakra it's at the heart chakra position which is unitary it's not a dual chakra okay on the Tree of Life correspondence system but what it represents what the tower card represents and what I would call it on my deck is change change is universal certainty nothing stays stagnant stagnation in the universe is death and non-existence and it doesn't really like you could say yes there's the death card and that's the stagnation card and or the involution card as a force in nature but really it's still change it's something progressing to become something else the same with evolution and that process goes on and on whether it's a an ascension or a declination but it can never be stopped no matter what you want to call those forces or how you you're you're progressing within that cyclical nature of those forces change is always occurring and can never stop occurring that's why it's called the one change the universe is the one change hence this at the center the change card is the center of it's the central focus of the whole thing verse re and Latin means change unit in Latin means one one change once again it's right there everything is changed everything is one form of energy flowing to another one form of consciousness flowing to another and can never be any other way so this is the change cart what do we see the thunderstruck tower that's a whole representation of the tree of life itself the lightning striking the whole tree or tower and the masculine and feminine forces you know being thrown from it and the yo'd you know the fire the Yotes representing the fire changes a fiery powerful force electrical force lightning it's it's tumultuous so this is the thunderstruck Tower in many decks and I would simply call it the change card okay now that change could be positive or negative depending on whether we have accepted truth or rejected truth so what happens when we reject truth we go into slavery so this is the devil card depicted as the traditional some symbolism of Satanism from the you know older Christian tradition as the you know the goat you know the goat of Mendes etc with the inverted pentagram the number is 15 which when reduced is 6 which is the failure of higher level consciousness and we see the man and the woman or depiction of Adam and Eve with chains around their neck in a state of slavery to the devil or Satan the adversary the opposer the force of involution has taken us and is holding us captive this is called slavery in my deck this will be the slavery card because what happens on this Tree of Life pillar you know the bottom of the pillar is rejection of truth well what happens in the world externally that's the internal aspect societally the moon is the rejection of truth as we go up that pillar of severity or that left-hand path we arrive at slavery and we arrive at slavery by rejecting truth so this is the slavery card and you'll notice that the chains are not tight around the neck of the enslaved man and woman they could be taken off at any time by an act of their will meaning this is not a determinant force it's all based on freewill choice of how we will behave will we learn the forces of the self in the universe and will we behave according to natural law and well if we do those chains could be easily slipped out of it's not something that is set in stone but if we accept negative influence and reject truth those chains will remain exactly there around our necks like a noose and we're not going anywhere as far as progress as a society or in consciousness at all universally see that's what this is about this shows you what's our progress both personally are we moving towards self mastery individually and are we moving toward a free society under natural law as a species this is what the Tarot is an indicator of all we need to do is look at the symbolism and read the book and we can understand where we're at let me tell you something folks this is the card that represents where we're at put that card up full screen this is it that's it right there that's where humanity's at slavery and we're getting ready to head upward of a rung on the left-hand path folks that's where we're a goin if things don't change oh they're always changing but I mean if they don't change in the better direction and guess what the verse will give us exactly what we give it and it's working perfectly that's why I'm not angry about that I'm saying that I'm angry about the choice that's being made willfully to reject truth that's what I'm upset about because it doesn't have to be this way that card is a choice put put it up fullscreen again please that that card slavery is a choice it's not a determined factor it's a freewill choice and people better start understanding the freewill is very real it's in our hands and all it comes down to is do we accept truth or do we reject it and all you have to do to chart the progress of society is look at where we're at are we in freedom or are we in slavery and then you'll know Tarot is exactly telling us the true indicator of where we're at as an entire society what's moved to the next card which is temperance I would call this the freedom card this would be true freedom you could call this sovereignty as well this is the sovereignty card of the deck but I'll just call it probably freedom in my deck okay this is what happens once again you see that idea of one foot in the waters one foot on the earth being grounded not floating out in some woowoo version of spirituality but being firmly grounded upon the earth with one foot in the waters of the spiritual nature okay the waters flowing between the two cups the two chalices the crown chakra being arrived that representing self mastery okay the crown on the Angels head the the fire of will you know you have all the elements there earth air water and fire all unified all required for true freedom the illuminant the sovereign being the angel incredible symbolism they call it temperance you know whereas they call the other one the devil I call them slavery and freedom this is the freedom card the devil slavery this is what happens to a whole system when it accepts truth and works upon itself to embrace all sentient beings sovereignty that's the only way we'll ever arrive a true freedom it cannot be done any other way by universal law passing through the realm of dot of universal knowledge of knowledge of natural law now we get to the two highest forces on the respective pillars okay and again the Freedom Card is on the external or masculine pillar because that's what happens to a society it's the positive pillar that's what happens to a society when it accepts truth that active principle acceptance okay when we reject it the passive aspect on the feminine teller the path of severity we go beyond slavery into extinction or death this is the involution card we're almost out of time folks I'll press it to the very end but we'll continue this at the beginning of next week's show so this is the involution card we talked about the forces of involution versus evolution on the shows about Satanism that's what led to this entire show talking about the position of the death card as the involution card at the top of the macrocosmic Tree of Life in the banal position or at the top of the feminine pillar what happens when we reject truth we go into slavery and eventually into extinction an involution takes over we have to start all over again and then we end up at judgment the bottom of the Tree of Life Universal judgment that's all the time we have for this edition of what on earth is happening ladies and gentlemen we'll get to those last two cards next week and we'll continue with this breakdown of the universal the aspects of the tarot deck from a position of Revelation of where we are as individuals and where our entire society is as a whole thank you for watching and remember government is slavery we'll see you right here next week thanks everyone oh do me a favor to check out gifts thought what on earth is happening calm lots of new items going up there this week and also check out the art section because a lot of people have been taking me up on the ark offer and they've been going out worldwide I want that trend to continue so go to the Ark request the art and really get a lot more knowledge that isn't even here on what on earth is happening that I've been collecting for the last 20 years that's all the time we have government slavery we'll see right here next week

What On Earth Is Happening Show #218

Topics: *The Tarot's Major Arcana As A Revelation Of Personal And Societal Progress: Part II, the Tarot in relation to Kabbalah's Macrocosmic Tree Of Life, Universal Forces at work in Nature, the Hermetic Principles, The Principle Of Correspondence, "As Above, So Below," the Human Soul reflected in the Universe, Daath as the realm of Hidden Knowledge, the Macrocosmic Tree Of Life as a guide to Humankind's Acceptance of Truth or Rejection of Truth, Morality and Natural Law, the Human states of Freedom or Slavery reflected in the Tarot, The Dark "Illuminati" as the Cult of Death, what "Turn the other cheek" really means, Humanity is Responsible for allowing themselves to be manipulated, the Death card of the Major Arcana as the Force of Involution, Stagnation, Backwards progress in the so-called "Freedom" "Movement," the Hanged Man card as True Evolution, Enlightenment, the True "Illuminati," understanding the Philosophy of Thelema, Natural Law is for EVERYONE, Elitism in Occult traditions and those who teach Occultism, Moral Relativism, People who believe they can "decide" or arbitrate what Right and Wrong are, the Justice card of the Major Arcana, the "Crown" Chakra, the Justice card IS Natural Law, Universal Consequences, Judgement and Hell, No One can escape the lesson of Natural Law, We should Not seek escape but rather confront the Great Work head-on, Christ Consciousness vs. Exoteric "Christian" thought, True Knowledge of Morality is revealed by Creation not by Religion, the Spiritual and Material domains One and the Same, a review of the Free Thought Project Community Group Facebook post showing how many people who say they want "freedom" are Moral Relativists, The Tarot as an encoded book, the Tarot as Discovery of Natural Law, the Natural vs. the Artificial, Perception of Reality vs. Objective Truth, Moral Relativism in Anarchist and Libertarian circles, True Freedom CANNOT be achieved in a society practicing Moral Relativism, the "Aquinas On Liberty" essay reviewed and explained, Atheists are DESTROYING the Freedom Movement, the False "Seven Deadly Sins" of religion vs. the True Seven Deadly Sins of Natural Law, Man is not the Law-Maker – God is*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening we'll endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're watching what on earth is happening i'm your host mark pacio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time thank you for tuning in today is sunday august 4th 2019 this is episode number 218 of what on earth is happening we have a great show lined up for you here today as always we are going to be talking about the tarot as a revelation the major arcana of the tarot as a revelation and a main indicator of both personal progress in consciousness and human progress as a society as a species this is part two of this topic i'm going to be closing up this topic today and then we're going to be taking your calls for the duration of the show i have a whole lot of uh housekeeping announcements uh because there's a lot going on here at what on earth is happening uh around this time so i want to uh jump right over to my slides and uh let you know about some pretty exciting stuff that's taking place uh before we do that just give me one moment okay all right we could jump over to the slides all right folks the big announcement came through this week i'm finally going to be interviewed by alex jones himself on infowars on the main infowars program so uh pretty uh glad to see that uh finally manifesting this was originally scheduled for this past thursday but there was a scheduling conflict with alex jones and his producer which is no problem this stuff happens all the time so they bumped me until monday and that's actually worked out for the better because um we got a more of a a timeline to promote for the show on my website and on social media so this is going to be happening this monday august 5th 2019 and my time slot on the show is 2 o'clock p.m eastern time that's one o'clock p.m central time you can watch live at infowars.com show and i will be recording and then posting the uh my interview segment on the show on my website at what on earth is happening.com in the news section following the show so um thanks to alex and his producers for bringing me on and i think it's going to be a great show and from what i currently understand the main topic of discussion will be natural law so i'm very much looking forward to that so tune in on monday uh august 5th at 2 p.m eastern time 1 pm central to hear me on the main infowars broadcast that being said i want to just briefly step out of my slides and go to the website i have this up on the home page of the website and i just want to play this main uh this video for you to show you when alex if we could just make it full screen if we could i'll show you when alex rescheduled me on the main show and announced that i was going to be on this coming week just switch over to the laptop full screen thank you here we go here's what i'm going to do i had a very interesting guest i've seen some of his videos online about natural law i think mark pascio coming on but i decided to move into next week i apologize because i'd forgotten that i'm going to be uh on a work occasion tomorrow taking care of some new projects so that that kind of scrambled up what we're gonna do so he'll be on next week okay so you know uh it was just a scheduling conflict and i'm definitely gonna be on on monday at 2 p.m so that's the big announcement regarding uh the infowars broadcast so we can switch over back to the slides and i'll continue with housekeeping announcements so uh sorry about that i had a wrong transition there let me just cut that out okay so i'll be a guest speaker a featured speaker actually at anarchopoco 2019 this year this is the inaugural uh sorry uh anarch adelphia event uh not anarchapoco anarchadelphia is taking place um september 13th through 15th 2019 that's friday saturday sunday september 13th 14th and 15th i will be speaking on september 14th i'll be the final speaker on saturday september 14th and my main presentation will be entitled the sacred gift of anger the sacred gift of anger and it's going to be a very unique and special presentation it's really shaping up i think people are going to be very happy and impressed with the presentation i'm going to deliver on the topic of what i call the sacred gift of anger an emotion that many people think should be purged and not felt or experienced but something that is absolutely critically essential toward truly guiding us on a path to truth enlightenment higher consciousness and freedom if we're being honest with ourselves and i'll be talking about what the right usage and channeling of the emotion of anger is during this presentation this uh one time only presentation at anarch adelphia 2019. if you use promo code passio at checkout at anarchadelphia.com you will get five dollars five percent i'm sorry off your ticket sale and five percent of the ticket sale will be donated directly to what on earth is happening so if you're uh going to the anarch adelphia conference this year use promo code pacio at checkout for that discount i will be giving an all-day workshop at the end of anarchadelphia on monday september 16 2019 from 10 am to 5 pm at poppy's italian restaurant at 3120 south 20th street in philadelphia uh the topic is teaching natural law this is a seminar an all-day seminar geared toward people that want to go out and actually teach natural law to others so tickets for this all-day workshop are 120 they are available at anarchadelphia.com in the tickets and workshops section so that's the announcements for anarchadelphi i think it's shaping up to be a really great conference with phenomenal speakers please go up to anarchadelphia.com and check out the great speaker list it's a who's who of speakers in the freedom movement okay so before we jump into our topic for today which is a revelation of the uh the tarot's major arcana as a revelation of personal and societal progress part two i'm going to wrap up the symbolism of the major arcana and get into a little bit about what it really means for us as an entire society but before we do that um let's uh i want to jump over to my laptop once again and show you a couple of other things that are going on so let me jump into my web browser we have finally put up the new t-shirt designs in the water north this happening donation gifts area so this is donation gifts of the men's t-shirts we have a new color palette we have the traditional black and dark heather heathered gray t-shirts but we also have uh three uh new colors we're doing all antiqued colors uh this round of shirts so we have a beautiful antiqued red an antique green and an antique blue and these are like a a slightly a darker heathered look i think they look really great with the one color and we have a brand new water nerf this happening shirt that is a three color design i want to just show you that one real quick this is the new what on earth is happening shirt design okay beautiful three color design and here's the back of it it says ending slavery one mind at a time with the earth with uh you know radiant blue light coming out of it and uh human hands uh breaking their shackles breaking their chains and then the water on earth is happening.com web address below i think i just want to show you this here so let's switch over to this side camera yeah there we go look at that beautiful new design i think they look great the printing company did a great job on these there's the back let me get it in there fully for you okay so you can get these at what on earth is happening donation gifts that's gifts.what on earth is happening.com so i hope people like the new shirt designs we also have them in women's we're doing only black and women's this time around because it seems to be the most popular color for women's t-shirts black seems to move the best and people like them the most so we have the natural law one great work and what on earth is happening designs all available in women's t-shirts as well that being said um i think that's all i really want to cover for now i want to get back to that that if you switch back very briefly before we go to uh calls i'm going to talk about something that i posted on my own um facebook uh uh which was a comment that went up in the free thought projects community group okay now i'm going to get to this actually in my whole talk on the major arcana of the tarot today but i want to point this out to people's attention and actually show people why we're headed in the wrong direction as a society why things are really headed south faster than i think any of us could have ever imagined so this will be coming up a little bit later on the show and then we'll be taking your calls i don't think i'll be going you know an entire show with the broadcast with the actual material of the broadcast this time so um i will be taking calls toward the end of the show this time around all right so let's switch over let's go to the slides and jump right back in to the presentation so this is a continuation of last week's show ladies and gentlemen everyone should be aware of that so this builds on what we did last week and as always okay every what on earth is happening show i've been saying this for the past many weeks i'm going to continue to say it every single one on earth is happening broadcast every show that came before it is a prerequisite necessity to understanding the current show so you are listening to episode number 218 no individual episode of what on earth is happening ever stands on its own every single episode is built upon the episodes that precede the current episode so if you're looking at episode number 218 which is today's broadcast you have 217 episodes that you should have looked at first if you're a new viewer i highly suggest not watching from here i highly suggest going back to episode number one and listening to each episode in its entirety at your own pace in order without skipping around that is the only way you're going to get the tapestry of information and understand it fully as i present the information here on the wall on earth is happening broadcast if you go and start skipping around or start listening at the current episode you are not going to understand the majority of what i am talking about you are going to be lost confused and in a stupor for the most part okay unless you're extraordinarily familiar with all of the material that i've talked about from other sources so again i'm going to highly recommend this every single week that you do not listen to what on earth is happening out of order it is a tapestry that is a very specifically engineered progression of information that is the only way that i can put it i very specifically geared the progression of information in a certain way to make it be able to unfold in a way that makes sense for people when they listen in order if you listen out of order you are doing yourself a disservice and more likely than not you're not going to get the most benefit of value from this broadcast i'm just letting you know okay so this particular show is a continuation from last week's this is the first slide it's called the major arcana of the tarot if we switch back over uh the self and the universe revealed in symbol this is part two so i'm going to go ahead and jump ahead to the slide that i want to begin on which is well into this presentation so i'm going to jump ahead to where we ended off last week's broadcast on which was a an examination of the symbolism of the second half the second 11 cards of the major arcana of the tarot deck in relationship to the kabbalah's tree of life symbolism specifically what is known as the macro cosmic tree of life meaning that this is a breakdown of the forces that are at work in the universe not the forces at work in the individual but the forces that work in the world in which we live now of course these are mirrors of each other as the hermetic principle of correspondence states that which is above is like to that which is below and that which is below is like to that which is above this means that the universe and the self are self-similar every part of the universe including the individual is self similar across all scales of existence okay so the the self or the soul is a reflection of the world or the universe as a whole and vice versa the universe and all of its parts is a reflection of the self or the soul the individuated consciousness this is what we have to understand that we're talking about when we're looking at the microcosmic and macrocosmic trees of life of the kabbalah's symbolism in relationship to the major arcana of the tarot deck so i'm going to blow through the um first many cards on this arrangement that we did last week that we looked at last week we ended on the death card i did not get to the hanged man card or the justice card which are the last two cards in this arrangement of the microcosmic tree of life so what we talked about is that this part of the tarot deck represents the world these last 11 cards of the major arcana okay and of course at the dot position which is the position of hidden knowledge or knowledge which we have to study in depth for to be revealed unto us and deeply understood is the world card this is also called in some decks the universe card or the aon card okay so this is card number 21 the final of the 22 cards of the major arcana which starts with zero and progresses from 1 to 21. we position the last 11 cards of the major arcana arcana on the mic the cosmic tree of life of the kabbalah with card number 21 being at the dot position which is shown here circled in white okay this is not one of the sephirot of the tarot of the kabbalah tree of life i mean okay this is not one of the sephiroth this is known as the place from which the tree grows or emerges or is emanated from okay so dot simply means knowledge in hebrew okay so this is knowledge of the world knowledge of the universe okay now we see that when we lay the other 11 cards other 10 cards down on the positions of their respective sephirah on the tree of life starting at the top with the justice card which is number 11 and then proceeding in the lightning bolt pattern as i showed people last week that the tarous tree of life is often referred to as the the lightning struck tree okay we arrive down at the very bottom of this macro cosmic tree at the malcooth position with card number 20. so we're progressing from the top from 11 all the way down to the bottom of the tree at position malcuth which is number 20 of the major arcana which is judgment so this is judgment or hell this is when a society has remained in ignorance when the bulk of the society in the aggregate has remained in ignorance and refused to answer the call of creation to awaken to accept truth and apply it in their life to accept objective morality and apply it in their life to accept natural laws objective and inherent existence and live according to it in their life we end up in judgment or hell as a society progressing upward this is the truth card at the yasod position of the macro cosmic tree of life the sun the light the truth okay this is the truth about what is taking place both within us and around us and if we do not accept that we are in for an extremely extremely horrific ride as a species and as individuals so as we progress in this lightning bolt pattern up the tree of life we come to the moon card card number 18 of the major arcana this is ignorance this is the refusal of truth okay so again the sun is the truth itself the moon here on the path of severity or the left-hand path of the cabalish tree of life progressing upward we see that this begins the left-hand path refusal of truth moving again forward in the progression of the lightning bolt pattern on the the lightning struck tree of the kabbalah we see the star card and the star card represents the acceptance of the truth the acceptance of our own sovereignty integrating the truth into our lives becoming one of the many quote stars of the heavens okay the sons of the sky illuminating the darkness okay this is acceptance of the truth and this is boots on the ground spirituality having one foot in the waters of spirit one foot on the land of the earth or physical reality okay so that's the star card acceptance of truth beginning the right hand path or the path of mercy on the kabbalah's tree of life progressing upward we arrive at the heart chakra of tifareth on the tree of life and this is the tower card which represents cosmic change change throughout an entire society an entire planet change in the universe which is the one ultimate constant of the universe along with natural law okay so this the tower card represents change and there you see the symbolism of the kabbalah's lightning the lightning struck tree the the tree is actually actually reflected in this card on the tiffaret position the tower is the change card okay progressing upward and again it's what matter manner of change are we going to create in our lives in as a society on this card and this is about making that change in the very real physical world some people think that it's only at an individual level that this change happens no it is not i'm going to be talking about the very significant reality and the very significant understanding that this change is to be done here on the ground in the physical domain which is no different than the spiritual domain that we should not be concerning ourselves about other dimensions parallel universes other areas of existence except what we are doing in the here and now that's real consciousness okay that's real spirituality that is bringing what you know at all other dimensions of existence and self and soul and bringing it right down here and putting it into practice right here on earth where we are at okay this is what too few people understand and accept and it's what a lot of occult elitists of the past left on the back burner left at the door and that's why the world's in this situation that it's in which is what the card i'm about to talk about right now represents the devil card represents slavery the slavery of the human condition and this is the middle card on the left-hand path the pillar of severity in kabbalah okay and it represents human slavery and notice it is not a deterministic thing it is a free will choice see this is what too many people are not talking about that it's all about free will ladies and gentlemen nothing is said in stone except natural law natural law will give us either consequence it will give us slavery if we so choose to ignore truth and morality if we ignore objective morality and insist it's relative insist in moral relativistic beliefs natural law will give us all the slavery we so want and deserve if that is the case and that's where humanity's at right now because we are headed all the way up the left-hand path the left-hand path is the satanic pathway and that's why they depicted satan as the enslaver of human beings chained to his throne okay but chained loosely to it where this the the chains could be taken off at any time around the head they're not shackled tightly this is meaning this means the symbolism of this card means that that slavery is a choice it is a free will choice and we are choosing it we are choosing that consequence as a result of the behaviors that we are choosing and the thoughts that we are thinking and the thoughts that we are basing our behaviors upon the devil card is the slavery card and that is at the gebura position which is severity that's the severe result that we get when we refuse truth the temperance card or as i call it the sovereignty or freedom card is at the hased or mercy position this is what the pillar of mercy is named after and this is the freedom card this is what happens when human beings as a society in the aggregate accept truth and accept morality and live under natural law and don't violate each other's rights and don't try to be the arbiters of truth and the arbiters of morality and this is what we get as a society see we got to remember folks this this whole tree the macrocosmic tree of life it's all about what happens in the aggregate to a society anywhere in the universe on any planet in the universe okay this is about when we either apply or don't apply the principles that we talked about on the microcosmic tree of the self to gain self mastery what will either happen in either direction in the negative direction or in the positive direction the left hand path in this instance the left hand pillar the pillar of severity is what happens when we don't do that internal work and we ignore the truth and we create a society based in rulership and authority and we get slavery as a result and eventually we get what we left off on last week which was the death card so as we progress past the dot position which is knowledge about how the universe works we get up to that top level of the left hand path or the pillar of severity and this is the death card this is extinction this is total stagnation as a species this is not getting the lessons that the universe is trying to teach us this is the refusal of objective morality this is the refusal of truth this is the refusal of goodness this is the refusal of living under natural law the ultimate solution the ultimate expression the final place where it all ends up total involution as they refer to it in the occult world the involutionary force has won and eventually almost mercifully death rules extinction becomes the reality this is where humanity is heading and i almost say it's heading there mercifully compared to what we've already created but we're going to end up going there very slowly to this level of extinction and evolution slavery is going to become total totally full and complete first because of the total immorality of our species and the total ignorance that they dwell in which i'm going to show you just just looking at social media all you have to do look folks i've said it many times most people don't see it most people are ignorant to it because they live in a rural community the majority of people who listen to my work do not live in cities because cities are leftist scumbag communist trash cesspools okay honestly and not that that means that object the understanding of objective morality and true goodness is any better on the part of right-wing jerk-offs okay because it's not they're still scumbag status who believe in authoritarianism in one form or another they believe in the legitimacy of government rulership they don't understand natural law as the law of creation as the law of morality as the laws of god they don't get that at all they think human beings can be the arbiters of truth and law and morality in the universe which is usurping the place of god in creation if we're being honest with ourselves so it doesn't really matter whether it's left-wing or right wing i'm just trying to make a point that if you live in a major populated city particularly in the united states or even in europe or practically anywhere else you're living in a communist cesspool at this point in our reality which is becoming more and more closed down more and more passively aggressive getting ready to move to direct physical violent aggression okay and it is just a tragic garbage cesspool scenario is the only way that i can really put it and we are going to descend into further and further slavery i'm going to show you where even the mindset of people who say they want freedom is that so you can imagine where authoritarian trash scumbags are at in their understanding and their belief in their cult religion called government because it is a cult it's a death cult this is their god this is the god see people think satan is their god no ultimately death is these people's god as i worded it satanism ultimately is a death cult totally totalitarianism control freak religion of authoritarianism it's a death cult folks this is what we talked about when we talked about our whole society being one big satanic cult ultimately this is the force they worship it's not this christian variant of the devil they don't look at ananthra as an anthropomorphized the force that they are ultimately putting up on a pedestal is not an anthropomorphized deity that we have traditionally symbolized as satan in the christian tradition you have to understand that is not what these people who are at the top of the globalist elite society worship they worship death one of the only names that their society has ever been called i call it the cult without a name it's not called the illuminati folks you know i keep trying to poo poo that name and tell people it's a horrific uh misnomer to call them the illuminati the people who are truly enlightened are the illuminati of the world we are the fucking light bringers okay we are the illuminati we are the enlightened ones not these jerk-offs who are not nothing but the elite of the bottom of a garbage can all of the the scum that builds up at the bottom of a trash can is what they're the elitists of okay i call them the cult without a name i don't refer to them as the enlightened ones okay i'm one of the illuminati i'm one of the enlightened ones okay don't give them that homage don't give them that you know kind of uh calling card why what are they enlightened about enlightenment is about understanding what is true understanding what is moral and then putting that into practice in your life through your actions getting your skin in the game speaking truth to others being an example of living according to not harming anybody else that's not what these pieces of trash are they're death worshipers the only name i've really heard them ever refer to themselves as that is an accurate representation of what they are is the cult of death that's it because they don't call themselves the illuminati and neither should you refer to them as what they really are the cult of death the cult of the black sun that's an accurate name for them the cult of knowledge that they have but it's not wielded for the right it's wielded for all the wrong reasons for control and manipulation and deceit and their own selfish gain at the cost of everyone else's rights and freedoms so this is where we left off this is what this card really represents this is the force of involution which was where we're headed it has firm control folks this is the car that has the most firm control over the current reality of human beings on earth i'm sad to say it but it i have to tell you the truth this is ultimately where we're going and i don't just mean as individuals i mean we are headed into the mall the gaping maw of these sick satanic pedophile mind controllers social engineers as an entire society they're eating us alive because we do not understand objective morality ourselves and yet we want to say that we want freedom and we don't understand you can never have freedom if you're a more moral relativist it cannot ever occur by law in the universe it's an impossibility it's like saying i'm gonna take some paper that burns very quickly hold it over a fire burn it and then suddenly magically i want that paper to remain intact in my hand after i've burned it well good fucking luck to you smacked ass because the universal laws of creation do not work that way in the physical domain just like they don't work that way in the spiritual domain you cannot just wish for freedom and have it magically happen when you're doing all the things to immolate it to burn it up and this is what jackasses in our so-called movement which is no movement at all it's moving backwards it ain't moving forward there's no evolutionary progression we are firmly ensconced in involution or backwards progress stagnation and backwards progress and eventually death that's where our whole society is going and i'm not saying that to depress you i'm not saying that to make you discouraged i'm saying that to tell you the truth about where we are at because if you don't know where we are at you don't know what our work is to do that's like saying you go into a structure in a building and your job is to rehab the structure and make it sound and you don't know just how dilapidated and all fucked up the structure of the building is so how would you know what work you actually need to do in the rehabilitation of a building structure as an engineer or an architect or people who are actually doing that building reconstruction progress you would have no clue if you didn't make the assessment the diagnosis of where the health of that building is at and i'm trying to explain to you through the tarot you can actually look at the symbolism that shows us and reveals unto us where the progress of our entire civilization is at if you know how to decode it and really all you have to do is step outside your door and just go and you know speak to people but see the again the problem is most of my listenership it's it's more people who have more time on their hands who have a little bit more maybe affluence on their hands where they can sit and study this over a period of time not all people that listen to the show are like that but i'm just trying to explain that there are more people who listen to this show who aren't like the trash in major cities i i'd say the bulk of my listenership is in somewhere in rural communities and that's actually a disadvantage to you guys i'm talking right to you it's actually a disadvantage because you're sheltered from a lot of the reality of the world sadly but truthfully you're sheltered from it i know i talk to a lot of people that i would have to call sheltered and naive who listen to my work but they do not understand where people are at they don't understand how absolutely sick and culture fucked up the average person that you go and talk to in a major city in a major leftist controlled city on the street is every day of their life these are people who would think that because i'm a white middle-aged heterosexual male that i'm their enemy that's how fucked up their minds are they have no idea what i've done with my life they have no idea where i've been what i've seen what i've done in the past what i how i have changed what i do in the present and they don't want to know they judge by appearance is if you look like you're not a member of their fucking cult you're judged accordingly and how fucking dare you you know you don't know a thing about me little boys and little girls out there not a fucking damn thing you know i'm not above responding to somebody with the way they treat me i'm not about this turning the other cheek shit okay that's bullshit added into the new testament by the piezo dynasty that wanted to make it all about stand down never never do anything to to the people who are physically actually harming you and taking your rights away no just take their bullshit that's not what turning the other cheek ever meant in original christianity it meant continue to bring the truth to people that you feel their soul isn't so fucking destroyed that they can eventually understand it and if they smack that truth out of your hand pick it up and give it back to them the next day in the next minute even you know friends family acquaintances that you think aren't so fucked up and damaged in the brain that they can't eventually understand this if you plant enough seeds that's what turning the other cheek is about doing it's not about saying people who have done things to you that deserve retribution for what they've done that you should sit there and just take it endlessly please i mean yeah that those are the kind of people who curl up in a fetal position when they're being beaten on these people have no right to do this stuff but see it's the naivete and the shelteredness of a lot of the people who listen to my work and you know who else is included in that not just people in the rural communities folks the europeans out there i mean you guys don't get it you i hope you're getting it with how bad your society is becoming you know but you guys are so so domesticated because you have had your weapons taken away from you that you don't even understand how dangerous it's going to get for you you don't understand how much of a powder keg america is right now and they're pushing further and further and further but see do you just let them keep taking the ground because they're pushing for more violence starting with passive aggression violence and then progressing to true aggressive violence do you just keep doing that endlessly that's my question to ask people do you say oh they're just mind controlled they don't know that they're a cult member they don't know what influence they're under by the social engineers and the mind controller do you just keep letting them take ground over and over that's what they did with the brown shirts of nazi germany keep letting them take ground take ground take ground never push back against them because you're too fucking cowardly to do it and then what oh then they the night of the long knives came right yeah and then they got that they got thrown under the bus so that they could put their even further elite henchmen in charge which is like what they have prepared in the military and police forces in the department of homeland security etc so forth okay you think all these people aren't going to get thrown under the bus they're useful dupes and tools is what they are and this is all part of the death cults manipulation and they're pulling out more more and more false flags again with these fake ass shootings you know these manipulated shootings all with people with aks and ars you know it's all just to try to get the guns away well you ain't ever fucking getting our guns motherfucker i don't care how many people get shot you can kill every infant in the world quote me on that put that up on the nightly news you're not taking my weapons away because it doesn't matter what bad people do with them all that matters is they are for defense against these criminal fucking authoritarian thugs that's it so you ain't ever getting them no matter what happens and that's nothing about love of guns that's the love of self and self defense and truth and morality and goodness i'm gonna tell you hardcore to your face in street language you ain't ever coming for my weapons without a fight and trust me just about every american with their fucking head screwed on straight thinks the exact same way if you're not in these trash authoritarian cult belief system the people who have their heads screwed on straight think exactly the same way here and the europeans you start better start understanding listening up and taking note because you've had your balls clipped off boys and girls especially the men there okay you've let them do it and when they come for your rights you're gonna have to kiss over and bend your ass pucker up boys and you're gonna bend over and kiss your ass goodbye pucker up because that's what's coming for your in your society and you know what we'll be too busy fighting our battle over here to save your asses don't expect america to save your ass you better be prepared to save your own but guess what we ain't following your example here we ain't following the example of australia and great britain and any other place that had their balls clipped off had their fangs pulled out you've been defanged de-venomized and de-bald son i don't care who gets offended get as offended as you like by that statement all right and this is why death's coming so let's go back to the slide i'm going to wrap up these last two cards and i want to put up a couple of other things and talk about a little bit about moral relativism regarding why we're headed in the path that we're headed this is the ultimate expression of the left-hand path this is when a society has become satanic where it's headed and that's what we are we're a sick depraved immoral satanic society and you know what i'm sick of shit as hearing it's all just the satanists and the globalists and the social engineers fault no it isn't stop being an apologist for bad thinking and bad behavior in humanity it's humanity's fault oh they're manipulated they're socially engineered they're mind controlled i don't give a shit you got to take responsibility for the lies you buy because for those lies and deceptions to be sold they have to have tons and tons and tons of willing buyers and this is what people have to stop thinking that oh it woe is us we're the victims you're an asshole and you don't understand what's going on and you don't understand natural law crying your milk over it punk little bitch boy because that's what people who think like that are okay you don't take responsibility for yourself and your own behavior and you don't and you let other people get off the hook without taking responsibility for themselves and their own behavior it doesn't matter how much manipulation has taken place if you are doing any work upon yourself to advance your own consciousness and your own understanding of what's right and what's wrong and i'm gonna i'm gonna tell you that straight up straight to your face with tough love okay and it doesn't mean either tough love for you for humanity it means tough love of truth and i'm gonna speak that tough love of truth out into the universe because the universe is spoken into creation and that's what i am charged to do by creation's laws that have nothing to do with man's laws and which is the only thing that i am bound by that my behavior is bound by are the laws of natural law the laws of the god of creation that's it so this is what's coming for our society this is the card that rules our society the cult of death involution backwards progress in consciousness now the two cards i did not get to are probably the two most important cars in the entire tarot deck and i feel a tremendous affinity with this particular card the hanged man card i consider as much as the justice card it is one of the most important cards and this is my birth card along with the courage or strength card card number eight card number 12. my birthday is coming up in eight days very appropriate you know that this is card number 12. 8 12 august 12th is my birthday those are my cards strength or courage and the hang man and what the hangman is is the evolution card the hangman is the servant of evolution the hangman is the servant of natural law i talked about this concept of service in the past being a servant it doesn't mean being a slave this is not the slave of natural law this is not the slave of god it's the servant the one who takes the law on a platter like a waiter or a servant in a restaurant takes food on a platter to someone and hands it to them and now they have to take it into themselves you can't make them eat it okay you can't force it into their makeup they have to make that willful decision to it but you are the servant and again we are the waiters we wait we are already there we have this knowledge integrated into our makeup as an individual but we wait on other people this is the concept of the bodhisattva in the buddhist tradition the one who waits in the prison who keeps coming back to the prison giving natural law to people until they awaken and until all are free and all are out that's the hang man he has accepted that he's crucified in the physical domain on the tree on the quote tree of life which is rapidly becoming the tree of death so tremendously powerful and appropriate for my particular birth cards you can calculate your own with your birth month first and then your birthday and if they end up being greater than you know either 12 or um you know uh 21 then you can just reduce so if you're born on the 31st of the month you just reduce that 3 plus one is four so your second birth card would be four okay since i'm born august 12th my first card is eight which is courage or strength and then twelve which is the hangman the servant of evolution the servant of natural law that is seated at the right hand of natural law so the hangman is true evolution in consciousness service to truth service to natural law service to object the laws of objective morality and he takes he's enlightened he's is the this is the illuminati card folks you want the illuminati card it's not you know the devil or the death card they're not the illuminati they're the ones who are trying to destroy the illuminati they're trying to prevent illumination and enlightenment this is the illuminati card okay this is the actual society that the people within society would comprise a group called the illuminati the illuminated ones the hangman card that's what the halo of light around the being's head means and the great cross see that's what it represents the tau cross of the universe and then of of the power of natural law and then he is upon that the lesser cross of his legs crossed again we saw the symbolism in the tarot last week of the great cross and the lesser cross the great cross of the galaxy slash universe the lion the man the bull and the eagle and then the lesser cross of the individuated sun which is what the hangman represents that's the solar system cross of the solstices and the equinoxes and here we have it reflected in the macrocosm so you see it's always the law of correspondence applied and that's we why we have to understand what we are talking about here is not just the individual progression or evolution of the soul this is the progression of the whole society as a whole okay that doesn't mean attachment to the physical domain that means that you are a servant of natural law in the physical domain and yes it is about getting everybody to that level of consciousness it's not about just individuals progressing to it as too many people who don't understand real high level spirituality want to talk about and this is the elitism of hermeticism coming through and i don't agree with it that's why they haven't accomplished the great work that's why the great work has not been accomplished of ending human slavery on earth and in any other on any other planet where slavery presents itself that's the goal it's a very real world spiritual goal in the physical domain and people have to get that message through their heads folks they have to get it through their heads this is not about what happens in other dimensions the hereafter some afterlife that we don't know is coming exists whatever okay this is about doing it here boots on the ground streetwise spirituality and too few want to accept that because they want to believe it's just about the individual that's the height of hubris that's the height of hubris this is indeed about everyone it's about the collective it's about the aggregate of society acts actually it's about everyone see this is the idea in thalema that the law is for all the true understanding of natural law is not for a spiritual elite it is for everyone as gamma ray the metal band said in their song heaven is for everyone when i hear the line i get chills up and down my spine i get goosebumps on my flesh you know the whole idea that you can take my heartbeat but you will not take my soul that's the hangman card that means you'll crucify me on in the flesh in the physical world of life but you will not annihilate my soul and my understanding of right and wrong and under natural law so do whatever you will to the flesh but i will be back here and never ever escape escape is not what i'm looking for see you know this is the idea the whole concept of obi-wan kenobi not looking for escape looking for true transformation in the physical domain because that's what natural law the law of the universe is demanding and commanding and that's the only authority there is because that's the law of god and you know what i'm going to say it just that way all you atheists go fuck yourselves how about that how about you saying it just like that i'm not interested in your bullshit religion because that's what is the religion here and that's why people believe in moral relativism because they think there's no higher power than man and you think we get to make up what right and wrong are and you're fucking trash all of you every last one of you are fucking trash i'm gonna say it just like that to you i don't give a shit what you think or how much you're offended you don't understand you're ignorant you don't understand what's going on in the world and you think you're you do because you're a little fucking child who thinks that man is the most powerful thing in all of creation and only a little fucking imbecile child would think that i don't believe in all these people's imbecilic religions either because that's just as naive and childish and it's you know what's even more childish the assholes out in the world who can't understand that you can be a non-religionist and not accept the major world religions as truth and you can also not be an atheist and accept that bullshit religion as truth either this is called unidimensional childish fucking thinking is what it's called and i'm calling people out on it you're buying into the dialectic of religion versus atheism and what you don't understand is cosmic natural universal spiritual moral laws under the creator of the universe which is which are objective natural law is objective inherent reality that does not require belief or religion to understand and accept any more than gravity does and there are too many people out there that are just ignorant fucking children and don't understand that and that's why you and i are enslaved that's the reason that's the underlying causal factor that you and i are currently slaves on this planet and you don't want to get it you don't want to understand it because your ego is in the way and i'll butt heads ego ego with you like i said last week i'm done trying to explain it to people with a little spoon fit be nice not let my true personality come out when i'm talking to an ignorant fucking asshole because that's what people who think that way are you're just ignorant assholes who just think you are the highest fucking power that's it that's what you think you think you're god you think you're god that's what you believe that's what satanism is you're a satanist that's what people out there are in the truth movement in the freedom of your fucking satanists i'm going to prove it after i talk about the justice card the final card in the major arcana so this is the evolution card the hangman card so let's move to the final position ketter the crown the crown chakra the top of the tree of life christed consciousness god consciousness in the microcosmic tree self mastery on the macro cosmic tree it's got itself law itself justice natural law heaven if you will this is where we should truly be living on the earth this place could be a paradise instead of a prison people think oh it's so utopic and so it's so just a pipe dream no you know what it is it's a freewill choice it's a free will choice that ignorant assholes don't want to make because they hate themselves and they think they're god and that's where thinking your god comes from thinking that you're the highest power in creation and you get to make up what right and wrong are that's that comes from a place of self-loathing and self-hatred because only one who hates themselves could ever come to believe you're the higher power you're the highest power in creation you're god and you subjectively get to make up what right and wrong are based on your whims and preferences only a motherfucker who absolutely hates themselves down to the fucking core of their being can think like that and that's called being a satanist that's called being a satanist you know i'm gonna i'm gonna lash this all out here today because i'm in a mood i'm going to try to reel it in when i go on infowars because i know his audience doesn't quite isn't here yet right i'll i'll dial it back a bit because i know they have to really study this and understand it and i'll try to give them the basics of natural law but you know what the so-called truth movement the so-called freedom fighters out there you guys have your heads up your asses and i'm gonna be the one to have to tell it to you because no one else will because they want viewership they want money they want donations i don't give a fuck if all of that dries up i'm here to tell the truth so we're going to look at after i talk about what this final and most important part of the tarot is we're going to go and look at moral relativism in the freedom movement before i take your calls and anybody who's not outraged by that this is still the the re the dominant reality the dominant mindset in the freedom movement you yourself have your head up your ass if you're not totally sickened and angered by this righteously angered you yourself and if you're not doing anything about that situation you don't understand what the great work is and you don't understand true right from wrong if you're not actively doing something to try to change it through your actions not just lip service through what you do in life so this final card

card number 11 the two pillars with the great great cross right there okay the two pillars of enlightenment and it's it totals to three as well which is the trinity seven seven seven okay i'm sorry it doesn't it totals to two but the two pillars is what i'm talking about of self-defense and non-aggression non-aggression and self-defense the two pillars of enlightenment totals to 11. okay 11 is the number and it totals to two but what we are talking about here is natural law the king of creation enthroned in the universe that can never be dethroned from the top of the tree of life the macrocosmic tree of life this is the force that governs all of creation natural law true universal cosmic spiritual justice holding the sword of truth and the scales of justice seated enthroned in front of the temple of man the temple of creation with the two pillars at his side the one pillar of non-aggression principle and the one pillar of the self-defense principle crowned king that's why he's at the crown position ketter on the tree of life and the crown chakra of the vedic chakra system so you just look at the progression we had the left hand path okay so that that's that's the final symbolism of the macrocosmic tree of life so what i want to do is i want to put them together the microcosmic tree of life which was the path of the individuated soul depicted at the dot position right here sorry let me uh let me step back and bring my trying to bring my cursor up give me one moment i'm not sure why i'm not getting the cursor on the screen but it's not coming up today but anyway switch back over and um we're talking about at the dot position which is the card right underneath the top one on the middle path okay uh in white okay with the white glow around it you see that i've positioned the i've colored the glows around the card according to the chakra colors red at the bottom then as you go up orange and then as you come to a dual chakra you have um yellow which is the solar plexus chakra then the heart chakra in green the throat chakra in blue and then in indigo or a deeper shade of bluish purple you have the third eye shocker then at the top in violet or even a bright purple pink you have the crown chakra right underneath that at the dot position which is not one of the cepherot but the position called knowledge on the tree of life the dot position you have the fool which is the soul card or the individuated consciousness and then you have the world or universe card at the dot position of the macro cosmic tree of life on the right so what i want to do first is show what all the cards actually mean so i think i put together a really nice card i'm going to uh kind of fade the actual tree tree with the card symbolism slightly into the background but then i'm gonna put the actual naming as i would name it very plainly and out in the open not occulted not veiled okay of what i would call this on my own these cards on my own tarot deck in these positions on the tree of life so i hope this particular decoding key for the major arcana of the tarot comes in handy for people i know it really uh helped me to understand it when i sort of you know really deeply understood what each card meant and then putting them on the tree of life itself the respective two trees of life the microcosmic and macrocosmic really acts as a decoding of the pictorial keys of the tarot okay so again the malcuth position on the microcosmic tree of life is ignorance and unconsciousness staying there as an individual then we come up to the sewed position it's the sacrum chakra or the um genital chakra this is the desire to know to learn to grow as an individual when we get up to the solar plexus chakra this is courage and willpower to act in the world courage is the internal quality willpower is the external so all the feminine or internal aspects will be on the left hand pillar which is the feminine pillar and then the right hand side pillar the pillar of mercy is the active or masculine pillar care or the generative principle is what ultimately unites everything within the individual this is why it is the ultimate of the universal of the individual forces i'm sorry of the individual aspects of human consciousness ultimately what we care enough to do to to learn to understand and then to do is what gets manifested in our lives then we go up to the throat chakra and we have self-discipline which is work upon the self and then we have influence upon others that's work upon others so this is how we will influence and change ourselves versus how we will influence and help others to change then passing through the abyss the hidden realm of knowledge of god the soul the self the individual which is what this whole tree is about we come to the realm of the trivium so the soul self individual at that dot position represents knowledge then we have to understand what that knowledge means understanding that's an internal aspect understanding of self through self discipline and courage to delve into the knowledge of self and then we actively apply that in our life and that's what wisdom is it's right action it's action not applied according to natural law which is what the high priestess card is she gives birth to that okay that is the mary figure in the christian tradition who gives birth to the son wisdom gives birth to right action in the world but it's a masculine quality because it's about acting it's not a passive quality and finally at the very top or caterer or crown position we have self-mastery that's what the magician or magus represents in the tarot so do we attain that self-mastery through integrating all of these aspects of human consciousness and working with all of them within the self understanding knowing knowing understanding and applying them or do we stay in ignorance and unconsciousness at the wheel of fortune card at the bottom at malcuth that's the microcosmic tree the macrocosmic tree is the tree that shows us and reveals unto us what is happening in our whole society based on what is happening in the aggregate as individuals because one tree is a reflection of the other the correspondence principle is always at work that which is below is like to that which is above the microcosmic tree of life is self-similar to the macro cosmic tree of life so if we stay in ignorance and unconsciousness in the aggregate as individuals what happens in society you then look at the malcuth position of the macrocosmic tree and we end up in judgment or hell and that's exactly where we are this is where we are on this on this place of the macro cosmic tree in the placement that's where we are malcuth macrocosmic tree of life we are in judgment or in hell that's what this earth has become it is a prison planet it is a locked down hell world at this point and rapidly going to become way way worse and way way more overt of a prison way more right now it's just a covert prison in most people's minds because they're so fucking ignorant but it is going to become a rapidly increasingly worse hell overt prison and that is because we have willfully refused truth truth has been offered to us it is the way the truth and the life truth itself the light of the creator natural law we could accept it and transform ourselves in our reality but we have rejected it we've ended up at the moon but we've chosen the moon instead of the stars that's what we've chosen we've taken the path of refusal of truth not acceptance of truth as you move up the ladder to god and the universe is going to give us the result or manifestation of that choice which is what the tif tiffaret or heart chakra position of the macrocosmic tree of life absolutely inescapable change or inescapable result inescapable consequence this is the change manifestation result or consequence card we cannot act without consequence we have free will to choose the behaviors we will enact in life but we do not have the ability to escape the manifested result or consequences of those free will chosen behaviors that's how natural law brings us the result of our behaviors in life and when we as a society in the very real physical domain on earth choose to refuse to learn the truth and we will not accept the truth we go into a societal condition called slavery on the left-hand path conversely if we were to become a society that in the aggregate did accept the truth we would build a society based on true human freedom depicted on the right side of the tree of life in the middle the pillar of mercy ultimately the two forces that are ultimately presiding over these choices are the actual i shouldn't even say presiding over i should say are the end result manifestation the final result is death involution stagnation as a species or the hangman card that's the death card or the progression and evolution of our species in consciousness in the aggregate again this is not the individual card this is the aggregate card of what is going to happen as a society as a whole as a collective and the ultimate law and force which presides over all of it is natural law or justice true universal moral justice that is not put in effect by any power of man by any ability of man by any preference of man by anything that mankind can do that humankind is capable of doing this is put into effect by the creator of the universe and exists in effect in creation as surely as any physical law does and the result that we are getting in our society is the way that we understand the existence and manifestation of these laws how they work the existence and operation of these laws and how they bring us the manifested consequences of our behavior as a society as individuals and as a whole as a species natural law is the unwavering presider over that that is the deterministic factor in creation nothing else is set in stone except natural law everything else is a choice it's a choice whether we do that self-work it's a choice whether we accept truth as an individual and as a society it's a choice whether we go into slavery or whether we build a world of freedom it's a choice whether we stagnate and go into involution and death or whether we progress as a an entire species and evolve under natural law it's all a free will choice and it is all on the macro cosmic tree of life it is all something that we do in the physical domain collectively and if people do not understand that i regret to inform you you have not figured out true real high level natural law based spirituality you have bought into a religion-based occult form of spirituality that only went so far but did not go all the way understand that get it go into it deeply this is about everyone natural law is for all the law of love is for all heaven is for everyone not just some because ultimately everybody's getting this lesson no matter how black-hearted they allow their soul to become and how fallen they allowed it to become you think the creator of the universe leaves any behind everybody's getting this lesson no matter how much they want to kick and scream and refuse that they're going to get it but the creator will allow that because it allows total freedom through free will to express whatever we want even if we're going to continue to express a prison that continues to be destroyed and recycled endlessly the creator will say that is your free will choice not to learn the lessons that must be learned here if you are to evolve you say that that's what you want but you are not choosing that through your gifted free will there is no forcing the free will the creator is total love total law the total law of love this is what you really if you really go into thilema that you deeply understand and most people never get there they stop short and guess what you want to say i'm not about crowley i am not a crowley at all being a thelamite and being a crowley are two different things that's like the difference between being a modern-day christian versus learning the true esoteric message of christ consciousness they're two entirely different things and one can go all the way and be and attain christ in consciousness and that has nothing to do with following the church's edicts or decrees in christianity well it's the same thing when it comes to thelema for people who don't understand the distinction between a fallen teacher known as aleister crowley and the true tenets and high level spiritual understanding that you can extract from a deep understanding of the thalemic philosophy and only people who have limited thinking and unidimensional thinking will not understand the distinction and will not make that distinction between those two very different things so when i say this can you can understand this by going deeply into thilema i'm not talking about liking aleister crowley i think that would be a very bad decision i'm talking about really understanding the thalemic philosophy which is a philosophy about natural law just like high-level rosicrucianism is a philosophy philosophy about natural law high-level esoteric christianity is a philosophy about natural law high-level esoteric freemasonry is a philosophy about natural law high-level esoteric kabbalism is a philosophy about natural law it's the understanding of these laws universal moral laws of creation and that's why one must study and understand the occult you can want to continue to think about it as something that should be shunned and not looked at because that's what your stupid fucking religion told you you go right ahead you're not going to get what's really taking place within yourself and in the world and you're always going to get it from some second-hand externalized source or deity that you believe in you're not actually going to get it from the universal creator that put all of the laws into effect on in a one-to-one lesson in a one-to-one lesson because when you deeply study the real hidden knowledge of the occult that's the lesson you're going to get and it's not going to come from any place else except from directly from the creator of the universe that's how natural law is revealed it's revealed and it is discovered and it is understood and then it is integrated by how we behave and that is what the tarot is revealing unto us like every other mystery tradition of consciousness does if we are open to it to receiving its message and that's what kabbalah prepares us for proper reception of natural law so let's just look at before we go move on i just want to just put up these pillars the two pillars and both on both trees okay the left-hand pillar of the microcosmic tree of life is those internal or feminine aspects of the individual courage self-discipline and internal understanding of self the right hand pillar is the external or masculine aspects will power to apply our behavior in the world influence that we are going to have upon others by interacting with others and setting an example and then taking actual right action in the world which is wisdom these are external or masculine aspects of the individual on the macro cosmic tree we have the negative outcomes of the left-hand path see in the microcosmic tree folks you have to not look at these as positive or negative they are simply internal slash female versus external slash masculine feminine i should have said not female internal feminine versus external masculine on the macro cosmic tree of life they are negative versus positive because you have the negative outcomes of the pillar of severity on the left-hand path the refusal of truth slavery and eventually death stagnation involution whereas on the pillar of mercy you have the positive outcomes which begin with the acceptance of truth the building of a society based in true freedom and then progress and evolution in consciousness to the next level that creation will then reveal unto us because there will be other challenges after this this is based on where we are at now but we're not going anywhere individually ladies and gentlemen this is a total lack of understanding of what our work is to do here because to say fuck everybody else in slavery i've learned the lessons and now i'm going somewhere else you have refused the great work through ego it's not the other way around this is about getting everyone out of slavery because heaven is for everyone it's not for leaving people behind and the physical domain it's not about attachment to that it is about that there is no separation between the spiritual domain and the physical domain that's the real message of true spirituality and hermeticism properly understood not understood according to the elitist interpretation of hermetic philosophy as is derived out of the ancient commission tradition and obviously even predates that so i hope people have gained an accurate understanding of this now before i give my small you know spiel on supporting this work i want to step out of the presentation slides for one moment because that is my last slide there and i want to switch back over to my web browser because i want to show people this and this is highly important let's put this up full screen and let's just leave it up full screen okay because that's how important this is i'm gonna make this as big as it can be to display this full screen i went to a thread in facebook so on social media on facebook and like literally almost came to a place of such depression that i actually almost vomited i'm not even that's not a i i know that's like almost nuts but i got so upset to my stomach upon reading this thread that i went and leaned over my sink in my bathroom for about ten minutes thinking i was going to vomit i swear this happened this week that's how depressed i got and how physically nauseous this thread made me and this should not be a reflection on the people who run the free thought project that's the first thing i want to say before everybody you know makes a inaccurate understanding of what i'm going to lay out here okay i know that the guys on the free thought project try to do a good job and guess what it's no different than groups that are about my work on natural law my work on freedom in groups that have the name mark passio or natural law on them okay you could have just as much of ignorant fucktards on groups that have my name on it as you do here in the free thought project soulless ignorant absolute naive children who think they understand the dynamics that are taking place around them when they know less than nothing and they are in a place of what i refer to as negative knowledge not only not knowing anything about how it works but erroneously believing that you have it figured out when you know your asshole okay so i'm done being nice about it and it makes me physically fucking ill and anybody who's out there thinking that i'm going to help the world and i'm going to be a teacher of natural law and i'm going to help people to understand what's really going on if this doesn't make you sick and you don't have to get as ill as that i hope you don't but if this doesn't make you angry and so like feeling soul sick about what's really going on in our society you're not awake you're dead fucking asleep okay so someone who's a member of this community group of the free thought project i don't know whether it's officially sanctioned by them or not posted this post that simply asks the question what percentage of the world is morally good now when i posted the link this is another thing i want people to understand because they don't listen they don't read they look at the picture and don't read what i'm asking them to do and i'm not asking people to answer their question see i can't remove the picture if you place the link to this place on facebook you can't remove the image to my knowledge you it has to have a preview image i think that's stupid i think facebook should go back to allowing you to delete the preview image if you post to a place that has one but they don't it has to have a preview image okay so i couldn't take this down and just say check out this link underneath my post it's going to have their original picture of the thread from the thread which says what percentage of the world is morally good that let me just emphatically state this so all the people who don't read and listen to what i'm asking them to do get it if you're watching this broadcast okay i am asking you not to answer that question i don't want the answer your take on what the actual percentage of how many people in the world are morally good i don't really care what you think the percentage is that's not what i'm asking i'm asking you to read the comments of this thread from the free thought project community group facebook group i want you to read the comments that are posted under it so i expanded the comments under it there are 251 comments to this thread so i expanded it this is what i was asking people to look at not to answer the question that was posed in the group do you understand i mean maybe i have to just say it way slower then maybe people will understand what i'm asking them to look at shall we go that route do we really need to go that fucking route okay i'm asking you on the uh my post on my facebook page to read the comments of the link okay i know some people are a little slow on the fucking uptake okay i get it there's a lot of fluoride products out there the the the uh you know the radionics have been ramped up you know i get it i get it all right so look at the first few comments what difference does it make ah who gives a shit whether people are more more or more who cares that has no bearing on anything to a fucking fucked heart in a group that's talking about making the world a freer place i mean could you imagine this is where people are at this is the kind of know-nothings that you have don't even understand that all of freedom hinges upon whether behavior is moral or not knows nothing about natural law and how it works and will insist it doesn't exist no doubt if you keep pressing them what differs does any question pose if you learn the answer the question then has value in this case the sheer impossibility of measuring morality makes the question naive at best no morality can be measured it can be measured by the observable effects of whether a society is heading into freedom or heading into enslavement that's called the law of freedom as aggregate morality increases aggregate freedom increases it's a mathematical equation that is unwavering and works the same way at all places in creation that's why it's called a law the answer isn't a percentage the answer is that everyone has different morals this is the original poster commenting on his own post now moral relativism in other words the answer is that everyone has different morals therefore it is an incalculable number i was just curious as to how many people could see that a thought experiment if you will and then it gets three likes oh one person responded with sadness maybe they get it moral relativism by a person who says or is in a group posting in a group thinking that they can ever obtain freedom in creation while being a moral relativist know nothings this is what our movement is comprised of our so-called move we have no movement we have death stagnation involution that's your master in this movement so-called movement you want to know that's the direction of the movement that's your master that's the card that represents your master and that's where we're heading somebody who actually gets it posted next and corrected their smacked ass error morality is objective and universal there is no such thing as different morals and it is not subjective period the fact that people don't know or understand this is why we have the world we do thank you thank you sir for correcting these smack fucking asses you know i don't even have the patience to do it on facebook thread i don't even have the patience to do it because where i'm at i'm bending over the fucking sink ready to vomit that's where i'm at having done this for the last 12 fucking years to see this kind of shit on threads that are saying they want freedom what does morally good mean to you i guess the question is a bit ambiguous because morality is subjective you be the judge oh yeah yeah we could just make it the fuck up at our whim so if we say we're gonna pass some laws and people gotta go into fucking concentration camps against their will well hey you passed the law that's moral according to the people who passed the law that's fine that's that's right that's what moral right is i guess just like all other of man's subjective law the answer has to include subjective parameters then i'd say there's no way to tell almost regardless of one's definitions of right and wrong of ones meaning an individual's definition meaning we can have individual definitions of right and wrong we could all yeah don't you know don't you know sorry i clicked on something i apologize we can have it sorry about that got a little excited and hit my uh my track pad yeah we could just make up what right and wrong are you know that's all it's according to each individual's definition there's no objective definition yeah this is where we're at yeah here he's saying it again experience is subjective much like morality there is no correct percentage because everybody's because of morality's subjectivity believe it and there are other people who absolutely agree with his contention you know yeah who chooses the morals or what's good or bad as if it can be chosen right it's not something that exists in the universe and was put there by the creator of the universe as law no every other aspect of creation is bound by law down to the subatomic particle but morality is subjective and humans get to fucking make it up yeah that's how it works folks yeah and these are people who say they want freedom well you know what folks you need to go back and reread watch my seminar on natural law okay hopefully i'll get into this on infowars and help people to get a better understanding of how moral subjectivity moral relativism is destroying our freedom hopefully you know the conversation will go in that direction because that's where i want it to go okay we'll see and i i highly suggest rereading the aquinas on liberty essay that i posted i'm gonna repost it with this podcast on tarot okay and really you should read it i'm not going to get into it today i'll just post it but it is not thomas aquinas the christian philosopher okay it is a modern philosopher who refers to himself as aquinas an internet handle okay i don't know how many more times i have to say that because i still get people saying that this is thomas aquinas's writings no it isn't this is a modern philosopher known as aquinas who to this day apparently remains anonymous who coincidentally or maybe synchro mystically posted an essay on the state of human freedom and its connection to objective morality on an infowars forum probably about eight or nine years ago that i commented on and did a lot of you know breakdown and analysis of because i thought it was such an enlightened understanding of natural law well i highly recommend people go back and listen to it because it concludes very truthfully and correctly that there can be no freedom in a society that embraces moral relativity can be no freedom in a society that embraces moral relativism by law by universal law so that's all i wanted to put up there about this post and show you where our society is so those are the ends of the thing things i wanted to show you on my web browser but i want you to cut back over want my producer cut back over to my slides because i want to just wrap this up and say thank you for you know watching the whole let me just take it all the way to the end i want to say thank you for watching this two-part presentation on the major arcana of the tarot revisited as a revelation of both personal progress and consciousness and society's progress in the aggregate in any given society anywhere in the universe now we're going to take calls for the duration for the last approximate hour and a half but if you have gained value from the information that i have put forward here in the last couple of broadcasts and throughout all of what on earth is happening please go up to gifts.what on earth is happening.com and consider getting a physical gift that you can have for yourself or perhaps give to any of your loved ones or friends or acquaintances uh and you know these are all gifts free gifts given in return for a personal donation to the work that we do here at what on earth is happening also i really have been happy with people taking me up on the ark offer i i sent out many arcs this way i was very busy copying arts this week one day i did six arc drives in one day on just an average day in the summer that's great that's fantastic i'm very happy to see that that shows me that some people at least want to go all the way in this understanding and they're hungry for the knowledge so thank you to the people who have taken me up on the arc drive offer the ark is a one terabyte hard drive filled with all of the research material that i extracted from the vast repository of human knowledge known as the internet over the years and what kind of has built the basis of my understanding of the world and helped me to get to the level of consciousness that i have been able to arrive at and i will copy that information for free onto a hard drive that you send me that's the offer and you know i ask for a personal donation from my time and effort that is not for the data that is that is collected aggregated and collected and copied onto the arc drive you know it's just you know a a personal donation for the time and energy and work that i put into this effort so you can go to what on earth is happening dot com slash ark or click the ark tab or button on the waternearthishappening.com site to get uh to fill out the form and then be contacted get the pdf document about what you would need to do to receive the arc drive thousands of people have now taken me up on this offer and i hope thousands more will and you can copy it for whoever you want it's an open ended offer you can pass it right along to anybody that you know who wants it in any form that you wish to do so so that is the arc drive offer and finally if you want to make a straight donation to the cause of what on earth is happening you can do that by clicking the donate tab or button or going straight to what on earth is happening dot com slash donate uh there are now i believe uh 11 ways to donate um yeah on the gifts area we have those new t-shirts up my producer just reminded me about that you know so go up and uh get one of these great new what on earth is happening t-shirts you know i don't really do let me get it in there i don't really do a whole lot of uh promotion i just figure you know i want to reiterate this stuff because you know some people don't know that this stuff is out there and every little bit helps folks because you know you do need resources to do this you know and um you know i don't make much here okay i make enough to stay afloat and have food shelter clothing some minor amount of entertainment for myself you know so i don't go crazy and to continue to do this work and have the resources that i need to do it in the form of technology et cetera so there's many ways you could donate there's like six cryptocurrencies up there um five or six you know uh you you could do paypal you could donate and be a monthly contributor through my patreon page this is something that i think a lot of people you know uh can take me up on you can go over to uh uh patreon.com okay and become a uh a monthly uh uh contributor on patreon uh you can donate through traditional means like cash uh check or money order or just check or money or not cash through the mail but a check or money order by mail and then um you could donate supplies to our amazon wish list and if you look at it right now it's empty and that's because people have taken me up on that offer and anything that i have put on that amazon wishlist people have purchased that's very humbling i very much thank people for doing that because every little bit of those tech donations help as well so when a need is is here and i need it to fulfill something that i need to do as part of this work and i throw something up on that tech list and you purchase it for me it's one of the best ways that you can help and contribute and you know exactly where your donation is going at that point so that's all in so far is what i wanted to cover as far as um you know post presentation announcements uh in ways that you can help and contribute with the effort here at what on earth is happening and for everyone who has donated and contributed to this cause thank you from the bottom of my heart and the heart of all of our staffs here at what on earth of the staff here at what on earth is happening thank you very very much all right folks with that said uh let me get my headphones on we're going to take your calls for the duration of this show and um you know i'd say let's try to keep it to um the concept of the tarot as a revelation and an indicator of personal progress in our society as individuals and in our society i think that this topic warrants sort of keeping to that general you know topic in so far as call-ins comments questions let's try to keep it to the material over the last two weeks maybe before anarch adelphia i'll do a few call-in shows that are just absolutely anything you want to talk about because that'll take some pressure off of me designing stuff before i have to really hone in and get my presentation slides and my workshop slides the way i want them so maybe we'll do a few call-in shows i think next week we're going to do a show where i'm going to give an extended existing presentation of tesla and humanity's missing paradigm shift that's coming up next week i'm going to do an extended presentation maybe all three hours maybe we'll do calls maybe not we'll see how it goes i'll do an extended what on earth is happening tv broadcast of tesla and humanity's missing paradigm shift since i only got like 15 minutes to do it at the tesla conference they have a whole lot of speakers at the tesla conference in new york so i'll take my time and really unpack tesla and humanity's missing paradigm shift right here next week so let's go to your calls let's see who's in the queue here all right my mouse has stopped working i think i need to plug it in i'm gonna have to use the trackpad so let's go to uh let's get somebody new in here uh let's go to human patriot human patriot you are live on what on earth is happening episode number 218 welcome to the show hey mark thanks for having me on thank you for calling in is there any way you can come back to me i started driving while i was listening and i'm going to be done hearing about yeah not a problem if that's your preference i i will do that okay thank you i appreciate yeah you you got it i'll make sure to get back to you okay let's see um let's go to let's go to saheed miller i'm going to try to get some new people in saheed miller you are live on what on earth is happening episode 218 welcome to the show hey how's it going can you hear me go doing pretty well i'm a little bit fired up this week but uh you know i have been over the last several weeks but in general as far as presenting this type of information i feel good about it i feel like some people are getting it and now going further in their understanding and uh you're coming through loud and clear can hear you great great so uh i remember the first time that you said the tarot was like a book and i feel like uh yeah right after you said that everything kind of clicked like it's a book of symbols and signs that you can kind of recognize in reality yup and uh one of the big ones that i think is like the full card and uh the hank man and awesome but i was thinking about what they they pictorially encoded it symbolically so that it would not be easy to censor a book would be easier to censor because people all have access to the decoding of it you know and then they say oh this is what he's saying let's let's burn this or get rid of this or block people from getting it the tarot has survived down through the ages because of the encoding of that information the problem is in the modern day we now have to properly decode it for others and get that information out there so that they can really understand what it means and how it is so powerfully transformative in in the way that we can actually develop ourselves and help to change our entire society gotcha yeah and i also think sometimes like um that uh reality itself basically already had that encoded they just waited those images and uh you know identified them and put them into like a set you know that's right this is the tarot itself is discovery and revelation you know so it's stuff that is already there naturally inherently as part of the very real world that we live in you know and people want to just say oh this is all about just the development of the soul and wherever it's going to go next no it is about the here and now and that's has nothing to do again with attachment to the body to you know the uh physical domain you know this is about what our the true one great work is here to do because how would you consider yourself spiritual if you're just about letting slavery continue endlessly and letting evil just rule people you know we don't need this level of rulership and evil to learn the lessons that the whole spiritual domain has to to teach us it's unnecessary and that's the whole idea is that you only think that evil is necessary until you understand that it's not and then you really start to try to do the work to truly take evil and slavery down and put them in the position that they belong in as an understanding of potentiality of what can happen when we don't live according to natural law you don't need to go into that state to understand that that's like saying i absolutely need to go put my hand into that campfire to understand that it's hot and will burn me that's ridiculous that you don't need that level of direct experience to understand that lesson and this is what many people who i think have taken occultism into too much of an elitist space as far as hermeticism may be concerned uh believe has to occur and i in that sense i don't agree with teachers like blavatsky who said don't teach this stuff to other people it's like throwing pearls before swine you know i don't believe in in um you know uh elitist occultists or or elitist uh rosicrucians who say this is only the knowledge for people who really want to seek it out we have to put it out there so that it is heard just as much as the deceptions that people buy into and believe in our heard that's what our work is to do as people who say we are our true uh truly aligning with true spirituality like if you're not doing that and you think it's just for certain people or you think it's just for some afterlife domain i don't think you've gotten what real spirituality is personally okay so you know i just wanted to really incorporate that in today's program yeah i can understand that uh i guess i could bring up about the um the hanged man i feel like there's this blockage with a lot of people where like if you say like uh that you we are the illuminati and uh you know and uh they actually co-opted it right if you go ahead and say that to somebody they'll kind of instantly you know attribute illuminati bad guy you you know right there's like these tough um bridges people have to kind of gap kind of let go of some of the elements so saheed it's it's the same unidimensional thinking and immediate bad thin slicing as if anybody who's read blink by malcolm gladwell this term that he uses in the book thin slicing is proof of how bad people are detached from their intuitive aspects from the the sacred feminine intuitive understanding where they can look at something and accurately gauge and garner what it means from thin slicing it not delving into it deeply and people think that they're good at it when they suck at it when they they have no ability to thin slice so people will look at a post and go oh he wants me to answer this when i never answer asked anybody to answer this question about how what percentage i don't care what you think your percentage of people who are morally good is i'm not asking that question i just can't remove that image if i post the link to that thread i'm asking people to look at the comments and they want to thin slice it and think they got it right and then quickly answer with a percentage when that's not anything that i'm talking about similarly they'll hear i'm the illuminati not the dark occultists of the world i'm one of the illuminati illuminati is a plural word which means enlightened ones okay and i'll make the claim yes i am an enlightened one in this world of darkness and so are many other people who understand what i have come to understand we are the illuminati and then they'll hear it and insist that what they heard erroneously about what that term means because someone absolutely incorrectly applied the term to evil people who think that they have the knowledge and they're the enlightened ones but really all they have is the black sun they have a twisted variant of knowledge that they're using as a weapon against others in their ignorance okay are the truly enlightened ones call them the darkly illuminated ones if you will they have a certain level of knowledge they have a certain level of enlightenment regarding how the knowledge of the occult can be used on other people as a weapon oh they're enlightened about that most certainly they know that very well but are they truly spiritually enlightened absolutely not so call them the dark illuminati at least like i call the bad occultist dark occultist because it's the occult is not all evil or bad it is just neutral knowledge and it's how it's used well we need to separate the true illuminati or from the dark illuminati you know and and and understand that the illuminated ones are the good guys not the bad guys the bad guys are the darkly illuminated ones the cult of the black sun the dark illuminati just qualify it you know what i mean get qualify it and and make the distinction at least if you're going to use that very inaccurate term right um i'm sorry my producer is telling me we're not getting your your audio in again we had this issue last time let me just see if i can clear this up and i'm not really sure why this is happening folks i'm not sure whether it's the discord server itself but i'm just going to briefly quit out of discord i apologize for the tech issue and i'm going to reestablish my connection to discord very quickly so just give me a moment and hopefully we can get this cleared up all right let me go back to let me go back to saheed saheed are you still with us i can but again my producer is not not having it um let's yeah i'll repeat what you said i hope we can clear this up and maybe it's just happening with your line but go ahead yes so i'll repeat that he's basically saying something that i talked about very in-depth in my natural law seminar saying that people are confusing their experience of reality or their perception with objective reality itself and what i talked about in the natural law seminar is that we absolutely have to align our perceptions with reality that's what our job is to do the truth does not change there's a great meme circulating on facebook of a cylinder okay and there's two light sources casted on the cylinder okay and one of them is saying um that showing that the cylinder produces a square shadow when casted from the side and one of them when casted from the top shows that the cylinder will produce a round shadow and two independent observers from depending on what side of of the shadow they're looking at what side of the cylinder they're at to look at the shadow will insist that they know the truth okay but what they're saying is that it is true that from this perspective the cylinder casts around shadow and from another perspective it is true that the cylinder casts a square shadow but that does is not the truth the truth is is that the cylinder exists as a cylinder and two different light light sources are casting two different types of shadows okay that's the truth that's not what is true from a perspective see that's what i'm trying to always explain there's a difference between a perspective and whether it is completely invalid or whether it's even valid but is only one perspective versus what the natural inherent objective truth actually is in nature one of the biggest parts of my work has been to distinguish the actual real in nature and in the realm of reality versus the artificial and constructural that exists in the realm of perception and people cannot seem to understand the distinction that i make between those two very important and completely different dynamics in our reality our goal our work should be as individuals to become so aware and enlightened that we have aligned our perception as much of the time as we are capable of doing it while in the flesh suit called a human body to the actual objective inherent truth of reality and not just talk about individuated perceptions of reality one is real that's the alignment with truth the other is constructural and depends upon independent human perception of a thing people really have to understand that all important distinguishment that i have been trying to establish here from day one and that's the difference between the inherent objective laws of morality which are god's laws natural law versus the independent perception of morality that people think that they have and are not doing the work to actually align their perception to the objective that's called moral relativism moral relativity okay so great caller thank you saheed let's um let's continue on let's go to let's go to spirit world spirit world you are live on what on earth is happening welcome to the show all right i'm i i'm gonna stop you for one moment we're still having a problem with audio coming through so what i'm gonna ask my what i'm gonna ask my producer to do is um just uh set the source where the callers are coming in from to none or something else just if you set it to none and then set the source where the callers are coming into back to the original note the original position in the production software set it back to none and then set it back to the original source and let's see if that clears it up in the source column please all right say something please no still not working all right it will it will be on the laptop source i'd rather try to clear it up because the rest of the listen listening audience is not going to be able to hear your call and i'm not really sure what is doing this this is why we have to get off of discord it's proving not to be a reliable um place for taking calls unfortunately i think there's too many features that are sort of still in their infancy or beta aspects and it's uh something that does what i want for free but um it's also something that uh is presenting some problems for us so um let me uh let um just uh if you uh go over to the uh left hand where sources are at just take your time okay we'll get it done and find where my laptop is at okay now i want you to set the source back to nothing under where it says source once you've identified my laptop in the source let's do that let me know when that's done i may have to control it remotely let me see if i can do this all right so give me a moment folks i'm going to try to do this on the fly i apologize for this i'll try to keep going as i do this so um i'm going to just connect to the production machine locally from my own laptop and try to see if i can resolve this from there tech issues are going to happen and unfortunately it's very difficult when they do happen on a call-in show because when they happen on a call-in show what happens is i haven't really prepared material past like where i'm at i could like break something else open and just you know do a different presentation but what happens is um when something like this happens during a call-in show what occurs is either we fix the problem live on the fly or um the uh the the show kind of you know goes into a tailspin because we can't hear the callers live on the air i could take a call where you're going to have to just very briefly get to the actual question and then i'll repeat it and answer it off the air and we'll take more calls that way and that may be what we have to do because it looks like uh this may be an internal issue that i am not going to be able to resolve do me a favor mute my mic for a moment okay let me know when my microphone is muted because i want to tell you something off the air okay okay no problem all right i'm gonna give this another shot folks so we can actually hear your calls live hey if uh if it doesn't work i'll just go off on some other you know rant tirade or some other material that i can talk about on the fly so just i think it's worth a couple of minutes that it might take to just get it corrected so let me just try that first and uh if not we'll do something else okay yeah it's everything is is against me today because i can't i can't scroll do me a favor scroll the left-hand column please i can't seem to scroll in the interface let me just come over there okay if the caller can just say something i want to see if this corrects it yeah we're still not getting you through so i'm going to disconnect from here let's see if it reconnects oh i hear you perfectly the issue is not local so uh what the caller is saying is that the uh the recent shooting in texas i believe happened on eight three or was this a different one right yeah i mean that's definitely some interesting symbology uh you know a lot of yeah there's there's a lot of interesting symbology that happens on dates when false flags occur no doubt about it because these people are all about symbolism they are all about habit repetition they want to throw up into our faces just how much they are not only in control but how much that they can put the symbolism of their belief system into our face and yet the average everyday person is incapable of seeing it they want that done on a perpetual basis okay they you know absolutely want to kind of tantalize and mock the bulk of humanity while they're actually ruling them and doing things to destroy their rights and their freedoms the whole time they want to mock their ignorance of their master's belief system because the average everyday person knows nothing of any of this they know nothing about how the real rulers of our society are dark occultists you know they think it's all just you know financial and political power that these people are looking for when they don't understand that it's control over the soul it's the actual destruction of the human soul that they want and that's what they have largely accomplished all you have to do is go and look at how soul dead the vast majority of all of secular society is these people have no spirituality at all they're obsessed with minutia they're obsessed with people are obsessed with like whether their car is parked out in front of their home that's what they're worried about they're obsessed with little rules and regulations they want to have little petty power they want to be petty tyrants over other people you know that's what they're worried about as opposed to whether people are free or not they don't care about whether they're losing their rights you know this is how ignorant and bull-headedly stubborn most people are you know they'll get all upset when their football team loses or because they ran out of beer in their fridge but you know they won't get upset when their freedom of speech is being destroyed you know just because they don't care about who it's being taken from first oh they'll get my freedom of speech last they'll take people i don't agree with first yeah and you think that that makes it okay so i apologize for the tech problems folks but you know until we can figure out something better than discord to take calls on and people have a million different suggestions but you know no system really does it well you know skype you can't use because they don't really allow groups and allow you to just put everybody on the group on hold you know until i take one if it did if that had that feature i would probably use it you know i don't want crosstalk in the form of chat or people talking to each other i want them just listening to my voice in the server until i call on them waiting in a call-in room you know anybody has software that can do that reliably and not as you know totally uh messed up as discord seems to do it um i like discord's feature set but i'm not impressed with its stability so you know but you get what you pay for as they say and uh you know this is uh open source software uh i don't know whether it's total open source but it's uh it's free software as in gratis so um again the uh the people who all are i should do a whole show on this or a small spiel on this is that you see free and and uh open source software unfortunately sucks most of the time you know i've talked about it before but the developers don't have their act together very few developers do and unless it's somebody being driven by high level profit motive on a big team of some you know soulless corporation most people don't want to put the work in to actually develop something correctly and it's a sad thing i want to support free and open software but at the same time almost invariably i end up using proprietary closed software because it's better it's does the fucking job better you know i mean i'd like to hear from some developers about that because it's unfortunately true and you can't get people motivated to actually be a part of a software team that makes great free open source software there's tons of bugs in it they don't really add or listen to many feature requests it doesn't have the capabilities that proprietary software often does of the same caliber and honestly it's just there's it's full of bugs you know it's not as reliable when you pay five six seven eight hundred a thousand two five thousand dollars for software you usually get what you pay for you usually get high quality top-notch software developed by a legitimate software development team that has the bugs worked out and i wish it weren't so i wish that money weren't the only motivator for society i wish that the improvement of our society doing the right thing and improving ourselves in our society we're the motivator but hey this is where you could also see where the real motivating factors of a society are and why we're fucked why we're fucked in the way that we are why we're losing our freedom you know it's all part of it it's all part of it you know and that's just one of the dynamics as it plays out that you know shows us where we're at you know like the tarot does all right let's uh let's try another caller uh see what happens so let's go to oscar oscar you're live on what on earth is happening neither one of us have him though all right let's try someone else uh let's go to loquito loquito you're live on what on earth is happening welcome yeah all right yeah i'm gonna we don't have your audio coming through the stream unfortunately so i'm just going to ask you to very briefly ask a question let me repeat it and then answer it or make a comment very very briefly so that i can repeat it but we want to try not to leave a whole lot of silence so go ahead okay no worries all right so i'm gonna take uh the call of face next face you're live on what on earth is happening let's briefly go to a comment or question and i'll repeat it sure okay so there he's saying there are only two tarot cards that have the infinity sign on them and they are yes the the strength card and the magician card or in other words courage and self-mastery okay so absolutely such important cards that they actually put the idea that once you develop this you're not going to lose it see it's it's the idea that this is something that will go on and on and on not only in your own lifetime but perhaps carry over to future lifetimes okay so the idea is you have to work on those aspects the internal aspect of courage is what really sets us off onto a path of self mastery once we develop the desire to learn no know and to grow and then we come to the courage card okay so um that is the base of the uh the pillar of uh of um severity which means internal self-work that eventually leads to self-mastery everything that goes against our self-work is a form of the failure of courage so people not wanting to know that's a failure of courage people not wanting to do something in the world that's a form of the failure of courage this is one of the reasons that a lot of tarot decks have that reversal of the 8 and 11 cards which i highly recommend is very bad news you don't want to reverse those because that takes natural law down from the top of the position of the macro cosmic tree of life but i understand why they think that that card is that important because if you don't have that courage self-worth doesn't really truly begin and then of course the other card is self-mastery it's like once you really achieve that how can it be undone how could you go backwards you don't it keeps going and going and going it's it's sort of the gift that infinitely gives once you achieve that that is something that has been done yes there will be new challenges but once you achieve that understanding of self you will have it with you forever so that's why it's so important to get off the floor of the house get into a place of wanting to improve and then start to work upon your courage this is why so few people are doing the great work you know i mean great question face your great um um you know um uh analysis of those cards and and thank you for bringing it to our attention but the whole the whole point here is this is why so much of the great work is not done because people are cowards and are have not developed true internal courage you know how many people know and stay silent i'll guarantee you so many more people that we are aware of actually know this stuff and you know what they do and say absolutely nothing because they're cowards deep in their hearts and in their souls they haven't developed that all-important aspect of courage you know so let this is month eight we're in august right now okay this is leo time of the year okay the the card is card eight we're talking about the importance of courage as relation in relation to developing the self right let's let this month be about self work regarding courage which isn't demolishing all fear it's not about never having any internal fear that courage is an internal quality because what it's teaching you is develop yourself and do the work in spite of anything fearful you may be feeling internally you know that's what real courage is about and most people don't want to do that they want to stay silent they want to stay you know huddled under the staircase in the in the palace of the self and it's one of the worst places to be because that fear will destroy you and it will put you in a place where you never really start doing the true great work and that's why so few people will even make youtube with their face on it their real name and and talk about something real very few people will do it you know they won't put themselves out there they won't put any skin in the game you know they want to hide i want to hide i don't want to use my real name i don't want to put my face up there you know it ain't about your privacy it's about because you're a fucking coward that's all you haven't developed the ability to say i don't give a fuck who knows me who sees my real name who sees my face who hears what i'm talking about i'm saying it because it's true how many people have that courage a piss ant handful is the answer and am i angry about it yeah you're damn right because that's why we're enslaved still you and i are enslaved because of so few people that will speak out put their name on something and say i'm not afraid of whatever anybody's going to do to me i'm going to speak the truth and put it out there in the world for other people's consideration and learning and growth and my humblest thanks to the people who do do that you're my peers and my brothers and sisters in this war okay so great call thank you to face let's see who else we have let's go to maven maven you're live on what on earth is happening and because we're not hearing callers this week unfortunately i'm just going to ask you to briefly get to your comment or question let me repeat it and then answer it when you're off air are you with us yes i can i can hear you loud and clear unfortunately we're still not getting a connection out to the stream through discord for some strange reason but it's no worries just uh get you know just hit me with your comment or question and then i'll repeat uh on the stream yes no worries okay thank you the caller is telling me that he's calling from israel and there's not many people who know my work uh in his area near in israel uh which is unfortunate but um do you have a comment or a question regarding the material or do you just want to make any general comment yeah i'm not sure i'm so i'm sorry i you you were accidentally muted there so just repeat that one more time yes i can sure so maven saying that he is trying to promote my work of natural law in israel i thank you for that and he wants to go ahead and make a comment so go ahead yes i will take i will take a look at them because i do look at stuff like that so um what what he's saying is that he's trying to do natural law by making uh videos on youtube and then uh spreading them and he sent me a few to look at to get my take on them so i i tell people just go right ahead and do this type of stuff because that's what is needed you know this is what we need is more boots on the ground we need more people who are actually doing the great work don't just look at mark pascio videos okay look at my stuff until you understand what the great work is to do and then do it okay this is what we need way more people doing okay so you know thank you very much maven for doing that so let's uh let's go on to someone else and uh let's hear from justice 11 justice 11 you are live on what on earth is happening welcome to the show yes yes i can so i'm going to ask again just get quickly to your question or comment see i think it's very possible so i i can hear him and he can't hear me i think it's quite possible that we may have hacker or hackers in the discord server that know how to somehow target the server and cut out audio from the server end i don't think there's enough security within discord and that's why i think we just have to implement our own system like we have implemented you know our own video system uh streaming system so um you know i'm gonna just say probably it's probably just a bad idea to continue with calls that's going to interrupt the flow of the show what i want to do is go back to talking about moral relativism in our society so i'm quitting discord and calls are canceled for today maybe we could you know do a whole call-in show at some point on the topic of of tarot but i'm not going to fight something that wants to you know uh basically take me off course for what i'm doing on the show so we have like 40 minutes left in the show so i'm just gonna get into uh moral relativism okay and i'm going to talk about that one of the worst places that i see moral relativism is in the freedom movement and i want to talk about why that is okay and i apologize to the callers in the discord room that are you know were holding on to call um essentially it's a house of cards honestly you know i like the idea of discord but the developers just you're not good enough that's all it really comes down to okay you're not rock solid enough in what you've done with putting an app together there and it's just a house of cards that's it and i wish i could say better and give you better comments and feedback but in all honesty it's kind of been a nightmare using it and i want to get away from it that's the honest answer so you know we're gonna have to try to build something that works much more reliably than discord because it's not doing its job okay so maybe i should steer away from call-in shows and don't even worry about making slides and just come on and fucking rant about things like moral relativism and the so-called freedom movement okay because this is the kind of stuff that's absolutely annihilating human freedom and it's what i talk about in anarchy in the occult part one and two all right so and you still have absolutely no nothing morons out there in our society that want to insist they're going to build a world based in freedom for humanity believing what they believe and propagating it like they're propagating it on social media and here i'm going to just get deeply into why it is here's the real reason okay these are left-brained people who have discovered that religion worldwide any cultural religion that's operating in the world especially the big organized ones are such absolute crocs of total fucking shit garbage that they did what i did in the past they saw it for the control system that it was and they said you know what fuck this shit the answer must be it's every single thing regarding spirituality must be a big crock of shit just like this religion is that they're trying to sell me on as a control system so what did they do they turned around 180 degrees they were heading this way they turned around 180 degrees and they said i'm gonna go 180 degrees in this direction and you know what whose arms they ran into they ran into the same people that invented the religious cult belief systems that they saw as a total croc of bullshit because they're over on here over here at this extremity of the dialectic and they're over here at this extremity of the dialectic okay over here they're called the dark occultists who are behind the scenes of organized religion and who run all of the higher level elitist established world religious leaders and then when these people saw this is a big crock of shit they turned around they went this way and they said i'm now an atheist i'm a scientific materialistic atheist and then they ran headlong into the same people who control the dialectic from the other end that's exactly what they did so they said fuck all spirituality okay fuck the idea of any higher power in creation that sets law into effect in the universe regarding behavior not just physical matter and they ran in the other direction into the other set up dialectic that was set up for that purpose if you don't get caught in this net you're going to go over here and get caught in this net and they're too stupid to say it quite frankly you are too stupid to see it left-brained jackass materialist newtonian physics and and dynamics people who think that's all there is when you you your that scientific paradigm has been proven wrong for over a hundred years and you're not privy to the new science that proved it incorrect you don't want to look at any of the new science that has proven consciousness is real and the ultimate factor in everything and that doesn't mean it's just when we can make reality whatever we feel like making it by just changing how you know how we look at it like the like the whole kind of double slit experiment it doesn't mean that at a macro level okay so at a micro level you can say that observation changes the actual effect that we witness and a part a wave can become a particle based on observation but that's just talking about aligning our perception to the reality at a macro level it doesn't mean you just say oh i think that the universe is a wonderful place and it magically be that the earth is a wonderful place and it magically becomes that action is required there are requirements for changing our actual manifested reality and that requirement is aligning our perception of objective morality to the truth of objective morality it means knowing there's an objective difference between right and wrong in creation that was put there by the creator of the universe which is not you which is not human beings which is not any man or anything that they can do and you don't have to look at that religiously i don't understand why it's so hard to get out of this dialectic of religion versus atheism both of them are wrong both of them are incorrect one's a right-form brain right brain form of imbalance and one's a left brain form of imbalance you're not at a place of mental and spiritual balance when you believe in either of those religions the the cultural world religions of whatever relig bullshit religion you believe in whether it be christianity judaism islam hinduism taoism any of it it's all religious croc of shit that doesn't go all the way to understand true natural law and then atheism is another religion that's the catch-all religion to catch all the people that don't go into this big net over here why are these infantile fucking babies so hard-headed so thick skulled and imbalanced in their mental makeup that you can't understand these dialectics were set up for you by social engineers that existed thousands of years before your fucking birth why because your ego is in the way you can't admit you are duped you can't admit that you're wrong and that you are governed by natural law you're not god you're not the creator of the laws of reality and that is not a religious statement there is nothing religious in the understanding of natural law it is not a belief system or a religion never has been never will be you can say it's that all you want and will never fucking make it true fucked hearts out there who insist that's what it is because that's what you are you're people who think you're god and think that man is god that's what you think and that you can make up what right and wrong are there subjective opinions and then but see i don't even care go and think that don't think that you can think that way and be free freedom true freedom is hinged upon whether our behavior conforms to whether to whether we are harming or not harming other sentient beings meaning whether the behavior is moral or immoral that's what freedom hinges and depends upon a society who doesn't bring its objective behavior into alignment with objective morality can never create true freedom in their society and that's what you're insisting can be done you insist absolutely insist that real freedom can be created while in a state of moral relativism so as a matter of fact let's go to aquinas on liberty i'm going to read it that's what we can do so give me a moment i'll pull it up since i wasn't prepared to go right into this just give me a moment to pull it up and you know this is what we'll have to deal with folks when there's an issue because i don't set up alternative stuff i don't set up alternative host guests and things like that people to bring on okay i i am basically doing the show on the fly i probably should set up some type of an alternative broadcast if tech problems occur but i haven't done that today so it'll be what it is you know all right all right i found that i'm bringing it up and i'm going to ask you to cut over to it momentarily all right cut over to it uh sorry now see yeah we have bad problems here because um this is completely frozen and now i can't even bring the essay up so let's try this one more time hold on i'll tell you when so what's going to have to happen is we have to find you we have to find where this cable is plugged in and we're going to have to detach it and reattach it that try it one more time to go back full screen yeah we're stuck so yeah don't leave that out so uh trace this cable and then attach uh de-attach it from the source and then reattach it from the source so at this point i can't even show anybody what i have on my laptop screen because we have a complete disconnect first in audio now and video from what is displayed on the laptop so i'll just start and when my producer can get that straightened out will will switch over to my laptop but this is the aquinas on liberty essay as long as we abide in partial darkness we will continue to be conquered so this is what the freedom movement thinks that we can do the freedom movement thinks you can stay at a place of total unconsciousness regarding how the laws of freedom work i think you might have it there okay and um and somehow magically no i'd switch it from the source again where the laptop source is at try that the freedom the bulk of the freedom community so that that switched it here so now switch it in software if you switch it in software next i think that'll correct it will at least be able to get this on the screen it looks like it went back so cut it to none then back to the original note the original just cut it back over yeah just close that whatever that is and then cut it back over to the original i mean to the laptop let's see if it's all up no so what you have to do is go to where it says laptop in the source and then change that to none note where it's at and then change it back to where it was originally at all right so i'm not going to continue to try to get into that let's just um continue with the essay the freedom movement believes that it can continue to exist in a state of spiritual unconsciousness because they don't think there is any they're atheists who believe that there's no such thing as consciousness and spirituality this is what's killing the freedom movement atheists are killing the freedom movement and i've told you i'm going to get harder and harder core on atheists because your unteachable fucktards is what you are okay let's just get hardcore in your fucking face about it all right that's what you are you think freedom is going to be generated somehow accidentally by the will of man who thinks that he can determine what right and wrong is for himself you believe that shit and i'm trying to explain to you you will be forever fucking enslaved with that mindset you cannot be anything but forever enslaved by that mindset atheists are destroying the freedom movement you're sending it backwards you left brain imbalanced fucktards okay right and wrong is not determined by human beings it is objective based upon the behavior and whether it causes harm or not in the objective reality in which we live called the physical domain and this is what people will not tell these people you want to be all soft and dance around they're bullshit and you won't get up in their face and say no you're not the arbiter of truth and right and wrong that's the whole idea this is what christians don't understand you're so fucked up with your religion you don't even understand what your allegories mean in christianity the idea of to eat of the knowledge of the tree the to eat of the fruit of the tree of the knowledge of good and evil is an allegory it doesn't mean to go pick a fucking fruit off a tree dunce it means you shall not be the arbiter of what is right and wrong for yourself that is god's fucking tree that's the creator the lawmakers tree don't eat of it but to eat of that fruit means to become the arbiter of what is right and what is wrong the knowledge of good and evil it doesn't mean that you just disobeyed an order not to pick fruit off of a tree you think that's what this allegory fucking means imbecile it means don't become the arbitrator of the knowledge and of good and evil to eat of that fruit that's what it means and jerk-off christians don't understand that because they don't know natural law you've been convinced they've been convinced that the seven deadly sins of pride gluttony sloth lust anger jealousy and greed are the real deadly sins when they are vices at best i agree laziness is definitely one of the true sins of consciousness when we don't act once we have right knowledge pride gluttony sloth you know these are all things that are though internal failings or vices the real seven deadly sins are the transgressions against natural law murder assault rape theft trespass coercion and willfully lying to hold the truth back from somebody coercion to rob them of their free will choice which is the gift of the creator of the universe and not for anyone to steal through coercion and the slavery of man's law continuing with this essay if we looked very closely at the idea of liberty we would discover that there is a radical distinction between true human liberty and liberty falsely so there's a real form of freedom and then there's something that fucking morons think of as freedom that has absolutely nothing to do with real freedom this is what he's saying indeed liberty falsely so-called is that same liberty which the new world order qualifies as quote the bait and switch i'm sorry the bait of an idea to attract the masses of the people to one's party for the purpose of crushing another who is in authority in other words divide and conquer hegelian dialectic controlled opposition they want you to think of their brand of freedom as being the answer so that they can conquer another party's brand of freedom their version of freedom that that other idiots think is the answer when neither one of them is the path to freedom and as an idea of freedom which is really an infection and as a slackening of the reins of government it's not only an infection it's the virus it's a mind virus this false notion of freedom and you know what there's a huge false notion of freedom going around in the freedom movement there's a couple of them there's one to think things to freedom means no rules because they say oh that was in that if you read go further into the comments on that assininity parade on the free thought community project comments on that that guy's uh quote about a comma a post about morality they go into that you know they go into oh well who would make the rules in a society that has rules in it um the universe god nature natural law not man the higher power that ultimately put those laws of the behavioral consequences in effect just like it put all the physical laws into effect and you're not that force that's who puts rules into effect there are always rules under natural law when we're talking about rules not rulers we're talking about natural law those are the only rules in effect where does the idea of false liberty come from what is false liberty what is true liberty knowledge of the correct answers to these questions is still lacking in the bulk of the so-called patriot movement and to the degree that it is lacking so is integral unity and true power to overcome the menace to our freedom you hear what this individual is saying understand it until the patriot movement unifies itself under true philosophical principles it will win only apparent victories while the satanic new world order continues its long march to global domination and let me tell you something folks this person posted this essay long before i did my natural law seminar and long before i even did my smaller presentation audio presentation with slides that i posted to what on earth is happening audio podcast so this person understood natural law before i delved into it on the show which shows that he's probably an occultist who knows the real deal about how the law of freedom works true liberty is the highest of natural endowments an endowment is a birthright given to us by the creator of the universe that each unnatural endowment comes from nature or god and again you know what folks i'm going to start using the word god a lot more because i want to piss off the atheists because you're in your total imbeciles and you're destroying your freedom and ours because you refuse to acknowledge that a higher power than you exists in creation and that you are not the lawmaker and man is not the lawmaker that's why we're in enslaved that's why we're in a situation of total slavery and for as long as you continue to think that way and the bulk of society continues to think that way human beings in the aggregate as a society will remain slaves get over it crying your fucking milk about it nothing you do or say will ever make it untrue so you can fucking do whatever say whatever you want about me and my attitude about it it will still remain the truth it has nothing to do with that i said it i am one of the few who has discovered the truth regarding this dynamic there's nothing special about me because i did the only thing that makes me anything special is i'm not as fucking retarded as the people that refuse to understand it true liberty is the portion only of intellectual or rational natures and it confers on man this dignity that he is in the hands of his counsel and has power over his actions but the manner in which such dignity is exercises of the greatest moment inasmuch as on the use that is made of liberty the highest good and greatest evil alike depend man indeed is free to obey his reason to seek moral good and to strive unswervingly after his last end that is free will yet he is free also to turn aside to all other things and in pursuing the empty semblance of good to disturb disturb rightful order and to fall headlong into the destruction which he has voluntarily chosen again free will you want to try one more time to go over to the laptop are we still stuck yeah we're still stuck worse though are those who promote a false and absurd notion of liberty by perverting the idea of freedom or extending it to things in respect of which man cannot rightly be regarded as free the declaration of independence states as follows we hold these truths to be self-evident that all men are created equal and it should say created equal under natural law this gives people the idea that we're all the same that they are endowed by their creator with certain unalienable rights rights which they can never be separated from that among these are life liberty and the pursuit of happiness and pursuit of happiness should have been property life liberty and property because all rights are property rights sad to say this is a very ambiguous and therefore dangerous proposition and as it is subject to any number of conflicting interpretations indeed the proof of its weakness is the young age of the total collapse of the american republic obvious obviously that clause has not been interpreted properly if it had been we would not have devolved into barbarity in less than 250 years it can be argued that the american republic was built on free masonic sand and it was and thus if we are going to rebuild it we might want to re-codify our foundational principles yeah and bring them into alarming with into harmony with true natural law true esoteric free masonic true esoteric christian true esoteric rosicrucian true esoteric kabbalistic teachings not bullshit degraded teachings of any religion occult order mystery tradition etc in order for america to throw off its internationalist the pressure oppressors or the globalists a proper understanding of natural human liberty in the minds and hearts of the american people is indispensably necessary for we that have the people have been brought low in our consciousness and have been rendered soft and vulnerable as the direct result of having imbibed them believed in a false notion of liberty and the pursuit of happiness an erroneous pursuit of happiness as a natural endowment given to human nature by god the omnipotent creator of the universe liberty must exist for an end or ultimate purpose yeah that is evolution the progression in consciousness of all life and thus this end must be identical to the essential determination and composition of human nature which is rational for example intellectual and volitional voluntary the end or object of both the rational will and of liberty is that good is that good only which is in conformity with reason the the atheists they think they have reason they think they have true intellectual capacity you're dumb little boys you're dumb little girls you don't have true reason you don't have true reason in hand if you did you would understand where true freedom comes from and you don't not even a little bit you're not as smart as you think you are punk boy punk bitch you're not as intelligent as you think you are just because you've rejected the idea of a higher power actually it it's made you totally fucking stupid and it's made you contribute satanically with your satanic masters to the destruction of human freedom and i'm a little upset about that because you're destroying my freedom in the process and you're making me have to stay in this shithole longer than i have to called earth called the prison called earth for the proper object okay so so sorry hold on liberty belongs only to those who have the gift of reason or intelligence this is what i've said repeatedly about natural law it applies to beings with the capacity for true holistic intelligence not to the animal kingdom the lower animal kingdom lower than human beings continuing animals do not possess liberty considered as to its nature it is the faculty of choosing means fitted for the end proposed they don't have liberty in the sense that we could acquire it because they don't have the intellectual and moral capacity that human beings do they should however be free not to be accosted and have their lives taken from them without right because they own their lives i'll add that considered as to its true nature it is the faculty of choosing means fitted for the end proposed in other words align what you're going to do with what you say you want that's what that means for he is master of his actions who can choose one thing out of many freedom of choice there is therefore the essential property of the human will that's right free will that's why it's called free will but the will cannot proceed to act until it is enlightened by intellectual knowledge this is called conscience knowing the objective difference between right and wrong behavior is the intellectual knowledge of conscience con science to know together all together to know what the actual objective difference between right behavior and wrong behavior actually is and that it is objective not subjective not prone to the interpretation of our will whims wishes desires etc for the proper object of the will is the good this is what it means to love under will nothing can be desired by the will unless it is judged by the intellect who be a good thus in all voluntary acts choice is subsequent to an intellectual judgment that something is good or desirable meaning we have to understand what is good meaning freedom is good and slavery is bad right behavior is good and wrong behavior is bad because one creates freedom and one creates enslavement and those are objective principles that exist in nature and we can only discover them and align our behavior to them or not the will is referred to as the repetitive power of the soul or the rational appetite like the intellect the will is a spiritual faculty again something that atheists don't understand because they've thrown the baby out with the bath water they've thrown true spirituality out with bullshit religion and think that they're so wise for having done so when they're totally fucktarded for having done so it is that power through which an individual seeks to execute an act or attain to an object proposed to it by the intellect the object of the will is always the good and even in the election of evil it must be proposed to the will under the appearance of good that's why they try to convince people who vote that they're doing good for society you can't just say well hey vote so that you bring in more totalitarian control and more government people have to be convinced that they're doing good which is proof that they're not really totally evil at their essence they've been convinced by mind control that they're doing good when in fact they're doing evil this is the job of the social engineers but don't make excuses for people that don't want to learn when the information's out there that's a willful choice not to correct that error anything chosen as a means is therefore viewed under some aspect of good goodness therefore because here's the crux of it this is the law of freedom ladies and gentlemen therefore because in all voluntary acts choice is subsequent to a judgment upon the truth of the good presented declaring to which good preference should be given it is an immutably true principle meaning unchangeable that human liberty depends entirely on intellectual judgments that conform to reason and the natural law if a judgment which does not conform to the natural law or to reason and which is therefore objectively false and immoral is acted upon by the will then it is a source of grave disorder in society exponentially multiply the number of individual immoral acts and you have a republic that collapses from moral decay in a short period of time that is the law of freedom as aggregate morality under natural law increases aggregate freedom increases and as more and more people do not understand natural law where it comes from how it functions how our free will depends upon whether our behavior is in alignment to it or not we become collectively enslaved as a society as a species continuing we have a couple minutes left hedonism or the tyranny of the passions has no place in the well-ordered man or in the well-ordered civilization unfortunately our elitist overlongs overlords have long been at dumbing us down to the level of beasts that cannot employ their natural rational endowments but can but only their carnal lusts this is the idea that this is just a society which you should just live for your base pleasures that satanism we allowed this to happen to us because we mistakenly believed in the lie that they told us namely that true liberty is the quote-unquote right to do whatever we want that is not the true will that is the false will true will our true right is to align our behavior with the moral the objective moral good of creation that means knowing which behaviors are right because they do not cause harm to other sentient beings and knowing definitively and objectively which behaviors are wrongs because they do cause harm to other sentient beings and that knowledge is unfortunately not present in the bulk of humanity and that's why we're enslaved and we are taught to believe life is all about just pleasure pursuit and doing whatever we want so he said we've mistakenly believed the lie they told us they've given us their satanic mindset that true liberty is the right to do whatever we want whenever we want as long as it is not illegal or discoverable true liberty not this false version of liberty that the satanists have told us is real liberty true natural liberty is an essential property of objective truth and morality therefore there can never be there can be no true liberty in a civilization that embraces moral relativity moral relativism can never be cannot exist and yet what i just showed you in that facebook post and asked you to read the comments not to answer the question that was posed by the original poster but to read the comments on it on my facebook shows you that even people in the freedom movement that think that they want freedom that say that they want freedom are moral relativists and can never produce that result in human society so imagine where the dumb masses of humanity's minds are actually at that's what the great work is to do to change ladies and gentlemen that's all the time that we have for this edition of what on earth is happening i apologize for the technical problems but this kind of stuff happens thank you for watching i hope you've learned a lot and we'll see you right here next week in which i'm going to go into an extended version of tesla and humanity's missing paradigm shift in consciousness ladies and gentlemen government is slavery we'll see you right here next week don't you ever don't ever you

What On Earth Is Happening Show #219

Topics: *Telsa & Humanity's Missing Paradigm Shift Revisited, Jeffrey Epstein possibly "suicided" in prison, the Government is run by Dark Occultists/Pedophile/Satanists, Pizzagate/Pedogate, Mark's upcoming appearance in "Unsustainable" documentary by James Jaeger, New Podcast Section instructions on how to view/listen and learn from the WOEIH Podcasts, Tesla's vision for the Human future powered by Free Energy, Scalar Wave Technology, Advancement and viability of Tesla Technology, the Control of Energy is the Control of Humanity, Manufactured Scarcity of energy, Scarcity-Based Mind Control, the Scarcity Energy Paradigm, Confessions of an Economic Hitman, True Unsustainability, Humanity's downward spiral spiritually, Post-Apocalyptic Cosmic Judgement is upon Human society, Lower-level thugs who take payoffs to continue corruption also keep the immoral Energy Paradigm in place, the True definition of the Paradigm Shift in Consciousness, the Consciousness that must precede Free Energy manifestation, Most people in the "Free" energy movement don't understand the "Free" part and are still Statists supporting Human Slavery, the 20 Characteristics of the True Paradigm Shift in Human Consciousness explained, the Equality of the spiritual and Physical "Domains," Release from Lower-self Identification and Attachment, Moral Relativism, the Understanding of the Human Condition as Slavery, Occulted Knowledge is for EVERYONE to understand, the Failure of the Occult Mystery Traditions to change the Human Condition of Slavery because they stayed too attached to Occult Knowledge as "reserved only for some people."*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome to the show ladies and gentlemen thank you for tuning in today is Sunday August 11th 2019 we have a great show for you here today this is episode number 219 of what on earth is happening and a little bit later on in the show I'm going to be delivering in an extended format my presentation from back at the Tesla Science Conference Tesla conference of the Tesla Science Foundation 2019 in New York City my presentation entitled Tesla and humanity's missing paradigm shift this will be a revisited version of this presentation in which I'll give it in an extended format before I do that I have several event announcement several housekeeping announcements to do so let's switch over to the laptop this is the podcast artwork for this episode looking really really great and we have a few event announcements to go through some gems just gonna jump right into that I will be speaking at the inaugural Antarctic Delphia conference hosted by the state of anarchy this will be taking place in Philadelphia September 13th 14th and 15th 2019 it's coming up in just over a month if you order at an arc adelphia calm and you put in promo code passio you'll be given 5% off your ticket sale and 5% will be matched by the state of anarchy and donated directly to what on earth is happening my main presentation will take place on Saturday September 14th and it is entitled the sacred gift of egg that's my main presentation at the at the Ann arkadelphia conference and I'm gonna be getting into how the social engineers have attempted to stunt and actually remove the emotion of anger from our human emotional makeup and why it's so necessary to maintain the ability to get angry and feel anger in our physiology and in our emotional makeup because if we don't feel that and direct it properly you know when our rights are being taken away you know when our self defense of rights are being taken away when our freedom of speech is being taken away we'll largely sit there and take it because we won't even feel an emotional and physiological response in the form of anger in the body you know and this is not something that should be purged this is something that should be felt and channeled it's a healthy emotional response when we feel it for the right reasons so that's coming up Saturday September 14th as part of an arc adelphia 2019 I will also be delivering a workshop as part of this event it is going to be happening the day after the conference on Monday September 16th from 10:00 a.m. to 5:00 p.m. this is an all-day workshop entitled teaching natural law with Mark passio this is at Papi's Italian restaurant 31:20 South 20th Street tickets are $120 to attend the all-day workshop up in the gifts area of the water earth is happening calm website if you click on gifts either the tab or the button we have some new items in there anarchy and the occult part two which I originally delivered at an arc apoco 2019 back in February is now available on the gifts area of my website in the form of DVD and flash drive so do check that out at gifts dot what on earth is happening calm also up in the gifts area we do have a new t-shirt design the new water on earth is happening t-shirt design with the new vectorized logo on the front and on the back ending slavery one mine at a time with hands breaking chains in front of the earth and the water on earth is happening website URL this shirts been selling really well you know in return for donations and I can't really be happier with the design as it came out it looks really good I actually wore this shirt which is my actual next announcement on the Infowars show this past week I was rescheduled yet again from my appearance that was scheduled to be on Monday due to the mass shootings in Texas and you know I fully understand you know that that a huge potential false flag event like that which more likely than not was a false flag you know that's going to probably be take the precedence and and take priority to be covered so I was rescheduled for Wednesday August 7th and the interview went ahead as scheduled on Wednesday August 7th and I'm very happy with how it went I think a lot of new people were turned on to the very idea of natural law and many probably had not heard about it before and our website traffic went up probably by about tenfold so you know this was actually a good thing for what on earth is happening and Alex was very gracious and cordial to me on air and he said that he wanted to actually bring me down there in studio to do a presentation you know from the Infowars studio so I'm completely down with that idea if that's going to be offered to me in the future we'll see what happens and he did say that he wanted to bring me back on so I think it was overall a very good success I'm gonna step out of the presentation for a moment switch over to my web browser because I want to show you where you can actually view that presentation we can switch back over so if you go to what on earth is happening comm and you click on the news tab or you just go down here in the latest news section and click this top item sorry about that you can go to the news section and at the top of the news section is my interview on on Infowars this past we so that's where it is at and I obviously did not place this on YouTube because of their fascist totalitarian policies regarding censorship so I did post it up on Vimeo and embedded it through there I don't anticipate that being a problem Vimeo is generally a platform that respects freedom of speech as far as I can tell if there if it does end up being a problem I'll host it right on the water earth is happening calm website itself and not bother with a video streaming service but as far as I know you know it'll be fine on Vimeo so you can play that video using the player right there on the top of the new section switching back over to the presentation slides I want to let everyone know and I informed everybody about this that well actually before I even talked about that I was gonna bring out my coming appearance in the documentary called unsustainable which is a documentary by James Yaeger of Fiat Empire Fame this is the filmmaker that made Fiat Empire he is actually from the Philadelphia area and I've been working with him and we finished recording for a Fiat for unsustainable his new documentary coming up but before I get into that because I want to show you a couple of video clips from unsustainable I want to talk about what everybody's talking about very briefly and that's the Jeffrey Epstein alleged suicide in prison while on suicide watch and um you know I can't really look first of all folks it's like not to say I told you so but I've been telling people for you know a while that he's not going to last long okay you know this is no surprise you know this is vindication actually that this whatever it ends up being whether it was an actual suicide whether it was a hit on him to stop him from talking or whether it was you know a you know covert smuggling them him out of the jail cell and replaced them with a corpse or whatever who knows okay it could be any people are speculating wildly it could be any number of things but what it really comes down to is you're not gonna see this guy in a courtroom okay bottom line and you know I said this from day one when you know he was arrested this is not going to come out you know they'll squash it somehow and you know this is not a surprise because you got to understand folks this is this is vindication to my message as far as I'm concerned since day one I've been trying to explain from day one to people out there who some of them will listen and take warning from someone who's been on the inside of this cult and some just don't want to know they don't want to learn they don't want to understand how the world really works they want to remain in their totally naive childlike mindset and not understand how things are really going in the world it's all one big cult it's all one big satanic cult ladies and gentlemen I've been explaining this to you for 12 years now okay this guy is part of the cult the police on the inside of the New York Police Department are members of this satanic cult they're gonna work with their overlords with their masters that are up higher at higher levels of the hierarchy and the satanic cult and they're gonna do whatever they're ordered to do get you know they're they're gonna take their payment you know they're gonna take their orders from their higher level commanders and they're gonna say yes sir we'll take that addition to our bank account and we'll do whatever you asked whether it's looked the other way so we can kill himself whether it's kill them ourselves or whether it's move them covertly and replace them with a body it doesn't make a difference what happened this is what I'm trying to say everybody will get caught up in all the speculation of the who and what and how you know you got to understand the why ladies and gentlemen they're not going to allow somebody who procured children for them for decades okay to go and talk to the public about what happened okay they're not good that's not going to be part of their agenda no matter how they have to institute getting him out of that position okay that's all you have to understand and what you have to understand is the cult members facilitated it and I I'm talking directly about the poll at that prison in you know institution you have to understand they're on the inside of this cult this is what people don't understand the media that is saying oh people will speculate about a conspiracy well this isn't a fucking conspiracy well if this isn't a conspiracy what is a guy who's supplying children to high level politicians first of all that's not a conspiracy and then he ends up dead in prison and you want to say too that the mainstream media has taken the position the public shouldn't think that this is part of any wider spread conspiracy are you fucking kidding me I mean just think about how ridiculous that is on its face okay it's all a part of the cult dynamic ladies and gentlemen that's all I want to re-emphasize the people and when people you know email me or text me or Facebook me and go oh my god did you see what happened this is absolutely crazy this is so alarming this is a I'm like yeah and yeah and this is what I've been trying to explain to people for like the better part of two decades of my actual life 12 years publicly okay this is no surprise no one should have ever seen this is any kind of a surprise he's a member of the one big satanic cult network that runs the world and so are the police so are the police okay they facilitated this openly with their higher level satanic network members that's what happened that's definitively what happened I'm not speculating there as said the actual methodology you could speculate all you want but that's what happened okay they're members of the same cult that this guy is a member of and if you don't think that and you don't know that you are naive fucking child that's all I have to say on the apps team situation and anybody who is awake to what's really going on regarding Satanism in this world this is no surprise none should become as no surprise whatsoever okay so one of the things I want to get into and I'm gonna I'm gonna emphasize the idea that you can't watch what on earth is happening out of order okay all right so III want to go over that for new viewers because I may have picked up some new viewers from the Infowars audience okay and again I dialed back what I am really like in person on the show for a new viewing audience okay this is a normal thing to do okay I don't want them coming in at the level of intensity that I'm at right now I want to slowly bring them over and up to speed because many of them are not now I'm not trying to insult them by saying I'm just saying most of them are coming from the world of politics and finance and the Mash nations that go on within those realms and many of them do not understand the world of the occult they do not understand what's really running the world they don't understand that this is a religious hierarchy that runs the world a sick twisted ancient satanic religion okay so I'm trying to bring them on board with this and to alienate them by insulting them or you know just going to intense is not going to serve a purpose for trying to bring them on board with this information and there are many will say that the people like that shouldn't be brought on board and I think that's bullshit that's elitism that this information is for everyone to understand and secondly it's the 101 of spirituality this isn't anything advanced this is spirituality true spirituality regarding natural law 101 and every human being with half of a brain in their head that's still functioning can understand this information okay now secondly I've also already said many times in the past you may not get it from me okay and that's okay people may not like my delivery style they may not not not like my personality they may not like the way that I present guess what then don't watch don't listen tune it out turn it off then it's not for you now you might hear it from someone else that'll wake you up to it in a faster way than I am able - I am here to teach the people with the will to move forward and become a teacher of natural law that's what I'm that's what my purpose is that's what I am here for that's what I've been doing since day one and nothing has changed regarding my personal agenda in regards to this information that I bring to the table okay that being said before I give that caveat even again before delivering the main bulk of the presentation today I want to talk about my appearance in unsustainable and I want to just say I think James Yeager is one of the best filmmakers in the freedom community as far as I'm concerned I mean he's made films like Fiat Empire okay he's done original intent he made corporate fascism he made cultural marxism okay he did spoiler he did good guys with guns I mean he's made some of the best documentary films of all time as far as I'm concerned so this is the screenshot of his website here I'm gonna go to his website in live time and I'm going to bring up the a couple of excerpts from the documentary that I was in so are we having an issue now okay we're good okay all right so this is James Yeager's website this is matrix entertainment okay his website is M e C films.com that's Amazon Mark II as an egg C as in cat films.com m ec films.com is his main website and you could look at all of his documentary films I mean here here's the full list Fiat Empire original intent cultural Marxism corporate fashion ISM spoilered Milan la baie midnight ride mainstream good guys with guns and now his latest offering is unsustainable all right so I'm gonna click into unsustainable actually already did the subtitle is the UN's agenda for world domination okay you can read the synopsis on this page I'm not gonna get into all of that now you can read that on your own okay that's the full description of this new film here's all the people who are actually featured in this upcoming documentary and I am down here on the list okay he has some people provisionally featured and I want to play the trailer for you so this is a few minutes long so let's get into this here we go we can now authorize corporations to take property from private individuals as long as the government can present an argument of tax revenue [Music] the globalists are added again not to rid the planet of poverty or war this time the plan is to wage war a war on humanity itself [Music] rather than pushed for sustainable energy sources like solar fusion or Tesla technology power elites at United Nations headquarters want to confiscate not only your car and single-family home they want to inventory and control all of the land water and air minerals plants and animals building projects and human beings on the planet first tonight our report on the incendiary radio host Alex Jones for years Jones has been spreading conspiracy theories in short their plan known as agenda 21 has hijacked the environmental movement and is now in the process of establishing universal zoning laws for real-estate development across the world no matter what your situation is the the environment comes in first the environment does not follow political boundaries rivers run through a whole lot of towns while Americans sleep the power elites in New York City and the DC swap jet around screaming about climate change and global warming and forget about private property ownership the globalists have the ultimate plan for that share your ownership with the states in what they call public-private partnerships they call themselves a clean local governments for sustainability we are an international they're not a local government for sustainability from the producers of good guys with guns and cultural marxism matrix entertainments present um sustainable a James Yaeger film not coming to a theater near you unfortunately the UN's plan for Humanity is coming to a neighborhood near you in fact through legal termites like Italy cogs and sustainable developments it has probably already arrived a plan to confiscate farms forests and historic properties while outlying guns single-family homes cars and even roast beef dinners a plan to dumb down and drug up your kids a plan for the destruction of national sovereignty through illegal immigration in short a plan to replace capitalism with socialism and constitutional principles with the ten planks of communism a plan to corrupt the American judicial system of the vote and use fiat currency to finance the whole agenda with ever higher debt and more nightmare taxes globalist organizations that have been established the largest of course would be the United Nations and a lot of other globalist organizations that we know of that exists the International Monetary Fund and the World Bank and all these are all subsidiaries of the United Nations some say the UN's agenda is a plan to depopulate the world by billions those remaining would be forced into smart cities and human settlements others say the forests and wilderness areas will be cleared of roads dams farms and electric grids so animals can run wild through thousand mile corridors while surveillance cameras and concentrated energy weapons keep we the people under good control we've been barred by Democrat policies from building what's called fire breaks and controlled burns yes agenda21 is not just another conspiracy theory like the theory that NAFTA will destroy the US manufacturing base it's a cancer that's already insinuated itself into every level of the US Republic while we the people have been eating bread and watching circuses on the globalists media propaganda machine from the producers of good guys with guns and cultural marxism matrix entertainment in association with oathkeepers present unsustainable so here's a new theory maybe it's agenda21 that's unsustainable and maybe it's time Americans find out what they can do about it unsustainable the UN's agenda for global domination [Music] all right folks so that is James Eagles new documentary film that I am going to be a part of and I'm really honored that he invited me to take part in this new documentary that he's making and I went and filmed my parts a couple of weeks back and he has put some excerpts from some of the people that will actually be appearing in the film one of them is Nick long char from the Tesla Science Foundation you could check that out on the excerpts section of this page but he did put an excerpt of me up so I'm gonna play that now for everyone to check out as well I believe this is the question he asked me on the right to keep and bear arms here we go the right to keep and bear arms is one of the two foundational pillars of enlightenment that is how important the right to keep and bear arms is the self it is part of the self-defense principle the first principle of higher consciousness or enlightenment is the non-aggression principle which essentially states that a sentient being should not initiate harm to another sentient being do not do a behavior that initiates harmful result toward another being the self-defense principle states that if harmful action is being initiated against you by another being that you always inherently maintain the right to stop that other being from conducting that behavior by whatever amount of force is required to do so so that's the right to self-defense so the self-defense principle and the non-aggression principle always have to go hand-in-hand if we're going to be building a free society so the right to keep and bear arms is you have the right to defend yourself and your rights and your property against attack from someone else with whatever type of weaponry is required to do so and it's so important because if you remove that right from any human being they are at the mercy of whoever is willing to come and attempt to take their rights from them and there's lots of people in that type of a negative and down a fallen consciousness okay so that's why you always have to maintain the right of self-defense and the Second Amendment was put in place to essentially keep that natural right in place and tell people that it should never be infringed upon no matter what all right so that's one of the excerpts of me from the film unsustainable which is going to be coming out fairly soon I think James said it's all within a few months hopefully so be on the lookout for that and you could check out James's main website em ec films.com so you know I think that's a good lead-in to the whole Tesla presentation that I'm going to give on the air today and you know people have to understand that you know this cult that runs the world runs it on energy okay energy is the main thing that everybody needs in one form or another after all we are all energy okay and the world is energy and the main thing to keep in mind when it comes to what I'm gonna do here today and and a film like unsustainable is that the control of energy is the control of human beings and it's not it doesn't belong to anybody to control this is a birthright of human beings living upon the earth you know to control the energy that people need for their survival on a day-to-day basis is a form of slavery and that's why they keep going with their you know agendas to put us all in controlled areas okay under the idea of sustainability which it is not okay constantly trying to push the arvin agenda you know which isn't what's driving climate change it's the Sun doing that as I've talked about it had innumerable amount of times this is a total lack of an understanding of real science on the part of most people in the world that don't understand that solar cycles drive climate change on the planet and always have for millions and millions of years and they rely on the public's ignorant in these regards okay they rely on people not knowing about Nikola Tesla as a scientist and an inventor you know I still have people in the so-called freedom movement or people who think they just know a lot about science constantly saying Tesla was a charlatan you know oh and you know when he was asked to really demonstrate how this would work you know he couldn't prove it okay Tesla himself backed off of his projects because he knew he was in a nest of vipers and didn't want to give potentially destructive technology to deliver it into the hands of satanic Psychopaths okay he may have seen that too late but he saw it eventually and this is one of Nick launched are from the Tesla Science Foundation's main theories is that Tesla himself backed off of some of his biggest projects like what he was planning at Wardenclyffe at Shoreham Long Island New York because he recognized that this could be weaponized and then if one country gained you know total control of the technology they could terrorize the rest of the world with it and I think really the two countries that have largely seized control of Tesla technology is the United States and Russia there are others that probably have some prototypes of it but I guarantee you that the United States and Russia have working Tesla technology working scalar beam weaponry action at a distance scale or interferometry weaponry without any doubt in my mind and again I've told people you got to look into the work of Thomas Bearden most people won't sit through his presentations because its technical okay you got to look into the work of Thomas of a loan you know you got to look into people who really understand a lot of the science of zero-point energy and scalar technology and this is what Tesla was working with you got to get Tesla's own notes to understand you got to get his laboratory notes and some of them are only available in Serbian and need to be translated probably less than a tenth of his notes have actually really been translated out of Serbian okay so this is another thing a part of the work that has to be done for us to really understand what Tesla understood you know largely people over in Europe and you know Serbia are doing the work of picking apart Tesla's work because obviously he was Serbian and he's a hero to them but you know we need a lot more worldwide translations of Tesla's work okay and so before I get into this I just want to reiterate one more time that what on earth is happening is a tapestry okay you can't just come in and start listening at the most recent episodes what I finally did as a matter of fact I'm gonna step out of the presentation and show this to you on the water on earth is happening calm website because I think this is very important okay let's move back over to the laptop and I want everybody to look at the podcast section because I've added a paragraph disclaimer a caveat at the top of the podcast section okay I'm gonna read it here for everybody today it says episodes of the what on earth is happening podcasts are listed here in reverse chronological order newest first if you are a new viewer or listener you should not start with the most recent episode since newer episodes build upon material that is covered in previous episodes you should start with episode number one and work through the podcasts in order at your own pace you should not skip around and if you are new you shouldn't start listening at episode 219 okay or episode 218 which is the most recent up in the podcast section okay click this link right here that says start with up as so number one see this link okay you're gonna click that and I finally figured out a way to create a section where the podcasts are listed in order from number one forward very proud of myself that I figured out how to do this with my content management system finally but I got it done and there it is okay so you can click that link and now you can listen to the shows in order it without having to go back and let you know go scroll to the bottom of the page and go go up okay so that's great for new listeners and viewers okay because it's something that I've been saying over and over again week after week and I'm gonna keep saying it you have to listen to what on earth is happening in order at your own pace don't skip around start with podcast episode number one and then when you're finished that episode move to number two when you're finished that episode move to number three if you do that and you stay in order at your own pace you will get the maximum benefit from all of the years of content that I have been delivering through this show what on earth is happening okay you will get the maximum value out of it if you do it that way if you don't do it that way you know your I don't know what to tell you I've been trying to explain to people this is the way it has to be done for years now okay if you want to skip around or you want to start listening from the end it's like reading the end of a book and having no frame of reference and what happened in the beginning of the book so if you if you want to insist them on banging your head against you know a solid concrete wall go right ahead okay and don't take my advice what on earth is happening is a tapestry and it has to be viewed in order for it to make sense okay I don't know how else how more plainly I could possibly put it but there you have it okay so let's jump back over into the presentation slides and let's start the main presentation for today's show which is entitled Tesla and humanity's missing paradigm shift so I originally gave this presentation at the Nikola Tesla conference hosted by the Tesla Science Foundation you could check out their website at Tesla Science Foundation org okay and this is headed by nick launched our my friend who invited me to speak at this year's tesla conference i took him up on that offer this would this took place at The New Yorker Hotel in New York City on January 12 2000 19 so I only had 15 minutes really to deliver this presentation I went slightly over I think I delivered it in about 20 minutes but still that is not enough time to go through the details on a presentation like this so I figured today would be a great opportunity to just deliver in an extended video podcast format so that I could really unpack a lot of the concepts that I did not have a lot of time to unpack at the actual conference the conference was very well attended a lot of other great speakers a lot of people came out Nick actually said to me Nick filmed his parts at what we actually filmed our parts for unsustainable on the same day at Nick's home ok and um MIT told me that it's like I got some feedback from him from this presentation when I saw him when we went to record our parts for unsustainable and he said that so many people went up to him after the presentation and was like who is this guy like this presentation was you know outstanding like and I didn't really think I was gonna get that good of a reception because look there's a lot of people in the free energy movement that don't get what I talk about there's a lot of people just like there are in the freedom movement and in the anarchist movement that don't like me that think I'm too extreme or they misunderstand what I'm saying and they don't understand you know natural law you know and they don't want to hear it so you know I'm not very popular even in my own quote/unquote circles ok namely the freedom movement the anarchist community etc I almost see myself somewhat the same way in the free energy movement where there's a lot of people who don't want to hear what I'm laying down because it's extreme it's radical to them okay they want to just stay in the realm of science technology innovation invention etc but they don't want to really hear the real deep philosophical dynamics that are really going to lead to real change in our energy paradigm and that's what I came there to do I came there to present the underlying true streetwise spirituality that is going to have to manifest within the free energy community and this was called a paradigm shift which I'm going to talk a lot about in this presentation I don't know how many you know old school people out there remember you know listening to like alternative information back in particularly the late 90s early mid to late 90s and they talked about a lot of spiritualists in that community talked about the paradigm shift well we're gonna talk about what that meant okay and it still hasn't happened it's still not really underway okay and that's why I call it humanity's missing paradigm shift this is something that never really materialized and I'm gonna talk about why it didn't materialize and until that paradigm shift happens don't expect free energy okay don't expect suddenly the controllers of the world who are a satanic cult to suddenly say we're gonna allow people to invent free energy so that we can't control them anymore we'll just let that out we'll let it happen we'll let it manifest and let the people let our slaves have it yeah yeah I mean you actually believe that that's gonna happen without stopping this cult this worldwide cult without putting their whole system in the ground where it belongs okay I shouldn't even say in the ground that because it had pollute the earth we need to put it into oblivion into the void where it belongs okay so let's jump into this presentation and I'll explain what that paradigm shift meant why it isn't happening and what we really need to do to make it happen so people who are watching this because they're into Tesla or free energy okay and you think that this is just going to be about something I got really bad news for you guys it involves so much more than just coming up with some new invention and then oh trying to put a patent on it and giving it to Big Daddy through the patent system because that's all you're doing you know and that's how so many people in this movement they're stuck in their thinking in that regard I'm gonna get rich oh I'll help the world at the same time but I'm gonna patent this everybody's gonna have to license it from me you know you put it right into the United States patent system so they can shut it down and that's how their thinking is I'm not booked asking you to believe how it is I've talked to many of these people personally and I'm telling you that's exactly how they think and I keep trying to explain to them you don't understand what the world is boys and girls you don't understand what is running this place you haven't done your homework you may have done your homework in the fields of science and technology and invention but you haven't done your homework regarding the occult at all you haven't done your homework regarding the real geopolitical situation that humanity is unfortunately enslaved within and let me tell you something folks it's not just about politics and finance this is a cult that wants our soul that's what it is and they want to be God and you know what it's the same thing in the UFO community that the community that wants to investigate extra potential extraterrestrial intelligence you go to people at MUFON you know you go you go to people in the New Age community in the spiritualist community and you say do you know anything about the occult you know anything about Satanism do you know that this stuff is really running our world you know what dark occultism is no no or you're you're nuts man that stuff doesn't exist and then you see you're seeing stuff coming out like the epstein situation you know this is stuff like I could have told you about 15 years ago in all of its gory detail so I'm looking at this like oh yeah oh whoa a little bit of this slipped out into the mainstream media Huck because got too big for their britches this guy was a little too popular he was a little too well-known right he dealt with people who are a little bit too well-known he dealt children to people who are a little too well-known so I'm just like yeah hey this is this is business as usual and everybody's like oh what's going on they don't understand what this is they don't have no understanding of it at all they can't decode it because they don't understand what the world is they don't understand it's one big satanic cult they don't understand pizza gate look folks I'm telling you right now after I get back from you know maybe a month after this conference is done maybe less than that I'm gonna start preparing material and delivering material on this show on pizza game I think I'm gonna just to make it a multiple water on earth is happening shows I'm gonna go into what Pizza game really was and is and now Peto gained a better term for it obviously because the whole pizza gate term you know throws people off from what it's really about pedo gate is definitely a better name for it but we have to understand it grew out of what became termed on message boards as pizza gate on the internet on internet forums and it's real and you need to understand it because it all ties in so how does this relate to the free energy community in every way because as long as you guys only get small pieces of the puzzle you're not fully enlightened you're not aware of your surroundings you don't understand what's really going on in the world and then that acts back in that aspect you act like naive little children you act like I see I see people with incomplete knowledge really as a parent sees a child that you don't know what you need to know to go through the world as a grown up adult and I know it's condescending I get how condescending that sounds but it's true nonetheless okay I happen to know way more about what's really going on on this planet than most people that doesn't make me a better person to them than them but it does make me a more enlightened one because that's what enlightenment is enlightenment is not just about such as pseudo spirituality as the New Age movement wants you to believe enlightenment is about how much you really know about what's going on within yourself and around you in the world that's what enlightenment is that's what consciousness is the ability to recognize patterns and meaning with respect to those patterns within your own consciousness within your own mindset and in your environment in the world in the everyday world in which you live and the people in the free energy movement sadly have a very incomplete picture of reality in the 21st century because they don't understand what's really going on politically meaning they don't understand that the whole government system is run by a system of pedophiles and Satanists a network a hierarchical network of dark Oh cultists they don't understand the causal factors that have led to the current human condition of slavery are about natural law or about how these mind controllers and social engineers have gotten us not to understand natural law and therefore not to live according to it and therefore we are ourselves creating the system of slavery all around us because we are not living in an in a state that is in true alignment with true objective morality so back to the slides worked I'm directing this right at the free energy community the the Tesla community itself if you will okay the only people who are mad at you for speaking the truth are the people who are living a lie and sadly the free energy community is still largely living a lie because they are still ensconced in all of the mind control that the social engineers of this satanic hierarchy Network hierarchical Network have put them in into that mind-control entrainment regarding what's going on in the world especially in the realm of government and politics they don't understand what it is they don't understand that it's not anything that we should be aspiring to or trying to continue they don't understand that it's a system of slavery and they don't understand that as long as that system of slavery continues there will never be free energy in our world ever there will never be a paradigm of free energy so the free energy community the so-called free energy community needs to wake up you need to wake up and what you need to wake up to is the world of the occult you need to understand what occultism really is you need to understand that natural law stands firmly within that body of knowledge referred to as a cultism you need to understand natural law and you need to start living according to it and then propagating that message so that others may also understand that objective morality and live according to it and if you think you're gonna create free energy without that happening first you are seriously in a state of mind control regarding how reality manifests on this planet or anywhere else in the universe for that matter so moving forward tesla envisioned a world powered by free energy and we're not just talking about free as in gratis we mean a state of abundance where you don't have to worry about where energy is coming from or if you will have enough he wanted to tap into the endless wheel work of nature regarding how energy would be procured and distributed and this is possible Tesla showed that this was possible through the many invite through the many experiments that he performed and the notes that he took on that experimentation regarding scalar energy Tesla was very enlightened for his time although I would not say he was totally enlightened either okay he understood and did a lot of research about how this would work he himself had to get out of the many ideas of you know Darwinism was being propagated you know he had to get out of the idea of eugenics in many cases you know he had to get out of the idea that you could work with people at high-level positions of power and Finance and government and somehow they would help you to develop this he was naive in some instances about just how evil some of the people around him that he decided to work with to advance some of his technologies were now this definitely at least put him out into the limelight and put him out into the public helped him become known as an inventor and helped him propagate some of his ideas that were more advanced but I think Tesla eventually started to realize what the world is a little bit later in his life and he started to recognize that these people were not going to allow this period no matter what and he recognized that he was in a den of vipers that was run by this hierarchy of occultists at the highest ends of the spectrum and I think he went into some depression at that point and he himself recognized really how bad the state of consciousness throughout the whole world was and that's when I think he started pulling back from his own perhaps more advanced technological you know directions that he wanted to take humanity in because he recognized this if this is the state of the consciousness of the world and these are the kind of psychopaths that are running the world this planet is not ready for this and that could be a very wise decision that he made he himself recognized that his technology could God could not be put in front that true freedom had to be put to the forefront it's it's a you know a cart before the horse as I like to describe it situation you know and Tesla technology is should be in in the back in the cart and the thing the horse driving it into our society should be true freedom a mentality of true human freedom and the manifestation of true human freedom then we could bring in those advanced technologies because we will have matured as a species to a place where we will not destroy ourselves with that technology we're nowhere near that point at all not even a little bit are we near the point where we're gonna have free energy technology and suddenly that's gonna free us and that's going to prevent us from destroying ourselves we haven't worked upon ourselves spiritually enough to have that eventualities to have that outcome we have to understand how things really manifest in the world this is part of truly waking up becoming truly enlightened and understanding the true laws of attraction and manifestation which is natural law you know Tesla one that a world where everything was powered by energies from the earth and the Sun and surrounding the earth you know and be able to distribute that energy effectively through the earth he was using the earth as one wire as literally a single wire system of energy distribution whereby the energy could be literally distributed created at one point on the surface and distributed to any other point on the surface through the ground through the earth and it's mantle itself literally a lot of people don't understand that about Tesla's work this was a form of standing scalar wave technology transmitted through the earth and he envisioned that it would power everything it would power our homes it would power any transportation devices including planes trains any kind of electrogravitic hovercraft even that he also worked with as prototypes he had a prototype of a electrogravitic antigravity vehicle in the year 1905 over a hundred years ago like 115 years ago 114 years ago Tesla was already working with anti-gravity transportation and had working prototypes of it and you think that they would let that out you think that they would let the public have anything like that so we could travel in three dimensions instead of the totally controlled road system powered by gasoline and the petrodollar that makes them rich richer and richer and richer by the second every single day every second of every single day on this planet good luck with that good luck with having that system in place and then saying oh yeah let's just do away with that and give them free energy technology which we can't control and we can't control their movement and the spread of free information you think you're gonna censor the world with Tesla technology powering communications good luck with that wouldn't be possible wouldn't be possible to the extent that it's possible now because the dumb public doesn't even understand something like BitTorrent folks we gotta understand BitTorrent BitTorrent is a technology that's like over it's like 20 years old and people still don't understand it they don't understand how it's uncensor ball oh they're talking about oh we're gonna regulate Bitcoin and some people in Congress who have an inkling of how BitTorrent and Bitcoin actually work technologically under the hood or like you can't there's no way you can control that you'd have to literally shut down the internet and the Internet is so integrated into the earth you literally have to destroy the planet to shut that down this is what people don't understand because they don't even understand the technologies that exist now let alone what's possible this is the other thing folks people look at this ago oh that's science fiction that's in just in the realm of the imagination no it's technologically absolutely scientifically feasible they don't they just don't know enough about how it would work because they haven't actually studied it they're using just pure speculation but they haven't actually read the works of Nikola Tesla they haven't actually read and watched the work of Thomas Bearden I have a scientific background in engineering folks but let me tell you some of the folks this is stuff that I've the best and brightest of the human world would have to come together and work upon to achieve a level of understanding of a genius like Tesla you know who comes around and into the human domain like maybe once every 500 years of mine like this I'm not trying to pretend it understand every single aspect of it the generalities of it I can see yes this could be possible this could work that's what they want to keep from everybody folks they want to keep the possibility from people of what's possible they don't even want people looking into what might be possible they want you in the mindset of that can never be stumped the imagination completely and just have you sit back never looking into any of it that's what they want that's what the social engineers 1 & 2 annek large extent that's what they have successfully accomplished you tell people about the potential for free energy technology and they're like that's a conspiracy theory pipe dream no it's actually scientifically achievable if we would get out of the entire human condition that we have trapped ourselves in because of course in a system of slavery the masters are never going to give the slaves freeing technology just think about that would would the masters of the plantations in the American South have suddenly brought semi-automatic weaponry to all of the slaves on the plantation said here you go have this of course not they wouldn't have given the highest-end military-grade technology to people who they wanted to keep as their slaves well the the masters of the earth plantation are not going to suddenly come out and give their covert occult technology that they're using to maintain their status as a breakaway civilization to their slaves and say here use this as you see fit so that we can no longer control you do you really think they're gonna be that stupid this is what the free energy community has to understand that's never going to happen you have to end the system of slavery first you have to understand that the system of slavery is in place on earth and you are slaves just as everyone else is you have to understand the reality that government is slavery or you will never manifest free energy technology you have to manifest freedom first because you have to have the freedom to invent and to experiment and to not have your inventions taken from you and and put into a covert hidden program like they always are through the patent system and through the military industrial complex system what do you think that out in our the groom Lake facility you know that they don't understand that this technology is possible technology that's a thousand years beyond this at this point they don't want it coming out because they know that the control of energy worldwide is the control of people worldwide that's why they don't want the industrialization of third world countries it isn't because it'll destroy the earth through climate change it's because they like the level of control that they can exercise over civilizations over you know subsets of civilization that are much less technologically advanced it's much easier to control the flow of information it got a little bit too hard for them here because of the internet and that's why they're doing all this censorship so you can't put the cart before the horse and think that free energy technology's going to usher in an age of true freedom it's not doesn't work that way it's the opposite way true freedom is going to usher in an era of free energy technology into the world and make the human future absolutely amazing once we free ourselves from the current human condition of government slit enslavement then we'll have free energy but not until not a second until so here's what we have today we have what's called the controlled energy paradigm if you switch back over to the main presentation thank you we have what is called a controlled energy paradigm or what I call the scarcity paradigm this is the dynamics of total scarcity of energy and getting people to believe that energy resources are completely scarce first of all it's not even true according to their model that they're trying to push on us which is the oil model that we have to get our our energy from alleged dead plants called fossil fuels I mean and if you believe these things are fossil fuels you know I have some really good oceanfront property you know in the middle of Utah to sell you are in the middle of Colorado somewhere I got some great oceanfront property you know right in the middle of Wyoming you should you should ask me about it after the broadcast I'll give you a good deal you know great beaches out there you know people actually believe that oil is a fossil fuel fossils yeah I mean it's you got to look into the abiotic understanding of oil and understand this is the Earth's blood system this is the actual blood of Earth of the body of the earth and it replenishes just like when we take oil when we take blood out of the human body okay it eventually replenishes hemoglobin builds a new blood and we eventually you know if you take out a pint of blood eventually a pint of blood gets rebuilt it's the same thing with oil it will never run out unless you take too much suddenly that's the balance they want to try to strike but they will keep people on the oil paradigm forever if they can endlessly this is not a non-renewable energy resource for as long as the earth body stays alive the entity of the earth the planet itself remains alive see it's the same thing when a body dies the blood will eventually just like the rest of the body dry up and decay because there's no life within it anymore that's what happens when a planet dies it eventually breaks up and the planets sick because of what we're doing you know I don't think it's enough at this point to actually kill the planet I think the planet will produce cataclysms that will eventually kill us before it allows us to kill it as its host personally and I think you know we're well on the way to creating that scenario of the Earth Mother turning into Kali the destroyer and sending some natural cataclysms our way to shake us off her back like fleas because that's what we've become as a species it's not what we have to be it's what we've become we've allowed ourselves to become that kind of a parasite to our host planet well oil is just like blood folks it is not going to just you know run out okay it exists throughout the entire body of the planet and they'll keep us on this controlled energy paradigm for as long as they possibly can to control us so let's look at the characteristics of the scarcity paradigm of controlled energy it's polluting and unsustainable there we have the real usage of the word unsustainable as opposed to how the UN wants us to think of unsustainability well this energy paradigm truly pollutes the earth through the burning of hydrocarbon based fuel with internal combustion engines let me tell you something folks this city is just absolutely disgusting Philadelphia is just they call it Philadelphia for a reason okay I mean the amount of sludge and dust and just everything that is just sickening literally disease-causing agents that pile up in this environment and that we are breathing in on a daily basis from all the cars I can imagine New York must be even much worse we just live in a toxic sludge cloud literally because of oil and internal combustion technology internal combustion engine technology and they want to say oh they're tightening the the regulations on this there's no such thing as doing anything to solve that without getting rid of that technology and using something different I mean you look at the amount of dirt and debris and dust that piles up in our atmosphere that we are breathing and you turn on a fan for a couple of days and the blades are like practically black in this city you know and we're just breathing that shit in day after day after day and people are just fine with it like this is normal like we need these cars with these engines like there isn't there hasn't been replacement technology for over a hundred years minimally a hundred years they're that dump they're that naive that they don't understand the first thing about what we are calling free energy or even scale or energy so this is real non sustainability because you are truly polluting the earth by using this and what you're doing as far as how you're procuring it and the types of violence that that is responsible for and causing we'll talk about that in a moment but this whole paradigm of energy is based in the fear of scarcity therefore it's based in fear-based consciousness it's not based in love based consciousness it isn't based in true enlightenment true understanding true higher level consciousness it's based in total fear of running out of not having the kind of mindset that puts you roots you firmly into the reptilian part of the brain the brainstem the fight-or-flight mechanism of the mind always in fear of not having of running out that's where they want people because people embedded in a mindset of fear are easier to control and to sell your nonsense ideas to them because you put them in a state of fear it perpetuates dependency dependency on oil companies and cartels dependency on government dependency on the military violently procuring sources of oil in other countries that we have no business in maintained by violence exploitation and imperialism this entirety scarcity paradigm of controlled energy is totally maintained by violence because in order for the industrialized world to keep taking the amount of energy in the form of oil that they need to continue to survive and to propagate their system they have to engage in military violence and imperialism and exploit third world nations to take their resources out from under them whether they do that through shady and completely corrupt trade deals or whether they do that through sending the military and should those negotiations quote negotiations fail which is bribery to their highest level satanic hierarchy partners on that farm you know this farm over here says to that farm over there you're gonna deal with us and take the deal that we offer you it's an offer you can't refuse or we're going to send our military in there that's how it works folks it's just two farmers getting up in each other's face for a minute and deciding how are we going to do this are we gonna do this you know through our corrupt deals that make you sell out your own people or are we gonna send in our thugs called the military that's how it really fucking works ladies and gentlemen you know read Confessions of an economic hitman another guy who was at a level of this satanic hierarchy he didn't understand that as Satanism though John Perkins you know because they they just use pee as useful dupes they don't know he doesn't really deeply understand that it's Satanism at higher levels you know he's in the military-industrial complex arm of the negotiation with another human farmer deal okay and that's the role that he played and he wrote great books exposing how it works but guess what it goes to a much higher level mat into the priests class into the social engineering priests class that were where the Satanists and dark Luciferians really operate from that are really calling the shots he don't he didn't quite understand that this is all a high level religion the military-industrial complex isn't running the highest levels of it folks okay it goes into higher level intelligence agencies it goes into higher level agencies like the NRO the National Reconnaissance Office the Department of Naval Intelligence DNI into the CIA and NSA and eventually goes up into the highest level religious organizations on the earth mainly the Vatican etc because it's all it's never been stopped being run by religion folks never this is always this planet has always been run by a priest class an occult priest class and this is what people in the free energy movement have to understand and they don't understand that you try to explain that to them there are most of their eyes go glassy there are a million miles away they don't want to hear it they don't want to listen some of them do but too few just like in the anarchist community you try to explain this to them their eyes go glassy there are a million miles away mentally they're not really listening it's in one ear and out the other and they think they know I'm trying to explain to you I'm telling you this from a position a perspective of having been on the inside of this satanic cult admittedly at a low level of it but guess what at a much higher level than most people who are even they're useful dupes ever see and these people are very out in the open about their agendas very very speak openly about it when you're in in that at that level of it with them when you're at the actual occult hierarchy level of the priest class of Satanism and dark luciferianism and the people who are at lower levels of this that to go into just regular you know the secular aspect of it and the financial and and political aspect they don't even understand about these levels of it they haven't been taken into those levels because it hasn't been deemed necessary - they don't really have the skillset they're a trained monkey pushing the buttons for the agenda that's all that's what you have to understand not everybody gets taken up into that level of that satanic hierarchy they want people with social engineering ability high IQ high communication skills the ability to mind-control others so that they never look into any other level of this that's who they really want that's who they groomed to take up into the real priests class level of this not people who they could just you know train in worldly skills and say you know go over here and tell deliver this message you know or people that they're gonna say hey just work in your scientific field and invent this for us they don't need to see that level of the hierarchy they're just trained monkeys that's what that you have to understand about one who I call useful dupes so let's continue about the characteristics of the controlled energy paradigm and I'm gonna unpack this as long as it takes folks see this is what I don't get a chance to do at presentations people say oh you rushed through that yeah well I saw all the time I had you try to develop a fifteen minute presentation and say something mine powerfully world-changing that blows somebody's mind and people were still coming up to the host of the conference saying wow who was that guy he blew my mind Nick said half the crowd got up and left and went out on the end of the corridor into the whole hallway outside the conference room to talk to me and like less than half the people that were there for my presentation were there for the next speaker which I don't I think that's kind of rude myself but I'm glad that they you know wanted to hear that that's how much I interest them interested them by what I said people always complain oh you left this out you left you didn't talk about this yeah I had

15 minutes like I said try it come on put a presentation that you think I'll like really make a difference in the world together and record your own voice for 15 minutes and see how well you fucking do yeah most people won't even try to do it in the privacy of their home let alone go out in front of hundreds of people at a conference a lot live in front of them and do it go record your own voice with like some audio recording software for 15 minutes and see how well you do you'll find out how hard it is so the next characteristic of the scarcity and Energy paradigm is that it promotes a separation worldview that nature is ours to conquer and this is what it's all about folks the idea of separation separation from source separation from oneness separation from wholeness in the worldview and in the mind this makes us think it's us versus them it's us versus the planet even it's us versus nature if we don't conquer nature we'll be conquered by it that's not how nature works nature wants us to actually work with it this is what Tesla was trying to achieve he called it harnessing the wheelwork of nature not conquering nature but taking what nature already provides and procuring the vast abundance that comes from nature for our needs as a species which is possible to do without polluting the planet without turning over just totally distorting the balance of nature and without the type violence exploitation and imperialism that we are currently addicted to in the controlled energy paradigm it's all possible without all of that but this is what people often think who are left brain nature belongs to us the planet is ours it's ours to conquer it's ours to subdue as we see fit it's a distorted religious worldview as well many fake-ass Christians think this as well nothing could be further from the truth we are a part of the living dynamic system of nature which is life itself this planet is alive it is a living holistic dynamic energy system which can be thrown into a state of imbalance and disarray even but like I said it's gonna shrug us off long before it allows us to kill it but we're doing a good job provoking it sticking needles in it everywhere you know like like we have you know the total right to just you know take the blood from the earth is to the extent that we see fit in a totally violent way this energy paradigm stagnates humanity's collective evolutionary progress in consciousness that is how powerful of how we even look at energy what it is capable of doing to our brains and our spirits in mass it is actually literally stagnating our evolutionary progress forward as a species and the most important thing to understand here is it is completely immoral we have no right to continue this controlled energy scarcity paradigm we have no right it is an amoral one because it is based on coercion and control and violence and ultimately slavery it is enslaving the human population it is in complete and direct opposition to spiritual law or moral law or what I refer to as natural law God's law that is exactly what is this controlled energy scarcity paradigm is in direct opposition to and you think that that's going to be allowed to stand indefinitely eventually nature's gonna step in and say enough is enough and this isn't going to continue we need to be have developing mature understanding of what we are really doing to this planet and each other as a result of this energy paradigm that is completely amore and if we don't wake up to that it's going to lead to the last point listed here on this slide it will lead to humanity's total slavery and extinction it's already led to what amounts to total slavery I don't think we're in total lockdown hardcore slavery yet but we are in a state of slavery that is covert we are in covert or occult 'add slavery right now and what it's going to lead to is overt

totalitarianism that's what's coming and that's what humanity is currently richly deserving of because we haven't changed our mindset we could not say we don't deserve it as a species as judgment no that's what we talked about was the human condition collectively when we broke down the taro and we saw the card number 20 is the judgment card at the MAL couth position on the macrocosmic Tree of Life in the last couple of episodes that's where Humanity is at right now if I could label the time period that we are in right now we are in post-apocalyptic cosmic judgment I'm gonna say that again okay because that's where we're at and what we're it's getting ready to break down into the situation of 100% overt total human enslavement and then eventually to human extinction and when it does get to the extinction phase it will be a mercy killing we will finally be put out of our misery as a species and allowed to go extinct after we are in a state of total whoa wo e meaning 100% shame and misery as a species that goes on for an indefinite amount of time that's what's gonna happen if we don't reverse our mindset and that's not fear-mongering ladies and gentlemen I'm explaining to you how actual spiritual dynamics play out in nature according to natural law and the real laws of attraction and manifestation and people better wise up and start taking heat they better wise up and start taking heed and really spirit truly spiritually advancing themselves and understanding that we are actually standing in the way of the will of creation and the laws of God because that's what humanity is acting in the capacity of right now as we continue this controlled energy paradigm and as we continue the overall control system called government and human enslavement I'm gonna say again what I say that our current human condition truly is we are in a state of post apocalyptic cosmic judgment we are past the apocalypse the apocalypse already occurred past-tense apocalypse comes from the greek roots oppo which is a greek prefix meaning to take away to remove away from removed from and then the greek noun khalipa time khalipa time means to hide to conceal to keep secret to occult and will you put them together it means to take away that which has been hidden to remove the veil to unveil to do cult to take out of hiding and bring into the light of day that's what apocalypse means when people are talking about the end of the world they are referring to the biblical concept of Armageddon Armageddon and apocalypse are two different things our mageddon is the alleged total battle between the forces of good evil and how they have arrayed themselves in opposing duality at the quote unquote end of time when time is up for Humanity that's the concept of chile azzam the end of days in Christian prophecy okay that is not the apocalypse the apocalypse means the great revealing of information that the truth has been taken out of the realm of the occult out of hiding out of being hidden and it has been exploded onto the world for them to see to hear to understand that's the apocalypse and that already happened that already happened past tense it you could say it's continuing to happen but it has already occurred and that information is all already out and you know what humanity has said to it it's raised its middle finger to that truth to that revealing and it said fuck you that's exactly what humanity has done to it in mass it is said we want no part of that keep it away from me I don't care that's exactly what humanity has does has done as a species and that is why I say we are in the period of poke post apocalypse we are in a post apocalyptic period of humanity the apocalypse has occurred already and humanity has said to that great revealing that great do cultic of information fuck you I want no part of it that's exactly what it is said with one great voice and that is why we are now entering the period of cosmic judgment as a species and you know what folks you can say that sounds as religious as you want I don't really care I'm not interested in your analysis okay I'm about as anti religious as it gets but I know when cosmic forces are coming for what we have allowed to continue I can feel it in every fucking single one of the hundreds of trillions of cells of my body because I am attuned to that and if you're not attuned to it and you think what I'm saying is somehow religious go right ahead and say whatever the fuck you want I could care less it has nothing to do with religion it has to do with how the universe actually works you think we're going to be allowed to stay in that level of saying fuck off to the truth for indefinite an indefinite amount of time you're out of your mind no because you know what the people who think that are they're atheist trash who think there's no such thing as anything higher than humankind in all of the universe that's what they actually naively and childishly believed that there's no law higher than man's law that's why we get to make it all up there are a theistic moral relativists and there's a bunch of that trash in the freedom movement and anarchist movement and I'm gonna call them out every week every week I'm gonna call you out trash cuz that's what you are you don't want to understand that there's a higher power in law in the universe than little old impotent man that's destroying itself and putting itself into its own chains you think we're the highest power that there is you have a lot to learn about what's going on in this life boy and girl because that's what you are you're a little boy and a little girl that hasn't grown up it's exactly what you are so that's where we're at and that's what's coming as long as we stay addicted to this oil paradigm this totally controlled energy paradigm of complete scarcity and fear and violence and coercion we're heading toward post-apocalyptic cosmic judgment 100% overt slavery and eventually merciful human extinction when it is finally allowed after we've suffered enough by our own hand by our own hand see it's not really anything else doing this to us it's us doing this to us see that's the quote good news too because if we put ourselves in this position we can get ourselves out does it look likely no it looks highly unlikely I'm just to be honest you know I don't want to blow smoke up people's ass never have been the type to do that I try to be as honest as possible with people about how I actually see the dynamic from a realistic perspective I'm a realist I'm not an optimist nor am i a pessimist I'm a realist I gauge highly accurately overall patterns of the human condition and people want to say that I'm not good at that I'm probably the best there isn't that to really look at the overarching dynamic within all of society and see it as one trend and to understand where it's heading and then I try to Acula accurately report on that situation that condition and I think I have it very well scouted and very well analyzed and that's why I say we are in a very very very negative place and we have the ability still to turn it around it still isn't set in stone it can be done do I think based on the trend of where human will is going that it is going to be turned around no I do not but as long as there's still a possibility of that happening regardless of how slim I'm going to tell you what the other possible outcome is because I'm here to lay those choices before humanity that's what part of my job is to do explain to you what's happening and explain the choices that you have by changing your mind and heart that's what my charge is to do that's my work that's my Dharma so let's look at the other choice and this is a choice this isn't something that's being done to us this is something we are actively choosing through our free will through the behaviors that we put out into the world through our free will just like everything that happened in the Epstein situation was all a result of free will it was coercing and removing the free will of a lot of those children but let me tell you something folks it's still freewill based behaviors on who will cooperate based on how much money is thrown at them why do you think the the controlled energy paradigm continues how much money has been thrown at people to shut people down to kill people kill people developing alternative inventions have the news lie about it and say it's all hokum how many people will just take a payoff to either shut up lie hurt somebody else covert hide information tell people that that's not possible when they very much do know that it is this is the problem with all of humanity folks we've become a species largely comprised of trash that will take any payoff or any advancing of their level of comfort to do evil to others as long as it's not them on the receiving end in the immediate sense and then people will say no most people aren't like that you're full of fucking shit you're full of fucking shit most people aren't like that it's a total anomaly when you find someone that's not like that the vast overwhelming majority probably over 99% I'm gonna say probably like 98.5 percent I'm being super generous today if you find one and a half percent of human beings that would not take a payoff to do something bad I mean we're in good shape I'm gonna say more likely it's probably over 99% of human beings they would just say yeah what do I have to do give me the payoff and I'll do it so this is why things like this continue folks it's nobody doing this to us it's not just because these people are so powerful it's all the people below them that are willing to say what are you going to give me to do this for you and they have unlimited resources because they've been profiting on off of this oil based energy paradigm for you know centuries and then they wave it in front of them wave some money in front of them and go here take this which is a pittance to them but it looks like it's like oh how much how much this is to the average slave and they go of course yes sir I'll get right on it do it right away you know and you're telling yourself that's not how it works you're lying to yourself you are a liar to everyone around you but most of all to yourself so let's look at the characteristics of the other potential choice that we can still make but are unfortunately not making certainly and not enough numbers to really make a difference the abundance energy paradigm or free energy it's non polluting and truly sustainable from a true sustainability aspect because it's unlimited and it's harnessing the will work of nature as nature put it they're not exploiting nature and creating a polluting environment based on energy explosions which is what internal combustion is actually doing see that's that's the whole thing do you work in synergy with nature or do you work in opposition to it by trying to blow it up you know that's what the controlled energy paradigm of oil is all about many explosions and then nuclear aspects is larger level explosions that release radiation energy you know and people don't understand this that true free energy true energy that is about harnessing nature's will work is not about pollution and explosions you are literally taking energy as nature intended it almost as mother's milk okay because that's what nature is it's our mother it's the Sacred Feminine dynamic in the universe and it provides if we understand how to take from it in the way that we should I mean it's the it's it's the difference between a baby suckling at its mother's breasts versus a baby trying to like poke holes in the mother and drew withdraw the blood from her like a vampire okay that's literally the actual difference that we're talking about the free energy paradigm is about empowerment via abundance no longer people being kept in a mindset of fear through scarcity who artificially created scarcity this would be truly creating a mindset of human empowerment through abundance of having the energy that we need it would be at our disposal when we need it and there is enough for everyone there is enough there is way more than enough there is more than we could ever possibly use actually it would promote true independence independence from government independence from the whole control system independence from the monetary system independence from all of the corrupt institutions and cartels and companies and corporations that we are currently dependent on it would promote genuine power meaning no scarcity would obviate aggression and war not this false illusion of military strength and power that's not real power that's actually spiritual weakness of having to be a Gretsch aggressive and coerce and attack not showing your own weakness and fear there's nothing manly in that there's nothing powerful in that that's the perversion of true manhood that's the perversion of the the true sacred masculine the true sacred masculine would be genuine helping to squelch this whole idea of scarcity and stop aggression and war that's what a real protector in society would do by promoting true free energy in the true abundance paradigm the free energy paradigm would promote it promotes as a promotes an integral worldview that we are quote we are part of the living system of nature so the worldview promoted by free energy would be we are not separate from nature we are one with it we are an integral an integrated part of the wheel work of nature it is us and we are it there is no separation whereas the controlled energy paradigm continues with the idea the worldview of separation which is what this is all about the reason we continue to do these things that lead to human enslavement is because of a worldview of separation from self from the true self and how we are all one and all part of the living dynamic system of nature it's all energy and it's scientifically provable that's not new-age hokum when I say that I'm not saying that in the sense of we are one with the actual and enemy forces yeah at some level of existence we are but here playing out on the ground of course those people are doing things totally against the human interest to continue the system of slavery and no in that in that sense we're not the same as them we are not one with them I'm talking about the highest level of existence you know you always have to caveat that we are one with at some level of existence you know at the three-d level of existence you do have to understand there are definitive forces at work that are against the the betterment of humanity you know and that's not that's not promoting a separation worldview that's saying the truth about what's going on the separation worldview is at a much higher level of existence that oh oh it's us versus nature we're separate from it I'm trying to explain you with that higher level of awareness we have to understand everything his energy and that's scientifically borne out that is proven scientifically it's not a theory if we're paying attention to new modern science and not ancient Newtonian paradigm of science the free energy paradigm promotes true human evolution in consciousness it is the true evolutionary force whereas what is one of the things that would be serving the involution airy force or the satanic force at work in nature would be the controlled energy paradigm this serves this works against the involution Airy force and serves the force of true evolution remember we talked about those two forces that are always at work in creation involution versus evolution the controlled energy paradigm serves involution stagnation and the opposite of human progress we're going backwards in progress in consciousness free energy or the abundance paradigm promotes true human evolution and consciousness it is truly moral this paradigm it is in harmony with spiritual law moral law natural law because it is not based in coercion violence fear scarcity etc and this energy paradigm if we were to actually implement it through changing our worldview to a world view of true freedom and then implementing that here on the earth would lead to a state of true freedom for all it would sustain it it would be better to say sustain true freedom for all okay then lead to because it has to be led to through developing true freedom I think I'm gonna perhaps change that to say sustain true freedom for all it would be much better worded like that it would support that state of true freedom and it enhance it and help it to grow and flower so those are the characteristics of the true free energy paradigm so these are the two choices that humans have in front of them before them and these are choices based on freewill behavior what will we do will we continue with the controlled energy paradigm that others that came before us put in place through their free will decision will we continue to take jobs in that sector will we continue to support that whole mindset that it creates will we continue to tell people don't look at free energy alternatives will we tell people not to look into Tesla's true science and innovations when we tell people that no that's not that's not possible that's all just can in the realm of conspiracy theory or will we work to truly build the free energy the true free energy paradigm which is possible so this is what what our path is if we're moving in the path of true evolution I'll go back and do that again it's okay are we moving in this direction folks are we moving in the direction from involution the controlled or scarcity energy paradigm to true evolution to the free energy partner if we're really if we have half a brain in our head we would say yes that's what we want and people in the free energy movement say this is what we want to happen but again as always things don't just magically manifest just because you say you want it to happen this isn't the false variant of the secret or the false variant of the law of attraction it isn't just thinking in your mind and feel it in your emotions and then magically it manifests there are requirements for the manifestation of free energy it doesn't just magically occur because you say you want it to happen and you have a good feeling about it you have to do things in the world to make it happen and the first part of that is changing the mindset of people to understand its possibility and how it is right to move in that direction whereas staying in the other paradigm is wrong morale to understand how the free-energy paradigm on the right in this image aligns with natural law the spiritual moral laws of creation God's law and how the control energy paradigm listed on shown depicted there on the left is totally the opposite the antithesis of natural law the antithesis of morality the antithesis of God's law it's the polar dynamic opposite but you don't just get there it's not just a magical quantum leap okay there's something in between there's something that lies in between these two states of existence for

Humanity and what what is that it's the paradigm shift but what is the paradigm shift okay a lot of people I think haven't even heard that term some people who study spirituality and have looked into the whole New Age movement have heard this term because that's where it gets bannard about you know that's where it gets tossed about all the time in the consciousness movement in the new-age community the paradigm shift again especially when I was first really getting into a lot of that material back in the mid 90s before them you know turning the millennium the words paradigm shift were everywhere in the alternative news community and in the New Age movement community and literally everywhere everywhere you turned okay so what a paradigm means is a way of looking at the world it's literally the way your worldview the way you see reality the way you see nature the way you see your place in reality okay and they were talking about in the spiritualist movement that we needed a massive shift in the way people think about everything in the way they see the world in the way they see themselves in the world in the way they see nature and reality itself and they were talking about that unless that happens humanity's not going to make this shift forward in consciousness so this has been called the paradigm shift or the quantum shift or quantum leap now let's look at the word quantum for a moment that's not in my slides here but it's been in much of my other work and on my other presentations a quantum shift in consciousness literally means a shift in numbers okay and I've said this an innumerable amount of times and many people yet do not understand this this is not going to occur by just a small amount of people changing and the goal is for a quantum shift in consciousness to happen in the physical domain excluding this from happening in the physical domain is an imbalance in consciousness and an imbalance in the understanding of what true spirituality is and what the true goals are of the great work it is to perform the work here upon the earth that is not attachment to the physical domain that is an accurate understanding of what the one great work is to do here it is to end slavery and change the paradigm of consciousness on the earth so that souls that come here to learn grow and evolve have the capacity and the environment to do so because this is originally intended as a school for learning and growth not the prison that we've turned it into do our poor choices and through mind control and I don't look I don't know what I have to do to convince people of that this isn't an eternal prison that is here so that like individuals get we're not supposed to build a prison and then like you know go to some other dimension that's not the goal if that's what people think you haven't understood the bulk of what I'm trying to lay out here on what on earth is happening that this spiritual domain and the physical domain are one and the part of the separation worldview mentality is to separate them to say that the work is to be done here on the ground on the earth is not putting the earth in a higher level of importance you know to put physicality at a higher level of importance than spirituality it is the understanding that they are one in the same and the work is to be taken from the higher level self and the higher level consciousness and spiritual domain and brought into the physical domain where it can actually be put to work put into work in physical manifestation this is how we learn and grow the physical domain is is that literal whetstone that we sharpen ourselves upon it is not slavery that were to do that upon it is the physical domain and the challenges it challenges that it contains and represents we're not meant to just be enslaved so that we can learn whoa whoa enslaving each other's a bad idea and now I know that and I could float to some other dimension of existence wrong we are to learn those spiritual lessons while we are here and then bring those lessons boots on the ground directly into the physical domain and change it you know the UFO guy and a alleged spiritual expert leer I can't remember his first name was saying on podcasts in the past we're not here to change the world we're here to be changed by it get the fuck out of here how about I just give you a nice South Philly accent get the fuck out of here are you nuts you know and you're teaching this is spirituality you couldn't fucking smell spirituality man somebody find me is his first name you know Laer who was saying we're not here to learn spirit it's not Roger Leir he was like the alien guy who was performing surgery to remove alleged alien implants and somebody else named Lear and I can't remember his first name but like the stuff that he put forward about alleged spiritual you know truth is just poisoning people we are here to change the physical reality and end slavery ladies and gentlemen this isn't something that is just done in them in the mind internally that's where it begins see you can't do it externally unless it begins in the mind oh you can do things just in the physical domain that'll don't make some people sit up and take notice maybe you know like what do you think the Battle of Thermopylae of the 300 wasn't worth doing you think the American Revolution wasn't worth doing did it long term change anything well one could argue no cuz we're still enslaved but guess what it set an example it set an example of how you should think about freedom that you should be willing to die for it if necessary and death should be no thing to consider when it comes to procuring true human freedom if we're asked to lay our lives down we should be glad to do it literally happy to do it do I want to see it come to that not really because I know how much suffering it's gonna create in the world for ourselves and our loved ones but if it comes to that it comes to that and if that's what's demanded of us happily you know that's like what Thomas Paine said if there should be trouble in the world let it be in my day that my child my children should know peace I mean that's a real man and that's a real man sentiment you know let that burden fall upon us so that the loved ones that come after us will know a world where this paradigm shift has occurred and it's better for them so we have to understand the paradigm shift the quantum shift in consciousness is all about how many people make that shift the word quanta where the word quantum comes from in English is a Latin word meaning an amount of something that's why it will never occur until the amount passes the magic number and the magic number is 51% that's when the momentum will be taken to a place where it cannot be stopped that's why the momentum is still in the favor of the Darko cultists and the controlled energy paradigm in the world of slavery through government because more than 51% still believe in those things as legitimate and how we should have things and until we flip the dynamic to 51% in the other direction do not expect a quantum shift in consciousness to take place this is why all of the satanic holidays are 51 may 1st 5-1 area 51 it's the flaunting their magic number in front of you because they know what it means and you don't they know they can keep the dynamic the way that it is as long as they have 1% over half of the people's minds in on in their way of thinking in their mental paradigm and until we change it to 51% to the truth we are never going to be making headway in creating a entire society based upon true freedom so stop thinking that you could say ok a small amount of people can influence it toward that great shift in consciousness but until you have those numbers it is not going to change the reality of the situation in which we live upon the earth in the state of physical manifestation physical manifested reality so understand that this paradigm shift is the same as a quantum shift in consciousness and it requires numbers no for more information on this idea of the paradigm shift you should check out my presentation called streetwise spirituality that I gave back in 2014 in st. Louis Missouri and the subtitle of that presentation was what does it truly mean mean to be awake and eyed it just popped into my head it was John Lear John Lear okay I apologize for not remembering that you know my recall is generally pretty good and I just needed a couple of moments you know this guy says we shouldn't be trying to change things in the physical world we shouldn't be trying to get more build more people and get them onto the side of truth build that number it's all about just the self changing your full fuckin shit boy how about that you like that come and see me about it okay your full fucking shit and you don't know what you're talking about and you're a false spiritual teacher and you should really no one should be listening to you cuz you don't know what the fuck you're talking about how about that let's just come out and just I'm just gonna get confronted about it with people when you're spewing fucking nonsense because that's what you're spewing you're spewing fucking nonsense okay and if you want to hear stuff that overturns bullshit like that watch streetwise spirituality because that's where I talk about what it really means to be awake what does it truly mean to be an awake human being this whole word thrown around now it's like all truncated a main cool I'm woke you're woke is your asshole okay that's about how woke most people are who use the term I'm woke okay you don't know what you're talking about you don't know what woke means you don't know what it really means to be awake okay because all the people who claim to be woke so hip and cool oh I'm a millennial I I can use the term woke and like I know what consciousness and spirituality really is okay you're a little hipster fucking trendy who thinks they know what spirituality is because you read a couple of New Age books and you know absolutely nothing boy girl nothing okay like I said here's where I'm gonna hit people hard this is episode 2 219 okay I'm not I'm not the mark passio of episode number one anymore I'll take it easy on people who are new viewers in an interview but here this is episode 219 and I'm gonna speak it the way it really is because we're out of time to talk about it any other way okay for the new viewers I gave you the caveat you don't want to start here because you're gonna you're gonna probably see and hear things they're gonna be a little bit intense for you at this point you should go back to number one and listen in order and then you'll start to get it so I gave a presentation called streetwise spirituality here are the this was the whole crux of this presentation these points that I'm gonna show you okay so what it what does it mean to be awake is the same thing that it means for the paradigm shift to take place so we're talking about what this paradigm shift actually is the 20 points of true spirituality that I talked about in street wise spirituality are the 20 points that comprise the paradigm shift so let's look at them each in turn and once again this presentation on the missing paradigm shift Tesla and humanity's missing paradigm shift it will take as long as it takes if this takes three episodes it will take three episodes if it takes five it'll take five okay we'll see how long it goes but I'm gonna unpack this the way I need to unpack this okay so the first aspect of what it truly means to be awake is that you have true knowledge of the occult when I was looking at all the characteristics of what it means to be a truly conscious individual and be a person that could could be considered to be spiritually awake I was thinking well what it would this rule is really all about what does it really mean this term I'm awake I know what's going on I'm fully conscious the very first thing that you need to have that most people don't have and that's why they're not awake is knowledge of what the occult really is what is ocultism what knowledge does it contain what knowledge doesn't hide why is it so important for us to understand that knowledge this is the knowledge of hidden science and hidden spirituality and how ultimately those things need to be bridged into one to change the paradigm and we need a science that incorporates true human spirituality and we are nothing close to that the occult is knowledge of how the physical laws of nature actually work it's knowledge of how the spiritual laws of nature actually work it's knowledge of occult science and knowledge of natural law which is the spiritual laws of creation upon which all human freedom depends the second aspect of the paradigm shift is knowing that truth and morality are both objective and it is our goal as human beings to bring our own perception into alignment with objective truth and objective morality and the goal of how and the measure of how well a society is performing that alignment of their own perception to objective truth and objective morality is the measure of how well a society is actually doing when it comes to waking up and enacting the paradigm shift they are not subjective constructs our perception is subjective but what we need to do is work to bring our perceptions into alignment with the objectivity of truth and morality which exist inherently in the natural world and are not human trucks that we can just invent that's what moral relativism is just inventing morality and saying oh whatever is the the relativity that that's built on is solipsistic a that's the idea we can just say whatever is true and it magically becomes true for us no there is no such thing as truth for us there is only truth and whether we know it or not whether we have come to understand it and bring our perception into alignment with it or not and that level of you know the morality of not the relativism of knowledge called solipsism is what the relativism of morality is based upon moral relativism the idea that human beings can just make up whatever right and wrong are and what's right for you is different than what's right for me or what's right in that society is different than what's right in this society bull shit morality is objective a right is an action that does not cause harm to another being and if you take an action that does cause harm through murder assault rape theft trespass coercion or willfully lying you have conducted a transgression against natural law by harming another by initiating harm against another those actions exist in the physical domain and therefore there is an objective truth about whether you are actually causing harm through the performance of those actions has nothing to do with subjectivity or relativism the characteristics of those actions are objective and therefore the morality that underlies those actions is also objective the third characteristic is knowing the characteristics of the higher self we talked about the difference between the higher self and lower or egotistical self endlessly on what on earth is happening most people have not made that transition in their understanding then we are infinite consciousness having a experience in the physical world we are spiritual beings having a subjective spiritual physical experience here to learn and to grow and to understand the laws of the cosmos and the laws of true morality and to understand the laws of attraction about what we will create if we try to break those laws or ignore them and not take responsibility for ourselves in our own behavior and you can get a lot more than that in the presentation regarding this separate the difference between the higher self and and the egotistical self and how a lot of people are trapped in the egotistical self because of ego identification in the presentation my first presentation called what on earth is happening which is also broken down extensively in the early numbers of this podcast series when it was audio-only so you can go back and start at number one and you'll get all of that information about the higher self versus the lower self or the illusory self characteristic number four of the paradigm shift is knowing that the physical and spiritual aspects of our reality do not supersede each other no one should be given precedence they are one in the same as I've talked about in previous slides okay you have to understand this is about boots-on-the-ground spirituality this is about spirit in the flesh this is about accomplishing the true great work here on earth not in some Hereafter realm or some other dimension of existence that we do not know whether we are going to okay this is about doing what you can do while you are here with the knowledge that you can gain from a true understanding of real spirituality it's about putting it into work that's the third step of the Trivium input processing output ok thought emotion action grammar logic rhetoric rhetoric is the action stage how you put it into practice in the physical world so this is what holistic simple deism is about it's about understanding that there is a higher power than mankind that put the laws of creation into effect you can call that creation the universe God I don't really care what you call it quite frankly higher power the all infinite names for it that you can call it I'm not interested in what you call it or how you relate to it in your own life that's for you that's not for me that's your own choice and your own preference on how you form any type of a relationship with that force I consider it the all or the universe itself and I'm perfectly fine with the word God many people are not and again I don't care I'm not interested in whether you're uncomfortable with terms of language get as offended as you like if I want to call that force God I'll call it God if that suits the purposes of what I'm trying to explain I don't see it as the religious God of any religions I think that's a childish bullshit worldview quite frankly I see it as infinitely more complex and powerful than what religions would make it out to be because they want to water it all down and they don't want you to understand natural law they want you to understand the law of man and the law of the church but natural law they don't want you looking into because that's gonna show you the real law of God and then it's that words is gonna leave their governments and religions in the shitter where they belong okay because most people with a brain will dump them there once they understand true natural law because religion is just the Queen's Chamber and if you want to get to the King's Chamber of the Great Pyramid of life you got to understand natural law because that's the real law of creation you know and we have to understand this is all it's all one you know that the worldview of simple deism bridges the worlds of materialism and the world of spirituality and religion because one could be to left-brain the world of materialism and scientism can be far too left brain and it's a matter is prime and there is no such thing as spirit and conversely the world of total spirituality and religion can go too far in the right brain direction and say Oh don't worry about matter only worry about what's gonna happen to your spirit after you're dead because the the world is evil and the old flesh is evil and don't worry about anything that happens in the physical world that doesn't matter bullshit of course it matters our lesson is to bridge those two worlds and to understand that there is ultimately at the highest level existence no level of separation between them the spiritual domain is the physical domain this is where all the lessons of the spiritual domain play out and are manifested what do you think all the energy that comprises the universe is in spiritual energy you think this is all isn't all ultimately a construct and a simulation of the mind of God of the creator of creation itself of the universe if you will of course it is you know scientists are speculating do we live in a simulation what else can it be what do you think this is actually physical they've already dulled into the realm of matter so deeply that they've already proven to themselves there's no physicality it's all energy you know oh no but they're gonna build bigger super colliders we got to get to that god particle and not understand God isn't anything but actual energy and consciousness experiencing itself through this illusion of the physical domain which is where all the lessons play out and that's why it's still of utmost importance and can never be downplayed and say it's so much lesser than the spiritual domain it is the spiritual domain they're one in the same the physical universe is the spiritual domain it takes a very balanced brain to understand that unfortunately most people are in one form of brain imbalance or another and they'll either side with the atheistic worldview or the religionists worldview sadly and that's why we're in so much trouble as a species because we can't balance we can't seem to balance our brain through self work and understand a worldview of non separation and non duality it's very difficult for people in one form of brain and balance to another to understand that point number four right there on that slide the fifth factor of the paradigm shift is released from ego identification this is what helps us to understand the true self not to be identified with the work that we do or the roles that we play not to say I am a doctor I am a lawyer no I am pure consciousness having a spiritual experience in the physical domain of learning and growth these are just roles that I happen to play you know I'll say I'm a teacher of natural law do you think that's all I am do you think that that's what I ultimately see myself as I know I'm infinite consciousness at some level of existence that's a role I am playing here while I'm on the earth so the release from ego identification helps us get in touch with the higher self again my presentation called what on earth is happening goes into more in depth about that characteristic number six of the paradigm shift is the exercise of true discernment and judgment this is what the New Age community doesn't want us to exercise so just believe you know a lot of religion wants that too which is the New Age is just another religion government wants us to just trust it oh this isn't conspiracy you know it's Joe the whole thing with Epstein it's a conspiracy theory don't use your own judgment but would powerful people who might have their activities of pedophilia exposed to a nationwide audience do know they would never work together to try to cover that up never never I mean come on they wouldn't pay people off in prison institutions and in the police force and in the medical community if they had they would never work together to spend their trillions of dollars to cover up their crimes that could that's that's a conspiracy theory the media tells us yeah and jackasses still believe these assholes smacked jackasses they want to believe mommy and daddy would never do anything to hurt us they're gonna tell us the truth and believe the mainstream media cuz you're brainless television Watchers you know that's all it is and it's not exercising your own discern discernment and judgment people want to say you judging is bad no you have to judge everything that's what we're here to do we are here to judge we are here to judge whether something is an in alignment with truth and objective reality and objective morality and bring our perceptions into alignment with those things through our discernment and judgment and we need to exercise them like muscles because if we don't they atrophy and disappear and that's why so few people have discernment and judgment at their disposal they haven't exercised them and therefore they've atrophied and shriveled up and gone away practically if not entirely the seventh aspect of the paradigm shift is becoming mentally free of all false religions again I've defined the word religion to the point where I want to puke the word religion comes from the Latin relig re meaning to hold back to tie back to thwart from forward progress ultimately religion is the force of involution at work in the world and it has nothing it has to do with the cultural religions but it is not confined to the cultural religions we have to understand there is more to the word religion than Christianity Judaism Hinduism Islam taoism buddhism etc these are just the cultural religions that have come down to us in the world since time immemorial that's not what the word religion only means you have to expand your understanding of the word to mean that it is anything that holds back human consciousness from forward progress from its actual etymological definition learning the root meaning of words when we study where they came from helps us to understand what they really mean and when we look at the ancient Latin relig re where the word religion does in fact come it means to hold back by tying up to bar mind to thwart from forward progress in understanding of something or in movement that's what religion is so what other things can constitute a religion false science that is holding back free energy technology government which holds back an understanding of true human freedom is a religion politics is a religion the New Age movement of false spirituality is a religion and too few people are trapped in that one money is a religion and we're almost the entire earth is trapped in that one glorifying money and thinking it's so necessary it's well maybe necessary right now unfortunately because people are such a low level of consciousness that they cannot see themselves as one and one overarching dynamic unified human family living here on the earth with the same basic characteristics and needs so that we would help each other to learn and grow and have what we need no we're not at that level of consciousness I'm no fool or naive sucker to believe that we are I live in the world I'm not of the world but I certainly live here and understand what's really going on see a lot of people hear me say that no oh that's new age woowoo no money is still a religion no matter how much it may be required at the level of consciousness that we're at now because we can't see each other at the level of total separation that we're at as one human family and lived together at a higher level of consciousness where we wouldn't need a monetary system we're nowhere near that level of consciousness what do you think I'm naive enough to think that we are it's why I talk every week to show people where we're at as a species and what our work is to do so really waking up as being mentally free of all false religions so if you're saying that you're awakened you're still in the religion of money politics cultural religion scientism government you're you're not really awake and many people are there I'm in full recognition that the bulk of the world is there I'm trying to work with people to advance that level of consciousness so people come out of those false religions because the one true religion that would truly reunite us to truth is a deep understanding of natural law it's not a religion it's binding us back to the truth that's the only religion that there is see truth is the religion and natural law is truth it's not speculation it's not belief it is a science which is why my upcoming documentary that's going to be screened I forgot to mention that we need a slide for that for the natural law documentary so I don't forget to announce that as well really I just need like separate slides for my presentation and for my documentary screening it's coming along very nicely and we are going to show a sneak preview it will not be the finished version we will have a preview version ready to screen on Saturday September 14th after my main presentation the sacred gift of anger will be screening a rough cut draft of the documentary the first documentary that I'm putting out called mark passio and the science of natural law the science of natural law not the religion not the belief not the conjecture of natural law the science of natural law natural law constitutes a true science when understood properly so becoming mentally free of all false religions is the seventh characteristic of the paradigm shift the eighth characteristic is understanding that knowledge is never negative you know too many people in the New Age movement say oh I don't want to look into that that's negative well knowing something is never negative increasing your knowledge even if it makes you feel uncomfortable is always positive learning uncomfortable truths does not make them negative see this is gauging things based on emotions and not logically and what do I say gauging something on emotions I don't mean using the intuition that's something entirely different that requires holistic brain intelligence to really do properly to thin slice something and gauge whether you think it's coming from a place of accuracy that's the intuitive capacity of the human mind okay that is not okay gauging something purely with the emotions gauging something purely with the emotions is something to the effect like this that makes me feel bad when I hear it so it can't be true or I don't want anything to do with it I don't want to learn about it I don't think it's important if it makes me feel bad that's gauging information with the emotions there's a difference between that and using the internal internal capacity of intuitive recognition which I'm gonna do a whole show on probably about intuition and thin slicing as the author Malcom Gladwell referred to it in his groundbreaking book called blink I have a show planned in the future on that dynamic so we have to understand that learning something even if it makes us uncomfortable or sad or scared even okay is never negative because we're increasing our knowledge base and we need to do that with very uncomfortable truths the New Age movement wants to tell you that that's bad and they want to tell you anger about what the truth about what's going on here is bad also and neither one of those things is true okay you can dwell on it and as Jay Parker likes to say gargle with sewage I'm not recommending people do that either because that will SAP your energy and I fall into that myself I don't fall into so much as taking a lot of negative information into a point where I get depressed I see where people's minds are at and get depressed I see how far off from a level of true understanding that they are regarding what's taking place in themselves and in our world that they are how bad they're in a state of total abject ignorance that's what depresses me that's what I tend to dwell on because I see how big of a divide there is between me and that average human being that's just totally brain fucked they're totally mind fucked I mean seriously but to just just just put it in the realm of everyday street parlance like these people are really really brain dead and soul dead and it it kills me to see it because I recognize what the potential for Humanity is and how much we've largely squandered that potential on what we have become what our current condition has become it's painful to look at but you know as Vernon Howard the philosopher said those who do look at it will become well you have to look at it enough to become well but not necessarily so much to throw yourself back into a condition of imbalance and let me tell you something I'm not perfect I'm a human like anybody else I tend to go in that direction of almost looking at the human condition too much and too deeply because I'm trying to improve it and it makes me very depressed sometimes not gonna lie but you know we have to try to it the more we collectively fight past that and learn the truth about what's going on we will synergistically help each other to fight that mindset of falling into that depression the problem is too few people are even doing that so the next point of the true paradigm shift is knowledge that the current human condition is slavery and that the causal and the causal factors that have led to this condition we need knowledge of those things that we are currently enslaved and that slavery is called government and we need to know not just that it is in effect that condition of slavery but what are the causal factors that have led to that condition and those causal factors are mental factors causality the realm of causality is always always exists in the mental and spiritual domain first before it manifests in the physical domain so we need to know that we are in slavery and we need to know how we got there only when we know the causal factors of how we got there and why we are in that condition will we be in an empowered position of knowledge to reverse that condition and sadly we're nowhere near that either and like I said from day one that's what sets what on earth is happening off from other shows of this nature in from earlier is no other show of this nature to be quite honest but it sets off it sets itself off from other shows and programs in the alternative media community because I go into the causal factors that have led to the current human condition more deeply than any other researcher has and I wish that weren't the case I wish there were people that would do it a hundred times more effectively with a hundred times greater numbers a thousand times a million times greater numbers but that it hasn't been the case thus far and I find that sickening personally I don't want to be the person that's doing this type of work the best than anyone else I should be a mediocre player in this game at best okay there should be a million teachers of natural law who are doing it better than me by this point number ten understanding and living in harmony with natural law well that's all about getting the current human condition and the factors the causal factors that led to it not understanding natural law is that very causal factor so in order to become awake we have to understand natural law and we have to align our behavior to it not just understand it intellectually but bring our behavior into alignment with true objective morality as an individual and then do it as helped to push in the direction of getting that done as a species let's look at the second of the the second half of the 20 factors that comprise truly being awake number 11 knowing and living both pillars of enlightenment the non-aggression principle and the self-defense principle this is part of natural law these are what I call the pillars of natural law the pillars of enlightenment the non-aggression principle states that you should not initiate coercion aggression or violence against your fellow sentient beings it is always immoral to do so and then self-defense principle so the non-aggression principle is the Sacred Feminine principle of the pillars of enlightenment hand-in-hand with that is the sacred masculine principle the self-defense principle which states that if aggression and coercion and violence is initiated against you as an individual that you always maintain the right to defend yourself physically with whatever weaponry is necessary to do so against that incursion against your rights and freedom and your property and we can do that collectively as well as as individuals the right to do that is the right of individuals to keep and bear arms and then the right to do that collectively is the right to organize into militias to protect our rights as individuals collectively as a species number 12 knowing that authority all authority is morally illegitimate and that all government is slavery this is part of what it means to be truly awake and this is where the people in the free energy paradigm fall very very short in the free energy movement I should say so-called movement fall extremely short because they don't understand the free part most of them are still status still pushing for government still trying to do things through government and they don't understand that until they break that slavery down and get rid of it that government is never going to allow them to manifest free energy in any form whatsoever this is what we talk about here constantly on what on earth is happening and the people coming here who are watching this presentation because they want to learn about Tesla and the missing paradigm shift have to understand this point perhaps more than any other that all authority is illegitimate because it is based on coercion and it is all ultimately a form of slavery and that's what government is that's not my belief on what government is that is the objective truth of what government is and it is absolutely provable based on the behaviors that government enacts and the situation of duress that government puts the people of the earth in it is immoral coercive behavior and it constitutes a form of covert slavery and really truly overt slavery when it's properly understood you understand that you are a slave on a tax farm being just squeezed like a battery to get done whatever the dark occult social engineers want done on this planet and that is slavery that is putting someone one on a free-range plantation factor number thirteen of the paradigm shift is recognizing the recognition of free will and personal responsibility this is what religions and you know scientism they don't want people to look at they want people staying in this very naive mindset where they just accept things on faith and a lot of religion wants to discount free will at a higher level and ultimately discount personal responsibility to choose for oneself moral behavior over immoral behavior that is the exercise of conscience and the knowledge of the objective difference between right behavior and wrong behavior is conscience itself we have free will and natural law is in effect free will is the random component of creation in the universe and natural law is the deterministic component in the universe both of them operate we have free will to choose the behaviors we will enact but we do not have the ability to be insulated from the consequences of the behaviors that we choose because that is natural laws consequences and you tell people that we've created this condition of slavery through the abdication of our personal response ability no one really truly put us in it we did it through Detroit the poor choices of behaviors that we enacted through fear and through mental influence you know this isn't some hardcore form of electric electronic mind control where we are free will has been completely taken this is influence at best I should have called it mind control should have called it mind influencing because that's what they're doing through the media and all the forms of mind control that they're enacting it doesn't mean that we've become robots we have free will and we have the personal responsibility to understand what behaviors are moral and then freely choose them even if it means an uncomfortable situation for us in the short term that courage is required to do that and unfortunately people want to shirk that responsibility and remain cowards and not actually employed in the world they want to come up with a million excuses for why they can't do it and I'm done here in them I've been done here in them since day one actually you know there is no shirking of this responsibility at a personal level and there is no excuses for not really understanding the knowledge of right and wrong and exercising and in the world we need to grow a pair okay and stop making excuses for why we're not doing this work and that includes speaking out speaking out what your real name all these people with these fake names in the movement your fucking cowards how about that okay get his offended as you like you're fucking cowards people who don't want to use your real name you're your birth given name you don't want to use your your you know birth surname and your birth family name because you're too chickenshit to come out against big daddy government and say yeah Here I am this is me this is who I am and I'm gonna speak the truth regardless of what you fucking do you don't have that level of courage you'll have those balls because your little kids your little kids thinking you're gonna play in a grown man's world in a grown human beings world grown man's world grown woman's world grown human and you're not gonna use your real name you're a chickenshit little pissed pants boy and piss diaper girl coward how about that let's go hardcore against the people who don't use their real name in the movement too just like I'm gonna get harder core against the atheist you're just as much fucking trash as they are how about that huh now I'm gonna be getting up in people's face more and more about this shit okay because I see where your sticking points and your religions are when you can't you can't see it because that's what cowardice does shuts down your vision you know you think you think that like first of all they have no ways of tracing who you actually are okay you know secondly if you're going to speak up about this grow the balls to do it all the way don't set a bad example for others because you're too chickenshit to do it all the way it sets a bad example for the whole movement of the whole community when they know you're not using your real name cuz you're a chicken shit coward then it emboldened them okay it just emboldened our enslavers because it says hey look at how afraid they are of us still they won't even use their real name and you know that that brings us to the next points okay so knowing that negative emotions serve a critical purpose this is the whole idea of the sacred gift of anger you know people would mark these as negative and say oh we should never feel this never get angry well that's what will drive your behavior when you're a righteously angry and you channel it correctly look I want to try to dial things back folks and not be this angry all the time but Pete I gotta be shown some progress I have to be shown some progress as a society some to just feel like okay we're moving some in the right direction I have no indicator of this none zero you know then maybe I won't be as angry as I am because I'll see progress being made right now it's all just one neg negative manifestation after another you know people not not going to get prosecuted or probably a lot of things exposed as a result of this Epstein thing they're gonna cover this up just like they did Pizza Gate you know we have no bones even being thrown our way to indicate that things are moving in the right direction at all the media is trying to spin it always a conspiracy theory if you believe that he was a hit was taken out on them you know so the negative emotions can be powerful drives to channel and move in the right direction when they're based on righteous indignation not just getting angry for frivolous reasons number 15 knowing that enlightenment is not about pursuing personal bliss while being surrounded by suffering while existing in a world totally filled with suffering this is what the New Age movement elements with satanic elements within the New Age movement would have you believe is a big factor of real spirituality live your bliss pursue your bliss pursue your bliss make bliss your life's goal and your life's aspiration when slavery is taking place you know I'm gonna have I'm gonna have a slide-in in a the sacred gift of anger to kind of go back to the last point of to slaves in civil war era America seated in a cotton field with in the background one of the house slaves viciously whipping at a whipping post one of the other slaves who stepped out of line and one of the slaves turning to the other seated you know below the and crops saying to the other slave I just can't understand why you're so angry all the time this is the equivalent in the modern world this is the equivalent that people won't get angry about enslavement what would you get angry about your football team losing them running out of your favorite fruit at the local supermarket you know I mean just imagine that and then imagine that same slaves saying why don't you just pursue your bliss why don't you just try to find something that makes you happy in this state of slavery and just try to do that all the time as much as you can imagine that this is what people think spirituality is in the modern world this is how fucked up their mindset has become and how totally mind influenced they have become by the dark occult who told me back in the night late 1990s that they were going to take over the publishing houses of New Age spiritualist communities and published the most ridiculous nonsense regarding what spirituality was so they would completely throw people off the path of true spirituality set it right to my face that we're going to buy up those publishing houses and or infiltrate them and wait until you see what we are gonna put out regarding what spirituality is and then come the turn of the millennium my god did they ever and people bought it I mean bought it they just swallowed it down with the proverbial funnel down the throat and throwing the garden hose in there and turning it on full fuckin blast you know forget slurping up with a straw and a spoon we got to get that bullshit down the gullet way faster than that put the funnel down the throat throw the hose in there and blast away that's what the new-age community did with that satanic information and they got a lot of people turn onto that switched onto that satanic spirituality so it is not about pursuing bliss when we are enslaved you know that doesn't mean never have any enjoyment for yourself it's hard to find when you know how bad it is especially when you know as much as I know about how bad it is it's very difficult but it doesn't mean you should never take time to recuperate regenerate find something that you enjoy and and focus on that for a time so you can go back to the work you know I have my guilty little pleasure pursuits you know and without them I'd probably you know feel way worse than I already do trust me it's part of living in the world you don't have to be of it and make it be your whole thing this is what I'm about but you know I'm as human as anybody else you know I want to have some modicum of pleasure in life as well but that's not what I live for factor number sixteen of the paradigm shift is knowing what true forgiveness means it isn't turning the other cheek in the false Christian sense of the word you know true forgiveness is if someone's really sorry you can move forward and heal and show them that you'll be willing to give them another chance to learn and to grow it doesn't mean when somebody shows you that they're not sorry and is continuing to smash you on one sheet that you offer the other to be destroyed that's not what was being talked about in the New Testament aspect of turning the other cheek that was continued to go to people that you think can get it and can be truly converted to the truth and keep bringing them the truth even if they smack it out of your hand proverbially you know even if they say oh no I don't want that that's some conspiracy theory or that's some you know religious hokum or whatever you keep bringing them the truth you keep taking more chances on them to understand that at some point because you planted the seed in fertile ground that's what real forgiveness is all about that's what real turning the other cheek is all about factor 17 knowing the difference of what cannot be changed versus what should be changed there are things in the world that cannot be changed they're set in stone they are determined that is natural law the human condition is not determined or set in stone it can be changed and it should be changed because it is currently an immoral condition that we are being held in on slavery and duress and censorship and not being allowed to exercise our rights and we're being forced to do things that are actually in violation of Human Rights like contribute through taxation through the the slavery and theft of taxation to violence that is being done to other people and it's being used that money is being used to cover up crimes of pedophilia and child murder so there are things that cannot be changed like natural law and there are things that absolutely can and should be changed like the human condition 17 I'm sorry 18 caring enough to take real world action real world right action to create real world change you know this requires courage not just care but care and courage this isn't about just wishing a new world into existence it's about taking action to implement it in the physical world and that is what the great work is to do it is not just to learn about this and say I know it so I'm good and I've brought my personal behaviors into alignment with it but I don't care what happens to the world because I don't care enough about the world wrong it is about doing it in the physical domain and helping all others to learn this and understand it and make a quantum paradigm shift together natural law is for all freedom is for all heaven is for everyone nineteen knowing that real enlightenment includes influencing others to improve themselves again same thing that I just said it's not about just knowing it yourself that's what the New Age movement and false spiritual teachings would have people taught and believed and again that's why I take umbrage with certain levels of higher level occult teachings like Hermeticism they were occultic elitists they were holding this knowledge too close to the chest see that's where the attachment is bingo that's where the attachment is it isn't in being attached to the world that you want the world to change and slavery to be ended the attachment is you start to take this knowledge as only belonging to some that's where the her medicines went wrong and that's why they weren't successful which is why I don't call it one thing it's not just about hermeticism it isn't just about Rosicrucianism it isn't just about Gnosticism it isn't just about esoteric Christianity it isn't just about esoteric Rosicrucianism or Freemasonry or Kabbalah or Tarot it is an integral approach to truth involving all of those things and more throw the leymah into that as well and you have to understand none of them were ultimately long-term successful because they were turned into religious systems of belief and or mystic traditions that didn't include everyone and try to get the word out and in a wider sense and looked at it as this is only for some incorrect this knowledge is for all and it is basic beginner knowledge 101 stuff okay I'm gonna keep re-emphasizing that I'm you're gonna hear mr. broken record earn his name okay are you gonna hear mr. broken record earn his name cuz I'm gonna repeat and repeat and repeat and repeat until it fucking sinks in just like the media does I'll play the same mine influencing tactics that they you for the right reasons and I'll keep repeating and repeating and repeating and repeating till someone thinks about it enough that they take it into themselves and eventually recognize its truth I'm repeating true information not false information okay thank you great job that's there is your host mr. broken record maybe instead maybe I need to go back rerecord the intro and say and now here is your host mr. broken record how about that maybe we should just do that you know it's much more accurate okay so the last aspect of true genuine enlightenment truly being awake the true paradigm shift is knowing that enlightenment does not equate to perfection ladies and gentlemen you are looking at a very imperfect being and I'll be the first to tell you so okay I'm about as rough around the edges as it can get okay the goal is we try and we work upon ourselves as much as we can to the extent that we can and with the time that we have that's real spirituality okay you are if you are expecting total perfection in the physical domain you are expecting what never has existed what does not exist now and what never will exist we strive to that ideal knowing that we're never going to reach the total perfection because that is the creator itself perfect that level of perfection does not exist in the realm of the physical that is the idealistic pure spiritual domain of pure consciousness and that's the only place that exists so to expect that in the physical domain is to set a bar that no one can live up to and then it discourages them and says I'm not even going to start that's why so few have even begun along the path to true knowledge and true enlightenment because they think it means perfection when it does not religion has inserted that idea into the culture and discourage so many people from pursuing true spirituality as a result unfortunately so those are the 20 factors of real spiritual enlightenment that I discussed entry wise spirituality and they are in fact the characteristics of the genuine paradigm shift that needs to take place in human consciousness a quantum shift in consciousness before we can ever really implement true energy before we can arrive at a paradigm of true free energy that Tesla envisioned for Humanity the paradigm shift aspects that are most critical to the emergence of free energy our knowledge of the occult because occultism comprises hidden science and what we are talking about here in too with Tesla technology is occult science science that has been hidden from general human understanding the second aspect that's very critical to free energy and the free energy movement is becoming mentally free of all false religions and I already explained why they're doing so poorly at that they still believe in government and politics and they're not understanding that we are never going to get the free energy paradigm implemented in a state of governmental slavery because many of them still don't understand the government is slavery the third aspect that is critical to free energy is knowing the human condition is slavery and the causal factors that have led to this human that that have led to the current human condition how many people in the free energy movement talk about natural law huh hmm I'm waiting you know I'll probably rot to ashes waiting to hear people in the free energy movement talk about natural law you know that's why they're making no progress we have to bridge all of these communities folks we need to bridge the UFO community that's seeking the truth about the interaction of humanity and extraterrestrial intelligence we need to bridge the community of people who are talking about the need for a new energy paradigm and the move toward some type of Tesla technology and or free energy paradigm we need to bridge the new age or spiritualist community in with this knowledge and information we need to bridge the alleged freedom movement and anarchist movement with this information because here's what none of them are doing none of them are talking about natural law zero the amount of people that are talking about natural law as being the causal factor that has led to the human condition of slavery in any of those movements is so negligible that I can count them all combined on one hand and I'm not exaggerating I'm saying probably less than five human beings you know you know so you know here is an example of what I was presented with I wanted to show some people this for doing the work to try to explain to people in the free energy movement what was going to be required for this paradigm shift to take place I was presented this back in 2015 at The New Yorker Hotel at a former Tesla conference this is called the Tesla Spirit Award the Tesla Spirit Award I'll turn it toward this side camera here it's a bust of Nikola Tesla that was presented to me and my producers just giving it a light dusting that's all in my mitt was on my mantle okay so this was presented to me back in 2015 and this is about doing work to help not only explain what was going to be required for the free energy paradigm to manifest but for helping to promote Tesla's vision and the work that he did to the average public okay so I thank the Tesla Science Foundation for giving me this and I wanted to you know show people that you know this it says right on it it says awarded to mark passio for continuous dedication to Tesla's legacy which I'm very humbled and you know proud for having received as well because you know so many people work within the Tesla Science Foundation to try to bring Tesla's understanding regarding what he wanted to do with energy to human beings and you know very few people are awarded that Tesla spirit award so you know just one that before the show was over to to show that to you and you know I'm when I got that award nick launched our of the Tesla Science Foundation introduced me as his friend and what he called a true American patriot and I don't take those words lightly okay I know a lot of people have take umbrage with the word Patriot but there's a difference between a patriot falsely so-called and a true patriot that is fighting for his country in the form of the people and that the territory of the country okay it's not nation state patriotism obviously I don't align myself with that type of patriotism but I take the words an American patriot very seriously and I do consider myself that because what a true patriot acts as as a defender of truth a defender of natural law as justice and a way of living that was the original intent of the people that originally came to and set up America they were fleeing not only religious but political tyranny and trying to come and establish a place where there would be more freedom and that's a first step you know I don't I don't buy into the cultural Marxist line and paradigm that this was all done to set up worldwide tyranny I do not accept and or believe that that was the case and I don't think it's historically provable and there are many people that will insist this was the plan of for America the whole time know that people came here because they wanted a freer way of life originally that was the original intent did it degrade from that rather quickly yes it did because of the influences and factors that came over here and people wanted to integrate everybody and not leave anybody you know out and they didn't want to send Tories back to England and let them live under the tyranny of the crown of the crown okay you know they thought that was it too much of an extremist position but you know what had degenerated into in less than 200 years were people with largely no true respect and understanding of real freedom and only a handful of people still doing that great work to help propagate to everyone then the understanding of what true freedom is under natural law and that's again this fourth point here on this slide that the aspect critical to the to the emergence of free energy the free energy paradigm is understanding and living in harmony with natural law that's why this has to be bridged into this community the so-called free energy community finally knowing that authority is morally illegitimate and that all government is slavery is the final the fifth and final factor that I think is very critical to the community of people that say that they're Tesla supporters and that they want a free energy paradigm to emerge to understand you know this is all about freedom they don't understand the free part that's the problem and that's why one of the reasons that the paradigm shift hasn't already happened here are some other reasons that I listed for why the so-called paradigm shift all talked about in prophecy back in the mid 90s never occurred really it started in the early 90s I'm using that term I don't know what the oldest instance of the term paradigm shift being used to represent you know building a world of real human freedom and turning over all the you know existing enslavement institutions and you know replacing them with you know factors within society and and people that would really propagate true freedom I'm not really sure where it emerged it came out of the spiritualist community of the early 90 but it certainly hasn't occurred we're moving in a more authoritarian and totalitarian direction freedom is going from the realm of being covert and occulted to being overt in what's called the externalize ation of the hierarchy of dark occultists ruling their slaves as gods and their slaves as their total subjects and the people in the dark occult hierarchy being propped up as gods of society we're moving toward that in a coat in an overt fashion rather than a covert form of control so why hasn't the paradigm shift happened well here's why most people in the world still believe that Authority and government are morally legitimate and necessary as we're going to show in the documentary the science of natural law I mean we have total tons and tons of footage on the street of man on the street woman on the street interviews of them saying if government were removed everything would be chaos okay he's government morally legitimate oh absolutely it's morally legitimate and we need it over and over endlessly the average person believes this and they still believe in the false left-right political paradigm where they pick a team you know where they pick their team that's gonna be in charge that's gonna exercise this Authority we're running out of time folks I got about a minute left a minute or so most people still believe that the mainstream media and its pundits are telling them anything resembling truth and let me tell you something we did this experiment me and a couple of friends went into a place asked them do you think the mainstream media actually endeavors to tell people the truth and tries to do as best of a job as they can 100% of the entire place said yes they believed the mainstream media cause they're ignorant television Watchers and they don't understand how much the intelligence community has garnered control of the mainstream media and they have their point men in positions of power all throughout most people still believe that the purpose of mainstream science or scientism is a genuine search for truth and the betterment of humanity through the understanding of nature and the development of new technologies when this is all government grant funded government stolen money grant funded science that is there to produce the results that Big Daddy government wants folks that's all the time that we have for this edition of what on earth is happening we're going to continue this extended presentation of Tesla and humanity's missing paradigm shift where I go into depth in this material right here next week on the show and we'll continue with your calls about this topic after I finish the presentation thank you everyone for watching ladies and gentlemen government is slavery [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #220

Topics: *Telsa & Humanity's Missing Paradigm Shift Revisited Part 2, What On Earth Is Happening is a tapestry of Knowledge which has prior prerequisites for understanding, The Goal of the Great Work is in the Here and Now, Social Experiments to gauge social intelligence on Occult Knowledge and True Awakening, Mark's view of the so-called "truth" "community," Widespread public disbelief in Truth, Natural Law, Google's outright and overt Censorship of Truth, the Improbability of the Clinton-related "suicides," Big-Tech authoritarian policies, the Paradigm Shift is stalled by the belief in "Authority," the False Left-vs.-Right political paradigm, Natural Law is virtually absent from freedom/truth community, Mainstream Media are paid liars and propagandists, the Mental Contradiction of Vegans who believe in and condone Government, Covert and overt oppression of Free Energy, Free Energy proponents and patent holders lack of understanding of Natural Law, Anarchists lack of knowledge of The Occult, Lack of Natural Law philosophy in the Free Energy movement, Bad People who don't want to learn truth and rights, Bad People who don't want to help change bad conditions, Accountability for the Sleeping Masses, the Need for Discernment and Judgement when attempting to find Spiritual Truth, Universal Peace through a Paradigm Shift in Consciousness, Care and technological solutions for human progress, Brainwashing and censorship by professors and administration in American Universities, Whole food plant-based diet vs. Processed Foods, Awareness of Synchronicities through studying The Tarot studies, Knowing the true philosophy of Thelema vs. glorifying Aleister Crowley, the agenda to push people toward Androgyny as espoused by the Whitehall Church of Satan*

freedom man that's what it's all about [Music] you've got to move on freedom fighters book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on water on earth is happening we are ending slavery one mind at a time welcome to the show thank you for tuning in today is Sunday August 18th 2019 this is show number 220 and the topic for today is going to be Tesla and humanity's missing paradigm shift extended edition part 2 continuing on from where we left off last week on this presentation that I originally gave back in I believe it was January of 2019 so I have a few housekeeping announcements to get to before we get into the subject matter for today so let's go over to the laptop and let's get started with the event announcements so this is the title card for today's episode Tesla and humanity's missing paradigm shift revisited part two we'll be getting to that momentarily I will be speaking at the inaugural and arkadelphia conference hosted by the state of anarchy this conference will be taking place in Philadelphia September 13th 14th and 15th 2019 rapidly coming up less than a month now you can use promo code passio at checkout to get your tickets at an arkadelphia calm if you put in passio as the promo code at checkout you will have $5 5% I'm sorry taking off your ticket sale and then an additional 5% will be matched by the state of anarchy and donated to what on earth is happening I will be giving the presentation the sacred gift of anger this is the title card for my upcoming presentation at an arkadelphia the sacred gift of anger is my main presentation at an arkadelphia 2019 and I think people are going to be very happy with how this presentation is shaping up I'm building the slides as we speak and the content is gonna just be things that people really need to understand regarding human emotions and how we should never let them cut ourselves off from the so-called negative emotions because they can be a powerful impetus toward right action if they are channeled properly and that's what this presentation is going to be all about at an arkadelphia 2019 after my main presentation on September 14 that Saturday night September 14th I believe I'm the last Speaker of the evening on the 14th we will be screening a rough cut a rough draft version of my first ever documentary film Mark passio and the science of natural law and again this will be a rough cut unfortunately the film will not be completely finished by the time and arkadelphia is here and we will not have the film available at the conference but we are going to show a rough cut on Saturday September 14th on Saturday evening after my main presentation so that being said I also have a workshop a full all-day workshop taking place the Monday morning all-day event after the conference is complete on Monday September 16th 10 a.m. to 5 p.m. all-day workshop called teaching natural law with Mark passio this will take place at Papi's Italian restaurant about a block away from the main venue that an arkadelphia will be held and the tickets for the workshop are 120 dollars available at an arc adelphia calm in the tickets and workshop sections so those are the main event announcements that I have oh I also want to make it known that we are still looking for what on earth is happening team members with certain skills right now on a volunteer basis hopefully it can eventually manifest into something more than just a volunteer effort I mean that all depends on how you know what on earth is happening is funded through donations you know we have the one great work network in the works and a lot of exciting things happening regarding that Network I hope to roll it out hopefully by the end of the year maybe early next year depending on how things go with development but um you know maybe that could bring in some resources for what on earth is happening I want to get team members you know compensated eventually but right now it is a volunteer effort all the people who do the great work here at what on earth is happening are volunteers they work on a volunteer basis and if you are interested in contributing to the great work here at what on earth is happening we need some additional team members we are looking for people who are very good with Photoshop and Adobe Illustrator Adobe Photoshop and Adobe Illustrator okay and this is all in-house so if you're willing to work remotely we have remote help we need in-house help on a daily basis here at what on earth is happening when we are here in the offices in Philadelphia working on the great work okay so we need people here in person okay it's not a remote effort here okay we're not asking for people who live in other cities we are asking people who live in close proximity or in the city of Philadelphia who are willing to come here in person okay I don't know how I can make that any more clear this isn't a remote effort I understand it is for graphics work and video work as I'm about to explain but we have remote help regarding some of this we need people who are here who will be here from a certain time to a certain time on the days when we work here okay at my headquarters here in South Philadelphia and we need people who will show up in person to help out for the efforts that we are doing with the documentary and with the live show every week okay so we need people who are great with Adobe Photoshop and mostly Adobe Illustrator I'm looking for an illustrator to sit down next to me and come up with some original vector graphics illustrations you could be good with illustrator you could be good with CorelDraw you could be good with you know something like another our artist program like Autodesk SketchBook you know we have access to all that software here so you know as long as you're a good artist you know who can draw original art that's what we were really talking about here okay we the the software largely doesn't matter as long as you have the skills to work a particular you know software program and use that as your main tool for expressing your creativity so Photoshop Illustrator SketchBook Pro CorelDraw whatever or any other vector illustration tools okay or paint tools we need video editors okay because we have a couple of video editors but we really need other video editors to work on some additional projects here in person that you could be actually given direct you know you know ideas about what we are looking to do and then implement them here okay we have some remote help regarding this but we need people sitting in at the workstations that we have here that were donated to us for this work you know we had some people that were going to do this and some of them worked out some of them didn't so we're still looking for additional people who are good with Final Cut Pro Adobe Premiere and any other nonlinear editors you know maybe like DaVinci Resolve etc but really we are looking for people who are good with Final Cut Pro and Adobe Premiere in particular we also need Mac and Windows system or operating system technicians whenever there's a technical problem it always falls to me and what that usually does when there's a technical issue that I have to solve is it takes me off of the work that I need to be doing during the week and things have to then go in a linear progression instead of a nonlinear progression and I need to sit and solve the technical problem until it's fixed and I can't do anything else until that is fixed I've put a call out for technical help for a long time and I know this is highly specialized I understand what I'm asking for okay I'm looking for volunteer help as a person who is a desktop troubleshooter who has a lot of experience fixing problems on Windows and Macintosh systems okay you should be familiar with the latest versions of Windows 10 and Mac OS okay meaning Mojave and the upcoming Catalina okay so that's what we're looking for here to be part of our in-house team at what on earth is happening if you are not in the Philadelphia area do not respond to this call for help okay we will put your email in the trash can and empty it all right you will be wasting your time this is for people who are able to come here to my headquarters in Philadelphia in person I don't know how much more I can make that clear because no matter how much I tell people this is an in-house job people from other states you know or other countries continue to get in touch with us and what you are doing is you're not helping because you're adding noise to the signal understand that we understand you are well-intentioned but we are not looking for people who are not or outside of Philadelphia and when you respond to a call for help when you're not from Philadelphia when that's what we're looking for then it makes me and my assistants job all that much harder to actually find people who are legitimately responding to this call for help do you understand okay I want to make that a total you know very clear caveat to this that this is for in-house help okay I I have to do that folks because people still don't listen you know they still they hear what they want to hear and they want to get involved and they have their heart in the right place but they're not listening to what's being asked for okay and I know this is a long shot because hey Philadelphia man I mean this city's getting worse and worse and worse and worse by the second with how brainwashed the population is here you know so I realize we are asking for a lot okay maybe there's one or two good souls out there who want to help than the great work here in person okay so if you have that skill set we need physical butts in the physical seats here in our office in Philadelphia okay I don't know how else I can make that more clear but that's what you are asking for if you are from Philadelphia or can come here on a weekly basis possibly you know multiple times a week please get in touch with my assistant Lia Boone her email address is Lea spelled le IH a Lea le IH a at what on earth is happening comm that's her email address you will be contacting Lea Boone L e IH a and her last name is spelled Boone B oon e Lea Boone at Lea at what on earth is happening calm okay that's who you want to write to if you're interested in being on the physical in house in person in Philadelphia in south philadelphia what on earth is happening team we need some people who have some creative talent here because what I want to do is start incorporating some original graphics in my presentation not just things i snag off of you know DuckDuckGo images or google images or something like that we want to start making some original art here okay and for that we need vector illustrators okay we need people who will help with a lot of video projects that we have on board okay that are gonna take people who are good with video nonlinear video editing software like Final Cut Pro Adobe Premiere DaVinci Resolve etc okay so please if you have those skill sets and you're willing to work on a volunteer basis at least at first hopefully we hope to get some people confident compensated depending on how the one great work network goes but if you are willing to help on a volunteer basis okay please get in touch with my assistant Lea Boone and answer this call for assistance here at what on earth is happening so thank you to people who already have responded and thank you to people who are you know perspective members of the team we appreciate your efforts and you know the the volunteer basis the people have already done this great work on it is absolutely invaluable and I thank them from the bottom of my all right that being said before I jump into the main presentation let's let's switch back over to the computer slides and I want to just go over this meme real quick that really connects with my presentation at an arkadelphia my upcoming presentation called the sacred gift of anger because you know as I briefly talked about last week and just interjected a little bit of this whole Jeffrey Epstein situation regarding pedophilia and child trafficking at the highest levels of government institutions which is all about Satanism at the highest levels of our society you know I talked about my take on it and how this is all about just Epstein was never gonna see the inside of a courtroom you know regardless of what you think happened to him you can conjecture from now until the end of time but he's a member of the big cult that runs the world and the big cult that runs the world isn't having him singing like a burden in his day in court it's just not happening okay they control that because the population is largely comprised of amoral pieces of fucking trash that will do anything that they are commanded to do or asked to do for a big enough paycheck or a big enough bonus enough cash waived in front of their face and they say yes Satanic master overlord whatever you say I must do I'll do that and take your petty cash bullshit you know reward for your honor you're absolutely obedient house slaves amoral action that you want me to take okay because that's how much the to a large extent the vast majority of human beings on this planet are immoral trash and that's why we're headed in the slavery direction that we're headed in because people will not take heat of natural law they don't want to learn it they want to remain ignorant they want to remain just totally and completely oblivious to what's really going on in the dynamics that are really controlling things and ordering things here on this planet and in this universe and they do not want to understand the cosmic consequences for their behavior for all for everyone on the planet and so that's why this satanic cult continues to get away with what they are getting away with because all that karma is deflected away from them because all they are ordered give and people like the people who work at Google who are their globalist slaves doing their bidding for them okay what I'm about to show you should make you angry and see the thing is people will see this and they'll just be like oh yeah that's just the way it is no it's not the way it is or has to be oh it may be the way it is it's not the way it has to be people are behind this this isn't some something that is just set in stone in the universe and you have no control over human beings make these decisions through their free will through their fucked up mindset that think they're doing the right thing and or just know that they're involved in the agenda and want to bring in this control because they're brainwashed and or just just evil people at the core of their being in the core of their mind and heart this is what we're up against this is what the good people of the world whose alleged good people of the world who say they want freedom who say they want a free society are up against but we keep blaming some you know way high up levels up the hierarchy it's the average person who follows orders and just does this immoral behavior that's causing all of this if you don't reach them with a message of natural law because you're angry enough about the behaviors that they're implementing that are creating chaos you're not doing the great work you don't even understand what the dynamic that needs to be done is you know people are just talking about saying how they want things to change well things don't just magically fucking change sorry to break the news to you little boy little girl you know I'm gonna just keep getting harsher and harsher about this stuff because the more and more I see the more and more I realize no one's paying attention to what's really going on hardly anybody I mean I can bring up these dynamics on the street not one person four square miles around have any idea what I'm talking about none they don't even believe there's any such thing as truth they don't believe there is such a thing as natural law they don't believe in objective morality they think it's whatever the fuck you want to believe make it up solemn sysm your whatever you think is your truth is true whatever you think is right is right their total relativists and saw abscess we're all in this city everywhere just about every person you talk to because they have been gotten their souls or gotten their gotten by the government they're gotten by the education system they're gotten by whatever political party total Association egoic Lee you know their whole identity wrapped up in you know they're gotten in every way so this slide is a meme that's going around on social media everywhere I'm glad it's kind of going viral that shows you people talking about the Clinton body count and all the people that were soaked have so-called committed suicide around the Clintons you know since they were some of the biggest drug traffickers in the United States back in Arkansas okay you type in in DuckDuckGo search engine clinton body and leave it blank okay and then start typing a space after that and then all of these results about the clinton body count will come up clinton body count clinton body count fact sheet clinton body count wikipedia clinton body bags clinton body count meme clinton body count what really happened clinton bodyguards Snopes clinton clinton body count snows clinton bodyguard deaths all of these things about deaths related to closeness with the Clintons you know will come up in DuckDuckGo but on Google you type it in and one result comes back Clinton body shop in Clinton Mississippi a car body shop collision center so if you don't think that blatant censorship is taking place about something that is very real but what couple do you know I've a I asked this before what couple do you know on earth that has over forty people connected with them at a friendship level at at a close level okay not just just even associates at a friendship level connected to a couple that you know you that forty people who are friends with them committed suicide over forty how many people do you know at all in your life to committed suicide if you know one two or three that's a lot for most people or if you know someone who knows somebody committed suicide you might know you know five or ten for one imagine one couple and then here's what will be said oh there are high levels of politics so they're under stress and their immediate associates and friends are under such stress well how many people in politics know forty people who have committed suicide let alone couples in politics with forty people around them that have committed suicide who are their friends it doesn't happen even in politics okay you won't find examples of it and so so this is a very real example of censorship and I'm glad it's making the rounds on social media because imbeciles who don't think we're in an era of total censorship regarding these big tech jackasses that our total socialist clowns and total totalitarian assholes okay people actually still trust this institution if you are still using Google as a search engine at this point I mean you're like complicit with communism that's how blatant it is all right you're complicit with total worldwide totalitarianism and worldwide socialism assuring in worldwide communism that's really how bad it is and that is not to take the alternative position to say I agree with the alt-right and the right-wing authoritarians it's all nonsense it's all Hegelian dialectic to get people to just believe in the legitimacy of authority vested in human beings called the government but it's very apparently blatantly totalitarian especially when it comes to socialists and leftists who are authoritarian in their mindset and want government involved in every aspect of life and now they want to control what people are allowed to say I'm gonna do this search in real time so people can say oh this isn't a Photoshop thing let's do it in real time so I'm gonna step out of the presentation I want to go over to my web browser okay and let's bring it up in real time here we go this is the DuckDuckGo search engine I've reconfigured it so that it will show results as you type I usually turn that off there you have it I click in there and there is the result clinton body-count fact sheet wikipedia bags meme what really happened Snopes and bodyguard deaths okay right there with the word body now let's go to google and do the same exact thing so i have the search pre-prepared clinton body in the Google search engine I'm gonna put a space after it as I would if I'm gonna continue typing something and the only result that now comes back is clinton body shop that's it okay right there you've seen it in real time so the meme is accurate as a matter of fact they've even eliminated some results here in in in the search in the google search engine in real time the same results are present for DuckDuckGo so right there if you don't think you're your ability to research is being completely censored in real time by these totalitarian search engines in these totalitarian big tech companies look i i'm on their platforms i'm on youtube okay i'm on facebook I'm on Twitter I'm on their because I'm trying to make people aware of what's going on I'll be on there until they want to censor me and then I'll dump their platform and go somewhere else I don't really care what you guys want to do you're not gonna stop me from speaking and getting the message out cuz you're authoritarian trash and you are evil you are evil people at the core of your mind and heart you're evil all of you and you should be completely ashamed of yourselves you are immoral trash human beings to continue to do this you're not doing anything that's good for people you're not doing anything that's good for the world you're trash you're a moral scumbag fuckin trash okay who thinks you're good and that's what every other immoral piece of scumbag fuckin trash throughout human history thought they think they're that they're good and they just want to impose totalitarian control over other people in their speech up to a point where they're rounding them up and putting them in war camps and we're shooting them in the back of the head you are the fucking trash not the people who are trying to speak truth and learn about what's really going on at high levels of corruption and government including child trafficking and pedophilia to ask questions about that means that you're a good person trying to seek the truth to try to censor research about that means you're an authoritarian piece of fucking garbage and that's what the people who work at Google are that's what the people who work at Facebook are you are immoral garbage human beings at the core of your heart you have a black-hearted evil core to your heart because you don't understand the necessity of free speech at this time in human history and that makes you a garbage amoral human and you should be ashamed of yourselves and your parents should be ashamed of themselves for bringing a child like you into the fucking world it's your parents fault for not raising you with morality you're garbage trash and that's all I have to say about that right now so we're gonna jump into the main body of the presentation for today's show I'm gonna say it just plainly and flatly just like it needs to be said cuz no one else will say it like that I'm the only one who will say it like that so it's been said so let's move to back to the presentation here we go so continuing from last week's show and folks I'm gonna have another caveat before I start because again I'm gonna keep being mr. broken record so put up there and put up on the lower third mr. broken record because that's who I'm gonna be again now and I'm gonna keep being mr. broken record week after week after week after week after week after week okay because people don't listen they don't get it it doesn't matter how many times you say it they want to hear what they want to hear not what's being said okay no episode of what on earth is happening stands on its own every episode that you watched it as a current episode every single episode that has preceded it is a prerequisite requirement to understanding the information that is covered in the current episode this episode is a continuation from last week's specifically but to understand it you really should go through the previous 219 episodes because this is show 220 and that doesn't mean every show doesn't have different information but it also doesn't mean like other podcasts each podcast stands on its own what on earth is happening episodes do not stand on their own they have information that I have built upon in previous episodes that you need to go back to to understand what I'm talking about in this episode so I want to show you I'm gonna step out of the presentation again go to my web browser I'm going to bring up the water on earth is happening calm website okay so let's go there okay and I'm gonna click on actually let me even make this full screen and I'm gonna click on podcast the podcast section okay first of all I've changed a couple of things here okay and when you click the podcast section now anchored to the top is the subscription section which has a caveat paragraph underneath it which says episodes of the water earth is happening podcasts are listed here in reverse chronological order newest first okay meaning the newest episode is first to 19 which is posted as of last week to 20 will be posted tomorrow okay and then you go backwards to 18 to 17 etc okay so you go backwards chronologically if you are a new viewer or listener you should not start with the most recent episode since newer episodes build upon material that is covered in previous episodes can I make it any more clear in the English language okay because this is what I've been talking about since day one and I still have people saying how could I listen to what this guy is talking about in this episode because you can't listen to the new episode and understand you have to go back to the old episodes and listen in order at your own pace you should click here to start with episode number one and work through the podcast in order at your own pace now if you click this bright bold red link okay because that's the other thing people like flashy stuff in front of them they have to have their eyes wowed you know maybe we should make a gigantic banner at the whole top of the site cover up where it says what on earth is happening put it in big fucking bold red letters start with podcast number one then go to two when you're finished number one when you're finished number two then go to three do you understand you know I mean I really feel like I'm talking to a whole population of people with like very advanced down syndrome you know I'd say it's a sad fucking thing to have to say week after week after week that the podcast is not meant to be listened to out of order or watched out of order and yet I'll still have people I don't understand what you're talking about in podcast number 79 mark well maybe because you didn't listen to one through 78 people are just really I mean their brains are burnt burnt hard burnt hard burnt to a fucking crisp due to the radionics the bad food the chemtrails that the the the smog and carbon the the hydrocarbon exhaust in the atmosphere that they breathe in every day the GMO foods the lack of exercise sitting in as a sedentary lifestyle disconnection with nature and you can go on and on for why their brains don't work but you know why the number one thing they just want to hear what they want to fucking hear they don't want to hear what the actual truth is they want to hear what they believe already in their own mind and they don't want to have their mindset challenged and altered because they want to believe they can change the world without changing themselves and their own mindset so if you click this link okay which I'm going to do let me just go back and do it in real time okay you click this link right here that says you should click here to start with episode number one it now will take you to a section that I have set up called podcast in order okay you could see that up in the URL here it says podcast in order after the slash of what on earth is happening calm okay podcast - in - order okay so that's the URL to go right there okay so the same subscription section is there except it says the opposite episodes of the water earth is happening podcasts are listed here in chronological order oldest first since newer episodes build upon material that is covered in previous episodes you should start with episode number one and work through the podcast in order at your own pace the most recent episodes of what on earth is happening can be found here and if you click the word here it takes you back to the way that the podcast is set up on the main podcast page now that being said I have also changed the button so I want to let people know that so see this button where it says what on earth is happening podcasts start the journey to true spiritual awakening click here okay this button has now been redirected for new viewers coming in ok if they click that it goes to the podcast in order page the main tab still goes to the pod to the newest episode first okay so I've kept that so people who are existing viewers you could just click the tab if you're a new viewer and you happen to hit this button here you'll then be taken to the podcast in order page I think that's a nice compromise for everyone the way the interface for the site is set up right now at some point in the future I'm going to completely have what on earth is happening redesigned with a super modern slick adaptive interface that's coming down the line probably early next year sometime so we'll see what happens with the one great work Network and how that whole situation goes and then hopefully I could have the water on earth is happening site read a lot redesign with a nice modern content management system so that's uh that's some of the plans we have for the website but you know more of that later all right so we could jump back into the presentation and this is the title card for the presentation Tesla and humanity's missing paradigm shift originally given in New York City as part of the Nikola Tesla conference hosted by the Tesla Science Foundation you could actually the Tesla Science Foundation at their website Tesla Science Foundation dot we had a problem with our streaming software it looks like we're probably restreaming I apologize for that we had a crash of our streaming software so I'm letting my producer get things back up properly okay and if you can fix my monitor as well yep and just if you can make that fullscreen for me and you have to put the go back in window you have to put the yeah that's good you have to put the card on the black interface underneath the window you accidentally turn that off when you go to the windowed interface I apologize for the technical difficulties folks this happens from time to time you know we're not a perfect operation here we're doing the best we can with the budget that we have thank you okay so hopefully we're back streaming on all platforms I if you guys could let us know if we're streaming on all platforms we're at least this is at least being recorded and so we will have a full podcast you know I'll have to edit that back together but you know it'll be what it is okay so we are back at the title card for this presentation Tesla and humanity's missing paradigm shift I gave part 1 last week to today hopefully I can continue well and finish up part 2 I believe I should be able to finish it within the time allotted today hopefully and then we'll take your calls on this we might even do a full call-in show on this topic next week but we'll see how things go okay so I'm gonna jump ahead to where we left off in the slide presentation last week let me just pull up that slide there we go okay we ended off on this slide of the presentation called why hasn't humanity's paradigm shift that was being talked about in the late 90s early to mid and late 90s not happened why hasn't this occurred in human society why are we still at the place that we really we're back at that time period when the paradigm shift was being talked about this change in human consciousness was being heralded you know you hear people talking about it today they don't call what the paradigm shift anymore they just call it the awakening okay like the awakening of humanity and you hear oh everybody's saying Oh humanity's awakening we're they're really getting this you know and I don't know what planet they live on I say this over and over again not to discourage people you know but I don't see the evidence for it at least not here look I think if you're gonna have a gauge to have a basis you know to measure the awakening of human beings do would you believe in your mind if you're going to conduct some sort of a scientific investigation regarding whether that is actually occurring would you go to the least populated centers of the planet or would you go to the most populated centers of the planet would you want to go to where human beings are congregated and concentrated or would you want to go to the place where so few people live that it's negligible compared to where the bulk of human beings live on the earth where do the bulk of human beings live on the earth do they live in the most rural areas and sparse areas where there's not that many people or did the bulk of the does the bulk of the human population live in concentrated cities in urban environments well it's like over ninety percent of the human population lives in urban environments now certainly in the United States that's true whether that's true for the rest of the world exactly at that figure you know it may be a little lower than that but I guarantee you in westernized societies which is what this audience really is that's who I'm talking to people who have access to technology I listen to an HD screen to watch an HD stream in real time we'll go to pull up a podcast series on their computer we're talking about a westernized society Western civilization okay that has access to technology you know total sanitation and clean running water toilets etc we're not talking about you know third-world countries where you could say oh there's very dense populations there especially in their cities but if you're gonna try to really gauge whether a human awakening is taking place you're going to go into the the most highly concentrated population regions which is urban environments in Western civilization and you just do brief very brief social experiments you're going to be horrified by the answers that you get of where people are at and I've done them see don't don't you know try to speak before you've done your own homework you want to really understand what's going on socially in in the minds of human beings around you do the social experiments that I've done and get the data so you'll see some of that data presented in teaching natural law my workshop at Ann arkadelphia we're gonna have some of that data for you about where people's mindset is that from social experiments that we have done in real time right here in the city I'm from and you'll find if you're being honest with yourself or if you just do this enough you could do it in any area and the results will not be drastically different because the human population has been brainwashed similarly no matter where you go no matter where you go and I'm going to show that in the documentary mark passio and the science of natural law we have clips in there man on the street interviews that show you just what people still believe everywhere you go it doesn't matter where you go so don't tell me any awakenings happening because I've done the actual social experiments and I have the numbers I know the dynamics that would need to be present for an awakening to be occurring and I know what the actual numbers regarding where the human mind is actually at regarding the true state of awakening and let me tell you something there's no such thing happening once again I do not say that to discourage anybody to get them depressed to make them you know want to give up I tell them that because it's the truth and in order to change something for the better you have to know where the dynamic is currently and you have to gauge it and assess it honestly you don't try to see what you want to see you have to see what's really there and guess what that's one of the hardest things for people to do because it will show you what the great work is and most people when they see where we're really at as a species and they see what the work is to do you know what they say fuck it it ain't worth it it'll never happen it'll never get done based on how fucked up humanity is that's what most people say except the truly crazy ones like me that say I'll be here no matter what happens to my body continuously doing this work from now till the end of fucking time if necessary because that's what someone who has really committed their soul to performance of the great work has committed to no escape no going anywhere else until this mission is accomplished and until someone has developed that much willpower has hardened their mind body soul and every other aspect of their personality to commit to the work no matter which direction it goes prepare for failure okay until you've developed your willpower to that preternatural extent to a superhuman extent prepare for failure okay so why hasn't this paradigm shift already happened here's the reasons most people still believe in authority and that authority and government are morally legitimate and necessary we ask this question over and over again in the man on the street interviews for the natural law documentary people believe government and authority are perfectly legitimate they exist in nature naturally and that they are absolutely necessary or human beings will go into a state of total and utter cos they still believe in the legitimacy of the left versus right political paradigm which means they believe in slavery they don't understand the government is slavery and they believe government is necessary to prevent chaos and coercion when government is coercion slavery and therefore chaos we're gonna apply more and more chaos to get rid of the chaos yeah it'll work like that once again I want to I want to have this water in this pot but I want to turn it on a boiling flame until it evaporates away and I still want that water to be perfectly cool with the flame under it not evaporating when I put my hand in there I want to I want to put my hand in a boiling pot of water and I want it to be ice-cold well good fucking luck because reality doesn't work that way ignorant shit you know and people just won't say it to people like that you don't understand the laws of nature you don't understand the dynamics of consequence as as to actually how they really work here on earth and throughout the rest of the universe you don't get it you haven't studied it I'm one of the only people that will just come right out and say it like that to somebody's face just like that again I go on again I'm still going on I'll turn the so-called alternative media just about every day just trying to find something to listen to and it's like I mean what is out there people it's it's it's it's so bad you can end up just vomiting over the sink or in the toilet that's how bad it is I mean I just can't believe there's this just that much swill and garbage all on the alternative media that aren't talking about first principles not talking about first principles and natural law it's horrifying then you have other people out there that want to blame one group of people it's all the Jews it's all the Freemasons it's all the zionists it's all this since all the Jesuits it's just the Vatican this oversimplified totally unit dimensional way of thinking about the entire world control situation and they don't understand the dark occult they don't understand how it's all a hierarchical network that's worldwide interconnected interconnected societies orders institutions organizations connected with intelligence agencies connected with the religion connected with medical organizations drug cartels pedophilia big banking big business Big Oil big pharma all connected interconnected dark occult secret societies no people don't want to understand that's how it works cuz that's complex they have little shit baby boy baby girl pooping their diapers thinking you know that hasn't hasn't developed a more complexified way of thinking about how the world structure really works together think-tank organizations you know social engineering Institute's like to have a stock they don't want to understand how it all fits together and works together as a hierarchical organization and a framework that guides people's thoughts the way they want them to think no that's too complex they want to reduce it to oversimplified notions like it's all just the zionists is that a bad part of the world control system you damn well better believe it and you need to understand it and study it that doesn't mean that's all there is to that would be like me telling you it's all just the Freemasons or it's all just the Jesuits No are they is it is that important to understand and to study absolutely and I've talked about that in presentations I've talked about that right here on what on earth is happening I've talked about the Jesuit Order I had at a preliminary basis as part of a wider a study in fake-ass Christians I'm not telling people don't look into all of those things you have to but to just try to reduce it to just one thing you're oversimplifying everything and you don't understand how the world structure of control really works because you don't understand the occult and how it works the second reason to Pete the paradigm shift hasn't happened is because most people in the world still believe the mainstream media still believe that the mainstream media and its pundits are telling them anything resembling truth and you go out do a man on the street interview maybe if you're from a super conservative rural area that won't be the case and people are aware that the mainstream media is duping them and lying to them but walk out in any urban environment and say did you watch the news you pay attention to mainstream media and either they're watching television news in some form or another regardless of what network it may be or they're reading government approved newspapers they're reading mainstream media newspapers and magazines and then they'll say they're informed now you're about as informed as a sack full of fucking hammers okay that's about how much you know about as much as those hammers do you know and you're a lot less useful to the world the least that hammer is a tool you're a tool but it's just in a different way and a lot less useful of a way you're a tool in the same sense that you're useful your masters most people still believe that the purpose of mainstream science which I call scientism is a genuine search for truth and the betterment of humanity through the understanding of nature and the development of new technologies no that's not what science in the modern world is about it's about the opposite it's about occulting and under a genuine understanding of nature and the development of new technologies because science is controlled and operated by occultists and mainstream science is all about getting approval for government grants getting government grant money so you can continue your hamster on the wheel form of science going round and around just to get that money for the next year but for making no progress you know and then all these so-called scientists want to say they're good people you're a moral fucking trash taking money from the government which is stolen loot stolen money at the point of a gun to somebody's fuckin head taking it so you and your family can be comfortable going around on the hamster wheel of government grant money piece of shit but no no one will say that no one will say that to them there they're good they're just trying to put food on their table for their families you're taking stolen money from the government through grant money and you're going on an endless fuckin cycle like a hamster and a rat wheel progressing science not one iota and if you think you are you're a fuckin liar to yourself most of all let alone blow and smoke up other people's ass I don't want to hear that there's any real science going on in institutional bodies you guys are covering up what's possible and you want to say that's conspiracy theory you're a piece of fucking garbage the conspiracy theory is what you're pushing that you're pushing real science that you're actually conducting real science that's the conspiracy theory asshole I'm done with I'm done with people believe in this garbage shit okay I'm finished you're not you're not getting the old mark passio back ever who was very calm and had a maintained to calm demeanor I'm channeling all my rage about what's going on and how fucking dumb people are for believing this nonsense you're as dumb as dogshit okay I'm gonna keep saying that week after week after week after week until you get up off your ass and you start changing these people's minds by putting this in front of them so undeniably that it's everywhere and cannot be escaped that's what our work is to do not to run away or say I want to get off the planet you're a fucking coward if that's how you behave or to say this is all just about what happens after this life no it's about the work you do here to change it in the here and now that's real occultism that's real spirituality this is see that's the whole problem is escapism saying I want to go somewhere else where my soul can progress your soul ain't going anywhere else but the earth until you end slavery here boy and girl that's exactly where it's coming and staying and probably until you make the vow to say I'm going nowhere else you're gonna probably forget a lot of your past experiences and they're not gonna come back like that in the next incarnation you're gonna have to go through it all over again you achieve real self mastery by understanding that your work is here on the ground on the earth in the now then maybe you'll come back more empowered than the last time you somebody was shat out of their mother's womb okay so I'm just gonna get harsher and harsher about this stuff because the so-called big boys and big girls really haven't grown up they just think that they have but they don't really know what the goal is or where it's to be done most people still believe that the purpose of the so called education system is to edify and enlighten people through genuine knowledge and here's the other thing people still send in their kids the government schools thing you know they're gonna get that education they're believing and the people who work in the education thinking you're part of the solution you are teaching a government grant money funded curriculum to indoctrinate students into believing what the government wants them to believe you're not doing any real education if you're teaching inside the government approved curricula you're lying to yourself trash lying to yourself trash okay I want you angry I want you mad at what I'm saying if you're not you see if you're asleep and you're not getting mad at what I'm saying you're not waking up the first step of waking up is that you have to get angry about the truth you have to get angry about what you've been involved with Punk you've been poked you're a punk bitch that's been punked okay you've been clowned Out Boy clown out girl and you don't even get that you're clowned out if you're a member of these institutions pumping out the shit they hum bow all you got to do is look at the result are we an educated population or are we dumb as a bag of fucking hammers societally Oh where's the teacher saying this no cuz you don't want to lose your your tenure or your your pension or whatever the fuck you're waiting on you don't want to lose your benefits cuz you're a little boy and a little girl who won't grow up grow a set of fucking balls grow some courage and speak the truth and reality will stay the same and degenerate into worse and worse states of totalitarianism and slavery until you grow that set of balls okay you know the sugarcoating is over here on what on earth is happening all over okay we did that for way too long I hurt people with that shit I hurt people by not showing in my real personality hurt them I'm making up for that now okay because I sugar-coated enough for people to take some of the information but I wasn't hard enough on them that's what happened you know and I still want to walk a line where I don't let my anger eat me up I'm trying to put out a message to the people that will get it that have a strong constitution and will to move forward there will become the teachers that are needed you know I see maybe one every six months a person newcomer starting to teach natural law maybe one person every six months comes along and I watch a video by them and I'm like I'm impressed you think that's the rate that it needs to be at to make any appreciable progress in the world situation you're out of your fucking mind when I go on alternative radio and every person I hear is talking about natural law I'll tell you the alternative media communities doing a good job they have their head up their ass that's where it's at right now okay so back to the final point of this slide most we'll still believe that the institutions of religion banking medicine law law enforcement military and just about every other societal institution exist to do what they claim they exist to do meaning they believe that their ostensible purpose is their true purpose as I covered on episode 213 the ostensible purpose of modern institutions often has absolutely nothing to do with why that institution truly exists and what it is actually set up to do society you have to learn the difference between a sensible purposes of mainstream institutions and their true purpose in society which we covered on that podcast I believe it was to 13 to 13 or to 14 I think it was to 13 what all of these things constitute and are all ultimately comprised is a system of false beliefs that is still widely believed and accepted in our society as a whole and if you tell the people know you have the religion you are the believer you are the non scientifically minded human being you are the one who is operating on faith alone when no evidence evidence suggests exists to support your position you are the religious cult believe believer and follower not me I'm not the conspiracy theorist the conspiracy theorist believes the mainstream media is telling them the truth about Jeffrey Epstein okay that's the mainstream that's the conspiracy theorist of the world not that alkali alkaline earth metals from the periodic table are being combined with aluminum and other soft metals and sprayed into our atmosphere that's not a conspiracy theory that's actually occurring it's not a conspiracy theory that high levels of the government are run by pedophilia and child traffickers Pettifer pedophiles and child traffickers that's not a conspiracy theory that's the fact of life on planet Earth in the 21st century the conspiracy theorists want to tell you there's nothing to that because they are putting out the government approved conspiracy theories that everything is fine the mainstream media has your best interest at heart and the people on there want to tell you the truth and most people believe I don't except for a moment that the bulk of the population doesn't believe what the mainstream media tells them about Epstein you'll say that for a day because it's cool and then don't just repeat to them anybody believing in this conspiracy death what had conspiratorial aspects as a conspiracy theories and they'll go yes ma'am yes sir we're not to believe in the conspiracy theory we're to believe in exactly the narrative that you put forward just like what we tried to tell him about pizza gate pizza gate actually occurred and was real folks it was about the emails that were pulled from the Podesta email server that they say is a crime to commit no the crime is the pedophilia that was all documented in those emails not exposing those crimes that's not a crime I don't give a fuck what they say what government says or what the mainstream media says fuck you we're going to own them we're going to spread them we're gonna propagate truth no matter what you say the problem is people are not angry about that situation people aren't angry that the bulk of the population believes all these false beliefs and because they're not angry enough they're not doing something about it they're not channeling that anger and putting it in the right action of speaking the truth out into the world that's why there's only like four or five people teaching natural law on earth in any kind of a way that is halfway decent when there should be four or five fucking million by this point at least well I'm not supposed to be bitter about that that I've conducted that I've given up my life that I want to live and the comfort level that I could have had to do this shit see that's the problem yeah my producer signaling me to show people what my shirt says yeah I just got this this week let me turn into it there we go says me and my homies would have been stacking bodies by now you know that's that's really the attitude that needs to happen we need to make these people afraid of us not the other way around you should be very afraid of me cuz I'm not afraid of you you know I don't give a shit what you think of the founding fathers our George Washington how about that that's not what it's about ass not what it's about it's about the idea the idea of freedom that okay they didn't go all the way well guess what we'll stand upon their shoulders and we will go all the way I don't put them up on pedestals as gods if you think I do you don't know what the fuck I'm talking about you don't know what my work is all fucking about you believe what you want to hear it's a it's a a symbol and an idea that needs to be taken to a further level of consciousness and manifestation did they get it all the way absolutely not do most people today get it all the way absolutely not I talk about this all the time how how do vegans actually still believe in government that's one that boggles my mind oh I know they're brainwashed and it's a religious belief system to them but they could so fully understand how will enslave the animal kingdom but they can't understand how government is slavery to the human population and then anarchists don't understand what we're doing the animals and so they don't want nothing to do with eating a plant-based diet you know and people go you can't be healthy on a plant-based diet folks do I look unhealthy to you do I look not strong to you do I look like I could not handle myself to you do I look like I'm afraid or weak to you you think any of those things you better have another thought coming to you I eat a fully plant-based diet and I'm about I could whoop my 19 20 year old self in all heartbeat second my 20 year old self Wharton last 1 second with me in my body today ok so it's all about whether you do it right or not and that takes a huge intake of knowledge and this is the whole problem folks this is the whole thing that most people don't want to go through that process they don't want to go into the knowledge all the way they want 1/2 ask the knowledge and then they have asked the proposed solution that's why you have people out there that say they want freedom that say they want free energy and they still believe in authority government the mainstream media the mainstream education system mainstream science religion banking law law enforcement military and all the other institutions because they are religionists religion does not mean believing in Christianity Judaism Islam Hinduism Buddhism etc those are the cultural religions and I'm gonna keep saying this over and fucking over and over and fucking over and over and fucking over like a broken fucking record religion means more than you believe that it means it means being caught in false belief systems about how the world works that's religion it means you believe that the violence and coercion and slavery of government is morally legitimate which it never can be that's religious belief it means you believe in all the other institutions money you know the education system science as scientism all religions that hold you back from where you need to go in your understanding in consciousness to understand your world and the role that you play in the world and the dynamics of consequentialism that are at work in the world natural law the laws of cause and effect through behavior so moving on to the next slide yeah let me step back one sorry I'm gonna just go back there okay it just wasn't the transition wasn't working properly there we go there is simply no polite way to tell people that they've dedicated their lives to an illusion and it doesn't matter you know I I don't really know this gentleman's work that well daniel dennett but it doesn't matter who said it all that matters is that the statement is true this is a meme just pulled off the net you know but it's absolutely true and you have to stop trying to baby feed it to them you got to tell them no you're brainwashed no you don't understand what's going on you think you do but you don't you need more information you need more knowledge you don't have enough knowledge about what's taking place you haven't looked into it deeply enough you look into it in a cursory way for the soundbite that you don't but you don't dive into the deep water that takes time and persistence I see people I see people all the time who finally get a glimpse of what the great work really is you know they do 180 degree turn around you keep going that way I'll be headed this way that's what they say whether they verbalize it out loud or whether it's going on in conscious or subconscious minds it doesn't matter you can tell they don't have the will because they'll say this is how much effort is involved to make this create this little change in the world yes actually even more effort than you think because you don't see all the aspects of it and most people go fuck that man get that away from me I want no part of it and that's exactly why the world stays enslaved because we don't have the willpower to follow through to push forward and let me tell you something folks it takes its toll on the people who are doing the work because what we end up thinking is what are we doing this for for who for what why bother to continue when nobody will get off their ass and help or so few will get off their ass and help it's not it's not worth it because it's not going to accomplish the end goal and if you're not in it to accomplish the goal what are you doing anything for why would you set one foot toward a institution of a project if you're not in it to complete the project so all this about don't want the goal that's bullshit spirituality too you have to want the goal badly enough that it drives your behavior to push forward until you achieve the goal that's what manifestation in the world is all about it's not about just wishing it and saying oh well yeah we may never get to that but but you know in the physical world this is the goal I'm not talking about perfection I'm talking about ending an imbalance that should never have arisen called slavery which is an unnecessary imbalance in the world if you think slavery is necessary you are fucking sick you're sick you're so sick if you think it's necessary if you think government and slavery are necessary to teach some lessons you are a fucking sick person mentally emotionally spiritually you're ill you're mentally ill you're spiritually ill your heart sick your soul sick the regular experience is in the physical plane are enough of the whetstone to sharpen all of the things that we need to sharpen in the physical domain our will our spirit our emotions all of it you don't have to go into such a level of imbalance to produce slavery so that you can't progress in consciousness absolutely unnecessary some of the people who I think are some of the most spiritually imbalanced when they go off into statements like all thoughts should cease like a car toll a you know also get part of it when they say evil is only necessary until people realize that evil isn't necessary if you have to be willing to discern and pick and choose and look at is this statement actually spiritually correct and absolutely truthful is this statement about we have to obliterate human thought to become enlightened true no it's a big crock of bullshit because he's too right brain imbalance to realize that we need thought as a tool in our tool set here on earth to accomplish the ending of our slavery what does that mean you throw everything out somebody says just because they're wrong about some things see this is where people go I don't like one thing you said so I'm throwing out all your work it's a baby fide little baby position you don't agree with one thing that I agree with and I think it's true so everything else you say you're a fucking idiot and you're it's all nonsense it's such a baby fide position it shows how emotionally immature people are in our community our so-called community we don't have any fucking community and honestly to tell you the truth if the world wasn't enslaved most of the people in this community wouldn't be in my quote Friendship Circle and/or physical presence I wouldn't choose you see in hard circumstances you make choices to associate with people you ordinarily wouldn't and that's guess what is that harsh you're damn right that's harsh it's cold it's cold I think about how many people I know and have known in the in the whole freedom community so-called freedom community that if we were all free would I have one thing to do with them and the answer is probably nine out of ten no would not be even associates let alone friends with I get as offended as you like doesn't matter to me I'm not here to be your friend I've told people that a thousand fucking times we are here to accomplish your mission not to be buddy-buddy friends and all all social and oh lovey-dovey I could care less about any of those elements if I happen to make a good friend along the way wonderful it's an added bonus that's not what I'm here to do it's not what I'm looking for I am here to get the work done of ending human slavery that's the great work alright let's move back to the slides so most people in the free-energy movement still don't understand the free part there is no free energy movement there's people who want to create inventions so that they could have patents and profit from something that they hold back from everybody else that's what the Furret so-called free energy movement is and don't tell me that's not what it is that's absolutely what it fucking is I've talked to them myself I don't need I don't need it here in book knowledge I've actually spoken to people that that's their mindset and they're all too happy to come out and tell you that so that's my mindset and when I when I say back to them you ain't creating freedom or free energy you're creating more slavery then they want to get all offended you don't understand the free part cuz you don't understand freedom freedom isn't turning an invention over to government so they could use their violence to stop anyone else from using it so you're the only one that can profit from it that's called slavery that's slavery not freedom I just have to laugh at all the people in the so-called free energy movement that believe patents are the way to go you're smacked ass clowns okay I'm gonna start getting hard on them I'm gonna start getting hard on the people in the New Age movement I'm gonna start getting hard on people in the anarchist movement I'm gonna start getting harder on people in the you know exposure the disclosure exposure of extraterrestrial intelligence UFOs aliens all of that we need to get harder on all these people because here's the one thing not one of them or practically none of them in any of those communities so-called communities understand you don't understand freedom and natural law and how they go hand-in-hand together and because you don't understand that occult knowledge you're helping to enslave the world through your behavior and your mindset and you don't understand that and I'm not here to be look I'm really I'm done with a lot of stuff folks I don't know how many more conferences going to go to I might just do my own events here when I want to do them I think I'm done with after an arkadelphia I'm finished with all conferences I'm not attending anybody's conferences I don't want to go I don't want to travel I don't want to go anywhere I'm gonna find a venue that'll let me do smaller presentations here in Philadelphia on at rare time schedules when I build up the presentation to a point where I say yes it's ready to deliver on no timeframe and then I'm gonna book a venue and deliver that presentation because I don't well I don't want this Kim I really don't want this false community around me anymore it doesn't do anything for me quite frankly and I hope people do take offense and insult to that it's you should be offended sometimes you need to be offended you know I don't see us doing any progress I don't see us making any progress what I want you to do how about a tan arkadelphia you come okay and then maybe stay for a little while and walk around the fucking city and talk to people in this city and you'll see what I'm talking about then you'll see what the great work is to do cuz you probably live someplace where you're around this really small tight-knit group of people or your only friends or people on the fucking Internet and you don't interact with the real world the real physical world around you that's what the Internet has done it's made people all huddled and fearful in their own homes oh I'm gonna stay here to tap away on the keyboard for a little bit that's what it's made us into not people who go out and actually see what people's behavior is like all around them on the street because if you did you'd be horrified and depressed about the real state of humanity instead of believing everybody's waking up like the 5 fucking people on your Facebook feed are and then you want to extend that to the rest of the world because this is your whole community so uh yeah sorry I accidentally just pulled out of my slides let me go back to that so you know this is this is the state of humanity where we're in a completely lockdown prison society rapidly progressing to an over our prison planet instead of a covert one and you have people in the free energy movement that say we're gonna work through the government and through patents to get free energy I mean hold on a minute like you know I have something for you just just cut away to the just the regular yeah cut away from that yeah that's fine okay I got something for everybody hold on let me show you something alright let's cut back to my computer fullscreen here's the free-energy community yeah we're gonna uh we're gonna wear and invent all these great inventions are gonna be all about free energy and we're gonna do this through the government the government's gonna approve everything we're gonna have patents for all of it of course you know oh I make these patents and the government will give us the rights to the patents right and then once we have the pants we're the only ones who are gonna be able to profit from all of this right but then we're gonna have it put out there by the government cuz they're gonna see how great it is right they're gonna see how wonderful all these inventions are and how great and how much humanity needs them we need them for our freedom and so then the government through the patent system we're gonna put out all of these free energy devices everybody and everybody's gonna be free that's how it's gonna work yeah yeah you smacked asses smacked asses and there's no polite way to tell you that you've dedicated your life to an illusion there is no polite way see I didn't I I dialed it back right like I dialed it back on the info war show admittedly I dialed it back when I have a totally new audience I'll dial it back a little this ain't that folks this is for the people who have listened and watched what on earth is happening podcasts number one through 219 that's where you're at now that this is what you're going to get now yeah oh it's humorous at some level I'm trying to inject a little bit of lightness into it but it's not really that funny because we aren't making progress in our understanding in consciousness we still think the same thoughts we did

20 30 40 fuckin years ago and think magically we're going to change the world and that's the problem everybody wants to change the world but they don't want to change their own thoughts and emotions and actions they think they're gonna do that that's gonna happen magically and the government is going to be the the assistants in this process right they're gonna Matt Nate because they want to help us so much they want to make things better they want you fucking enslaved Dundas that's what government wants and there ain't no polite way to tell you that if you've dedicated your life to the illusion that government wants to improve the quality of life of human beings on this planet you're all fuckin dunce and you are a religious cult follower and believer and all the people who believe that in the free-energy movement you spread this podcast around or the whole free energy movement because that's what you need to hear your dumb fucking dunces that our religious cult followers that believe in the cult called government and actually think they're there to help you instead of fucking enslave you dunce all right so I was respectful of the Tesla Science Foundation to go up on their stage that they invited me to and dial it back a little bit and present this as politely as I could well this ain't their stage this is my stage now what on earth is happening is my stage okay and now you're getting the real mark passio you're getting Mark passio from the founders not mark passio of old what on earth is happening a claim all right because there's no time to put it politely anymore you don't understand where we are you know I said a long time ago almost jokingly I should change the name of the show from what on earth is happening to what in hell is happening but guess what it's not a joke anymore folks we're in hell this is hell Earth has been turned into hell this is what the the metal singer that I call the the philosopher mage of heavy metal Ronnie James Dio said in the song heaven and hell it's on and on and on it's heaven in hell we have the choice we have the freewill choice to either create a paradise or prison on earth it's both heaven and hell and it goes on and on that that choice is continuously renewed in the present moment that's why it's a gift the present of the present moment of free choice free will that is gifted to us by the creator of the universe to create anything we want to create and here's we're choosing to create a fucking prison out of what could be a paradise planet and and I'm not supposed to be angry about it right I'm not supposed to be totally calm don't get angry that's what the New Age movement and bullshit religion will tell you if you're not angry about the situation where we've been given the freewill to create anything within our imagination and we chose to build the prison you are spiritually broken as a being if that doesn't produce any anger in you in your physiology you are broken and you are have fallen for their bullshit satanic agenda if you have no ability within your body within your physiology to feel the emotion of anger present inside of you that means they have disconnected you from a gift of the creator of the universe your full range of emotions and emotional intelligence because if you don't believe that scenario shouldn't make you angry you are brainwashed and undermine control and you're under emotional mind-control and there's something physically wrong with your Anatomy you're in your brain your midbrain isn't working properly now that isn't to say let it go crazy to a point where you cannot control it and you're making yourself sick the point is what am i doing with it it's like you got to look at it like combustible rocket fuel this is what I'm going to explain in the sacred gift of anger you

have to look at the gift of anger as something that's going to drive you forward as you burn it and take you from one place to another you don't just light it where it's at and it goes nowhere you need a vehicle for the expression of the anger this is the vehicle for that expression what I do here and if you really listen to what I'm saying and you detach emotionally from it you will hear the truthfulness the the veracity of what I'm saying this is part of escaping the mind control is being able to listen to somebody say something to you in all different emotional states whether it be anger rage fucking total bliss and niceness or whatever other state in between humor but you're not listening to the emotion you're listening to whether the information is true or not and that's what everybody in our society the vast majority of us have been conditioned to do is not listen to the veracity of it but just hear the tonality of how it makes them feel how the actual word vibratory energy that hits their ear drums makes them feel when it gets converted into electrical impulses in their brain they're not listening for the truth they're listening for the tone how does it make them feel that's why they're playing on this mind-control dynamic in the mainstream media and on the nightly news that's why they speak with such sweet tones but they're telling you bullshit continuously the goal isn't to go and do their same exact tactics like that we need to shake people out of the trance by showing them you hear it like this as they how they talk on NPR then oh we have to do what our government overlords have commanded us to do this week because they know it's better for us right but if I tell you you're a fucking brainwashed cult member like that suddenly oh that hurts how could he be this angry and say something like that but you'll go and listen to the brainwashed Order follower on NPR speaking with the sweet voice loving you you know like the Pied Pipers leading the rats to slaughter the idea is to physically hear it like that and make the mental Association to break that bondage that emotional bondage that is saying to us only when we hear things presented in a wonderful sweet matter should we accept it as being true that's called mind control that's emotional mind control there's a huge part of this presentation on Tesla and his technology because the people in the free energy movement are also under this mind-control and they want to hear what the same thing that they want to hear they just want to hear people tell them you're doing so well your daughter it's so wonderful is what my friend Michael came over last week and told me he's like yeah all the people with the free energy would think that there's doing so well until they hear you then they realize there's a whole nother level they have to go to and I'm like thank you that's a great compliment I don't want to be known for making everybody feel comfortable and wonderful about what they're doing unless they're going all the way in their understanding and then hey if they are like that then I do want you to feel wonderful then you're doing the right thing in the world but I can count those people on two hands especially in a movement like this unfortunately and the same can be said for the new-age community the same can be said for the UFO community and especially the anarchist community I mean a little bit more get it in that community but not by much percentage all right so let's move on so what is the main thing holding people back in the free energy movement it's their belief and authority just like it's the same thing holding people back in just about every other aspect of life it's the big cult authority is an illusion of a diseased psyche based entirely in violence and built upon the erroneous and dogmatic belief that some people are masters who have the moral right to issue commands while others are slaves who have a moral obligation to obey the masters the belief in authority is the world's most dangerous religion and as I like to call it it's the world's most dangerous cult if you believe in authority you are a member of a cult whether you accept that or not as being true nothing will ever make that statement untrue that's the objective inherent truth of the universe not because I said it because that's exactly the truth of what is objectively and inherently within creation imagine being forced into religion that you can't opt out of it's called government that's what government is based upon the belief in authority which is a delusion of a mind controlled disease ease the mind which is built entirely upon coercion duress and violence none of which can lead to freedom all of those things only lead to chaos and slavery that's it chaos slavery and death are the only things that belief of authority can lead to according to the laws of the true laws of attraction and manifestation inherent in the universe which is natural law which the free energy community has absolutely no fucking clue about I could talk about this with them with the vast majority of them with the night and day for hours and hours daily and they have no understanding of it because they are not Oh cultists they do not study the body of knowledge known as ocultism because they're bullshit other cultural religions have told them that that's evil and you should never look into it when it's really the understanding of the human psychology and the understanding of the hidden laws of nature that the bulk of humanity have not been made privy to and that's why they keep living their lives in a mindset of total illusion and creating chaos slavery and death because they don't know those laws of creation and this is how it goes they believe in authority in the old world this is the old world order as I call it authority vested in one that's the old world order all of the power concentrated in the hands of one being who is like God God's representative on the earth he has the Divine Right to rule which came out of our ancient human ancestry and human origins of the beings that were here calling themselves the gods saying that they had the right to rule over us they had no divine right they just had advanced technology that made them look like gods that's all it was so advanced it was like magic you know and then what they tell this story over and over and over again throughout in many different storytelling methods and and venues throughout human history you know the man who would be king you know just about I mean there's hundreds of them the road to El Dorado you know what else there was actually an episode of Oya dura bout to Ferengi that go in are worshiped as gods in the Delta Quadrant in in Voyager you know on the other side of a non stable wormhole I actually just rewatched an episode that was about this and I reminded me of the whole story of Enlil and Enki you know the two gods who wanted to be worshipped as you know the two extraterrestrials that went to a non advanced planet and they wanted them to be worshipped as gods that's where the god-king story came from Emperor's kings pharaohs so all from the same place believing that their God on earth this is the origin of government the whole idea of their administrators as God's chosen people on earth you know what do you think that came from you think that's the god of creation choosing one group of people over another what do you think the god of creation orders people in in the Bible like you know Abraham to sacrifice his son Isaac because he wants human sacrifice that's the god of creation no that's that's God's with a small G that's why they're called the Elohim plural gods yeah their gods have nothing but a big bag of shit because that's what they are we're big bags of shit and that's what all the people who have continued their whole institutions and rituals are their huge bags of shit the people who believed in authority all your a bag of shit okay I'm not gonna tell you politely like I do on other people's platforms this is my platform now I'm gonna tell you how I want to tell you because I'm done what your bullshit thinking of violence you're a violent person you believe in violence you believe in coercion you believe in slavery and that makes you a bag of shit you're an amoral fucktard who can't think at any higher level so I'll tell you in your language I'll tell you in your street language I'm not gonna sugarcoat it like all these other researchers one - and all these other podcasters one - I'm gonna tell you the way I would say to you to your face here in front of you you're an amoral bag of shit so that in the ancient past the amoral bags of shit that believed in this system of authority called it kingship to euthanize it oh the King is different than everybody else he has special special dispensation he's been given this authority to rule everybody else and make everybody his slaves his subjects because the gods put him in power the gods commanded him he has the divine right to rule and jackass assholes today still believe this nonsense there are people who still have any respect for people calling themselves kings and queens can you believe this bullshit I mean what like we've not progressed one iota as an entire civilization and as a species this is how immoral the bags of shit on this planet are they call themselves human beings and then other people want me to take it light on them I'm not after 220 episodes of doing this you know I'll take it light on your fur like one or two episodes going into some new platform but then guess what you're gonna get hit with the harder material I'm coming back just like their psychedelics do with the clipboard you know you always taking one hit a half a hit of acid of LSD he's done I like a little bit like me two grams of mushrooms hit him with a light experience hit him with the lay he's not not that experienced let's hit him with a light happy-go-lucky fun trip on the first round Hey Oh next to experience oh he's been here several several times so what's he learned what's he put into practice out in the outside world huh let's look at his chart here okay still looking at it as a means of escape you know still looking at it as some Joyride is he actually acting brightly in the real world now hasn't really bring the message down to the ground on earth right but he's yet back here over and over and over and over well now hit him with the hard shit yeah you know anything about psychedelics that's how it works you know well what I knew I had a lot more work to do it was leaving me in a pool of sweat almost curled up in a fetal position going my god I don't know if I could take another I don't know if I could take any more like that and then when I finally got up off my ass and really started doing what I was supposed to do it's making me laugh hysterically and other people are going what the fuck are you laughing about well because it's telling me I'm on the path so it's saying it have a little bit of fucking joy in your life because you are doing the right thing and then other people who are aren't and aren't making progress it's leaving them in the fucking ball in a fetal position and a pool of sweat on the ground that's how that shit works you know it's the same thing with what on earth is happening it's just it meant it may be a different form of a psychedelic experience if you're really putting it to practice in the right way I'm gonna hit you hard if you're not doing the right thing if it doesn't apply to you don't don't take it to heart it's not for that message isn't for you then if you're really doing the work but if you're not you know I'm talking about you so now this is the New World Order right authority vested in few this is the New World Order the Old World Order God King one of authority and one unchallenged ruler and all his henchmen under him killing for him well it's no different in the New World Order it's just the authority has been diffused a little bit into a handful of people comprising an oligarchical institution calling itself government the government has taken the place of the single ruling member and now they are a body of ruling members that's all instead of having one being that represents God on earth this is an institution that represents God on earth and they are they all the lawmakers like the king was the lawmaker nothing has changed except the euphemism of what you call it you don't call it kingship any longer now it's called government it been euphemized what all this means is to control the mind and yes it does mean that asks I'm not gonna even go into why it means that you're just an ass if you haven't looked into it after 220 episodes yes government does mean to control the mind asks yes it does no matter how much you say it doesn't yes it does immutably true regardless of whether you think it's incorrect or not you're wrong okay and I don't need to endlessly repeat and qualify myself over and over again go look it up in past episodes I'm tired of repeat myself in that regard that's exactly what it means because the only way you control the body is when you control the mind that's it and this is why people believe in government because they're under mind control only way you can believe in authority is if you're under mind control oh it doesn't matter what political identification you happen to identify with left/right centrist doesn't matter men are kiss you believe in the concept of authority you are under mind control and you're an immoral piece of trash and really it's like I don't really want to associate with people who have that mindset much anymore you know I want to try to bring more people over to the non authoritarian mindset and I will use what is at my disposal to reach those people but you know when it comes down to the nitty-gritty people who are authoritarians are not my friends because they are believers in an illusion and thus they are undermined control and you can't ultimately really be on the same side and trust people like that because whether you call it kingship or government or whatever other euphemism you want to call it however you want to identify with this concept of authority it doesn't matter what you call it I call it what it really is it because what it really is is slavery you could you my zit however you want but what it really is is slavery okay you know people can call it kingship they can call it queenship they can call it royalty they can call it oligarchy it doesn't make a difference how you what words you want to use the euphemized it's the same thing when it all comes down to it kingship is slavery and government is slavery and here's what the New Age movement that why is this in a patella presentation because the jackasses in the New Age movie free energy movement actually believe you can create free energy while maintaining a system of slavery in place they you believe that people in your movement yes you believe that that's your belief system people in the UFO disclosure movement believe you can maintain a system of slavery and still have the disclosure of the truth of extraterrestrial intelligence to the world and all the good things that will come along with that you believe that because none of you are talking about government as being slavery I don't hear it you're too chicken shit you're chicken shit cowards just like most of the people in the free energy movement you're chicken shit cowards here's where I come out is not your friend right everybody wants to think I'm so chummy chummy with everybody anarchists I'm not your friend UFO community I'm not your friend new-age and spiritualist movement I'm not your friend free energy movement I'm not your friend I'm here to tell you the uncomfortable truth that all of you at one level or another still believe in forms of slavery and that's why you'll never create a world based on true freedom that's why you'll never have true spirituality that's whether you'll never have true freedom that's whether why you'll never have true this disclosure and that's why you'll never have true free energy and I'm the bad guy in your communities for telling you this for telling you the truth well fuck all of you how about that okay I'm done with all of you you know because what I keep asking myself in this whole community is what do I do this for for who for what like the former running back of the Philadelphia Eagles Ricky Watters said greatest thing he ever said most honest thing that was ever said in professional sports because he was the star player of a shit team the star player of a shit team and he laid into the team and he said why am i busting my ass doing this for you for who for what cuz guess see what what I understand that I'm doing this for is not for you cuz you ain't on my team you're on your own team lost in your fucking mind okay I am serving the truth not you and your bullshit communities your so-called movements that ain't move and fucking anywhere they move and fucking anywhere okay see this is what this whole platform is gonna be about for me it's catharsis named after the Cathars who I highly identify with as being people who were teaching a true variant of the early Christian tradition but then we're slaughtered for doing so learn about the Alba Jensen crusade in the slaughter of the Cathars well this is catharsis this is the Cathars combined with the spirit of Isis the goddess of truth and real love it's necessary tough love this is catharsis for me because I'm coming out now this is my platform for really speaking as I really feel not as I would on somebody else's platform or stage and that's why I really don't want to do anything on anybody else's platform or stage anymore because I don't want to travel because I hate being harassed by fucking jerk off road pirates when I travel you and moral trash pieces of shit pigs okay I don't want to be harassed by you fucking dunces who have no right to harass people the way that you do on the road and honestly I'm done talking to a half assed mindset community that doesn't understand natural law principles your so ensconced in what you're doing and seeing things from a myopic perspective that you can't see first principles and I'm just done talking to people like that I honestly feel I'm more effective on my own platform saying it out in the open the way I would hear on the air and then doing presentations where I'm just I'm the sole host and I could just be myself because I I don't like wearing a mask anymore I don't like wearing a mask anymore this is who I really am you know and there's nobody behind this this is my platform the run as I see fit that's why I don't want your jerk-off comments on this platform either that's why silence all of that that's not censorship because I'm it's not a public platform it's an entirely private platform Google and Facebook and Twitter are engaging in censorship because they're running a public platform you can't give people an account and say this is your account to post whatever you want and then say oh if it doesn't agree with my political opinion I'm going to censor you know that's acting as a public utility and a public forum and then your censoring people if they don't and allowing other people to put their ID out if they do concur with your narrative that's immoral I never claimed that this is any kind of a public platform this is me mintmark passio and mark patios platform only that's what what on earth is happening is is now was since I started and always will be you know so that's why I really don't want to do any work with outside agencies anymore to be honest that's why I've pulled back from it and pulled back from it and pull back from it and even in the current couple of years that I've done it what I've seen that's out there are sickens me to my the core of my being and take as much as offense as you want get as offended as you want by that you don't see it to the level that I do you don't see the behavior you don't see the mindset because you don't talk to that many people you talk to your little small fucking circle of friends that's like this big and I see the big picture of everybody coming and bringing stuff to me and I can get a very accurate picture of what the overall dynamic of behavior and personality is like and I'm telling you if you're not a pole by you're not paying attention to it plus people would rather argue amongst themselves and actually go out and do any real work because they see we're putting together a platform like this is they see what doing the steady work of having to do this constantly make all this content you know you wouldn't do it you couldn't do it you don't first of all most people don't have the skillset to do it and they're not developing the skill set they're still talking they're Yap and Yap yeah fucking yap yap yap shut your fucking mouth and get to work how about that no that doesn't occur to anybody yap on fucking Facebook buh buh buh tapping away on the keyboard so what you sound like a jerk-off well you know what you have the show really in a long term as an archive of your data you have a big fat fuckin goose egg ninety-nine percent nine nine nine percent of you well you can Yap on and Yap on gums flapping the fuck away about how I could be doing it better or how somebody else who has a huge body of work can be doing it better fuck y'all how about that okay this is Mark Paseos circa episode 220 not circus ode one I'm done with that Mark passio okay he ain't ever coming back you're getting the hardcore shit now let's see if I got this correct you believe that people can't govern themselves but you also believe some people can govern hundreds of millions of other people this is the smacked ass fucked hearted mindset of people who believe in the concept of authority but can you imagine explaining to someone that's not from the earth what government is Larkin Rosa's has done great presentations on this tell me what government is oh it's we'll see we don't believe that people can govern themselves so they have to be externally controlled too coercive laws you know and then this one body of part of humanity is called government and they write these laws and then the aliens thinking well wait wait wait you just told me that people are generally bad and they can't really take care of their own affairs so are these not human beings oh no they're humans they're just a smaller subset of humans well is there anything inherently that makes them any better than other people no just more people voted for them and their opponents when they were running for election and this is what people believe they believe you could take a subset of shit and put it in control of the body of shit and magically the shit will turn to gold that's what you believe that's what the the jackasses who believe in government believe what makes these people morally superior and and having some wonderful majestic mindset that's holier than thou they're just as much moral relativist as any other member of the population all you got to do is do the same social experiments with them and don't be all too happy to tell you that their moral relativist and or solid sis that don't believe in objective reality and don't believe in objective morality because that's what 99.9% of them think like and then we think they're fit to govern others you know the whole idea that oh because man is not a angel he's not fit to be fully free and unbounded by government no wrong because man is no angel and and no human being are angelic no one is fit to rule there are none who are fit to rule others you know the whole idea of the concept of divide and conquer this is what this is all put in place for and davide and Imperia means divide and rule you know it's been euphemized into divide and conquer I was talking about this was with a friend this week it's been euphemized into that it actually means in the original Latin divide and rule not just conquer but rule over someone rule over the two groups that you're dividing and that Hegelian dialectic is what they use to polarize the political party polarization is at its more advanced than it ever has been in human history in the modern day and that's because people don't understand natural law they don't understand the legitimacy of all forms of authority as being violence coercion duress and slavery because they do not understand natural law they do not understand the principles of natural law they do not understand the transgressions against natural law which are murder assault rape theft trespass coercion and lying all forms of theft all forms of taking that which does not belong to you probably the ultimate of which is coercion attempting to take the greatest gift of the creator of the universe away from the beings that is he gave it gave to them as their birthright he/she/it whatever you want to call it that force that aspect of creation gifted to human beings as their birthright endowment freewill coercion is the theft of that all forms of transgressions against natural law all forms of wrongdoing are forms of theft there is only one ultimate wrongdoing and that is theft don't steal rights life freedom property free will and there won't be a problem continue to perform and condone acts of theft in any aspect that it exists you're going into bondage that's how the universal laws of consequentialism of cause and effect of morality work and this is what people don't understand and that's why you need to listen to all my work on natural law especially my three-part nine-hour series called natural law the real law of attraction and how to apply in your life this is the title card right there from that presentation available on what on earth is happening calm in the video section or on my youtube channel the vast majority of the very people who say they want to see the manifestation of free energy are actually blocking the manifestation of free energy by the way they continue to think because this leads to what they continued to condone and how they continued to behave which has kept humanity in a state of total slavery it starts with the slavery or imprisonment of the mind through mind control and then it manifests out into the world through what they condone and how they behave themselves through the manifestation in the physical world with the body conducting that manifestation through their behavior and that's exactly what we are talking about the people who are in the free energy movement unfortunately have not freed their minds yet they are still under mind control of the belief that authority and government are morally legitimate when they never can be and for as long as you continue to think that contradictory notion that cognitive dissonance being still in place that you can work through channels of government and government can be in place but somehow you're gonna create a system that frees human beings you are imagining what never was what is not now and what never can be because you are under mind-control free energy cannot be manifested as long as the people of Earth continue to believe in and condone humanity's current immoral institutions which are based entirely in violence coercion deception ignorance greed usury and exploitation and for as long as you continue to think that these institutions exist for their ostensibly purpose instead of their true purpose and for as long as you think that they are trying to actually improve the quality of life on this planet instead of hinder it and enslave it you are a naive retarded mind controlled individual who can only do anything to help the manifestation of slavery on this planet and you can never do anything to truly help the manifestation of freedom on this planet that is an immutably true statement that is that way because this is how the internal dynamics of creation as laws of the governing dynamics of behavior work not because I said it but because MIT like many millions of people before me and millions at well that will come after me I have learned and discovered that principle that is already pre-existing in creation and its laws that is what natural law is and this is how it works in the free energy community you have people who are positing oh this is what we can make happen who wants this to happen Oh everybody raises their hands oh I want that to happen I want that change to take place but then when you have somebody like me saying then the more you know what you can't have that change take place externally in the external manifestation of our entire society unless all the individual members of that society change inwardly change how they think change how they feel change what they condone and ultimately change how they behave in the world then all the hands go down when you say who wants to change like that say fuck you I don't want any part in that process I want to stay just how I am and I want the world to magically change around me when I don't want to change one fuckin part of myself well you are a smacked ass fuck tarded naive bitch if you think that's how it works if you think you can keep your hand in the boiling water keep applying heat to it but you're not going to get burnt the water's not gonna eventually boil away okay you're not gonna hurt yourself in the process all right after you take the water boils away oh I put the pan on the side I want to magically cool my hand off by keeping it right over the fire you want to believe that's how the world works this is how retarded you are and the people out there listening you're not bringing this information to people properly you're not putting them on to it they're not watching it they're not paying attention to it you're not making them pay attention yes you might have to divorce yourself from their presence and say this is more important in my relationship to you either pay attention to it or go off the cliff by yourself but you're not taking me with you and I'm not gonna help you go by going to being buddy-buddy with you while you drive yourself off a cliff into the flames you have to make them see how important this is and ask them right to their face you value my relationship our relationship that we've built as friends or associates that are partners or whatever because you're displaying who you really are that's what you got to put in front of them and that's what I put in front of people and you know what I've done I've let them go their separate ways I like because they're bad people that's the big divide is separating the good people from the bad people if at some point they come back and they say I want to know what you wanted to teach me before then do it take them up on that that's called turning the other cheek well you got to put before them an ultimatum at some point that it is not here to not have a divide happen between people you know the concept here is we are not here to bring peace we're here to bring the sword of truth by placing the choice will you pay attention to the truth and how reality really works and become a rut truly good person by learning objective morality or will you continue to stay in the illusion to trance the the total mind controlled mindset and continue to help build the planet of enslavement and if that's your choice you're a bad person that's what makes you a bad person this is what I've told almost every member of my family which is why I really don't like go or it like to go around them for any length of time they're bad people they're just bad people when it comes down to the inner core of who they are on the outside do they try to overtly hurt people no that's not what makes you a truly good person though just refraining from physically damaging other people does not immediately make you a good person capital G good capital P person that's not the definition of a good person the definition of a good person is when they see tyranny happening in the world they will try to find the causal factor of that condition so that they can do the most good to help reverse that condition and if they don't want to learn those principles and they say fuck that I don't want to learn that I don't need to learn that I'm not gonna do that with my time I'm not gonna take at least enough of my time to learn this works and then help propagate it you're a bad person and that's not proselytizing a religion that's saying the truth about how a law in nature works that people have to learn as surely as they need to learn how gravity works so that they don't walk off tall buildings or fall out windows of tall buildings okay and teaching that is what makes some what learning and teaching is it what makes you a good person and you got people getting involved in all kinds of theft and schemes and you know just just shit that people are involved in just schemes to try to steal from people I mean the love some of the lowest form of Trac lying the people in the media you're some of the lowest forms a fucking mutant garbage your parents were just in just absolutely inhuman trash garbage I mean there's no end there's no even words for it there's no words for how low of just fucking garbage people like that are people who want control over other people because you know why you know why you want that control you know how much of a piece of fucking dirt garbage you are that's why they want that control they hate what a bad fucking person they are they know they're a big fucking piece of trash garbage and so they think everybody needs it can be controlled like they would really want done to themselves because you're a self-loathing piece of fucking garbage but no one will say that to somebody like that that's the mindset of someone who is a control freak and wants to control other people's behavior but I'm one of the only people with the balls to say it like that prove me wrong prove me wrong that I'm not the only one with that much courage that's what I want to see I want to see other people just saying or right out in the open the way it really is don't sugarcoat it at all and there's people like oh you won't do any good like that you don't fucking know a goddamn thing about what good will come out of that want to know why only like like make be mean to people in the history of humanity have ever tried it you think it's been tried you don't know human history if you think it's been you don't know what unapologetic truth might do to the world you know maybe that's what we're really supposed to be doing here instead of trying to give people a little little tiny bite-size Oh little baby here's a little bite-sized piece of the truth here Oh will you take it I'll put it on a little tiny little spoon for you here just open up a choo-choo train choo-choo - whoohoo no how about no how about we try to treat people like what we want them to be responsible adult human beings capable of learning and disseminating truth no we can't have that that might put us in the light of an adult instead of a self-loathing little fucking child that wants mommy and daddy to take care of every aspect of life for them when are we going to grow up and what are the people gonna step forward who are just going to say no this isn't the way it needs to be or should be and you're the problem because you're a self-loathing little child inside that's never grown up emotionally mentally and spiritually to understand we don't need this level of control and enslavement all around us to get involved in every aspect of our lives we can be responsible adult human beings that no knows what's best for us and doesn't infringe on other people's rights in the process of performing that kind of behavior that is within our rights that perform we don't need all these rules restrictions and endless violations of our rights coming into every area of our lives possible this is what the modern left once a little baby society being told what they could do by mami papi nanny daddy I'm not your fucking child motherfucker you don't own me I own my life I know what's best for my life not you your dumb bag of shit quite frankly you're certainly not as intelligent holistically as I am you're not gonna tell me what I know and I don't know when you don't know shit about the world and how it works don't presume to tell me you know and I don't like I'm your fucking child it's quite the opposite way around I'm the adult in the room boy and that's how it's gonna be said to you cuz I'm not gonna be ruled by fucking children and you're gonna learn how much I'm not gonna be ruined but by children when the time comes and it's comin tassel was an adult in a world full of children again just like the founding fathers of America he didn't get it all you know you got to understand the time period we're talking about we didn't have the information that we do now that the totality of the information being present at our fingertips the ability to awaken the mind to the level that it can be awakened in today's world it's amazing that the people who existed before Tesla and at his time were even able to grow and develop themselves to the extent that they did what was he some perfect enlightened avatar no but guess what he was way out in front of most of the rest of humanity in most ways so again I'm not propping Tesla up as some God or Saint hey I'm talking about Tesla as a person who saw that we could create a human future far better than what we are doing and saw that potential in humanity and realized by giving humanity freewill choice they will choose to do the right thing if they're given the tools and the knowledge to make those correct decisions the people who are root will really be truly psychopathic will be a tiny fraction in our society this is what people have to understand the bulk of humanity is not really they've been turned into bad people through the mental influence that they've been put through but that's no excuse for them not working on themselves and coming to the correct conclusions see it's a dual edged sword you have to be at least so hard on them that you don't make them think this is something that should be being done to you and you're the victim and you have no control over it but you also can't be you know so light on them that you're like oh woe is you this is all just mind control and you're a big victim here there has to be a balance in place where you say this does not have to be the way the human condition is but this isn't human nature this isn't nature this is how human society the conditioned human society has come into through mental influence and wrong forms of mental nurturing nurture Trump's nature in almost every way sadly because we are programmable beings our nature is that we can be programmed by the information around us and in our environment and through our environment and the people around us and if the people before us were programmed in incorrectly and then they teach that to the next generation well garbage goes in garbage comes out you have bad parenting generally you end up as a bad adult that then acts as a bad parent until you break the cycle and we have to understand that's what we're talking about here with genuine enlightenment we have to break the cycle of the desire for more control Tesla wanted to put that framework in place through the technology you know he said that science you know that is divorced from the betterment of humanity is but a perversion of itself paraphrasing you know science that you know does not have as its end goal the betterment of humanity is but a perversion of itself okay he also said peace can only come as a consequence of universal enlightenment and I modified that statement to say a world based in free energy can only come as a consequence of you know a universal paradigm shift in human consciousness and therefore a paradigm shift in behavior you're not ever going to get free energy first again that's putting the cart before the horse Tesla technology rides in the cart the horse that ushers it in is the paradigm shift that is currently missing in humanity what this whole present about the paradigm shift that has to usher in Tesla technology and true freedom hasn't occurred we will never have Tesla technology until that paradigm shift in consciousness happens and all of those characteristics we discussed them last week in part one go over them and review them watch the natural law seminar watch the streetwise spirituality seminar which I cover these dynamics of what a paradigm shift in consciousness and a true awakening of humanity really looks like the true characteristics of an awakening in humanity that's the world Tesla envisioned ladies and gentlemen and it could be a society that is truly free and one that has technologies and possibilities that we can scarcely envision from where we're at now we have to want it bad enough through our free will and then make it manifest through our behaviors it will not just that paradigm shift in consciousness will not just magically manifest on its own so thank you that's the end of the formal presentation part of this series and if we can switch back over to the computer I just have a couple of quick and notes if you have found value in what I have presented here in this two-part series and then all of what on earth is happening please consider going to gift stop what on earth is happening calm or just click the gifts tab of the what on earth is happening calm website and there you can get hard copies of all my presentations and lectures in the form of DVD and flash drive there's also t-shirts up there there's coasters there's keychains buttons stickers have run out we are expecting a new order coming in this week so I just put them up for pre-order and I'm gonna be filling those orders they have come in four stickers this week we have a new nice vibrant version of the one on earth is happening oval sticker that's been pretty popular up there

there's new t-shirts there's a new water on earth is happening vector design t-shirt that came out really nice with great colors it's a three color design of course the traditional Lex Rex and one great work t-shirts are up there the natural long one great work shirts so that's at gifts not what on earth is happening calm also if you are interested in the data archive from which a lot of this learning was pulled okay the all of the information that helped me come out of the matrix through my deep searches on the internet and the dark web if you will okay that I have amassed on a one terabyte external hard drive which I will copy for you you go on to the arc page which stands for the arc tab of the water on earth is happening calm web site which stands for the amazing repository of knowledge AR K it's a one terabyte hard drive filled with all of the information that I've done in my studies over the years the best information that I've pulled from the internet all available in one searchable harddrive so you don't even need a connection to the internet you need no connection to the internet at all not and let alone a fast one all this will be locally on your computer it works on any operating system it will work on Mac that will work on Windows it will work on Linux because the hard drive will be formatted as an exFAT drive which works on all platforms so that's the Ark offer you can fill out the form to get shipping instructions on the Ark page and then finally you can go to what on earth is happening calm slash donate to make a straight donation to the water on earth is happening cause you can make donations I believe now in 11 ways there are PayPal we have a patreon account set up for people that want to do recurring donations you can use patreon I accept paypal dot me so those two there are six crypto currencies up there okay so that's that's what is that so that's a that's eight okay and then we have check and money order traditional you know donation methods like you could sign up the form fill out the email I should say send an email and I'll give you the shipping address for that so that's nine and then we have so there's ten methods and then you have the Amazon wish list the tech needs wish list I have put a couple of items up there someone did purchase one of them there's one item up there it's a rather expensive one I'm looking for a new color laser printer the one that I'm using is giving me some problems unfortunately and is not producing accurate color output so trying to get my hands on a new all-in-one color laser printer that I print a lot of the materials for the physical items that I put out through the gifts area so you know that's up there right now and I occasionally add some tech needs to that list thank you so much for everyone who has said everyone who has donated in whatever way you have donated whether it be through you know electronic means such as cryptocurrency and/or PayPal or patreon you have become a patreon patron or if you've donated you know directly through technology I know a lot of people like to do it that way because they can actually see what they are actually sending into the into the cause and we use all of that technology here to produce the show every week and to make the items for the gifts area every week so thank you in no matter what way the anyone has ever donated - what on earth is happening thank you this is an operation that works on a volunteer donation basis okay we twist no-one's arm for what we do here this is a part of voluntary ISM and if you want to contribute to the effort and you have resources to do so but can't contribute directly with your knowledge or creativity or technology you know if you have some extra resources at your disposal and you're able to donate we appreciate those voluntary donations I never and never will ask anyone to put themselves out okay if you don't have the resources and your resources are tight use them for what you need them for okay if you do have the ability to donate to an effort such as this because you have some surplus we absolutely value and appreciate that on a purely voluntary basis and that is what this operation is funded by voluntary donations so thank you to everyone who has ever donated in passed in you know in the president or will donate in the future you make this work continue you make it happen so thank you so much and that is all for the whole part of the presentation here today I think for the remainder about the 45 minutes or so that we have left let's um let's go to the phone lines now the end of the show is probably going to be a little bit different today because we'll have to probably manually end the show we lost about let's say a minute so let's end the show at 6:01 p.m. today so that when I edit it together you know we'll have an approximate three hour-long exact three hour-long show okay because right now the show will still run on a three hour basis and I'm just saying that out loud from my producer okay so we'll end the show at 6:01 p.m. today all right so let's go to the discord phone lines and start to take your calls let me just bring it up on my local system here okay here we go all right paddy lager you are live on what on earth is happening episode number 220 paddy good to hear from you welcome hi mark can you hear me up without and clear we're using a new interface by the way for the computer and discord and so far it's worked beautifully I want to like knock on wood somewhere to make sure I'm not jinxing it but we've had very rock-solid connections where there's been no general interruptions I mean we did have a failure of software that was the streaming software here today and things like that will occasionally occur we got back into it rather quickly but it looks like you know the connection to the laptop that sits on my desk where I run the the callers it has been working perfectly so far since we've kind of switched over to some new technology so I can hear you loud and clear what do you have for us here today well first I just want to thank you once again for expressing your passion and really putting this message forward because it is so important and you really do inspire I think many of us here because that really gives us the courage as well to do the same you know this this whole mindset is insidious I mean everyone that I work with that I'm around it is really quite scary to see how many people are stuck in this notion that government is something that will always be here they can't even vision they have no imagination they believe it's a solution they think government solves problems you know they don't understand that only human care leading to right action in the world and then the creation of technology used for a right action can ever solve human problems you know and there are people who will say leave the technology out of it just about everything around us is a form of technology electricity in the home plumbing sanitation that is helpful with disease you know refrigeration of food communication you know just everything around us relies on technology in our way of life technology isn't something that should be shunned technology is something that should be learned and then we will direct it and guide it as the Masters of Technology which is an assistive tool for our way of life will direct it in the right direction you know and this all comes ultimately from how we think and feel that has to come first you know we have to understand government has never solved any problems oh it's done as coerce hasn't made anything better hasn't made life better on this planet human care human innovation and human technology is the only thing that has ever made life and increase the quality of life on this planet not government not coercion yes and when they get to the point but they realize that this government is not needed that they're just a parasite that's it and they're just sucking us dry then we can maybe use that technology as Tesla was putting forth many years ago and spread it free as it should be without me because it's not to be a cultic yes you know again my background is in education and medicine and I see the use of technology there again being used for ways to limit to harm many people I mean you know I work as a naturopath with a lot of clients because I'm not licensed I refuse to be licensed so I don't have my hands tied but I work with clients and they they tell me what they're put through as far as what technology what they're exposed to and this is the this is the dark side of the technology is not being used for good it's being used to suppress and harm humanity and I just you know I I'm trying to find a way to kind of break through this mindset because that's really at the at the crux of where everybody is they have to break free that we don't have to accept what they're giving us no this little small miniscule of truth it's not the whole thing I mean they're just they're stuck in this mindset that oh I have to I have to have I have to expose myself to radiation to see if if this thing growing inside of my body is still there I have to expose myself to these chemo therapies to kill this thing I mean that's that's chemical it's like it's asset they're putting into their blood you know they can't even see that you know it's a dual edged sword you know not all technology is good or gonna be used for good you know so that's where human discernment has to come into play and that's where we have to be truly awakened people that understand the whole world situation if we're going to use technology for the right reasons so I mean this goes to the heart of the whole matter when it comes to Tesla technology as far as I'm concerned so I'm really glad you brought up this point it's like you know it's not about either having or not having technology it's about how you use it it's the same thing as it called knowledge right it's just neutral knowledge technology is just a way of enhancing what we are doing in the natural world it's a tool set right techno logos right yeah okay so we're talking about the tools of the word right tools this literally is the etymological definition of technology it's using nature the word and sculpting it through the language of science into a tool so that we can use that tool for our betterment technology isn't not something that is part of the natural world it all came from the natural world everything that we use in some form or another had to come out of the natural world right it's an extension of the natural world and it's the same thing as knowledge it's a neutral tool technology isn't good or bad innately on its face inherently it is something that can be used for good or used for control coercion and evil the same thing is true about the occult the occult is neutral knowledge but if it remains hidden and a small priests class uses it to their advantage and Holle wields it as a weapon over people who are ignorant of that knowledge only bad things can come about as a result in the manifested world the same is true of occult 'add technologies okay technology has to be understood to the extent by the everyday man that they can make a accurate discernment and judgment regarding how it's being used is this being used the right way is this the best what usage of technology whether it be for communications or for publishing or for health for medicine in any in any aspect of life the the discernment is the problem that's not there in humanity because they're still acting as naive children trusting other people and trusting experts instead of learning at least in a general way you know in generality to become a generalist about it I'm not telling every single person that you need to know every single nuance about how every computer in the world is programmed no one could do that okay I rely on technical experts to help me with what I do and we'll continue to do that okay I know enough about the generalities of it to use it and to help put a show like this together you know I take credit and you know kind of like I'm proud that I helped set up this entire program and learn a lot of the technology and how all this work and I wish other people would do that because you would see how powerful communication tools that we can really get for not any kind of a ridiculous an exorbitant amount you know okay how you can use them you know and the whole idea here is there are things that are not unit dimensional they are dual edged swords and we have to understand there is always two sides to them and that we have to have the discernment and the judgment to put them into effect and let them manifest in the world properly there's a proper usage and then there's an abuse and abuse and abusive usage of Technology and that's what I think you know we have to go through the growing pains to really learn and understand hey this stuff is not only possible it's out there in the world and right now it's being used for the wrong reasons well we have to understand what is the true transformative potential of some of this technology and I think that's what people can start to learn if they really study about Tesla and understand what his you know heart you know his care what he was really trying to put into effect and then learn what he ran up against and it's the same forces that we're up against in the modern world regarding the implementation of potentially transformative technologies but again it's my contention we can't put the cart before the horse either we have to work on ourselves work on our mindset and work on creating a society of true freedom that respects freedom that first of all understands what freedom is and respects it in all of the people of the world and builds a society based on freedom like that before we're ever gonna have a type of a technologically advanced civilization that's gonna be based in some type of free energy technology that's going to propel us to a type one civilization you you will never do that without the mindset of freedom and that's why people have to understand you know the answer is not government government is the problem it is it is slavery and to try to implement you know freedom by conducting more coercion and slavery you you and you're that person who actually believes that you're going to heal a wound on your hand and make it nice and cool and healed by putting it right over a campfire it's literally that brainwashed that people believe you could add the same polarity to a dynamic and magically come out the other end with a different with the opposite polarity and the laws of nature just do not work like that and it's it's unraveling that mind-control I mean the government is my control and they are controlled to believe that they need this drug called government to to be comfortable and to be safe that's the fear that where they comes back let me ask you a question your area is it more rural or urban where you're at I live in st. Louis Missouri and I would say it's probably a lot like Philadelphia you're actually in my city so okay so what yes well in the county just outside of this okay so if you go into the heart of the city you see this dynamic where if you ask people like is morality objective they're gonna say oh no it's just up to us to decide and if you say is government necessary you know and is it morally legitimate they're going to say oh absolutely you see that dynamic in that urban environment 100% I mean I'm a college professor I teach at a college and I you know I I've stepped out of education and then I get back into it because I have a passion for teaching I really do love it touching my students with education but you know I was at a it's our first week of class we had all of these meetings and they had the audacity to tell us that our students don't they get confused by too many choices they're trying to limit places they want students to have a direct path to Ajo be a just over broke job to enslave them to keep them in this system they're like if you give them too many choices they get confused and they run away but no we have to give them this class and then this class and they have this system to go through outcome-based art of the enslavement of them exactly and I and I'm sitting there you're laughing and I'm looking around at my co-workers thinking don't you find this to be a joke and they're just all in it they're all in it you think it's great because they don't really care about the betterment of human beings they just want the paycheck they're just there because that this is what they have to do as a way of making money and all they care about is getting the paycheck at the end of the week and this is what I'm gonna do I've been trying to explain to people mmm by definition makes someone a bad person we have to stop viewing this traditional definition of a good person and at versus a bad person which is stuck in people's minds okay that's why I did the whole show called evil is more powerful than good in our world more people are bad people in the world have become it doesn't mean that inherently they're bad people more people through their free will choices and their refusal to work upon their selves their mindset and their behavior have become bad people in the world then there are good people and that's this is that very dynamic people just care about themselves and what they are gonna get out of a situation that's what Satanism is that's what Satanism is so I want to ask you another question see I'm asking you more questions than you're asking me but I find it an interesting dynamic to kind of like look into and you work at a university now you are an anarchist and you are also a vegan I mean I I am a vegan I don't even like to evening use the term because of how emotionally charged it is I just say I eat a complete plant-based diet okay so I know you're into that way of living - of not harming animals leaving the animals alone and for our nutrition taking the plant-based Whole Foods that are in nature for us to sustain ourselves on okay and if we do that the right way we could be strong healthy individuals thinking clearly really doing the work you know there's no reason why anybody can't transition to that form of a lifestyle okay well regardless of what you want to call a vegan plant-based etc okay so obviously working in a sort of an urban you know university style setting University setting in an urban environment you're gonna see a lot of younger people who are vegan okay or who you based diet yet you're also going to see that total dichotomy that toad a socially engineered mind control dualistic dynamic and putting them in total cognitive dissonance where on the one hand they're vegan and believe animals should be free and free of coercion and and you know enslavement through what they're what's being done to them through the farming system and on the other hand they still believe that government should be in place and human beings should be put on farms called governments of the world and kept in in a state of free-range slavery through the governmental system how do they in their own mindset reconcile this total contradiction in their thinking well about you know I you know because I have a problem with both vegans and anarchists because of that concept right there you know and again the vegans they can't bump up to end animal will never vote it out of existence you have to abolish the government first and then the animals will be free because the humanity will have risen in consciousness to realize we can govern ourselves and we don't want to be governed so therefore we shouldn't govern any of any no masters above and no slaves below you know this is the whole concept of no masters no slaves you know it's not only that we want to free ourselves you know from the tyranny that is seemingly ruling us from above but we shouldn't be masters over other beings either that's what real freedom is being an advocate of true freedom means that you don't advocate for being masters of species that you consider not as developed or quote lower than you in consciousness you know so you know I just think we have to bridge that community through those communities through natural law as you said the anarchist community doesn't get the aspect of natural law that applies to animals and the vegan community doesn't get the aspect of natural law that applies to human beings but to me it's yeah I said the the anarchist community doesn't get the aspect of natural law that applies to animals and the vegan community or plant-based community often doesn't get the aspect of natural law that applies to human beings and I just think we have to resolve that cognitive dissonance in the mental you know functioning of these groups of people by bridging that understanding through an understanding of natural law yeah we really do mark and I think one thing that's kind of scary in the vegan community are all of these fake vegan foods that are full of GMOs and all of that so that's another thing I'm a strong proponent of you know if we're going to be healthy vegans we have to be focusing on real food none of this GMO soy chemicalized food because I think that might be affecting their mental state as well I think that's definitely a part of it it's like you know small amounts of that fine but if we're gonna make that the total staple of what we're eating and then you know a lot of them are juicing and blending on a daily basis and then supplementing correctly it's like you know they're there's so many natural things that we could be doing just with raw foods and just making that a staple you know then if you're gonna eat a few things that are that are somewhat process you know you're not gonna be doing that the bulk of the time when you make that the bulk or the the essence of the diet then you're going down the wrong path and a lot of vegans do do that more so Patti thank you so much for the points that you've brought up today great great you know things for people to ponder and consider so thank you thank you for everything mark you got it all right okay let's go to all right let's go to Josh Josh you're live on what on earth is happening welcome to the show hey Mark can you hear me not unclear oh wow I've been trying to talk to you again since the last time for a while so thank you for answering my call sure I want to say thank you for your work on the Tarot because since having the Tarot now in my life since when I first got like the wider rate deck I mean the amount of synchronicity that it's shown me in my life and in some of my friends life has just been so just I can't even really even put it into words but I definitely have come to a more understanding that it's not just for like fortune-telling and divination yeah hey isn't it amazing once you learn what it really is oh it blows my mind it really it really is every like I just sometimes I even look at it on days where I'm not expecting anything I just want to study what card means what threw my book and then boom I get like a hit of just like wow I like sent when you pointed it out the the right like the second path on the tree and we're certain like birthday cars of me and my girlfriend's cards were like mine is the fortune and then the star card and hers is like the fortune and the temperance card and then there's the hangman and then the justice one and just little things like that that just really blow my mind about it see well eventually I'm gonna do a more in-depth presentation on the Minor Arcana that's planned in future episodes of what on earth is happening I may go through every single card in the Minor Arcana and talk about you know allegorical meanings of the symbols of the cards and that could be a multi-week show you know so that's gonna be coming up at some future point but it's like you know people ask me like oh do you will you do tarot card readings things like that and it's like you know I mean I've done them in the past for people I've had them done from friends for me you know but you know I don't really like to get into like reading or divination with them I can tend to like more want to show people what the real meaning of them are and then they could do their own readings with them if they want to use them like that you know what I mean but the real goal of me going into the tradition of Tarot which i think is just such a rich philosophical tradition when it's improperly decoded is to just show people how you can look at this book of life you know and this book of truth for yourself and like make a personal connection to it through a proper coding of the symbols and allegories within it and then you could use it in multiple in a multifaceted variety of ways for yourself you don't have to depend on somebody else doing that for you okay so that's how I tend to look at it and where I sort of want to keep that going and I think I'll extend that like maybe after Anika poco I said I have I'm gonna do some presentations on pizza gate after that a conference is over and I'm sorry an arkadelphia and then uhm I'm gonna do some extended presentations on the Minor Arcana of the Tarot as well so we'll have all a lot of other information to build on regarding occultism I want to do further work on Rosicrucianism for people I really want to do a whole extended series on thelema because I think Philemon is horrific Lemus understood by people and I think I really need to clarify what real thalamic thought and philosophy is and really emphasize the difference between Crowley and Philemon which are not the same thing and too many people try to conflate them and say that they are identical and one in the same and that's just not the truth so I think that's you know well different occult traditions I have to cover more in depth as well in future shows right yeah cuz my buddy showed me a little bit about the Toth deck and he has a book that he gave me that I want to study from Aleister Crowley and I have his I have his diary of a drug fiend book and like the drug and other stories book of his but he's definitely like an interesting character that I've been studying not someone that I want to end on chest that's right I was going to say if people want to really look into some of the basis of Thelema I wouldn't start with some of the more difficult to decode work I would I would work with a smaller work such as the heart of the master which is pretty good a spiritual philosophy that doesn't have too much of Crowley's ego embedded in there so you know okay I would work with a what you might call a lower level that doesn't really need a lot of you know decoding through allegory gematria cetera which a lot of other Crowley's work is like laden with so at the heart the heart of the master is probably a good starting basis for people that are just looking into the Leymah for the first time you want to start with some lighter material that's what I would recommend anyway but again I have to recover what it is just like you know I could do a whole another series on Freemasonry possibly you know or Kabbalah go into deeper aspects of Kabbalah like bring up some work of some Kabbalistic teachers that I like like Israel Regardie or Brian Greene you know people like that and you know just really go in depth and show people some work that could get trigger people's interest in it in an easy-to-understand way because like it's such a big field people don't know where to start maybe I could just give them some basics on you know where to really start looking into the tradition so that they could properly decode some of these things right and I wanted to say I have just to think cuz I could ask you questions for hours and hours about the occult but I know you have other callers on the line go ahead you go on fire away we'll see where it goes okay so I want to say first I believe you when you talk about Satanism and everything from Anton LaVey because when I was first you know finding out about the occult that's kind of how it started with the knowledge of you know reading the Satanic Bible reading his essay books you know I still have them I just never faced my life upon them or really do it so for we just read yep I'm sorry just repeat that last part you cut out there for a moment oh I said I believe everything you say when it comes to safe ism and I think other people if they read like you know Satan speaks the devil's notebook The Satanic warlock you know all those things that people really you know it's not that hard to find these anymore either so either it was like I know his work from the temple of set such as the ruby tablet of set you know I mean I would definitely check out something like that which is a large volume and can be difficult to go through because of how dark it is but it'll put it'll show you their mindset for sure and these are really honest they this is a religion you know it's not just such people they they have a religion with very specific tenets you know very specific worldviews way ways of looking at the world themselves and other people now you have to put yourself in the so called masters mindset you know you you like it like some zoo said in the art of war if you know the self and you know the enemy you need fear not a thousand the result of a thousand battles you know if you only know half of that equation you're gonna lose half the battles if you don't know either you're gonna lose every battle you face you know this is about understanding who we are what our current situation is and then understanding what we are up against and if people don't understand those things or if they want to take a childish and naive position on exactly what our situation is we're gonna lose the battle right yeah and I wanted to ask how do you feel now like from you exiting the church how do you feel about those past people like Nicholas Shrek and Xena and then you have someone like you know Marilyn Manson who that's a synchronicity of it itself because holy wood was my favorite album in high school and now I've recently found out that he based that album a lot on the Tarot if not like a honey I just remember listen to that album but I'm saying the imager with with his music I'm not hugely into it but okay yeah I know cuz we'll call it work oh yeah everything and pretty much that Marilyn Manson has done has been through the occult and like you know I love that album Hollywood but it makes me hey you know when I can when I see little things more now in you know mainstream or even people who don't claim to be mainstream it just well he who makes me this hard dance and holds the same rank as I did in the Church of Satan he was just a least by lava when lava was alive I believe he was appointed very close to the time that I was appointed priest so we had the same rank in the Church of Satan um it's interesting that I did have the books that a former caller when we did the show on the whole society being one large Saint one big satanic ritual was talking about and drogyn ization within the whole agenda of Satanism especially modern world worldly Satanism in the modern world I was trying to find some of the books from one of the organization's I belong to called the Whitehall Church of Satan in the past or just had some affiliations with this group and got involved with it for a time you know but I did have those books lent out they are here now I got them back my producer went down and looked for them before I'm gonna ask him to actually bring them up if somebody could bring them up there on you'll see them they're out in the open on the bookshelf downstairs you'll see they're too small like about this big and they're bound by a plastic black binding just bring them bring them all bring whatever is there and they're there they're on the bottom level of the books or should be you'll see there's small plastic bindings but anyway um what I want to do regarding that the reason I'm gonna just even show them here on camera is at some point in the near future I want to do a show on the agenda of androgynous ation in human society within Satanism because this is a faction of modern Satanism see laveyan satanism isn't so much for this aspect they were for the delineation and and distinction between the sexes however there are other satanic fact of sex if you will factions that do want to yeah that's them that do want to really and Rajah nice people and to show that is a very huge part of exposing modern Satanism because this is you can look at this as this is the leftist faction in the world of modern Satanism want to bring the world into what is known as international socialism or worldwide communism so I'm just gonna show this I want to thank you for the call and bringing up reminding me you know of this point in yeah yeah Thank You Josh so um you know what I'm gonna show here are pretty rare items to have physically in your possession I don't know how many of these were ever really printed okay but these are the books that I was that you know there you could call them books they're more like large pamphlets they're like these are just bound at a local copy center probably and um there's probably not that many copies of these in existence I would say there's probably in the thousands if I had to venture a guess okay so um this one here is called Satanism social realism and the Second Coming okay I'll see if I can hold that closer and if the camera will pick it up I'll go over here okay and that is the priest of this organization from Whitehall on the front and there it says Reverend Magus by Magus Josh no malice or Jay Solomon who is considered the high priest of that organization the Whitehall Church of Satan I I would doubt he's probably even alive at this point I don't know whether that's the case or not I haven't really tried to catch up with him but there you have it right there social realism and the Second Coming okay and as you can see they use different symbolism slightly different symbolism than the laveyan branch of Satanism but um you know what I really want to get into and talk about when I go through this I'm gonna go through and make notes on this I might even digitize this I got to see if I have a copy that is already digitized okay but I want to talk about where he really gets into the message of androgyny okay so it you'll see it right here I'll just go right I'll see if I can get this on here it says survival and the and regeneration and this shall be this shall be my name on words and that spell Satan survival and the androgen nation you see that right there right here that's his acronym for satan survival and the androgen nation so this is putting you know human egotism and survival physical needs and androgyny as the basis for the society that they want to create this is the first tenant of Satanism combined with the eradication of the distinction between the sexes and that's what this whole androgynous ation agenda agenda is with the 60 some-odd genders etc and weakening the male in society and denigrating the male etc and that this is part of the Satanic agenda and I covered this pretty extensively in neo feminism and the Satanic epi eugenics agenda and I know this is diverging from the you know Tesla and humanity's missing paradigm shift a little bit but you know this is part of the reason that you know that paradigm shift hasn't happened because we're being completely mind controlled and brainwashed by institutions and think tanks and occult organizations that have really gained a foothold and a contraction in our society that are putting us down the wrong path you know and then this is the adjunct or addendum to that book which I showed people last week called satanic where a few weeks ago called satanic rites and ceremonies and this goes into some of the rituals that this particular organization does get involved with and you know you see here there's some there's some oh he had an association with lavey as well shown here where where Levay is um and there you have Peter Gilmore you know so it's show it's showing people that like you know people in other satanic organizations really kind of a you know what he called sanctioned sanctioned Solomon's work as part of the Whitehall Church of Satan so where they may have disagreed in certain aspects you know he had their blessing in others and again as I've said lavell Ave was just a lackey you know that's all he was he was involved with the bushes and people and intelligence you know his son outed those aspects of it and you know talked about how you know he was just an order follower as well people who think all he was great his own person I mean he had connections to the lansky Meyerson crime organized crime syndicate which then had obvious connections to you know Israeli intelligence and US intelligence you know he became personal friends with members of the Bush family and this guy was just the lackey for government agents you know and they charged him to put the work that he put out which was a coalescence and concrescence of the satanic ideology for the every man and every woman that's all it was all ultimately about to bring people in from the outside because they know they don't have the numbers unless they actually bring some useful dupes in with characteristics and skill sets that they can use as tools so let's go to another caller we have limited time less than 10 minutes left on the broadcast so let's hear from Apollo G apology you are live on what on earth is happening episode 220 welcome to the show very well go right ahead awesome hey it's great to finally talk to you let's say a happy belated birthday by the way thank you early this last week on Monday yeah happy Leo season too I'm a Leo moose so I've been feeling that great kind of energy I'm creative creativity and things I have so many things to talk to you about but I don't know let me see um your shirt is cool to it but synchronistic that it's a episode 220 his George Washington's birthday was on February

22nd yeah that's my birthday in February so that's why I know that but or not yeah my sister's birthday oh really yeah I know somebody else who has it too but um Jesus okay so I don't know where to start um so you talked about in the a couple episodes ago with the Satanic society stuff um just New York State in general especially I live in upstate New York and you're right about the people here they're taken yeah the East Coast up into you know most parts of New England but especially the state of New York is owned owned not even as bad here in Philadelphia as it is in New York said it's really bad ah I'm from Pennsylvania originally and when I moved here you could just tell what kind of the difference in people yep Pittsburgh is slightly better than Philly and the middle of Pennsylvania is much better because it's a yellow grandma spurts environment um right they have most of the eastern seaboard and the western coast man they call it the left coast for a reason it's really right out there polarize it's right but um speaking of which was I gonna go on - oh there's in an anarchist thing I was gonna talk that's just um I feel like that's just left rain right brain um the mental schism do you always talk about you know it's the the ones that are willing slaves they'll but they're they're good enough to or at least open-minded enough to accept it to not harm animals yet they won't have the masculine components to stand up to you see how the other side have all of those dynamics InterPro so it's worked with it's such a simple concept but like yeah it's such a simple concept but like your friend owned get a cured we're not holistic as beings as as individuals you know and that's that that'll cause problems societally because the society is just gonna be a reflection of the individuals that comprise it right polarized as you say like the po'lice I was I made a connection I don't know if you mentioned the the fact that like the north and south pole are polite you know and in the middle is where you know things grow yes and off I see er I like officer to say officer just because it's male energy you know it's like an officer it's in green language how that language worked out like that yeah and I know you like science fiction so another green language thing I realized was science fiction itself is the two the two sides you have the masculine science logic from the Greek room sigh and then Phi if from the so the feminine side creation like the Fibonacci spiral is always creating it shows you when it's what's possible with those two things together like things that we haven't ever imagined about a doubt I mean that's that's a great point you know and and that's why science fiction can work to enhance the human imagination and wake people up to possible and get them thinking hey we could be doing so much better we could be advancing our society and so many interesting and creative ways you know that's why I've always liked it as a genre right it's like a painting you are you're taking that chaos of just all the possibility and then putting it into a very ordered thing even though the painting might look chaotic over what you're trying to paint but it's still what it is specifically it's that dynamic of both life imitating art and art imitating life I mean it goes in both directions absolutely let's see I mean I could go on and on yeah but I thought that was really fascinating that with the two Greek ruins and how psychology and philosophy are also based on those two things and there's almost a dichotomy and people that study those things where like people will want to gravitate more towards the psychology side of things and some people more the philosophy side so but only when we coloring it to do we have a whole little understanding right that's what I have to do any people just trapped in one and like the other ones just nonsense there we just we got to fight the other one yeah you have to bring that awareness up into the full conscious mind of people this is the whole point of it all folks it's it's it's learning that that's where our imbalances are and then learning how to integrate holistically all of those aspects of the mind and the individual okay so we're running out of time we have like maybe so we're going to end one minute after so we have like two minutes left I'll try to squeeze one more caller in let's go - lets go - Ivan from Phoenix I'll let Ivan take the show out today Ivan you are live on what on earth is happening welcome my friend hey mr. broken record what's up man hey I'll let you take the show out today go right ahead slavery people reactivate your free your mind meetup groups I looked online - the only one up and going I recently had a meet-up week ago so we got to jump back into that all the free your mind or get beat ups went by the way so don't give up going I see too many people giving up too easily Ivan they know they have to understand the great work is the long haul you got you got to understand this is a slow steady effort and you got to be in it for the long haul you got to realize this is low you got to fight for the long game you know yes indeed yeah it's not easy it is not her assistance always you're like giving up yes I know you're in it for the long game because you you have good qualities of persistence you know that's that sacred masculine dynamic where you just keep fighting no matter what the odds are it's like you people like us I don't think know anything but to keep swinging you know what I mean it's like I may go down I may be taken out who knows what will happen but I'm going down swinging in some form or fashion you know what I mean I'm not going down quietly that's just not in my nature and like you said this show is your house this is your place that's what my conference was my place that's right my way contrary to all the opinions and suggestions that everybody had no I put up my money I did it my way now you guys go out there and do whatever and you know taking suggestions is great I let people give me suggestions all the time and then I run them through I decide hey is this what I want to do is it do I think it's a good idea sometimes I run with the ball and sometimes I think say thank you for the suggestions but I'm gonna do this my way instead so ladies and gentlemen that's all the time we have for this edition of what on earth is happening thank you for watching I hope you found the section on the second part of the Tesla and human missing paradigm shift very informative remember go up to the website and you go to the diff section to make a voluntary donation for physical items there check out the art drive offer to make a direct donation at what on earth is happening downtown / donate this is an episode number 220 remember the government is Slade Wilson right here next week thanks for watching [Music]

What On Earth Is Happening Show #221
